5 REPORTS

25.10.2 SUBMISSIONS ON THE 2025-34 LONG-TERM PLAN AND THE DRAFT LONG-TERM PLAN DOCUMENT

Doc ID: 2461344

Report Author:	Saskia Righarts, Group Manager - Governance and Business Services
Reviewed and authorised by:	Peter Kelly, Chief Executive Officer

1. Purpose of Report

To consider the submissions on the 2025-34 Long-term Plan and the content for the draft 2025-34 Long-term Plan.

Recommendations

That the Council

A. Receives the report and accepts the level of significance.

B. Notes the submissions received and thanks the submitters for their feedback.

C. Approves the receipt of the following late submission for consideration as part of the 2025-34 Long-term Plan:

   (a) Staff submission on the Fast-track Approvals Act 2024

D. Considers the submissions on consultation item one - Our Plan for Water and decides what action should be taken.

E. Considers the submissions on consultation item two – Volumetric Water Charges and decides what action should be taken.

F. Considers the submissions on consultation item three – Community Halls and Facilities and decides what action should be taken.

G. Considers the submissions on consultation item four – Ida MacDonald Roxburgh Pool Punawai Ora and decides what action should be taken.

H. Considers the submissions on consultation item five – Alexandra Outdoor Pool and decides what action should be taken.

I. Considers the submissions on consultation item six – Manuherekia Valley Community Hub and decides what action should be taken.

J. Considers the submissions on consultation item seven – Supercars Championship and decides what action should be taken.

K. Considers the submissions on consultation item eight – Artificial Turf at Maniototo Area School and decides what action should be taken.

L. Considers the submissions on consultation item nine – Artificial Turf at Dunstan High School and decides what action should be taken.

M. Notes the submissions received on the policies consulted on and decides what action should be taken

(a) Significance and Engagement Policy

(b) Development and Financial Contributions Policy

(c) Revenue and Financing Policy

(d) Fees and charges

N. Considers other ideas and feedback in the submissions and decides what action should be taken.

O. Considers the late staff submission and decides what action should be taken.

P. Decides whether to keep or retain the remissions contained in the Rates Remissions Policy and the Postponement of Rates Policy contained in the draft 2025-34 Long-term Plan.

Q. Decides where income received from mining agreements is recognised in the budgets.

R. Notes and provides any further feedback on the remaining content of the draft 2025-34 Long-term Plan ahead of the final audit commencing.

S. Agrees to the Mayor and Chief Executive approving any editorial changes and changes required as a result of these deliberations to the draft 2025-34 Long-term plan, ahead of the final audit commencing.

2. Background

Following a series of workshops and papers in 2024, councillors decided on the key items for consultation at their December 2024 meeting. Over December and January, the consultation document was developed, and at the January 2025 Council meeting councillors approved the draft consultation document and supporting documents for audit. Following the audit, the consultation document and supporting documents were approved by councillors for consultation. The consultation period ran from 1 April to 1 May 2025.

79 submitters have indicated they wish to speak to Council, and a separate report has been published for the hearing of these submitters on 15 May 2025.

The results of the consultation are detailed below.

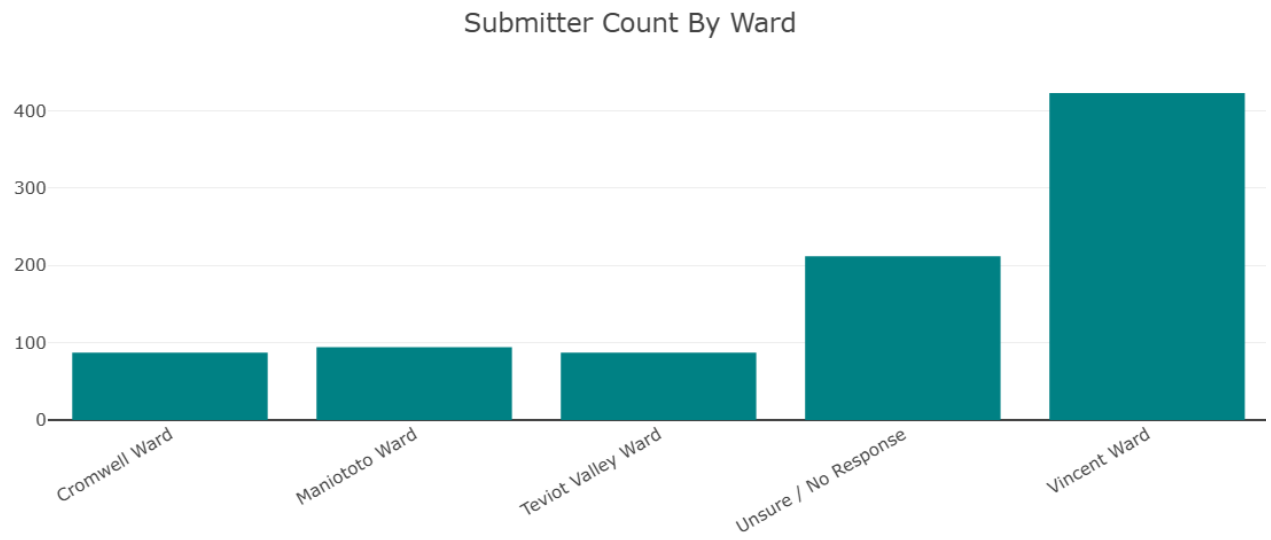
3. Discussion

Consultation process

Council ran an extensive pre-consultation engagement process, which included attendance at community meetings and A & P shows (refer to the consultation report attached as appendix 3 for further information).

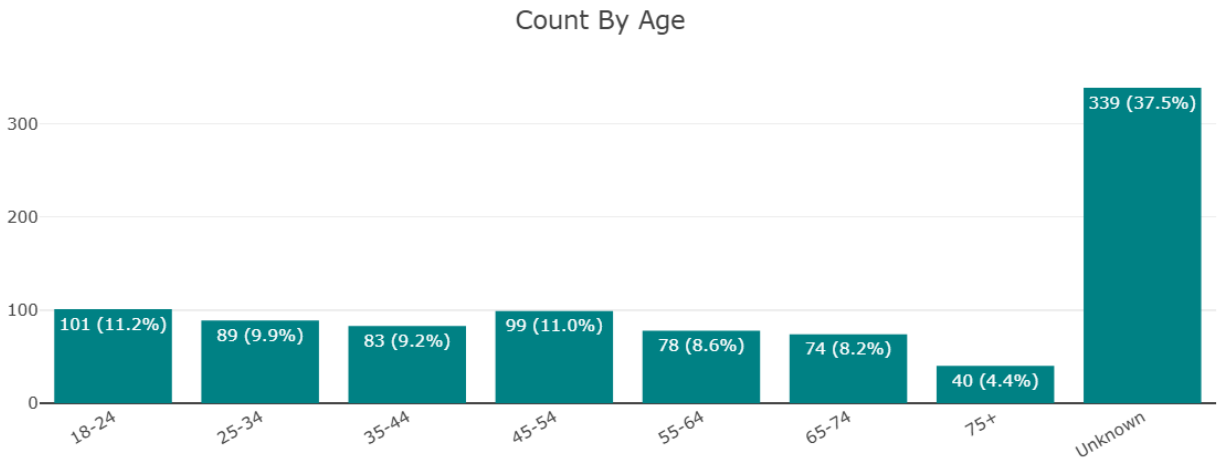
During the consultation period a series of community meetings and drop-ins were held, as well as an online question and answer session. Details of these sessions are below, as well as the number of attendees.

Community Information Sessions	Date/Time	Number of attendees
Alexandra	2 April 5.30pm – 7.30pm	34
Millers Flat	3 April 5.30pm – 7.30pm	29



Cromwell	7 April 5.30pm – 7.30pm	25
Roxburgh	8 April 5.30pm – 7.30pm	14
Ranfurly	9 April 5.30pm – 7.30pm	9
Omakau	17 April 5.30pm – 7.30pm	16
Q & A Drop-ins	Date/Time	Number of attendees
Alexandra	10 April 11am – 1pm	10
Cromwell	14 April 11am – 1pm	6
Roxburgh	15 April 11am – 1pm	1
Ranfurly	16 April 11am – 1pm	5
Clyde	28 April 9.30am – 11am	8
Online Information Session	Date/Time	Number of attendees
Online	22 April 8pm – 9pm	20

Submission results



Overall 903 submissions, and one staff submission were received. For this Long-erm Plan a youth survey was run, which asked similar questions about the consultation topics. A total of 313 youth submissions were received. See appendix 7 for the full submissions received. As appropriate, staff have responded to some of the comments throughout the submissions and this can be found in appendix 5.

The quantitative data in the graphs below excludes the youth results, instead for the youth survey a summary for each topic is provided.

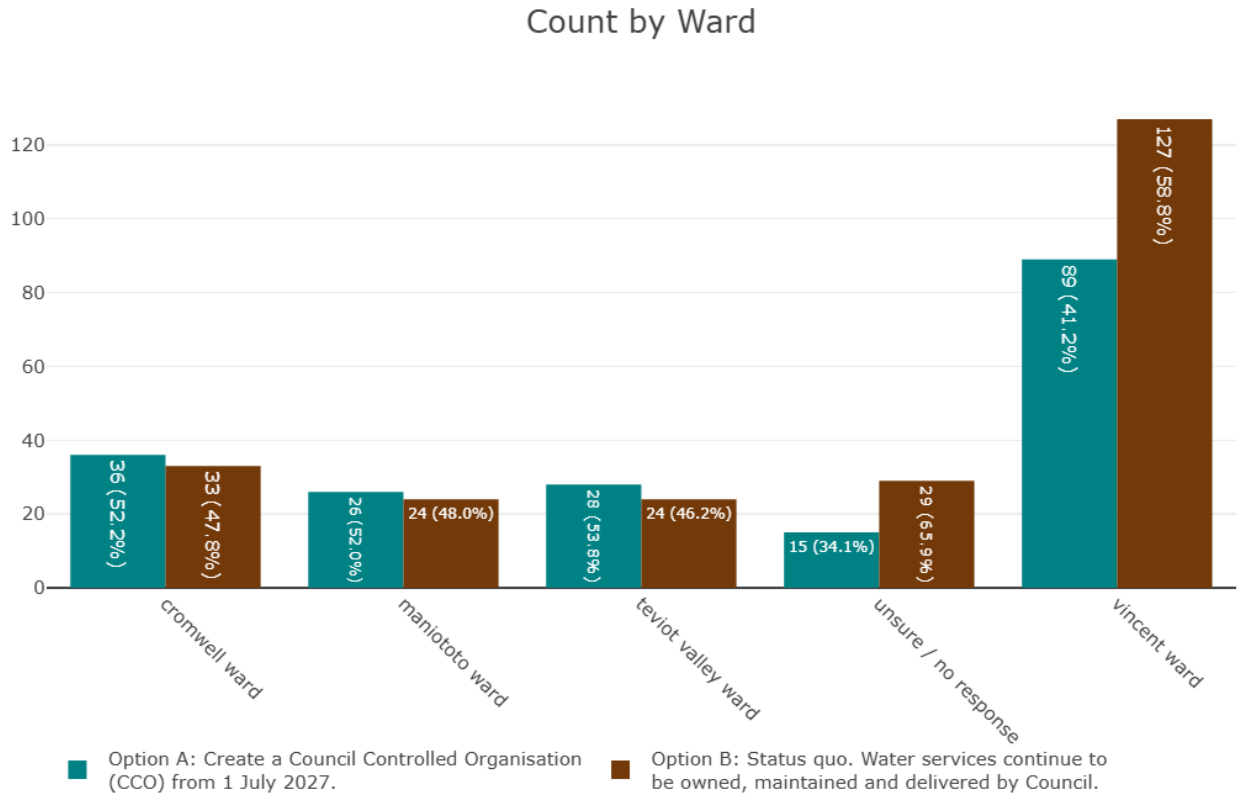
The majority of all submitters were based in the Vincent Ward (46.8%).

Of note compared to the 2021-31 Long-term Plan, there was a more even spread of responses over age categories (in the previous Long-term Plan there was a stronger representation among the older age categories). For the youth survey, the majority of respondents were high school aged, between 13 to 17 years.

The information below is a high-level summary of the data. For detailed information about each consultation item, including more data on the youth submissions, demographic data and themed analysis on the comments received please refer to the attached consultation report (appendix 3).

Consultation Topic 1 – What's our plan for water?

The question asked about the future of water services, presenting two options:



- Option A: Establishing a Council Controlled Organisation (CCO) by 1 July 2027,
- Option B: Maintaining the current status where the council owns, maintains, and delivers water services.

There were 431 total responses:

194 voted for 'Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027. '
237 voted for 'Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.'

134 people made a comment.

Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

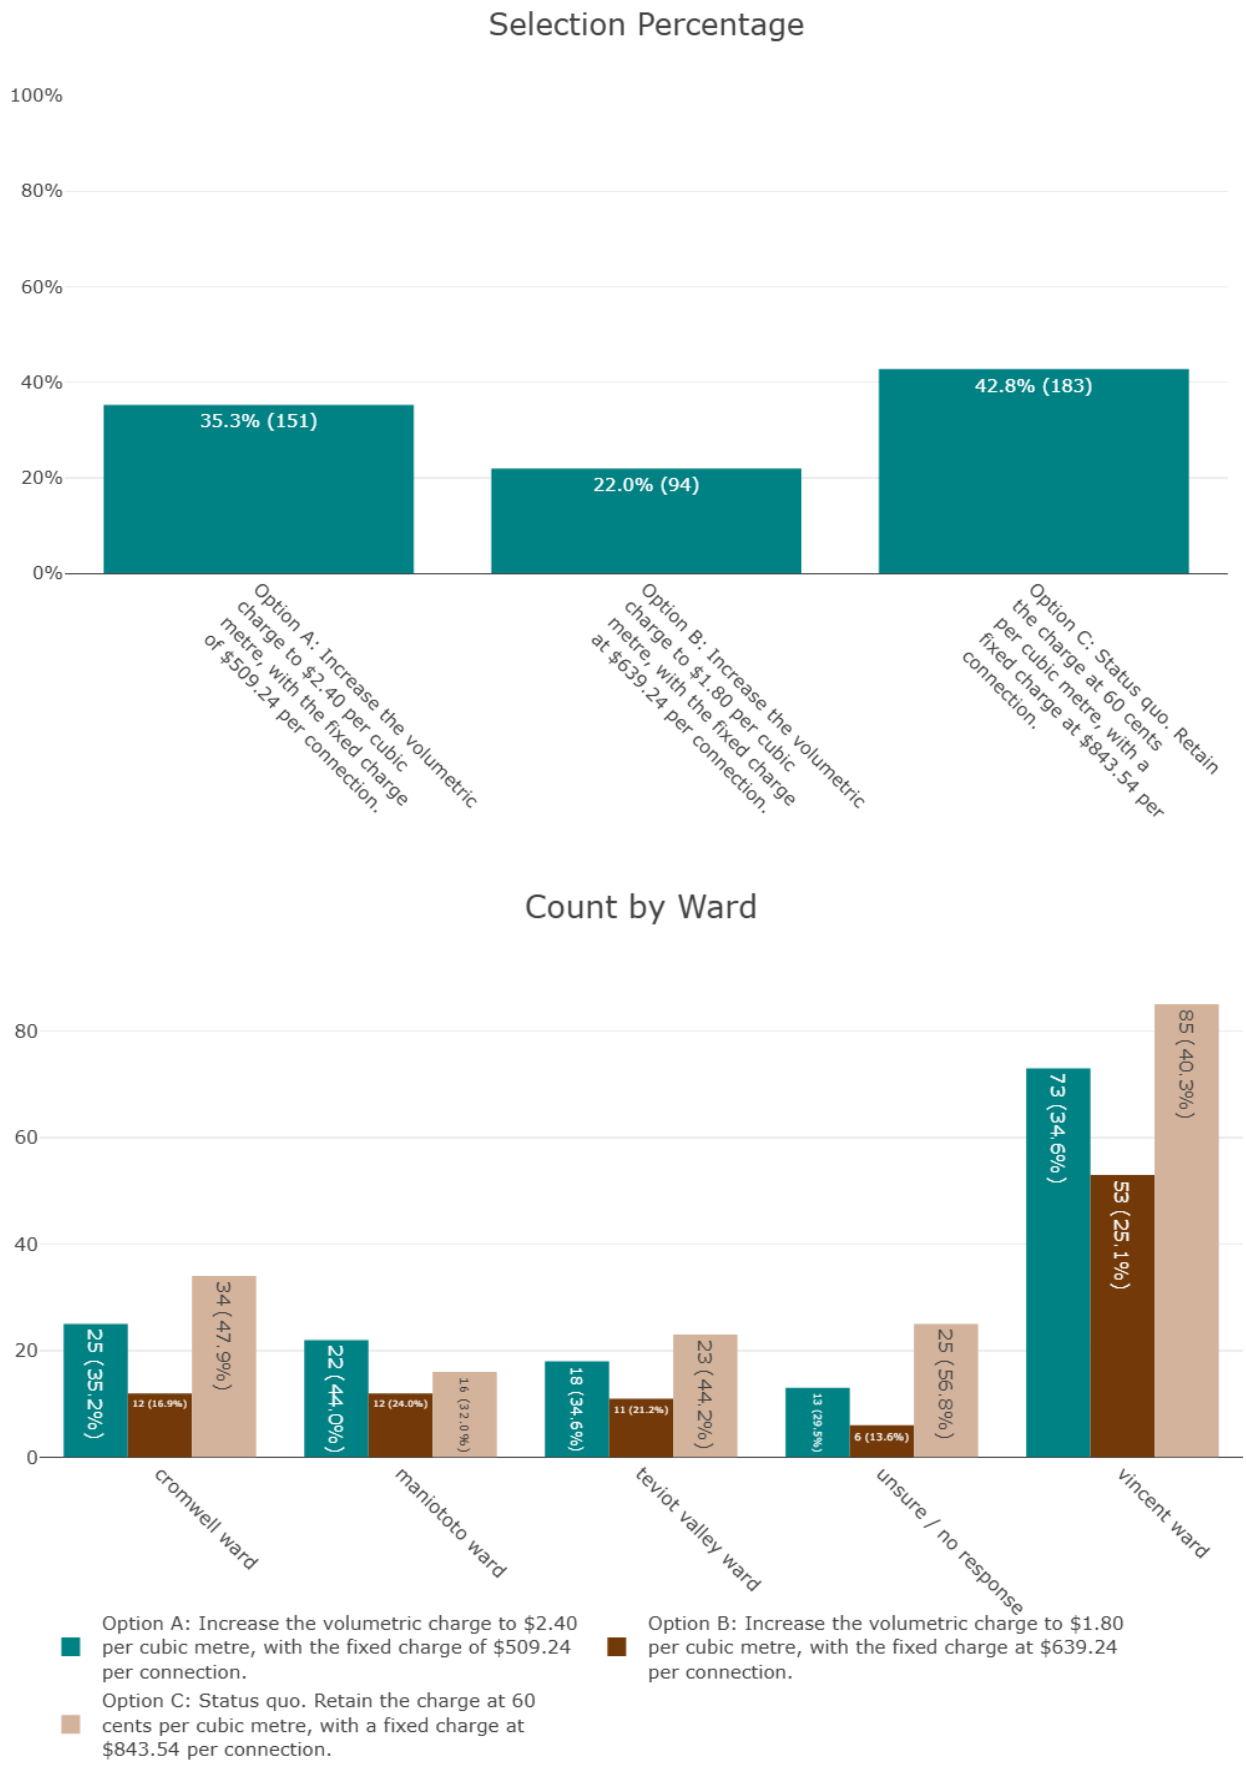
Respondents were split on the water plan, with 55% favouring the status quo (Option B) and 45% preferring a Council Controlled Organisation (CCO) from 1 July 2027 (Option A). Concerns about potential cost increases, bureaucracy, and influence from other councils, particularly QLDC, were prominent themes. Many respondents also highlighted the need for more information to make an informed decision, and some expressed concerns about the potential for privatisation or reduced local control.

Note this topic is currently the focus of a separate consultation which is before the community. This consultation document has more information about Council's plan for water, including the proposal to from a CCO with three other councils. This consultation closes on 6 June 2025, with a decision by Council expected at a meeting on 10 July 2025.

Youth Survey - This question was not asked as part of the youth survey.

Consultation Topic 2 - Volumetric Charges

The question asked about volumetric water charges, presenting three options:



- Option A: Increasing the volumetric charge to $2.40 with a $509.24 fixed charge,
- Option B: Increasing the volumetric charge to $1.80 with a $639.24 fixed charge,
- Option C: Or maintaining the status quo of 60 cents per cubic metre with an $843.54 fixed charge per connection.

There were 428 total responses:

151 voted for 'Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection. '

94 voted for 'Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.'
183 voted for 'Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

141 people made a comment.

Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

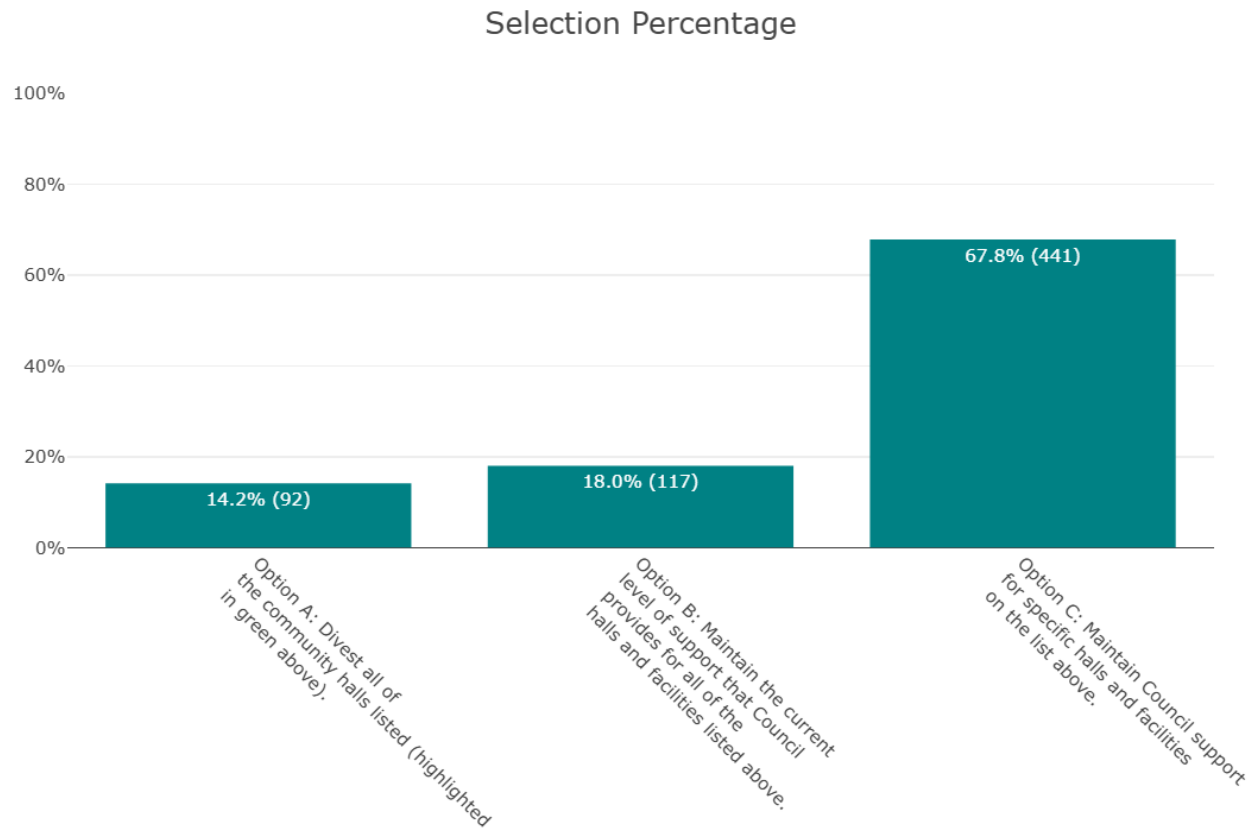
Option C, retaining the status quo, was the most selected (42.8%), while Option A had a substantial number of selections (35.3%). Feedback indicates concerns about affordability and the impact on gardens and community aesthetics if volumetric charges increase significantly.

Many respondents expressed that the proposed increases were disproportionate to service quality, while some supported user-pays principles and responsible water usage, particularly with Option A.

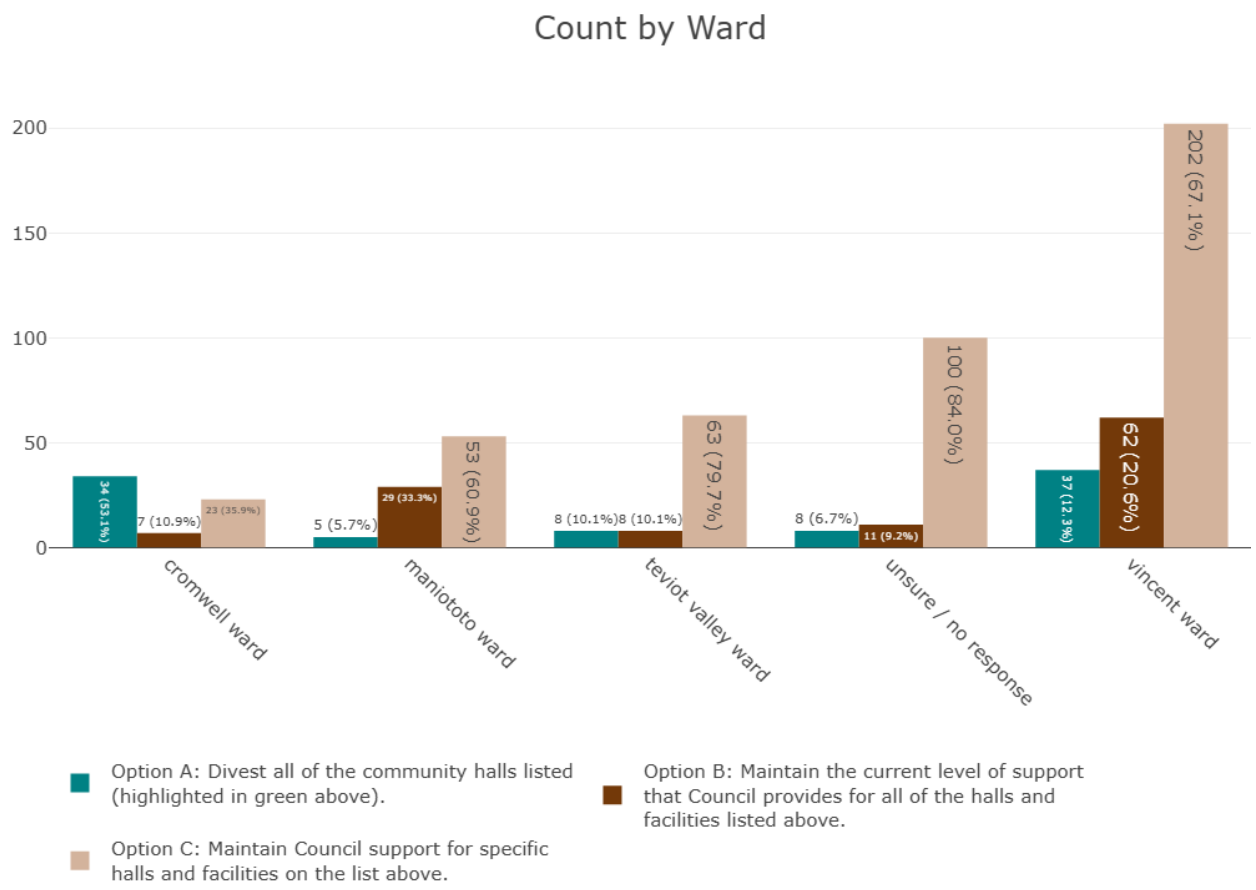
Youth Survey - This question was not asked as part of the youth survey.

Consultation Topic 3 - Community Halls and Facilities

Respondents were asked their preference regarding community halls and facilities:

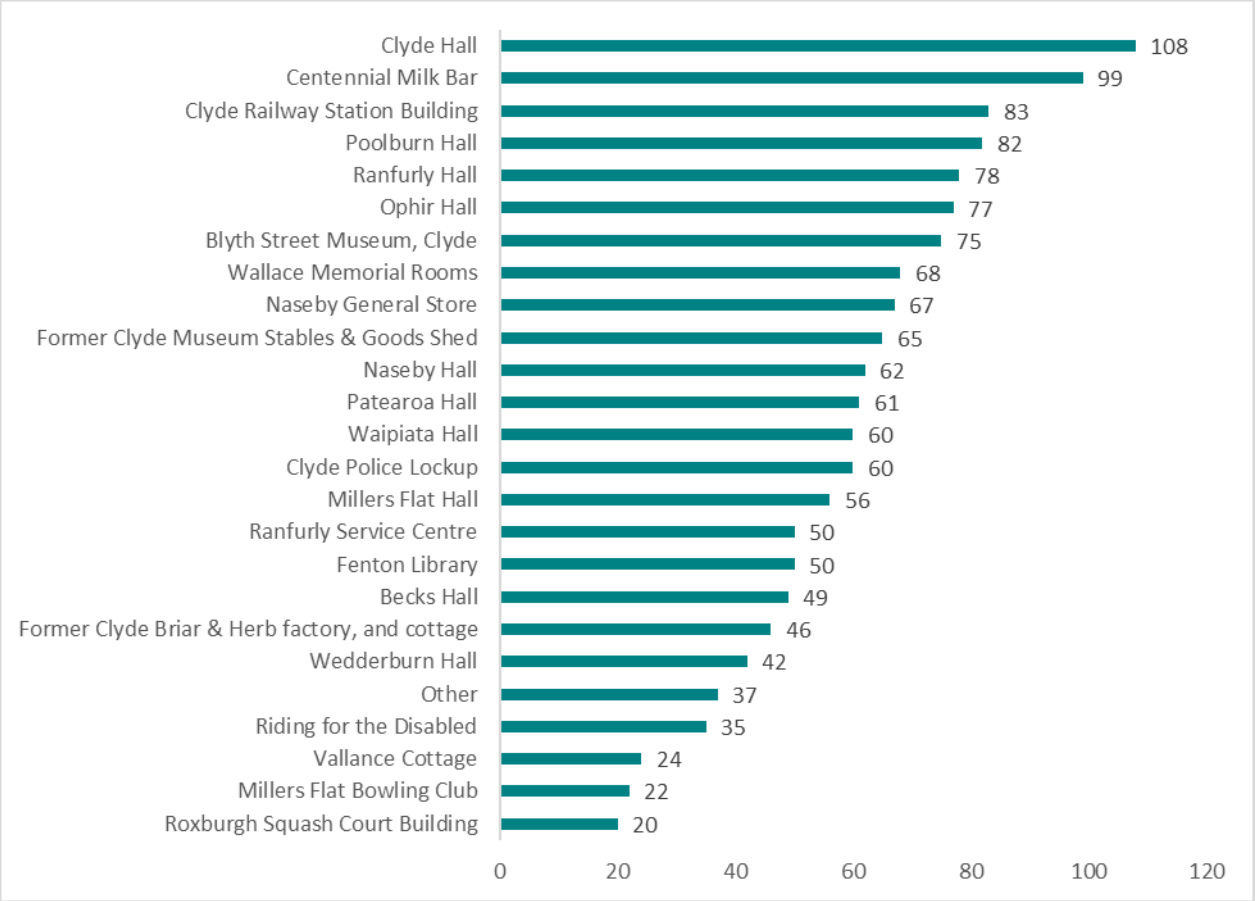


- Option A:Divest all of the community halls
- Option B: Maintain the current level of support that Council provides for all halls and facilities.
- Option C: Maintain Council support for specific halls and facilities.



There were 650 total responses:

92 voted for 'Option A: Divest all of the community halls listed ',



117 voted for 'Option B: Maintain the current level of support that Council provides for all of the halls and facilities listed above.',

441 voted for 'Option C: Maintain Council support for specific halls and facilities on the list above.'.

Response Distribution of halls and facilities that people commented on:

Vincent Ward halls and facilities

Ophir Hall: (64 comments) - The overall sentiment is in favour of retaining the Ophir Hall due to its central role in the community's social life, its historical significance, and the community's active involvement in its upkeep; however, a few respondents suggested that it may be more financially prudent to focus resources on the new facility in Omakau, or that the hall should be divested due to the small population of Ophir.

Poolburn Hall (65 comments) - The feedback indicates widespread agreement that Poolburn Hall is a crucial community hub with significant historical and social value, particularly for the school and community gatherings, although a few responses suggested divesting or exploring alternative facilities, the overwhelming sentiment supports retaining the hall due to its unique role and lack of comparable alternatives in the area.

Clyde Police Lock-up (57 comments) - Feedback is divided, with some advocating for its retention and integration into a museum or community space due to its historical significance, while others support divestment due to its perceived lack of use or financial burden, with the Clyde Museum offering to relocate the building to their site.

Clyde railway station (72 comments) - The sentiment is to retain the Clyde Railway Station Building due to its historical significance, its role in tourism, and the positive contribution of the current tenant, SheBikesHeBikes. A minority of respondents suggested divestment, primarily to reduce costs or allow private businesses to utilise the space, but with the caveat of maintaining its historical character.

Former Clyde Museum Stables and Goods Shed (60 comments) - Feedback is divided, with some advocating for retention due to its historical value and current use for museum storage, while others support divestment, citing a lack of use or the building being a disgrace and should be sold off to a business so the public and tourists can view and enjoy the history, or that it should be moved to the Blyth St Museum instead. The Clyde Museum has requested a long-term lease or right of first refusal if divestment proceeds, while others have expressed interest in leasing or purchasing the building for business purposes if council retains it, or purchase if council decides to divest, if it is deemed not earthquake prone.

Blyth Street Museum, Clyde (59 comments) - Feedback reveals support for retaining the museum due to its community value and historical significance, with many advocating for a long-term lease agreement and continued council support; however, a minority suggested divestment, proposing alternative uses for the building or consolidation of museum resources to reduce costs.

Clyde Hall (86 comments) - Feedback indicates support for retaining the Clyde Hall due to its heavy use, community importance, and recent upgrades, with a few respondents suggesting divestment due to cost or to allow for tourism-related business opportunities while preserving its historical aspects.

Becks Hall (34 comments) - The feedback indicates agreement that Becks Hall is a crucial community facility, particularly for its role as a gathering place and emergency hub in a rural area with limited alternatives; however, a few respondents suggested divesting the hall and exploring alternative facilities in nearby Omakau, or community management options.

Vallance Cottage (19 comments) - Feedback indicates a divergence of views, with some supporting eventual divestment to a capable organisation after restoration, while others strongly oppose divestment, especially in its current state, emphasising the Council's responsibility to preserve this historic building for the community and future generations. There is agreement that the cottage should be restored to its pre-collapse state before any further discussion on divestment occurs and then on a much wider scope.

Riding for the Disabled (22 comments) - Feedback is divided, with some emphasising its community value and positive impact on disabled children, while others advocate for divesting due to perceived lack of use, potential costs, and the building's condition. There is also a suggestion to offer the site to Ngai Tahu for incorporation into their development plans, addressing potential contamination issues.

Former Clyde Briar and Herb Factory, and Cottage (40 comments) - Feedback is mixed, with some respondents advocating for divestment, some suggesting alternative uses such as a museum or tourist attraction, and others raising concerns about land ownership needing clarification before any decision is made. There are also conflicting views on the building's value to the community and its historical significance, with some believing it should be retained and others seeing it as obsolete.

Maniototo Ward Halls and Facilities

Ranfurly Hall (47 comments) - Feedback indicates that the Ranfurly Hall is valued as a unique venue for arts and community events, especially by the Maniototo Theatre Group and local schools, with some advocating for its retention and upgrade, while others suggest divesting due to cost concerns and perceived underutilisation, with alternative venues proposed by a few respondents.

Naseby Hall (37 comments) - Feedback reveals a divide between those who see it as a crucial historical and community asset and those who view it as a financial burden requiring significant upgrades, with some suggesting community-led management as a potential solution to ensure its preservation and continued use.

Patearoa Hall (43 comments) - Feedback reveals a split between those who see it as a crucial community asset needing time to explore future options and those who believe divestment is the most practical solution due to the hall's condition and associated costs, although there is a general agreement that public toilet facilities need to be maintained regardless of the hall's fate.

Waipata Hall (48 comments) - Feedback is divided, with many respondents advocating for its retention due to its community value and emergency role, while others suggest divestment due to costs and underutilisation; a common suggestion was to allow the community to decide and/or manage the hall themselves, or to wait for new government guidelines regarding earthquake strengthening before making a final decision.

Wedderburn Hall (27 comments) - Feedback is divided, with some respondents emphasising its importance as a community hub and advocating for its retention or sale to the community, while others highlight the financial burden and advocate for divestment, suggesting potential sale to private interests or community organisations to manage the hall independently. There is widespread agreement that the hall needs earthquake upgrades, and that the council should consider this when making a decision.

Fenton Library (22 comments) - Feedback is largely in favour of retaining it due to its current function as a community hub and its historical significance, with Burn Radio and Positively Māniatoto playing a vital role; however, a small number of respondents suggested decommissioning or divesting the library, particularly if its usage is perceived as low. The respondents see the building as important for community connection and communication, especially in emergencies, while also aligning with the council's long-term community goals.

Naseby General Store (37 comments) - The respondents largely believe the Naseby General Store is essential to the community's well-being and should remain in council ownership, while a few suggested divesting the store, increasing the rent, or converting it into a museum, raising concerns about its financial viability and continued operation under private ownership.

Centennial Milk Bar (84 comments) - Feedback indicates agreement that the Centennial Milk Bar is a valuable asset to the community due to its historical significance, contribution to tourism, and provision of community services, although a small number of respondents suggested divesting the property, preferring it in private hands or repurposed as a service centre.

Ranfurly Service Centre (60 comments) - Feedback is divided, with some respondents advocating for its retention due to its role as the Council's presence and its architectural value, while others suggest divesting, relocating, or repurposing the building to improve efficiency or community use.

Wallace Memorial Rooms (59 comments) - Feedback indicates agreement that the Wallace Memorial Rooms are a valuable community asset due to their historical significance, income generation, suitability for small gatherings, structural integrity, and accessibility, although some respondents were unaware of the rooms or suggested disposal if not used frequently enough, and one respondent noted the building is not used for its original intended purpose.

Teviot Ward Halls and Facilities

Millers Flat Hall (42 comments) - The feedback indicates support for retaining the Millers Flat Hall due to its frequent use, community importance, and role as an emergency centre, with a few respondents suggesting divestment due to financial concerns or perceived low usage. The loss of the Roxburgh Entertainment Centre has further increased the importance of the Millers Flat Hall for the community.

Millers Flat Bowling Club (18 comments) - Feedback is divided, with some respondents advocating for divestment due to perceived lack of use, while others highlight its potential value for community activities and sports events, particularly within the context of the Millers Flat Sports & Recreation Hub project, suggesting a deferred decision on divestment pending further consideration of a lease option and funding outcomes for the hub project.

Roxburgh Squash Court Building (17 comments) - Feedback is divided, with some respondents advocating for its retention as a community resource, while others suggest divesting or selling it due to perceived lack of use and associated costs, although one respondent stated the operational expenditure was very low for the building.

Other comments received on the halls topic - Feedback indicates a tension between recognising the financial challenges of maintaining community halls and the importance of these facilities for community identity, social connection, and emergency preparedness, with specific facilities like Central Stories receiving strong support for their community contributions, and concerns raised about the impact of divestment on rural communities and the fairness of funding allocations to different facilities.

Youth Survey

There were 183 total responses:

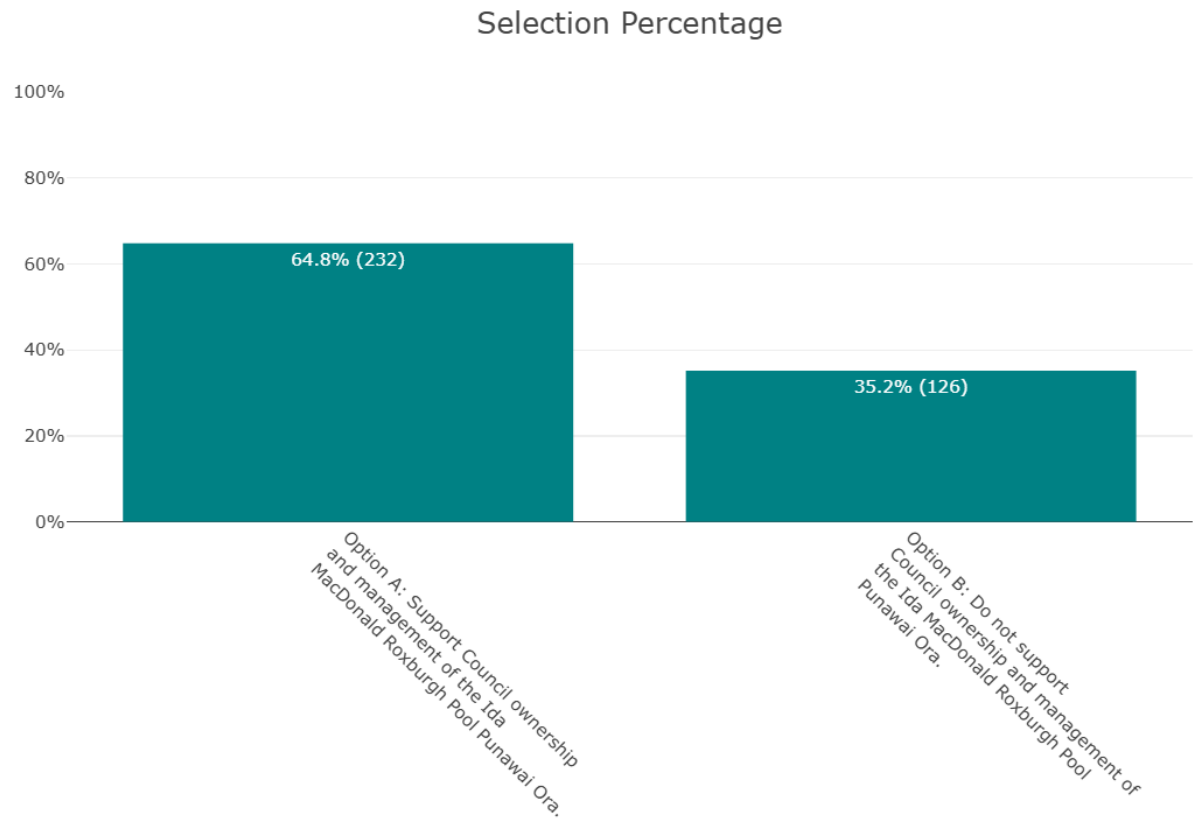
116 voted for 'Option A: Council should keep all of the current halls.',

67 voted for 'Option B: Council should reduce the number of halls.'.

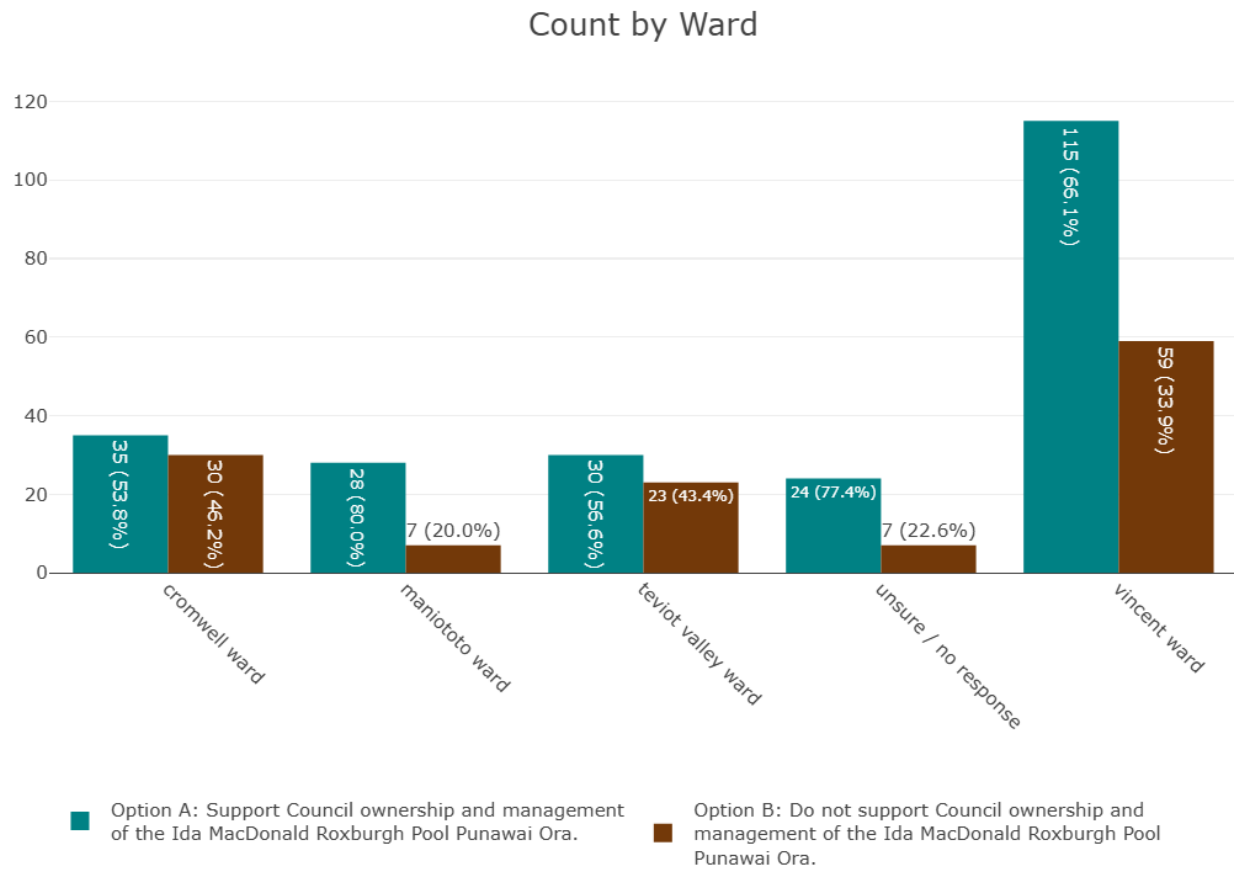
69 people made a comment.

Overall, a majority of respondents (63.4%) believe the council should keep all of the current halls, while 36.6% think the council should reduce the number of halls. The most prominent sentiment was the importance of these halls for community events, historical significance, and gatherings, particularly in smaller communities, with specific concern for the Poolburn Hall. Some respondents raised concerns about cleanliness and maintenance, while a few suggested removing underutilised halls or improving specific facilities, and a few mentioned the halls are cheap. The community halls and facilities are seen as vital spaces for community events, gatherings, and historical preservation, though concerns exist regarding maintenance and the potential closure of well-used halls.

Consultation Topic 4 – Ida MacDonald Roxburgh Pool Punawai Ora



The question asked whether respondents support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora, with options to either support or not support this proposal.



There were 358 total responses:

232 voted for 'Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora. ',

126 voted for 'Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.'.

100 people made a comment.

Option A, supporting Council ownership and management, was selected by 64.8% of respondents, while 35.2% chose Option B, opposing Council ownership.

Option A was favoured due to the perception that Council ownership would ensure sustainability and broader community access, while Option B reflected a desire for community control and concerns about potential rate increases.

Overall, the feedback indicates a community grappling with balancing the benefits of Council support against the desire for local autonomy and financial responsibility for the Ida MacDonald Roxburgh Pool Punawai Ora.

Youth Survey

There were 188 total responses:

122 voted for 'Option A: Council should own and run the Roxburgh Pool',

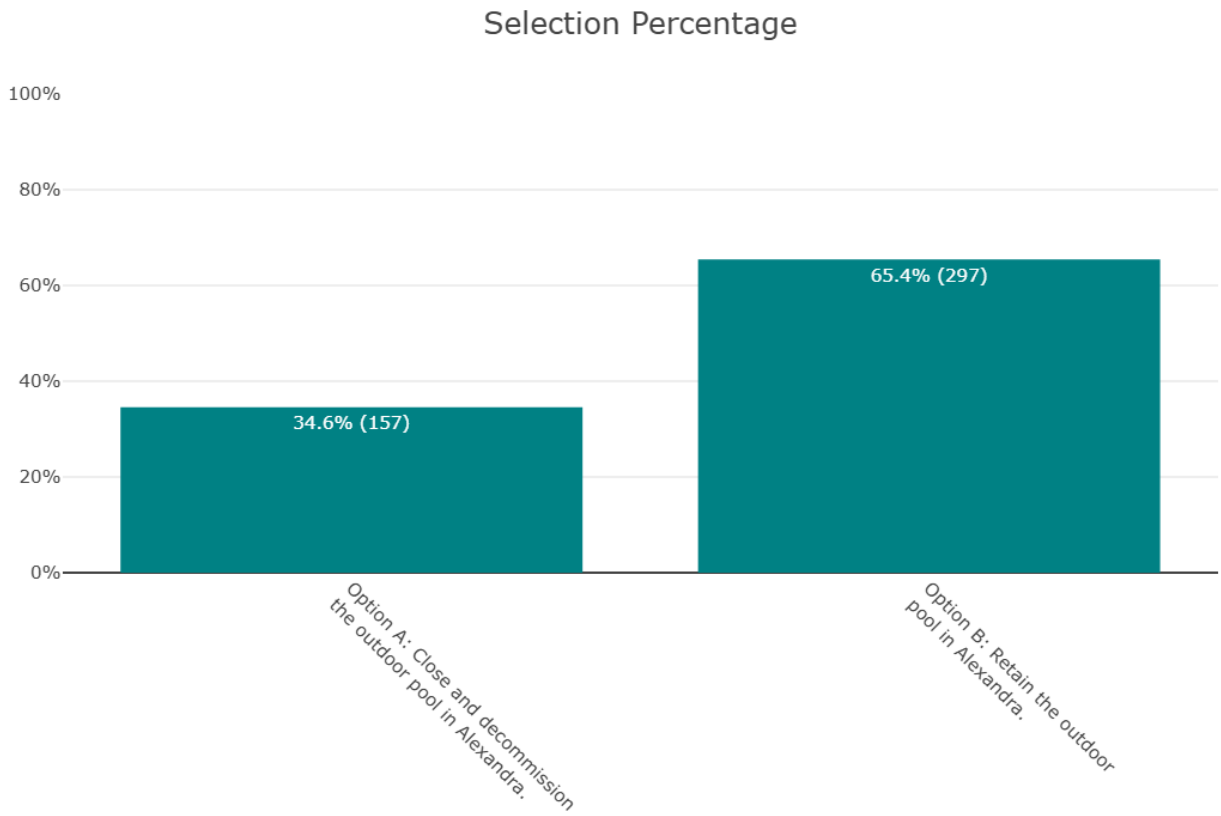
66 voted for 'Option B: Council should not own and run the Roxburgh Pool '.

56 people made a comment.

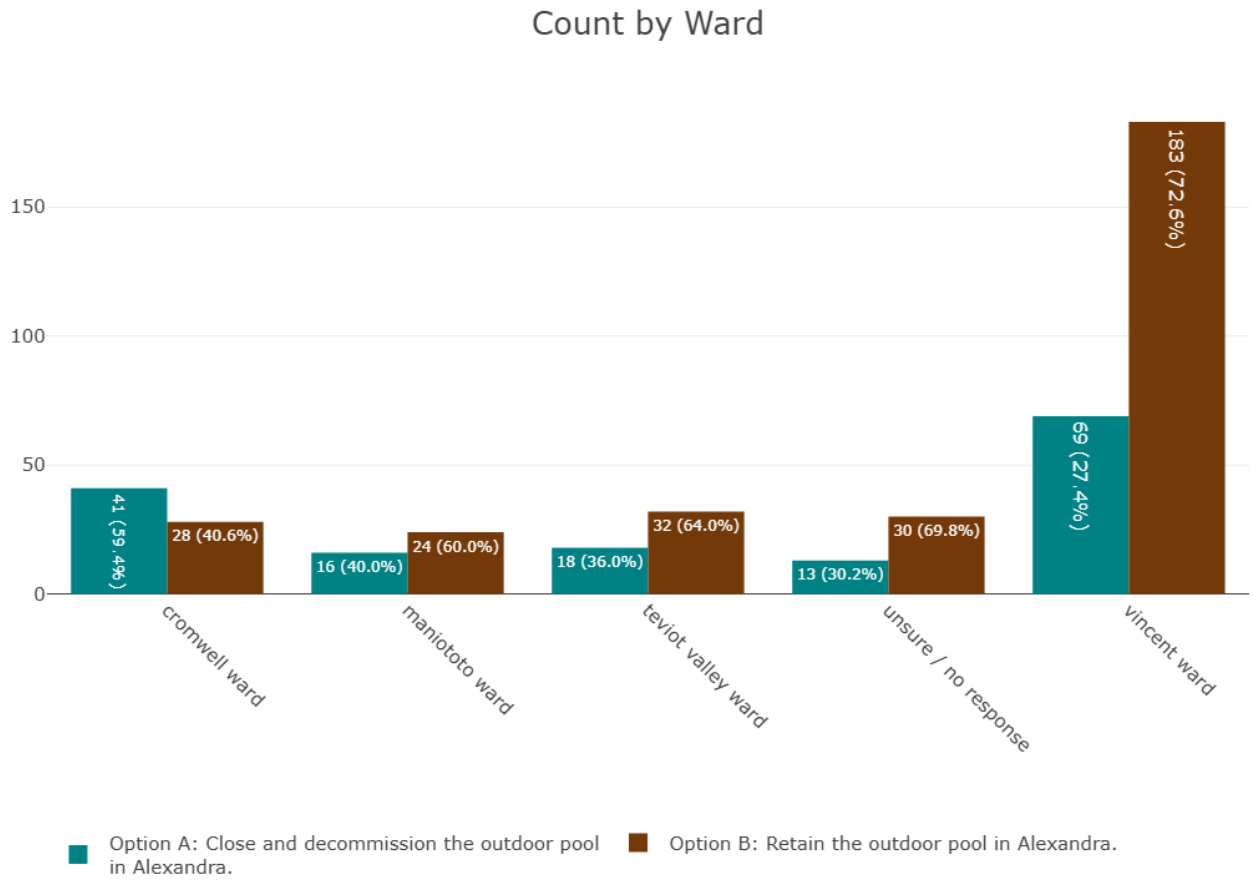
Option A, Council ownership of the Roxburgh Pool, was favoured by 64.9% of respondents. Key themes included the need for lifeguard supervision to allow independent swimming for children and teenagers, the pool's value for various age groups, and suggestions for improvements like slides and inflatables. Some respondents were unaware of the pool or felt it was too far away, while others suggested the council contribute to wages instead of owning

the pool. Overall, the feedback highlights the pool's importance for water safety and recreation, with a desire for improved accessibility and features

Consultation Topic 5 – Alexandra Outdoor Pool



The question asked whether to close and decommission the outdoor pool in Alexandra or to retain it.



There were 454 total responses:

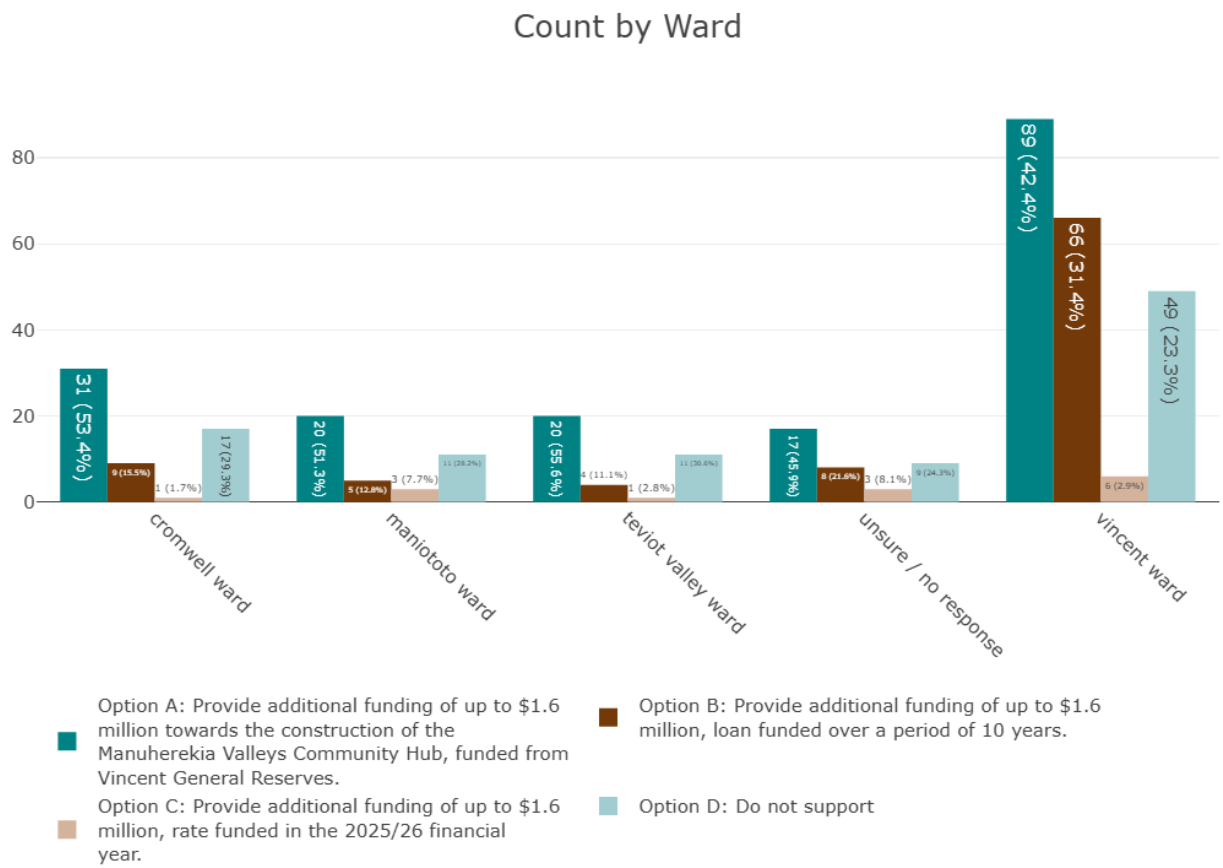
157 voted for 'Option A: Close and decommission the outdoor pool in Alexandra. ',

297 voted for 'Option B: Retain the outdoor pool in Alexandra.'.

202 people made a comment.

Option B, retaining the Alexandra outdoor pool, was favoured by 65.4% of respondents, while 34.6% supported decommissioning it. The pool is viewed as a valuable community asset, especially for safe summer swimming and events like ice swimming, though staffing issues and potential improvements were frequently mentioned. Concerns about the accuracy of reported operating costs were also raised by some respondents, with suggestions for alternative uses of the space if decommissioned also suggested by some respondents. Overall, most feedback supports retaining the pool, emphasising its community value and potential for increased use with better management and enhancements, while a minority felt it was underutilised and costly.

Youth Survey



There were 273 responses: 191 voted for 'Option A: Council should keep the outdoor pool open in Alex', 82 voted for 'Option B: Council should permanently close the outdoor pool in Alex'. 129 people made a comment.

The majority of respondents (70%) believe the Council should keep the Alexandra outdoor pool open, while 30% think it should be closed. Those in favour of keeping the pool open value it as a refreshing summer activity, a safe swimming environment, and a venue for school activities, while those who support closure cite underutilisation and high maintenance costs, with some suggesting alternative uses for the funds. Overall, the feedback indicates a strong community attachment to the pool, particularly for summer use, though concerns about cost and maintenance exist.

Consultation Topic 6 – Manuherekia Community Hub

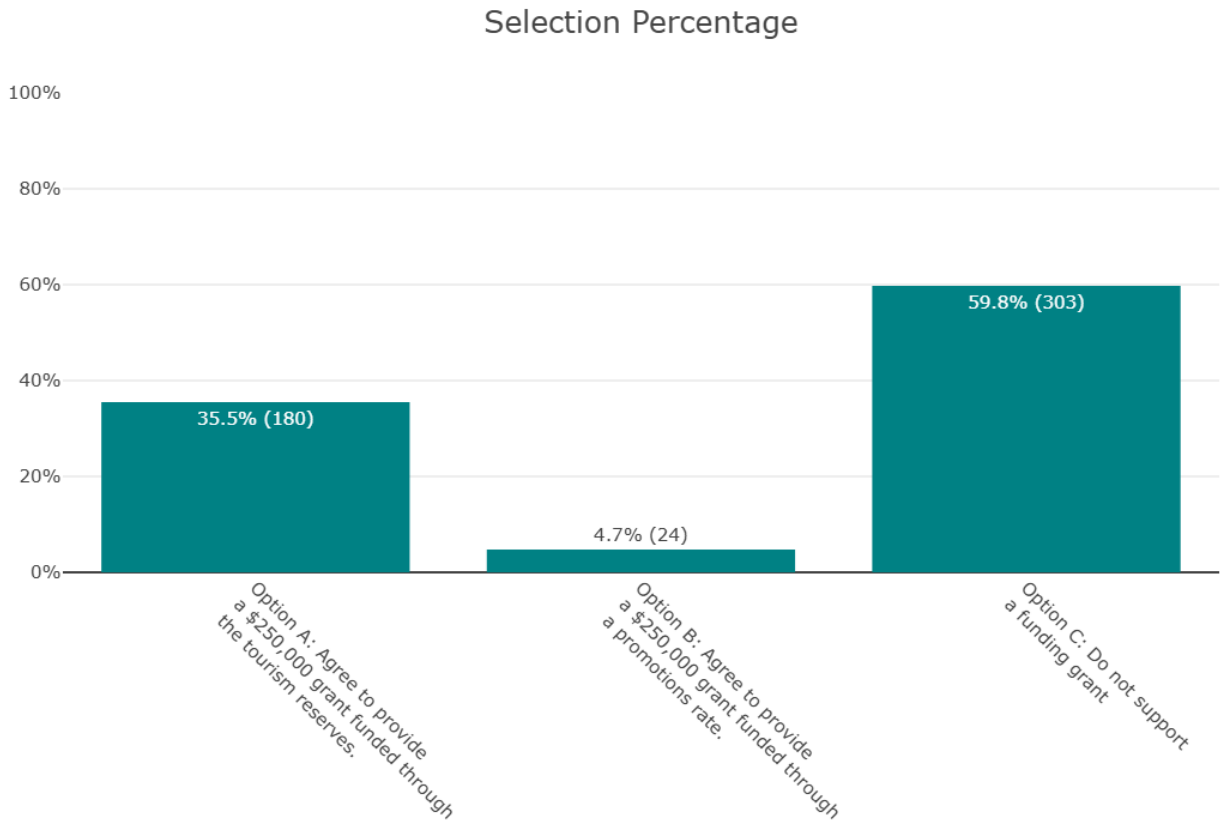
The question asked whether to provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub. The options include funding from Vincent General Reserves, a loan, rates, or not supporting the funding at all. 85 submitters made comment.

Option A, providing additional funding from Vincent general reserves, was the most selected (46.6%), while Option C, rate-funded in 2025/26, received very low support (3.7%). Feedback indicates that the Hub is considered essential for community connection and activities, particularly if smaller halls are decommissioned, but concerns exist regarding long-term costs, transparency, and potential impact on existing facilities. Overall, there is considerable support for the Manuherekia Valleys Community Hub as a valuable community asset, but opinions diverge on the funding approach and its broader implications for the region's facilities and ratepayers.

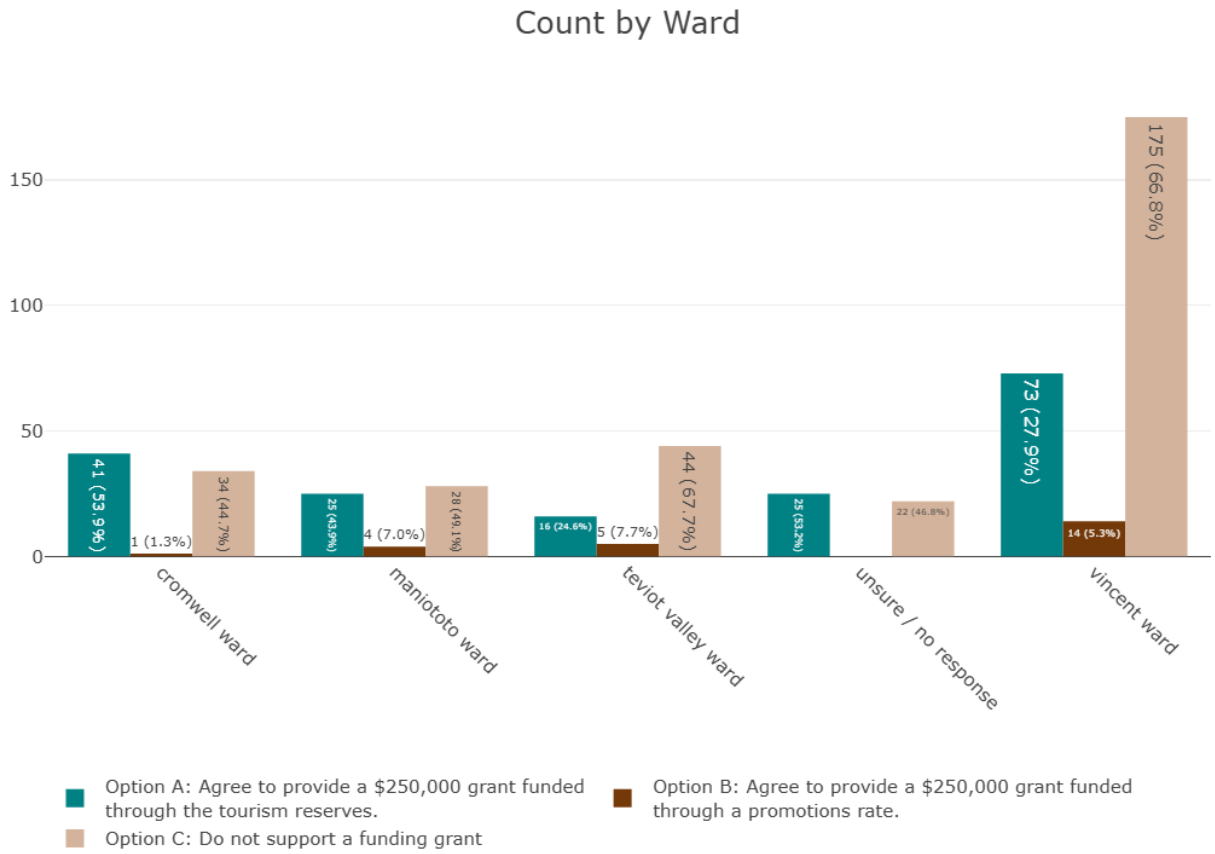
Youth Survey – this question as not asked in the youth survey.

Consultation Topic 7 – Supercars Championship

The question asked whether to provide a $250,000 grant for the Supercars Championship, with options to fund it through tourism reserves or a promotions rate, or to not support a funding grant.



There were 507 total responses:



180 voted for 'Option A: Agree to provide a $250,000 grant funded through the tourism reserves'.

24 voted for 'Option B: Agree to provide a $250,000 grant funded through a promotions rate'.

303 voted for 'Option C: Do not support a funding grant'.

192 people made a comment.

Option C, 'Do not support a funding grant,' was the most selected option, chosen by approximately 60% of respondents, while Option B, utilising a promotions rate for funding,

had very low support at only 4.7%. The primary sentiment was that Supercars should be commercially self-funded, with concerns raised about using public funds for a private venture and the environmental impact of supporting a fossil fuel-dependent event. Some respondents believed the grant would provide economic benefits and promote tourism, but others suggested the funds would be better allocated to essential community services and infrastructure, or that the benefits would primarily accrue to Queenstown, not the Central Otago District. Overall, there was significant opposition to providing a funding grant for the Supercars Championship, with a strong preference for commercially self-funding the event or allocating funds to community services and infrastructure projects instead.

Youth Survey

There were 222 responses:

186 voted for 'Option A: Council should provide money to support this event',

36 voted for 'Option B: Council should not support this event'.

80 people made a comment.

The majority of respondents (83.8%) supported the council providing money to support the Supercars Championship, citing economic benefits for local towns and the community, as well as the event's popularity. A smaller percentage (16.2%) opposed council support, arguing that funds should be prioritised for council facilities and community needs, with some raising concerns about the environmental impact.

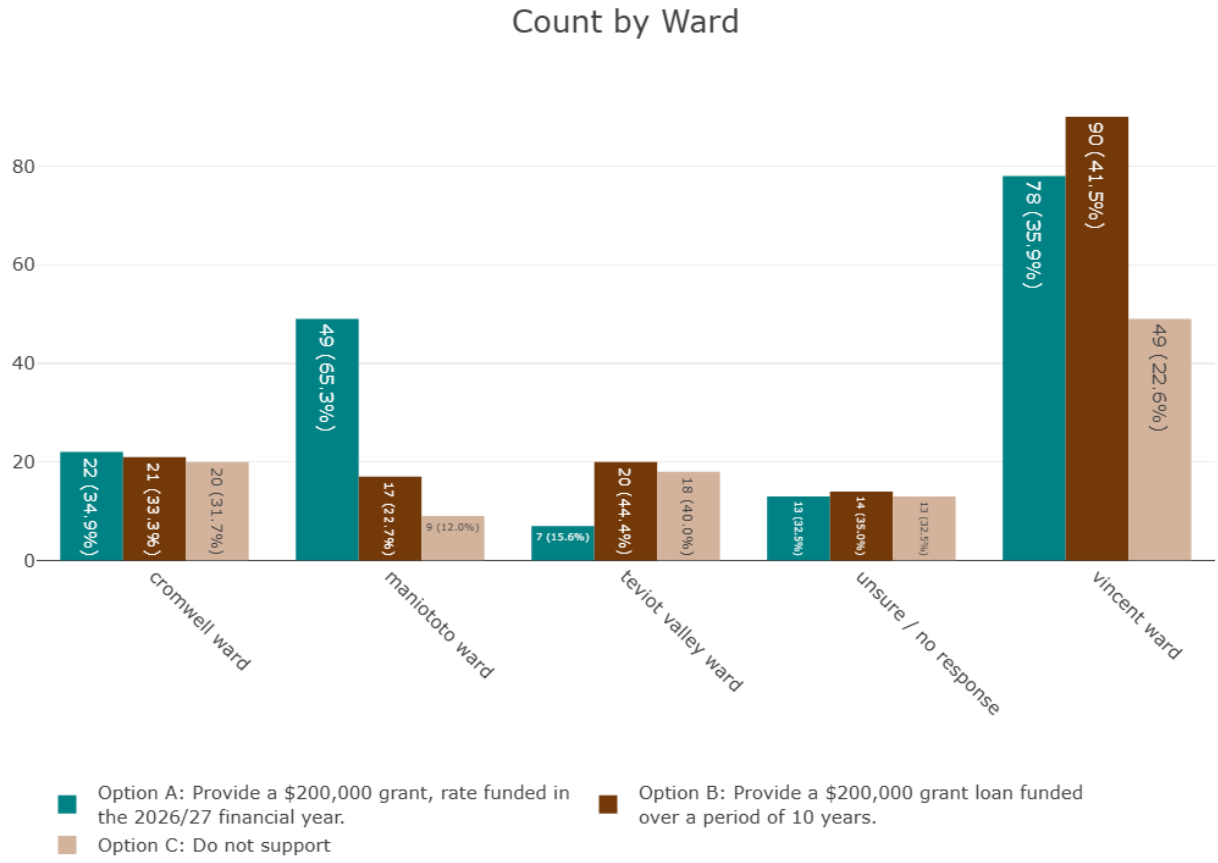
Overall, the feedback suggests that the Supercars Championship is a popular event with perceived economic benefits, although some believe council funding should be directed elsewhere and raised environmental concerns.

Consultation Topic 8 – Artificial Turf at Maniototo Area School

The question asked whether to provide funding for artificial turf at Maniototo Area School.

The options are a $200,000 grant rate funded in the 2026/27 financial year, a $200,000 grant loan funded over 10 years, or to not support the funding request.

There were 440 total responses:



169 voted for Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

162 voted for Option B: Provide a $200,000 grant loan funded over a period of 10 years.

109 voted for 'Option C: Do not support'.

127 people made a comment.

Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.
Option B: Provide a $200,000 grant loan funded over a period of 10 years.
Option C: Do not support

Option A ($200,000 grant) and Option B ($200,000 loan) were similarly favoured, with 38.4% and 36.8% of respondents selecting them, respectively, while Option C (Do not support) was selected by 24.8%. Support for the grant (Option A) centred on the upgrade's crucial role in addressing safety concerns and enhancing wellbeing in an isolated community, while those favouring the loan (Option B) appreciated spreading the cost over time, though some felt central government should be responsible. Those who did not support the upgrade (Option C) raised concerns about financial implications for ratepayers, questioned whether funding school facilities was a core council service, and cited environmental concerns related to artificial turf.

Overall, the feedback indicates significant support for upgrading the artificial turf at Maniototo Area School, driven by the need for improved facilities and community benefits, but also highlights concerns about funding responsibility and financial impact on ratepayers, with some suggesting alternative funding models and a need to balance community benefits against financial constraints.

Youth Survey

There were 197 responses:

111 voted for 'Option A: Council should spend money to upgrade the artificial turf',

86 voted for 'Option B: Council should not support this project'.

53 people made a comment.

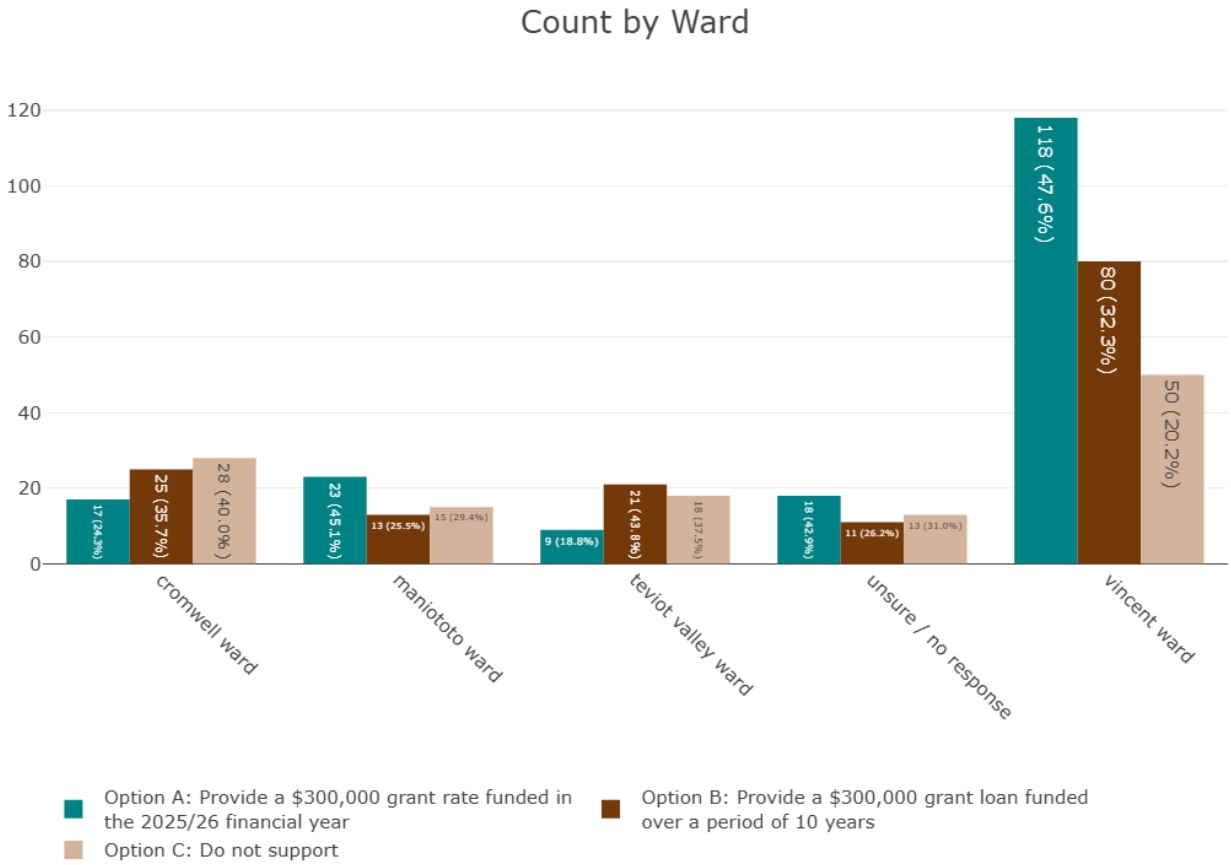
A majority of respondents (56.3%) supported upgrading the artificial turf at Maniototo Area School, while 43.7% were not in support. Those in favour cited frequent use by students and the community, the poor condition of the current turf, and the potential benefits for school sports teams and hosting events. Those not in favour expressed concerns about disproportionate benefit to one school, a lack of connection to the area, and a preference for prioritising projects in Alexandra, or other needs.

Consultation Topic 9 – Artificial Turf at Dunstan High School

The question asked whether to support artificial turf at Dunstan High School.

The options are to provide a $300,000 grant, a $300,000 loan over 10 years, or not to support the project.

There were 459 total responses:



185 voted for 'Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year',

150 voted for 'Option B: Provide a $300,000 grant loan funded over a period of 10 years',

124 voted for 'Option C: Do not support'.

Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year
Option B: Provide a $300,000 grant loan funded over a period of 10 years
Option C: Do not support

Option A, providing a $300,000 grant, was the most selected (40.3%), while Option C, not supporting the project, received 27% of the selections.

Feedback indicates strong support for a multi-purpose turf, particularly for hockey, but also concerns about funding responsibility, community access, and environmental impact. The respondents expressed a desire for the project, balanced with concerns about financial responsibility and community benefit, highlighting the need for a well-governed, accessible facility.

Youth Survey

There were 273 responses:

246 voted for 'Option A: Council should support the construction of an artificial turf ',

27 voted for 'Option B: Council should not support this project'.

122 people made a comment.

The vast majority of respondents (90.1%) support the construction of an artificial turf at Dunstan High School (Option A), citing benefits for the school, community, and sports teams, including reduced travel and increased opportunities; a small minority (9.9%) oppose the project (Option B), primarily due to cost concerns and perceived lack of need.

Overall, the feedback indicates strong support for the artificial turf, driven by the potential for increased sports participation and community benefits, though some concerns about cost and specific facility preferences were raised.

Key Themes in General Feedback Section

- Council operations and finances: Concerns about council spending, transparency, staffing levels, rates increases, and financial management.
- Community facilities and services: Feedback on the importance of maintaining and supporting various community facilities such as halls, libraries, pools, museums, and recreational areas.
- Infrastructure and development: Issues related to water and sewage infrastructure, roads, footpaths, cycle tracks, and the impact of population growth on infrastructure.
- Community engagement and representation: Concerns about the council's communication, consultation processes, and representation of smaller communities.
- Strategic planning and vision: Feedback on the council's long-term planning, sustainability efforts, and focus on essential services versus 'nice to haves'.
- Specific local issues: Concerns and suggestions related to specific locations or events within the district, such as the Cromwell Cemetery, Blossom Festival, and Omakau water system.

Overall Summary of Other Issues

The respondents raised a wide range of issues in the section for general feedback, with key themes including concerns about council operations and finances, the importance of community facilities, infrastructure needs, community engagement, and strategic planning. There is a strong emphasis on the need for fiscal responsibility, transparency, and a focus on

essential services, alongside the desire to maintain and improve community assets and infrastructure.

Summary of comments on Development and Financial Contributions Policy, Significance and Engagement Policy, Revenue and Financing Policy, and Fees and Charges.

- Financial burden on ratepayers: Concerns about increasing rates, fees, and charges, particularly for those on fixed incomes.
- Development contributions and fees: Feedback on development contributions, their impact on development, and potential disparities across different areas.
- Council transparency and engagement: Suggestions for improved transparency, community engagement, and consultation processes.
- Council spending and efficiency: Comments related to council spending, staffing levels, and the need for cost-cutting measures.
- Community facilities and services: Feedback on specific community facilities and services, including funding for Central Stories, the Alexandra Airport, and waste management services.
- Waste management and charges: Concerns and suggestions related to waste disposal charges, recycling services, and green waste disposal.
- Development and infrastructure planning: Feedback on aligning development contributions with infrastructure projects and addressing infrastructure needs for new developments.

Overall Summary of Long-term Plan Policies and Fees and Charge

The respondents raised concerns about the financial impact of rates and fees, particularly on vulnerable residents, and called for greater transparency and efficiency in council operations. Several comments focused on development contributions, infrastructure planning, and the need for equitable development rates across the district. Support was also shown for community facilities, particularly Central Stories, with suggestions for improved waste management and transparency in council decision-making.

Late Staff submission – Fast-track Approvals Act 2024

In 2024 Government passed the Fast-track Approvals Act, which purpose is to facilitate the delivery of infrastructure and development projects with significant regional or national benefits. The process is truncated compared to the processes used under the standard resource management provisions and enables councils to cost recover reasonable costs. It is prudent to reflect this in council's fees and charges (refer to the staff submission at appendix 4).

Draft 2025-34 Long-term Plan

Attached as appendices 1 and 2 is the draft content for the 2025-34 Long-term Plan. Councillors have seen the majority of this information in previous Council agendas. The new material is primarily at the front of the document including the Mayor and Chief Executive foreword, as well as the summary of each activity, which includes the community outcomes it contributes to, what is planned for the activity and if there are any significant negative

effectives. The attachment also incorporates the design work discussed at a workshop last year.

Councillors have previously discussed ideas for amendments to the rating policies in particular the remissions (xx nd xx). No resolutions were passed at the time, and clarity is sought on what, if any, changes councillors would like to see.

Some sections are yet to be drafted (such as the pages detailing the decisions on the key items in the consultation document, and other holding material that needs revised following the Council deliberations). Following decisions at this meeting the material will be revised ahead of the final audit commencing on 26 May 2025.

4. Financial Considerations

The financial impact of the preferred options are contained in the budget information attached to this report (refer to appendix 2).

5. Options

Option 1 – (Recommended)

Consider the submissions and consider what changes are made to the draft 2025-34 Long-term Plan.

Advantages:

- Follows due process as set out in the Local Government Act 2002
- Enables Council to consider community views before finalising the draft 2025-34 Long-term Plan.

Disadvantages:

- None identified.

Option 2

Do not consider the submissions and consider what changes are made to the draft 2025-34 Long-term Plan.

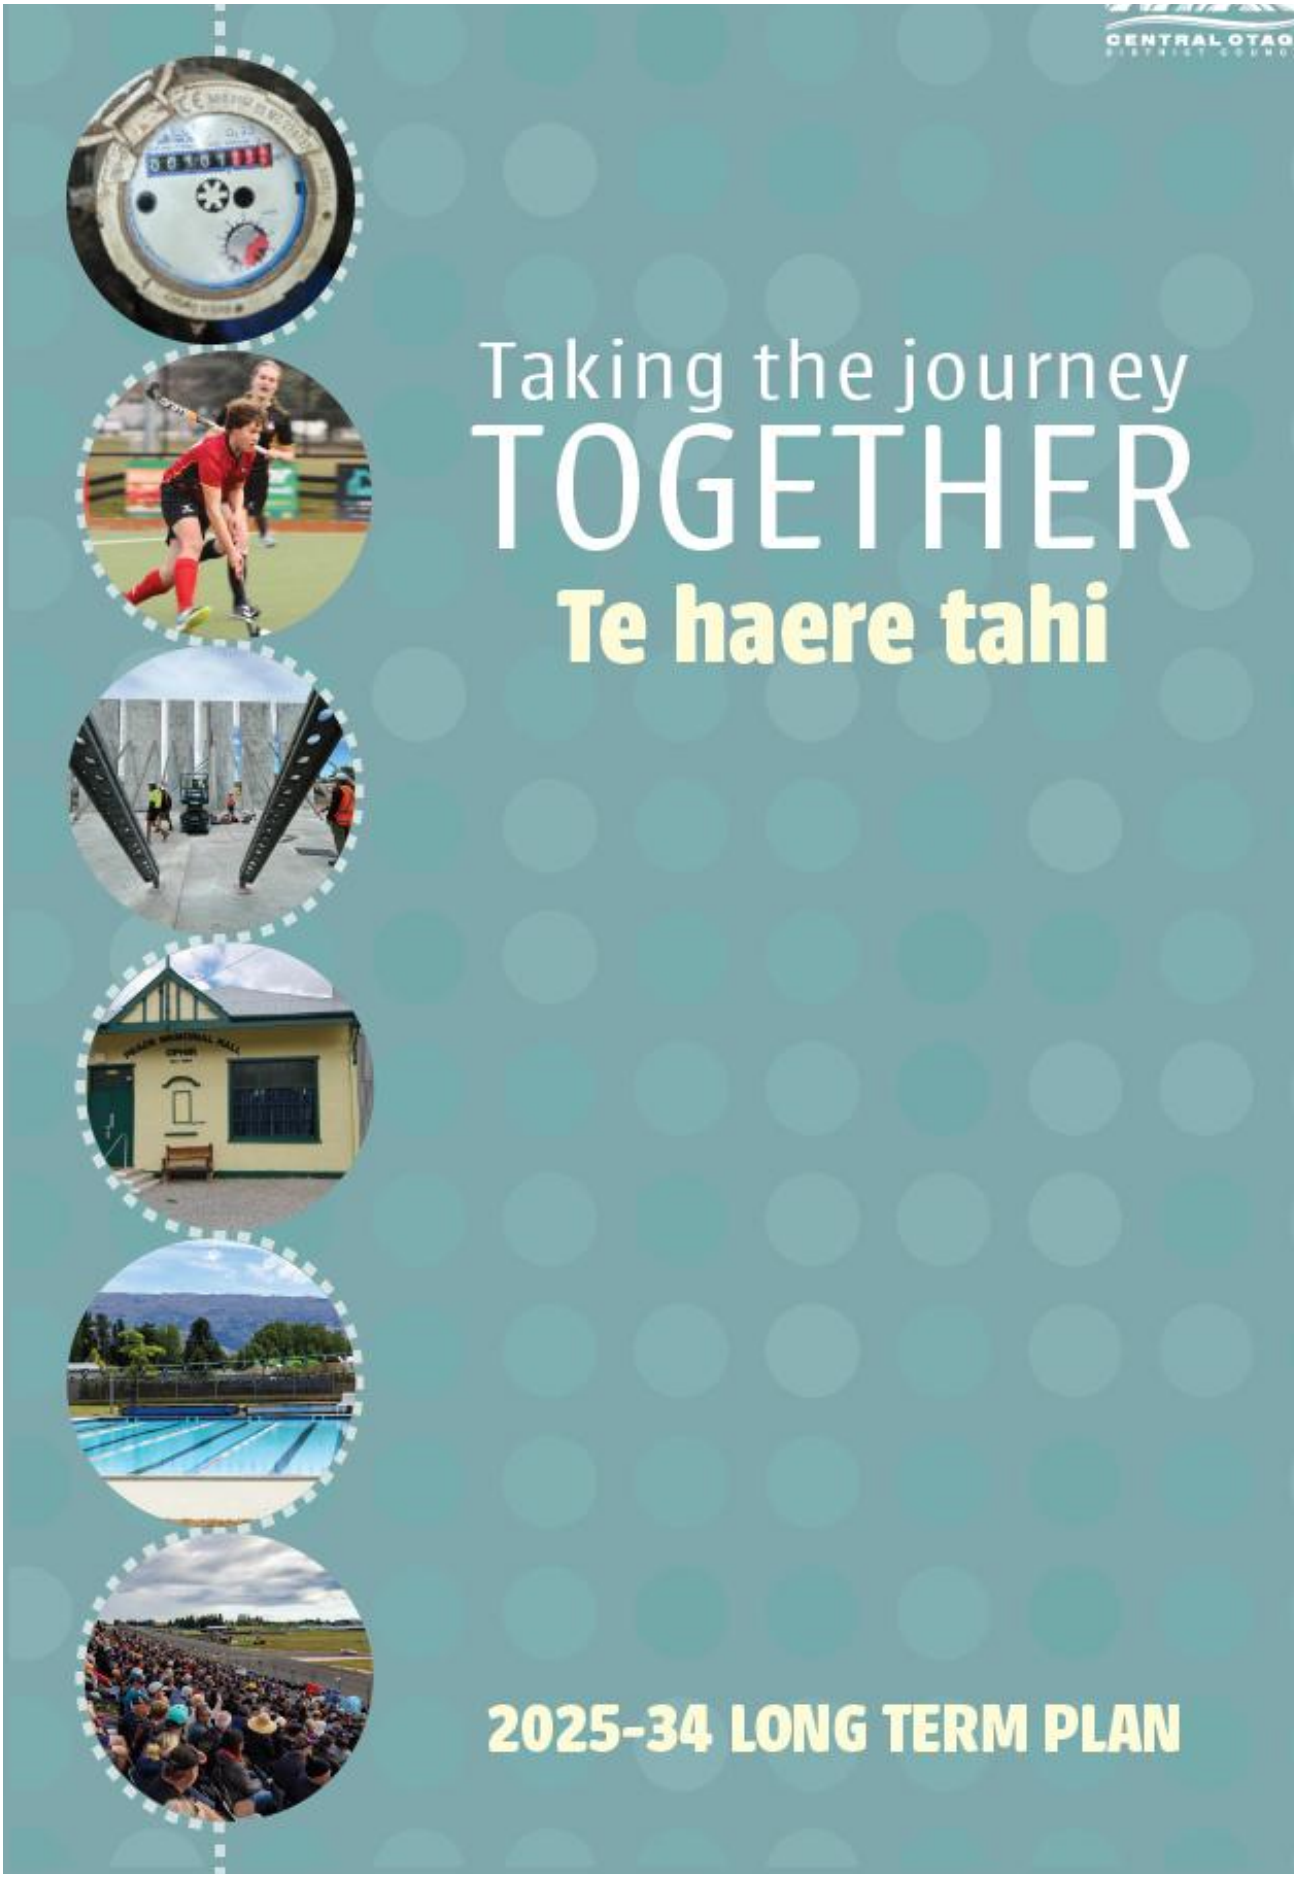
Advantages:

- None identified.

Disadvantages:

- None identified.

6. Compliance



Local Government Act 2002 Purpose Provisions	This decision enables democratic local decision making and action by, and on behalf of communities by considering public submissions on the 2025-34 Long-term Plan.
Decision consistent with other Council plans and policies? Such as the District Plan, Economic Development Strategy etc.	The development of a long-term plan is required under the Local Government Act 2002, and relevant sections refer to existing council policies and strategies as appropriate.
Considerations as to sustainability, the environment and climate change impacts	These are considered in the relevant sections within the document.
Risks Analysis	There are no risks in considering the public feedback on the long-term plan.
Significance, Consultation and Engagement (internal and external)	This is a significant decision, and the special consultative procedure as outlined in the Local Government Act has been followed.

7. Next Steps

Following direction from Council on the consultation items and submissions received, draft budgets and content for the draft 2025-34 Long-term will be amended prior to the material being presented to Audit New Zealand. The final audit will commence on Monday 26 May. The 2025-34 Long-term Plan is pencilled in to be presented at the 25 June 2025 meeting for adoption, with a back-up date of 30 June 2025, if required.

Looking Back - Looking Forward

Every three years, we must prepare and adopt a Long-term Plan (LTP). Our last LTP was adopted in 2021. Last year, the new Government gave councils the option to delay the Long-term Plan by one year and prepare instead an enhanced Annual Plan. This LTP will in fact be a 9-year-plan. We took this option given the uncertainty around the Government's proposed water services delivery. Some of the big projects we have completed since the last Long-term Plan include:

Lake Dunstan Water Supply project went live in 2023, combining and upgrading the town water supply for Clyde and Alexandra residents.

Cromwell Town Water Supply upgrades to provide increased capacity and meet water compliance standards, were completed in 2024.

Clyde Heritage Precinct project to make infrastructure improvements and upgrades to water, stormwater drainage, footpaths and streetscape. A big thanks to the community for working around the public access disturbances.

Kerbside waste and recycling collection upgraded in 2023 with the introduction of a four-bin system, including an organics service.

Vincent and Teviot Valley spatial plans have been developed in collaboration with the local communities. These plans provide a 30-year blueprint for where and how our communities should grow.

Central Otago's District Plan can now be viewed as a digitised E-Plan. The Industrial and Residential chapters have been updated, and a Dark Skies chapter has been introduced. Guidelines have also been established for our heritage precincts.

Central Otago's Destination Management Plan developed 2022, in partnership with mana whenua and the Central Otago community, is a shared statement of intent for an enduring and positive approach to managing our region as a tourism destination over the next 50 years.

Alexandra Library's refurbishment completed in December 2024. All of Council's libraries now also have Radio Frequency Identification (RFID), a sensor scanning tool for issuing and returning library books.

Cromwell and Alexandra pools relined to smarten them up and maximise their longevity.

Good progress has also been made on other projects you told us were important in 2021. The construction of the Cromwell Memorial Hall is well underway, the Riverside park development in Alexandra has begun, and planning is underway for the Cromwell Town Centre. We're doing further planning and will present our development ideas to you in the 2027-37 Long-term Plan.

Shaping Tomorrow Together wellbeing project gauged what the community valued most about living in Central Otago. Feedback enabled the development of a 50-year District Vision for our region.

With more clarity on expectations from Government around water delivery of water services, and with feedback from the community, we prioritised water in this LTP, and the future for investment for halls and facilities, public pools and community and commercial projects.

Some of the projects we aim to achieve in this Long-term Plan include:

Water delivery services changes in line with Government policy. We looked at different models to deliver these services, including the creation of a council-controlled organisation (CCO), either stand-alone or with other councils involved, to own and deliver these services while in the meantime continuing our programme of work to replace and improve water service infrastructure across the district.

Review of how we pay for water in the ratio of charging households for drinking water (i.e. between the uniform annual charge for infrastructure costs and the volumetric charge for per unit water usage). Over the next two years Council is proposing to reduce its rates funding for asset replacement and borrow to meet the shortfall to help keep significant rates increases down for households.

Infrastructure investment of some assets reaching end of life. Investment in infrastructure needs to be able to absorb current and future population growth. This LTP includes significant infrastructure projects, such as the construction of a new hall and event centre in Cromwell, water services upgrades and bridge replacements.

Maintenance and improvement of roads and bridges. We didn't receive all that we asked for from New Zealand Transport Agency Waka Kotahi (NZTA) which means a shift in how we will maintain and improve our road network. This LTP sees us using rates to fund work that would normally be subsidised by NZTA, which has reduced our ability to deliver on some of our bridge replacement programme as well as maintenance of footpaths and cycleways. replacement programme as well as maintenance of footpaths and cycleways.

Long-term focus to handle our district's growth, future- proof our communities. Spatial planning is helping us map where we can sustainably grow, and discussions continue around future focused services and facilities - the **Cromwell town centre project** being an example of this.

New environmental waste strategy implementation to show our commitment to improve recycling and reduce the amount of waste sent to landfills. A key project this LTP will be the construction of a new organic facility so we can more sustainably manage food and green waste.

Moving to district-wide funding from July 2025 for all Council services and activities. This will mean that the costs of activities will be shared by us all. We are also reviewing the services that we provide to check if they are still 'best fit' for our communities and that we can still afford to deliver them. The community halls and facilities discussion in this LTP consultation document was part of this work.

Increasing debt to borrow for building things that last for a long time, as it spreads the cost across the generations of people who will benefit.

Land strategy development to ensure smart management of Council's land and assets. It will state how properties – including reserves and endowment land – must be used for the purpose they were acquired, ensure their value is being preserved for future generations, and require any conversion of land to assets to be done through careful investment for current and future generations.

Cost of delivery does not come cheap. Like many households, we are facing big increases to the costs of providing services. These inflationary pressures can be seen in the 13.01% rates increases (on average) over the next two years.

Long-term Plan

The Long-term Plan sets out our strategic direction and work programme, usually for 10 years ahead, in this case through the next nine years. It outlines the service we will provide, the projects we will undertake, the cost of doing this, how it will be paid for and how we will measure the quality, and our effectiveness. The issues we face and the context, within which we work are continuously evolving. For this reason, the Long-term Plan is produced **every three years**.

Annual Report

At the end of **each financial year** we produce an Annual Report. This sets out how we performed for the year compared to what we said we would do. It lets you know what we delivered and analyses whether we met our budgets and performance targets.

Annual Plan

In each of the two years between Long-term Plans we produce an Annual Plan. The Annual Plan takes a fresh look at the budgets and work programmes that we planned for the year, according to the Long-term Plan, and considers whether adjustments are needed.

Defining our place and space

The Central Otago district, New Zealand's most inland region, covers an area of 9,969km^2. Our district is further split into four electoral wards: Cromwell, Maniototo, Teviot Valley and Vincent. We pride ourselves on our rugged remoteness, fierce independence and also our connectivity.

We have one of the lowest population densities per square kilometre in New Zealand. However, we are growing; as of June 2024, our estimated usual resident population was 26,500 people, up 1.9% from the 2023 Census statistics, and is among the fastest growing districts in the country.

Early on in 2024, Council commissioned independent research to help inform its Shaping Tomorrow Together project. With strong community participation, the project helped identify what is important to people about living, working or holidaying in Central Otago, and will help articulate our vision for the next 50 years: Our community told us that healthcare, housing affordability and future-proofed infrastructure are highly important to delivering their vision for Central Otago.

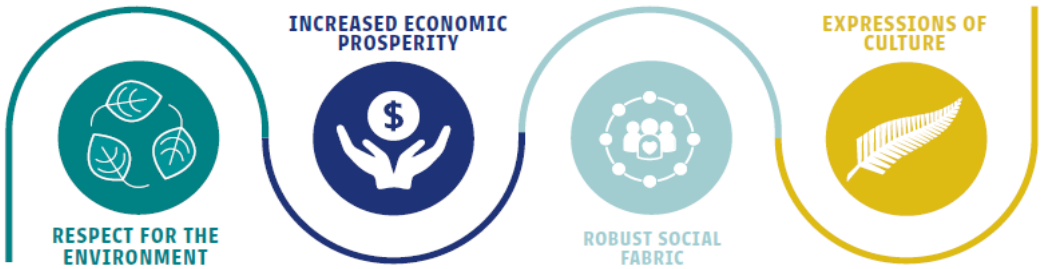
Many opportunities are arising from our growth, such as increasing diversity into communities, and new employment opportunities and new skills into the district – a place that optimises a growing global trend for people to find a better balance between work and lifestyle. Central Otago's reputation as a visitor destination, especially domestically, has been strongly enhanced in recent years, with new product offerings and supporting visitor infrastructure helping drive that popularity.

CENTRAL OTAGO
A WORLD OF DIFFERENCE

Our regional identity expresses the things that are special about this district that ring true for those in every corner of our community. It reinforces those values that are special to Central Otago as a place to live, work and play, now and into the future.

Our region's values are what council staff, councillors and community board members will draw on to guide good decision-making.

1. **Making a Difference:** We will inspire and lead others with our special point of difference.
2. **Respecting Others:** We will respect our culture and personal differences.
3. **Embracing Diversity:** We will recognise differences and embrace diversity.
4. **Adding Value:** We will always ask ourselves if there is a better way – one that achieves a premium status.



5. **Having Integrity:** We will seek to be open and honest.
6. **Learning From the Past:** We will learn from past experiences with future generations in mind.
7. **Making a Sustainable Difference:** We will make decisions in business with the community in mind and in harmony with the natural environment.
8. **Protecting our Rich Heritage:** We will protect and celebrate our rich heritage in landscapes, architecture, flora and fauna and different cultural origins.
9. **Meeting Obligations:** We will meet legal obligations at both a local and national level.

Cover page

Identifying our Community Outcomes

Council's mission is to support and enable a safe, healthy and thriving community and environment.

Council's role is to provide leadership, good quality local infrastructure, public services and regulatory functions and to support local economic growth and development. When doing this, it is mindful of rising costs and aims to deliver its services well, with affordability in mind. It provides these services to meet the needs of the community as expressed in the following community outcomes:

Central Otago is grounded in respect for, and protection of, the natural environment.

A healthy and resilient natural environment is a prerequisite for peaceful enjoyment, active recreation and high-quality, productive enterprise.

Central Otago is advanced by increased economic prosperity so that people can afford to live a satisfying, healthy, fulfilling life, characterised by enjoying a good work/life balance.

Investment in infrastructure, innovation and technologies that enhances productivity, provide employment and sustainable business opportunities.

Central Otago is empowered by a robust social fabric through a strong sense of safety, belonging and connection.

Protecting a small-town feel, welcoming others, treating people fairly, being healthy and feeling safe are valued. Quality facilities and services and improved affordability is also important.

Central Otago is enriched by expressions of culture through its people and their creativity, valuing place and interaction with the landscape, acknowledging heritage and those who have gone before.

Continuing to show respect for tradition, celebrating regional identity, and adopting progressive thinking to ensure an enriching and sustainable future for those who come next.

ALIGNMENT TO OUTCOMES

CODC provides for this through district planning functions, water services, waste services, roading, regulatory functions, parks and reserves, cemeteries, provision of grants, policy advice, community development, regional identity, economic development, regional partnerships and destination management.

CODC provides for this through economic development, community development, welcoming communities, roading, planning, regulatory functions, property functions, waste management, water services, regional identity, destination management, MTFJ and regional partnerships.

CODC provides for this through community development, roading, welcoming communities, parks and reserves, community facilities, advocacy, regulatory functions, waste services, elderly persons housing, regional identity, planning, economic development, pools, libraries, provision of grants, cemeteries, local democracy and destination management, regional partnerships.

CODC provides for this through the provision of grants, District Plan provisions, property activity, libraries, roading, welcoming communities, parks and recreational spaces, community facilities, community development, regional identity, economic development, cultural partnerships, water, cemeteries, local democracy and destination management, regional partnerships.

Council values the deepening relationship with local iwi, Ngāi Tahu, and is fostering a mutually beneficial partnership with our local rūnanga. These relationships contribute positively to Council's decision-making, cultural confidence and to broader outcomes for Central Otago. Council has a formal partnership agreement with Aukaha and Council is also a signatory to the Te Rōpū Taiao Governance Charter, a formal agreement between Otago rūnanga and Otago local authorities to work together at both a collective and individual Council level.

Opportunities for Māori to contribute to decision-making processes

Central Otago District Council acknowledges Māori as people with whom there is a special relationship. Council is committed to giving effect to the principles and intent of Te Tiriti o Waitangi and to engaging in genuine and appropriate consultation with Māori.

Council values the deepening relationship with local iwi, Ngāi Tahu (Kāi Tahu), and is fostering a mutually beneficial partnership with our local rūnanga. These relationships contribute positively to Council's decision-making, cultural confidence and to broader outcomes for Central Otago.

Central Otago District Council has an enduring Partnership Protocol between Kāi Tahu, as represented by Te Rūnanga o Moeraki, Kāti Huirapa Rūnaka ki Puketeraki, Te Rūnanga o Ōtākou and Hokonui Rūnanga (Kā Rūnaka), for the operational interface between Aukaha and Central Otago District Council. This Protocol respectfully meets any obligations of CODC to consult with Kāi Tahu under the Local Government Act 2002, or any other legislation within the jurisdiction of the Central Otago District Council, and broadly across the full suite of Council duties and functions.

Central Otago District Council is also a signatory to Te Rōpū Taiao Governance Charter, which formalises the relationship between the Otago Rūnanga and the local authorities of the Otago region.

Taking the Journey together

Central Otago is the best district to live in and we are committed to ensuring our communities have the core services needed to continue to prosper in a sustainable way. To achieve this, we must make smart decisions on where we best put our efforts, knowing also that some costs cannot be put off for future generations to bear the brunt.

We are facing significant challenges in the years ahead. Central Otago is growing like never before, and while this brings opportunity, we need to ensure we have infrastructure in place to meet future demand. Investing in infrastructure accounts for 48.8% of the rates increase in Year One of this Long-term Plan. Development contributions are also increasing to reflect the true cost of providing additional services for our growing population.

Our district covers a large geographic area, and we need to further invest in our roading network to ensure resilient connection routes. In this Long-term Plan, we will be embarking upon a bridge replacement programme. However, this is not made easy with the pressure on Central Government's roading funding pot.

We face continued pressure in the delivery of water services, and like the previous government, this Government is requiring higher standards of councils than ever before. With these requirements come costs. For example, in Year One of this Plan, wastewater investment is required, which will impact all residents with a wastewater connection – motels and hotels being most impacted.

PLACEHOLDER – PENDING DECISION: We needed to decide in this Long-term Plan how to continue providing water services to this district in a sustainable way, and we asked for your feedback on this on the best operating model (for delivering water services to Central Otago households into the future. We had a preferred option, to form a joint-council Council Controlled Organisation (CCO), which was driven by the need to keep costs down by sharing costs, resources and staff across the joint CCO.

We worked hard to reduce rate surges for our households and have made the decision to reduce the amount of rates we collect for the replacement of water services assets over the next two years, funding this shortfall instead from debt.

Last year we consulted on a ‘district-wide funding’ model. We know that it is not economical to keep funding activities at a ward level and we need to start rationalising some of our services across the district. The ratepayer spend is getting stretched and things are not likely to change in the near future.

PLACEHOLDER – PENDING DECISION: In this Long-term Plan we asked for your feedback on whether we divest some community halls and facilities.

PLACEHOLDER – PENDING DECISION: We know there is more to our community than roads and pipes and we had a number of community and commercial groups seeking your support on funding their projects. While we think there are merits in all of them, we know costs are hitting some of you hard and we really want to hear from you about whether or not we have got the balance right and that it’s a good use of your money.

There are many things beyond our control, and weather events and natural disasters are examples. They seem to be getting more frequent. That’s why we take Emergency Management seriously as an organisation. We work closely with Otago Civil Defence to be emergency-ready to help our community get through by training Council staff to be part of any response. We feel this is a vital part of our function, as well as helping build preparedness and resilience within our community.

Please keep talking to elected members and staff, as you did through the LTP consultation process, about your issues and concerns, as we all continue on this journey together.

Chief Executive Officer

Our Activities

This section provides an overview of the activities we have undertaken during the 2023/24 financial year. The groups of activities incorporate the core services we deliver. We give consideration to how these services contribute to community well-being in our decision-making process. While some of the activities relate to legislation, they contribute to the community's social, cultural, environmental and economic well-being and therefore also contribute to our community outcomes in some way, either directly or indirectly. Governance and Corporate Services provide the internal processes and support required for the organisation to carry out its activities.

Within each group of activities, you will find a description of each activity, and an overview of what we have achieved in the 2024/25 year.

The Statement of Service Performance measures are reported in the following activities.

Water Services

Roading

Environmental Services

Planning and Regulatory

Pools, Parks and Cemeteries

Property and Community Facilities

Service Centres and Libraries

Governance and Corporate Services

Community, Economic and Strategy Development

Service Performance Judgements and Assumptions

When preparing the Statement of Service Performance in the 2021-2031 Long-term Plan, the following judgements in the selection of our service performance measures:

- Reflected on the extent to which the levels of service we plan to provide to the community were best captured by performance measures.
- Consideration has been given to the views expressed by our community, community boards and elected members. This includes feedback relevant to the levels of service and performance measures received throughout the Long-term Plan consultation process.
- We have ensured that the performance measures adequately inform progress towards delivering the our community outcomes.

Relevant measurement judgements have been included within each group of activity section which the judgment relates.

Under the Local Government Act 2002 we are mandated to provide standard performance measures so that the public may compare the level of service provided in relation to the following group of activities: water, wastewater, and stormwater. Department of Internal Affairs guidance has been followed in measuring performance against all mandatory measures.

Material judgements have been applied as follows

Surveys

Council carries out an annual survey to:

- measure its performance with respect to the services it provides during the year
- identify issues for the coming year
- identify priorities for the coming year

The 2024 survey was conducted using the Let's Talk Kōreri Mai consultation software. Respondents were required to register to participate, which may have been a barrier. The survey was promoted throughout the district through media channels, elected members and community outreach efforts. This survey used self-selection sampling.

Estimating roading roughness
Council uses RoadRoid testing to measure for road roughness. Measure is based on prior year road roughness survey.

Measuring water quality
Department of Internal Affairs guidance has been followed in measuring performance against all mandatory measures. An external contractor is used to review the data collected to ensure these measures have been accurately recorded.

The Non-Financial Performance Measures Rules 2013 required local authorities to report their compliance with the bacterial and protozoal contamination criteria of the New Zealand Drinking Water Standards 2005.These standards have been superceded by the Water Services (Drinking Water Services for New Zealand) Regulations 2022 (the regulations) and therefore the council is reporting against these measures relying upon the relevant incorporation by reference provisions in New Zealand law.

Changes to Service Performance Measures
Per the requirements of FRS 48 guidance issued in 2023, Central Otago District Council are required to disclose any alterations in the content or presentation of their service information and provide a summary of these changes, along with providing a clear explanation regarding the rationale for these changes. This disclosure requirement ensures transparency and accountability in the reporting process. By summarising the modifications and explaining the rationale behind them, stakeholders and users of the financial information can gain a comprehensive understanding of how the entity's service information has evolved over time.

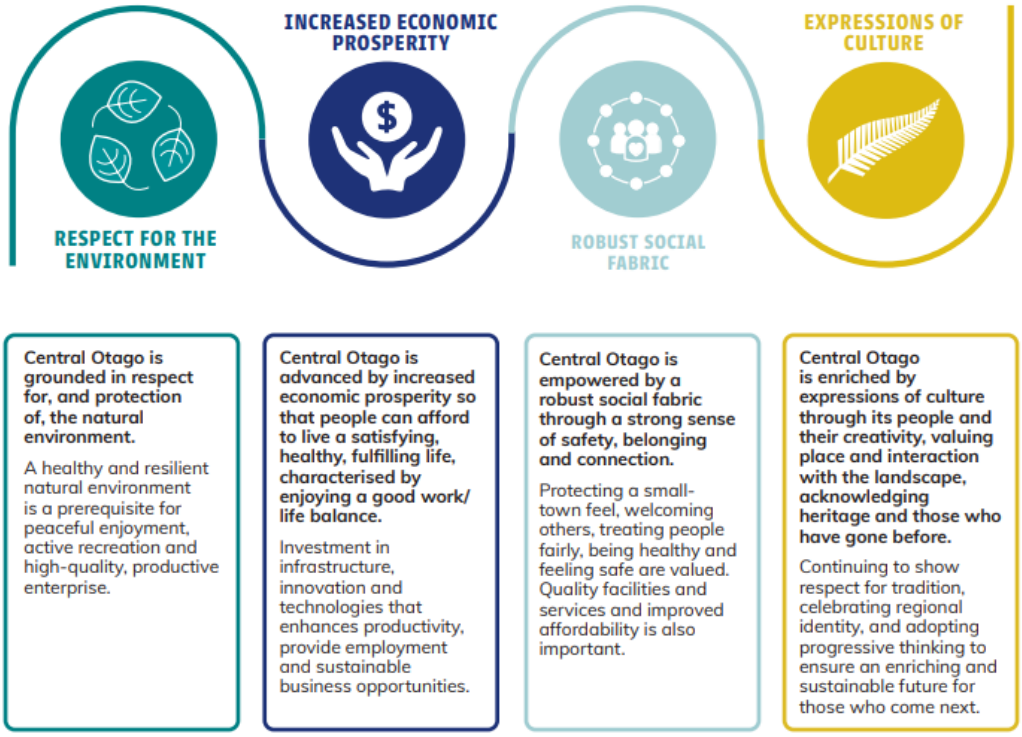
Water Services

Water

About our Activity



Our vision for water services is to deliver safe water supplies that support a healthy and thriving community and environment.

Council provides potable water to properties within eight water schemes in the townships of Pisa, Cromwell, Clyde / Alexandra, Roxburgh, Omakau, Naseby, Ranfurly, and Patearoa.

This includes:

- 10,560 drinking water connections
- 8 water treatment plants
- 4 bore fields, 4 surface water takes
- 18 treated water reservoirs and tank farms
- 16 pumpstations
- 469km of pipeline

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Looking Ahead

Council has three treatment plants which do not meet the drinking water requirements for protozoa treatment. These are Cromwell, Ranfurly, and Patearoa.
The Cromwell Water Treatment upgrade commenced with construction of a new raw water pipeline from the borefield to the reservoir site in 2024. Construction of a new treatment plant at the reservoir site, and an upgraded borefield in 2025 will complete this project.

Package treatment plants are being installed at Patearoa and Ranfurly in 2025 to provide protozoa treatment for these supplies.

The Omakau treatment plant is at the end of its life and requires a new plant to be built to fully meet the drinking water standards. Design of the new plant will occur on 2025/26 with construction in the 2026-28 period. The Roxburgh treatment plant also needs an upgrade to fully comply with the standards.

Omakau, Naseby, Ranfurly, and Patearoa are supplied from rivers which become dirty during high rainfall. This impacts on the ability to treat the water and can result in boil water notices. Future upgrades are required to make these supplies more resilient.

The population of Naseby increases from approximately 150 people to over 2000 in the summer. This treatment plant struggles to keep up with demand and requires increased capacity and storage to meet this demand.

The Council has committed $2.7 million to replacing ageing pipes as part of the 2025-2026 renewals, which includes the Bridge Hill Rising Main in Alexandra, Enterprise Street's 70-year-old pipeline and Northland Street in Ranfurly.

Currently, there is insufficient capacity in the existing water supply pipeline servicing Bannockburn to meet future growth projections for the area. Therefore, a new watermain and reservoir upgrade is being designed, with construction commencing in 2026/27. The section of pipe is from the northern side of the Bannockburn bridge to the current reservoir site on Hall Road in Bannockburn.

Council has adopted new spatial plans for Cromwell, Clyde, and Alexandra and new water infrastructure will be required to service the significant growth occurring in these areas. As well as new infrastructure, some of the existing pipe networks, reservoirs, treatment plants and pump assets will need to be replaced or upgraded to provide increased capacity to service this growth.

The costs of work to service growth are intended to be recovered from development contributions where appropriate.

Significant Negative Effects

Significant negative effect	How we are addressing this
A contamination event in a water supply would have significant health and economic consequences. Boil water events create health risks, have economic consequences on residents and businesses, and cause inconvenience.	Within the first three years of this LTP, Council expects all of Council-provided water supplies to be fully compliant with the New Zealand Drinking Water Standards. As well as treatment upgrades, we are also turning our focus to build resilience into these networks.

Wastewater

About our Activity

Our vision for water services is to deliver wastewater services that support a safe, healthy and thriving community and environment.

Council's wastewater service enables the collection, conveyance, treatment and disposal of wastewater within seven schemes across the district. Each scheme pumps, reticulates and treats the wastewater generated by households, businesses and industrial processes. This is provided through:

- 9,170 connections
- 7 treatment plants
- 40 pump stations
- 284km of pipeline

Wastewater service is provided to properties within in the townships of Cromwell (including Bannockburn, Pisa and Lowburn, Alexandra (including part of Clyde), Roxburgh, Lake Roxburgh Village, Omakau, Naseby, and Ranfurly.

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Central Otago is grounded in respect for, and protection of, the natural environment.

A healthy and resilient natural environment is a prerequisite for peaceful enjoyment, active recreation and high-quality, productive enterprise.

Central Otago is advanced by increased economic prosperity so that people can afford to live a satisfying, healthy, fulfilling life, characterised by enjoying a good work/ life balance.

Investment in infrastructure, innovation and technologies that enhances productivity, provide employment and sustainable business opportunities.

Central Otago is empowered by a robust social fabric through a strong sense of safety, belonging and connection.

Protecting a small-town feel, welcoming others, treating people fairly, being healthy and feeling safe are valued. Quality facilities and services and improved affordability is also important.

Central Otago is enriched by expressions of culture through its people and their creativity, valuing place and interaction with the landscape, acknowledging heritage and those who have gone before.

Continuing to show respect for tradition, celebrating regional identity, and adopting progressive thinking to ensure an enriching and sustainable future for those who come next.

Looking Ahead

The proposed new national wastewater performance standards are expected to result in additional nitrogen removal being required at the Cromwell treatment plant, and a discharge to land being required at Ranfurly.

The Alexandra wastewater treatment has a single processing line which consists of an activated sludge reactor, a clarifier, and UV treatment. This plant is nearing the end of its life, and has a high risk of breakdowns occurring. There is only 8 hours of storage available in the network, with no alternative treatment option available. Breakdowns result in non-compliant discharges to the Clutha Matau River. A significant upgrade is required to duplicate the existing process and then renew the existing infrastructure to provide increased capacity and resilience to plant outages.

The Omakau wastewater ponds are located in a flood zone, and have been inundated twice in the last five years. An alternative location for treatment of wastewater is required for Omakau.

The proposed environment performance standards would enable a standardised factory-built treatment plant in shipping containers to be used, with a continued discharge to river at a significantly reduced cost.

We anticipate that monitoring will be more stringent with fortnightly and monthly monitoring required instead of monthly and quarterly. There will also be significant increased reporting requirements and improved public access to test results. This information will require a third-party annual audit. From 1 July 2025, this work will be undertaken by council staff instead of being contracted out. The savings from resourcing this work internally will be used to fund the additional monitoring required.

The Local Government (Water Services) Bill, which is currently being considered by Parliament makes changes to the Resource Management Act (RMA) to implement the proposed national environment performance standards. The new standards will be implemented once this legislation has been finalised, which is expected in October 2025.

Council has adopted new spatial plans for Cromwell, Clyde, and Alexandra and new wastewater infrastructure will be required to service the significant growth occurring in these areas. As well as new infrastructure, the existing pipe networks, treatment plants, and pump assets will need to be replaced or upgraded to provide increased capacity to service this growth.

The costs of work to service growth are intended to be recovered from development contributions where appropriate.

Significant Negative Effects

Significant negative effect	How we are addressing this
Wastewater discharges can have a negative effect on the environment and public health if they are not treated to an appropriate standard.	Reducing the environmental impacts of all our wastewater schemes in line with the Government's essential freshwater programme is a priority in this 10-Year Plan.
Wastewater overflows due to blockages, pump failure or power outages also have a negative effect.	Resilience work is programmed within the next four years to improve pump station capacity, provide emergency generation and reduce the risk of wastewater overflows occurring.

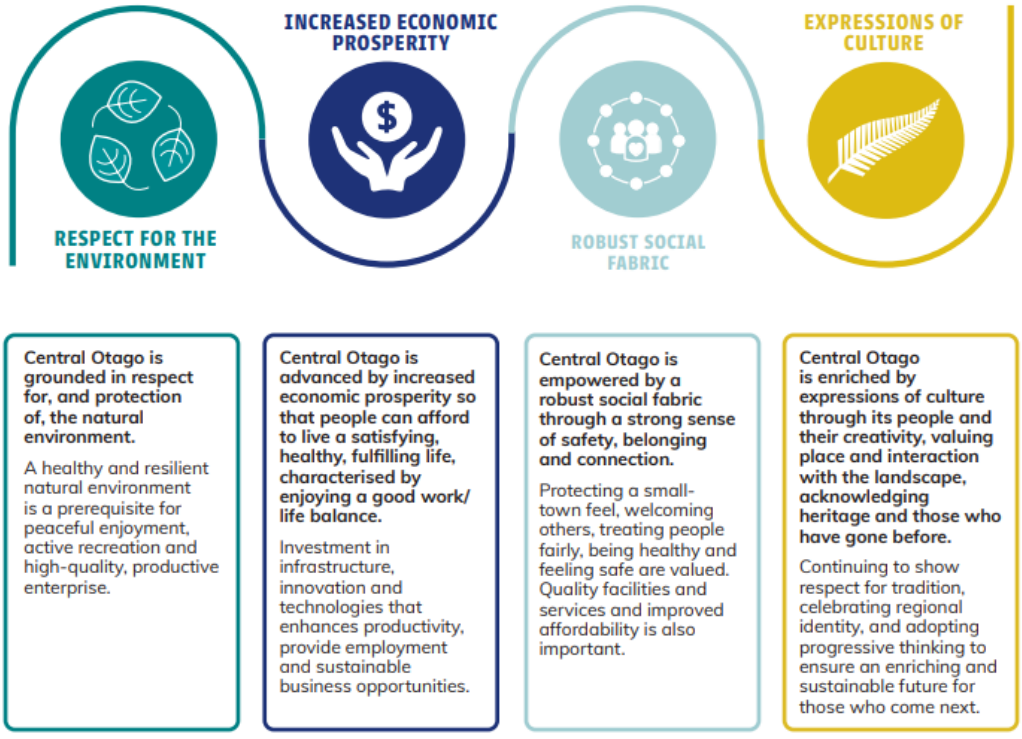
Stormwater

About our Activity



Our vision for stormwater service is to deliver safe and compliant stormwater networks that support a healthy community and environment.

The stormwater activity enables the collection, conveyance, and disposal of stormwater that runs off roads, roofs, and driveways. Cromwell, Alexandra, Ranfurly, and Roxburgh, have reticulated stormwater systems to manage drainage and prevent flooding. Stormwater in these towns is conveyed directly to waterways using piped infrastructure, natural water courses and open channels. The remaining towns have mud tanks connected to soak pits, or open channels, with culverts across roads.

Stormwater services are provided through:

- 81km of pipeline
- 4.4km of open drains

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Looking Ahead

Central Otago has traditionally had low rainfall, and minimal stormwater discharges to waterways. However, analysis we commissioned on climate change impacts on our district has signalled we can expect higher intensity and more frequent extreme rainfall events, so we will be investigating how we improve and build resilience in our systems to cope with this.

In the next three years, Council will collect a detailed inventory of discharge locations and undertake flow monitoring to identify where further work may be required to improve environmental outcomes.

Stormwater catchment plans will also be prepared for each of out towns to meet expected increased regulation relating to stormwater management.

Council expects to be able to accommodate improvements required for environmental reasons, or upgrades for climate change within the renewals programme in the 30-year plan.

Significant Negative Effects

Significant negative effect	How we are addressing this
Flooding of property or homes can result when stormwater infrastructure does not have sufficient capacity for rainfall events.	Council will review our stormwater network and the implications of climate change on this in the future and looking to build resilience.
Stormwater discharges can have negative effects on the waterways.	Council will collect a detailed inventory of discharge locations and undertake flow monitoring to identify where further work may be required to improve environmental outcomes.

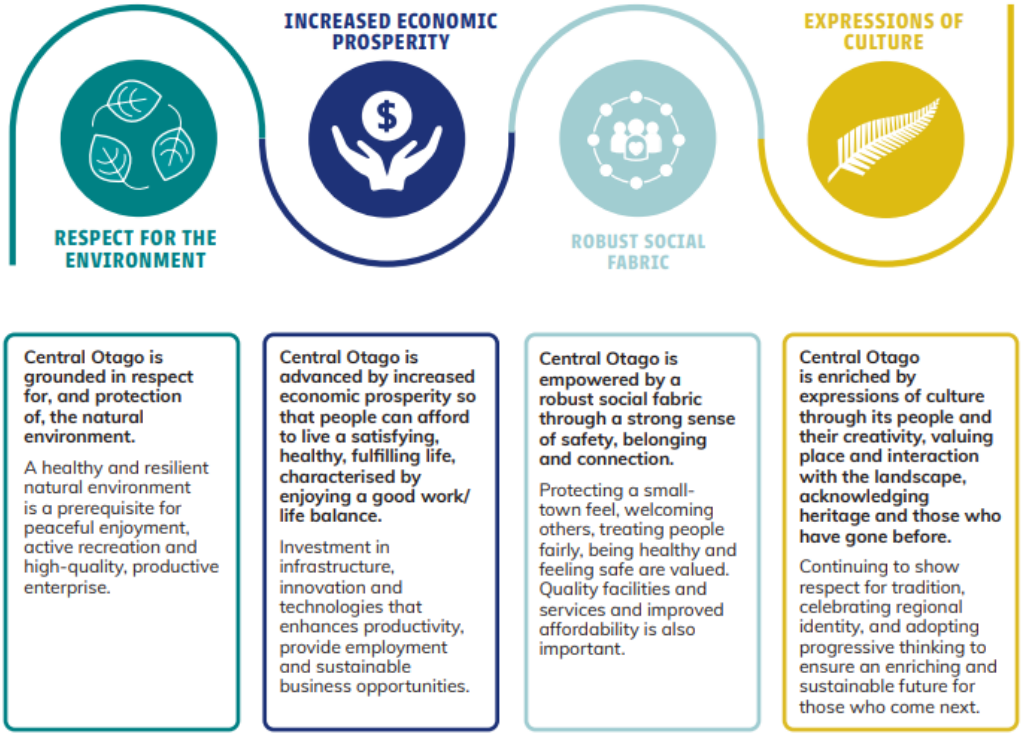
Roading

Roading

About our Activity



We work to ensure an efficient, fully accessible, safe network of roads and footpaths for our Central Otago community, to enable the movement of goods, people and services across our district.

These are essential for our social, cultural and economic well-being, and we are committed to being innovative and environmentally-conscious in our service delivery.

We currently have 1,926km of roads, with 1,753km of rural roads and 158km of urban streets; 72% of our roads are unsealed, a total length of 1,386km.

We have 173 bridges (including five footbridges maintained by Council), 188km of footpaths and greenways and just over 5,300 culverts. These roading assets are contained in close to 12,000 hectares of road reserve across the district, 3,800 hectares of which has formed and maintained carriageway.

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Looking Ahead

The Council is actively improving transportation networks, including road upgrades and new cycling infrastructure, while also addressing the challenges of rising property values and changing land use patterns, which are impacting traffic volumes and environmental sustainability.

Our district boasts one of New Zealand's most cost-efficient roading networks, evidenced by low costs per kilometre and per vehicle kilometre travelled.

In this LTP, we are prioritising core maintenance and renewals to ensure the continued safety and functionality of the roading network while maintaining service affordability.
The key challenges we will work towards addressing in the next nine years are:

The affordability and resilience of our aging bridge network: With 30 bridges (17% of the network) nearing the end of their service life within the next 10 years, significant investment is needed to replace and maintain these critical structures.
Increasing costs of managing our unsealed network: Rising traffic demands, and material shortages are driving up costs, with a backlog in renewals and heavy vehicle traffic adding further strain.

Shifting national priorities may impact local budgets, timelines, and strategic planning, requiring adaptive management to address evolving challenges.
With a reduction in footpath funding there will be shift to focusing on safety-related maintenance. Renewals may be limited to one side of the road, potentially impacting level of service.

Significant Negative Effects

Significant negative effect	How we are addressing this
Noise: Noise from traffic can cause a negative environmental effect. The local road network typically has relatively low traffic volumes and noise complaints are restricted to heavy vehicles using local streets at night, and service covers making noise when vehicles travel over them. Council monitors heavy vehicle use on main urban streets using traffic counters and considers traffic calming and legislative tools to restrict heavy vehicle use when this is appropriate.	Council monitors heavy vehicle use on main urban streets using traffic counters and considers traffic calming and legislative tools to restrict heavy vehicle use when this is appropriate.
Streetlighting: Light spill from streetlighting can have a detrimental effect on properties in residential areas and impact on the night sky. Council completed an upgrade of its streetlighting to LED lights where economically viable. LED lighting reduced power consumption by streetlights by 50-	Council completed an upgrade of its streetlighting to LED lights where economically viable. LED lighting reduced power consumption by streetlights by 50-60%. LED lights can have a low cost "shield" attachment fitted (where required) to reduce spill into adjoining property,

60%. LED lights can have a low cost “shield” attachment fitted (where required) to reduce spill into adjoining property, reduce upwards light spill and provide safety benefits from the quality of light.	reduce upwards light spill and provide safety benefits from the quality of light.
Dust suppression: This was historically carried out by applying oil to sections of unsealed roads. This has negative environmental effects, is no longer a permitted activity under the Otago Regional Council’s “Regional Plan: Water for Otago” and has been phased out.	Council’s Roading Policy details the method of dust suppression and eligibility criteria which are applied when a landowner requests a section of road be eco-sealed. A review of the Council’s dust suppression policy will be undertaken during the 2025/27 period. This will include consideration of requiring developers of new residential properties to eco-seal adjacent gravel roads.
Crashes: Traffic accidents are a significant negative effect. Council manages this by undertaking an integrated safety management approach to activities on the network by addressing maintenance defects, providing information to road users, providing a community road safety education and awareness program and undertaking prioritised site-specific safety improvements where known risks exist. Speed increases both the likelihood of crashes and the consequence of a crash, regardless of the causes. Council is consulting on proposed speed limit changes in 2023/24 and the implementation of changes in incorporated into this plan.	Council manages this by undertaking an integrated safety management approach to activities on the network by addressing maintenance defects, providing information to road users, providing a community road safety education and awareness program and undertaking prioritised site-specific safety improvements where known risks exist. Council is consulting on proposed speed limit changes in 2023/24 (and reconsulting on some aspects during 2025) and the implementation of changes in incorporated into this plan.

Environmental Services

Environmental Services

About our Activity

Working together, Council and the community can achieve more effective and efficient waste management and minimisation across the district.

Our vision for the future is:

"Central Otago is working towards becoming a low-emissions, low-waste district built upon a circular economy."

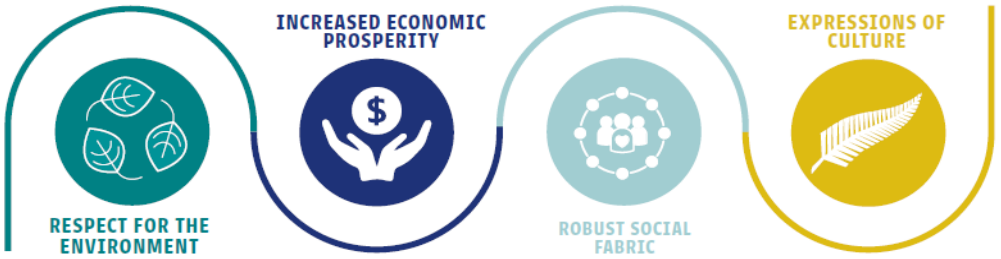
Our goals are to improve the efficiency of resource use and reduce the harmful effects of waste. We work alongside our community to deliver effective and efficient waste management services and promote waste minimisation.

Council delivers a range of waste management and minimisation services across the district.

These include:

- Kerbside collections for refuse, mixed recycling, glass, and combined food and greenwaste
- Recycling drop-off containers
- Operation of four transfer stations
- Processing and disposal of collected materials
- Waste minimisation education and behaviour change programmes

Supporting Sustainability



Council's sustainability vision is:

A great place to live, work and play, now and into the future."

Our Environmental Services team leads this work and supports the organisation in achieving the following goals:

- Being customer friendly, with enabling policies and appropriate infrastructure
- Supporting improvement and diversification of skills, industries, and experiences
- Delivering Council services while managing environmental impacts
- Enabling development while managing its environmental effects
- Providing affordable and equitable services that promote community well-being
- Managing change while protecting and enhancing our culture, heritage, and landscape

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Central Otago is grounded in respect for, and protection of, the natural environment.

A healthy and resilient natural environment is a prerequisite for peaceful enjoyment, active recreation and high-quality, productive enterprise.

Central Otago is advanced by increased economic prosperity so that people can afford to live a satisfying, healthy, fulfilling life, characterised by enjoying a good work/life balance.

Investment in infrastructure, innovation and technologies that enhances productivity, provide employment and sustainable business opportunities.

Central Otago is empowered by a robust social fabric through a strong sense of safety, belonging and connection.

Protecting a small-town feel, welcoming others, treating people fairly, being healthy and feeling safe are valued. Quality facilities and services and improved affordability is also important.

Central Otago is enriched by expressions of culture through its people and their creativity, valuing place and interaction with the landscape, acknowledging heritage and those who have gone before.

Continuing to show respect for tradition, celebrating regional identity, and adopting progressive thinking to ensure an enriching and sustainable future for those who come next.

ALIGNMENT TO OUTCOMES

CODC provides for this through district planning functions, water services, waste services, roading, regulatory functions, parks and reserves, cemeteries, provision of grants, policy advice, community development, regional identity, economic development, regional partnerships and destination management.

CODC provides for this through economic development, community development, welcoming communities, roading, planning, regulatory functions, property functions, waste management, water services, regional identity, destination management, MTFJ and regional partnerships.

CODC provides for this through community development, roading, welcoming communities, parks and reserves, community facilities, advocacy, regulatory functions, waste services, elderly persons housing, regional identity, planning, economic development, pools, libraries, provision of grants, cemeteries, local democracy and destination management, regional partnerships.

CODC provides for this through the provision of grants, District Plan provisions, property activity, libraries, roading, welcoming communities, parks and recreational spaces, community facilities, community development, regional identity, economic development, cultural partnerships, water, cemeteries, local democracy and destination management, regional partnerships.

Looking Ahead

The Cromwell Transfer Station is no longer meeting community needs due to significant growth and the age of the facility. Council will explore and cost options to improve safety and efficiency, including better facilities for rubbish drop-off, recycling, and greenwaste.

With the introduction of the kerbside green bin organics collection in 2023, work has begun on developing a local organics processing facility in Central Otago. Currently, organic waste is transported to Timaru for processing. A local facility will provide a destination for all kerbside-collected organic waste, reducing transportation and processing costs. It will also

be designed to accept organic material from Queenstown Lakes District, enabling it to serve as a regional facility for organic waste management.

Significant Negative Effects

Significant negative effect	How we are addressing this
The effectiveness of our waste service impacts on the environment. If our service does not meet demand or costs become too unaffordable, then waste can be inappropriately disposed of. This causes environmental and health impacts.	Our Waste Management and Minimisation Plan focuses on mitigating any negative impacts and seeks to reduce the volume of refuse and increase the volume of recycling. Council has employed a Waste Minimisation Officer to focus on education. Our new Solid Waste Bylaw gives us an enforcement option.
The consumption of resources to deliver services can have a negative environmental effect.	The actions within our Sustainability Strategy 2019-2024 focus on opportunities across all our activities to reduce out carbon footprint, reduce environmental impacts and streamline our business processes.

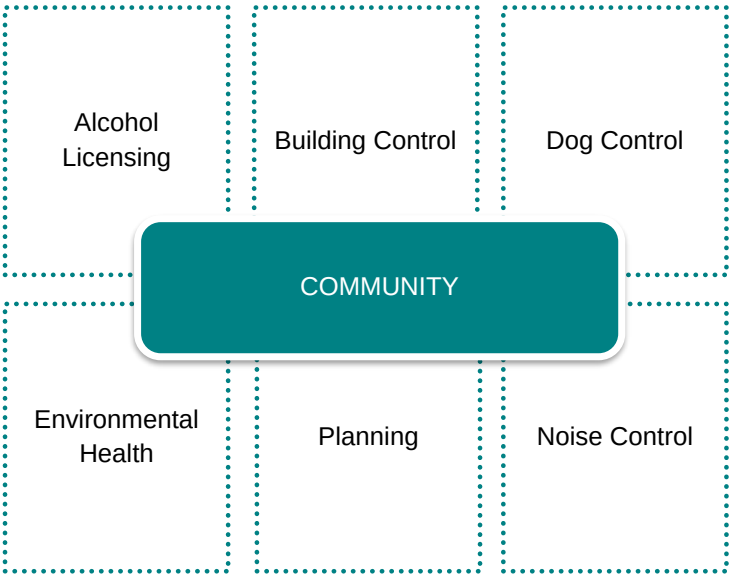
Robust Social Fabric	Provide compliant waste systems and facilities	Compliance with resource consents for transfer stations, closed and operational landfills	> 90% compliance	> 90% compliance

Planning and Regulatory

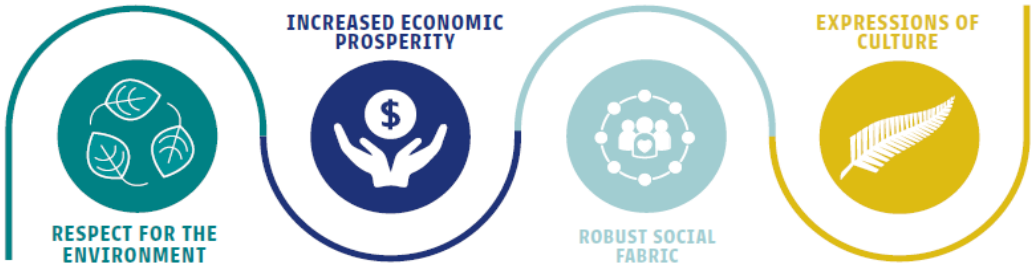
Planning and Regulatory

About our Activity



Our regulatory services play a crucial role in safeguarding public safety and the environment, minimising potential nuisances, and ensuring that our community adhere to their legal obligations.

We provide these services through various methods, including processing building consent and alcohol licence applications. We also oversee and audit registered food businesses and ensure dogs are registered and kept under control.



In terms of planning, we are responsible for the processing of resource consents and developing, reviewing, and managing the District Plan. This District Plan serves as the guiding framework for processing resource consents.

Additionally, we monitor the compliance with resource consent conditions and District Plan provisions to ensure that environmental impacts are properly managed.

The activities of the service include:

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Central Otago is grounded in respect for, and protection of, the natural environment.

A healthy and resilient natural environment is a prerequisite for peaceful enjoyment, active recreation and high-quality, productive enterprise.

Central Otago is advanced by increased economic prosperity so that people can afford to live a satisfying, healthy, fulfilling life, characterised by enjoying a good work/ life balance.

Investment in infrastructure, innovation and technologies that enhances productivity, provide employment and sustainable business opportunities.

Central Otago is empowered by a robust social fabric through a strong sense of safety, belonging and connection.

Protecting a small-town feel, welcoming others, treating people fairly, being healthy and feeling safe are valued. Quality facilities and services and improved affordability is also important.

Central Otago is enriched by expressions of culture through its people and their creativity, valuing place and interaction with the landscape, acknowledging heritage and those who have gone before.

Continuing to show respect for tradition, celebrating regional identity, and adopting progressive thinking to ensure an enriching and sustainable future for those who come next.

ALIGNMENT TO OUTCOMES

CODC provides for this through district planning functions, water services, waste services, roading, regulatory functions, parks and reserves, cemeteries, provision of grants, policy advice, community development, regional identity, economic development, regional partnerships and destination management.

CODC provides for this through economic development, community development, welcoming communities, roading, planning, regulatory functions, property functions, waste management, water services, regional identity, destination management, MTFJ and regional partnerships.

CODC provides for this through community development, roading, welcoming communities, parks and reserves, community facilities, advocacy, regulatory functions, waste services, elderly persons housing, regional identity, planning, economic development, pools, libraries, provision of grants, cemeteries, local democracy and destination management, regional partnerships.

CODC provides for this through the provision of grants, District Plan provisions, property activity, libraries, roading, welcoming communities, parks and recreational spaces, community facilities, community development, regional identity, economic development, cultural partnerships, water, cemeteries, local democracy and destination management, regional partnerships.

Looking Ahead

Regulatory: We are in the process of -

- Developing a compliance and enforcement policy to inform the community on Council's priorities, and what the community can expect from Council to safeguard and promote the long-term, sustainable management of our natural and physical resources, foster quality-built environments, and support strong, healthy communities.
- Reviewing and consulting on Council's Dog bylaw and policy, along with dangerous insanitary buildings.
- Moving to next stage in earthquake prone buildings work.
- Continuing to stay informed on major reforms to the building sector, to ensure council staff and elected members are informed to ensure we fully understand the potential impacts of proposed changes and are able to provide informed responses and remain agile to respond the changes to be implemented.
- Continuing inspections of residential swimming pool fencing to protect under 5-year-olds.
- Prioritising of Building Warrant of Fitness inspections for commercial buildings over a 5-year cycle as required by MBIE.

Significant Negative Effects

Significant negative effect	How are we addressing this
Regulatory: Competing demands on the Building team for processing consents, inspection lead in times, education and enforcement for unconsented building works.	Increasing resources, training, and development of the building team to reduce inspection lead in times and processing times. A review of the consenting process to increase efficiencies and consideration/ implementation of remote inspection types.
Planning: Anticipated major RMA reform pressure and national directional changes could influence/determine new or different priorities within both the policy and resource consent processing space.	We will have to be suitably flexible in our professional business practices to both adapt too and adopt new legislative change requirements. This will require a proactive approach on ensuring we remain informed and updated on potential and actual statutory changes.

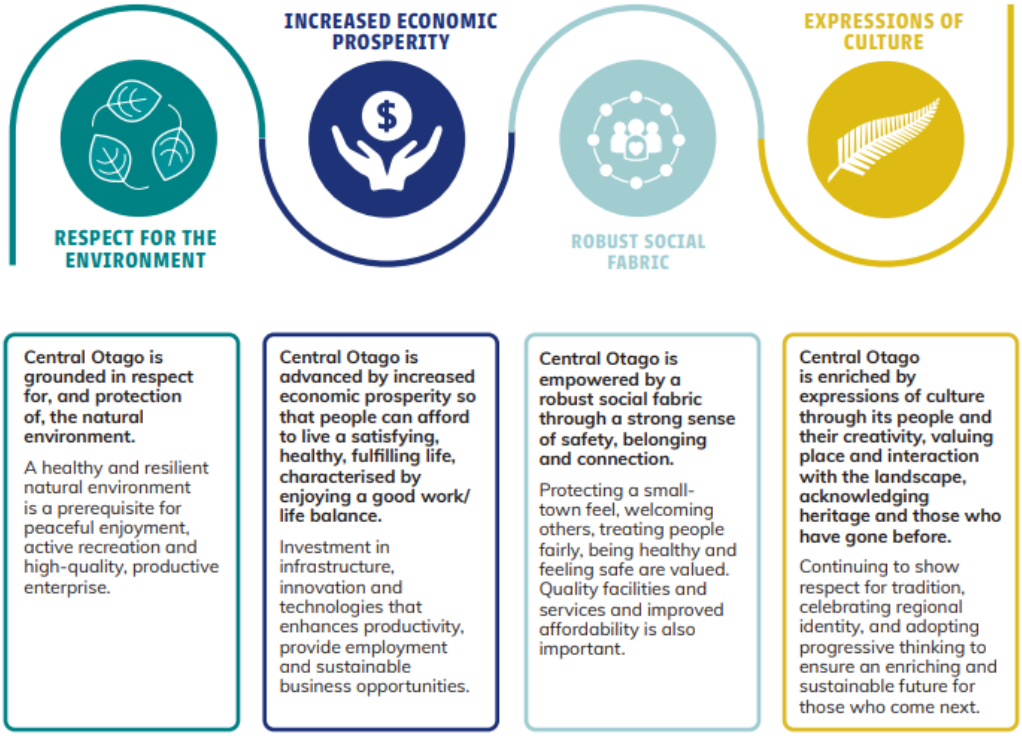
Pools, Parks and Cemeteries

Pools, Parks and Cemeteries



About our Activity

Access to parks, reserves, rivers and recreational facilities is important for our communities' well-being and maintaining a variety of high-quality open spaces helps to make our district an attractive place to live, work and play. Our swim centres provide a place for people to recreate and learn to swim, particularly for our young people. We manage the Cromwell Pool and Alexandra Pool directly, along with a summer pool in Ranfurly. [content to be revised following Council deliberations on the Alexandra outdoor pool and Roxburgh Pool]

Council's parks and recreation team also looks after 13 sports grounds and domains, eight cycling and walking tracks, three skateboard facilities, a bike park, approximately 7,000 trees, 31 playgrounds, and we maintain 268 hectares of reserve land.

The provision of cemeteries is an important function which we undertake on behalf of the community. We are responsible for nine cemeteries in our district, and cemetery trusts manage the other cemeteries.

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Looking Ahead

The Alexandra Riverside Park project, now named Kāmoanahaehae - Riverside Park has got underway and stage 1 will be completed during the course of this long-term plan. The dual naming reflects the Kāi Tahu name for the site where the two rivers meet.

Naseby Cemetery is being expanded to make way for new plots with the removal of a number of trees.

Cromwell Cemetery will be expanded, with stage 1 to commence on the western side in 2026.

The Half Mile wilding conifer removal and restoration has continued with planting and establishment of recreational spaces with more work to take over the 2025 winter.

Significant Negative Effects

Significant negative effect	How we are addressing this
Keeping our lawns and gardens green requires a high volume of water for seasonal irrigation.	Current community demand is for irrigated lawns and gardens. Council will reduce the cost of supplying this water by sourcing non-reticulated water for the irrigation of green spaces.

Property and
Community Facilities

Property and Community Facilities

About our Activity

Our community facilities and buildings provide local community hubs for social, sporting and cultural interaction. The Council owns 35 halls, pavilions, theatres and swimming pools for community use. Several halls are administered on Councils behalf by hall committees. Also, some halls are owned and operated by independent hall societies.

We provide:

- Community housing, predominantly for the elderly. Council owns 98 flats located in Alexandra, Clyde, Cromwell, Ranfurly and Roxburgh.
- Public toilets in towns across the district and at recreation facilities and parks, to meet the needs of the community and visitors to our district.
- A main operational office and customer service centre in Alexandra, and service centres in Cromwell, Ranfurly and Roxburgh.

We manage the assets at the airports at Alexandra, Cromwell and Roxburgh. The users are generally recreational private pilots and some commercial users.

We own and lease a variety of commercial and farm properties and develop land for sale. The income from commercial property is used to fund other Council costs.

We hold a number of land parcels, currently being used as forestry blocks. These forests also provide an amenity value for the community for walking and biking. Some have potential for other land use in the future as recognised by their zonings in the Central Otago District Plan.

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Central Otago is grounded in respect for, and protection of, the natural environment.

A healthy and resilient natural environment is a prerequisite for peaceful enjoyment, active recreation and high-quality, productive enterprise.

Central Otago is advanced by increased economic prosperity so that people can afford to live a satisfying, healthy, fulfilling life, characterised by enjoying a good work/ life balance.

Investment in infrastructure, innovation and technologies that enhances productivity, provide employment and sustainable business opportunities.

Central Otago is empowered by a robust social fabric through a strong sense of safety, belonging and connection.

Protecting a small-town feel, welcoming others, treating people fairly, being healthy and feeling safe are valued. Quality facilities and services and improved affordability is also important.

Central Otago is enriched by expressions of culture through its people and their creativity, valuing place and interaction with the landscape, acknowledging heritage and those who have gone before.

Continuing to show respect for tradition, celebrating regional identity, and adopting progressive thinking to ensure an enriching and sustainable future for those who come next.

Looking Ahead

The main challenges facing the property activity stem from maintaining an ageing asset base within higher regulatory standards and meeting changing demands as our community grows.

Council manages many community halls and public facilities requiring significant maintenance and upgrades, including earthquake-proofing and enhanced fire and accessibility features. Many community buildings were built as government-funded war memorials and once central to community life, these halls now see significantly reduced usage. Council has allocated approximately $19.8 million over nine years to upgrade community buildings.

Council has resolved to fund $5.63 million for maintenance, renewal work and earthquake strengthening from board reserves for the Molyneux Stadium in the 2025/34 Long-term Plan (LTP).

Given the numerous funding priorities facing Council, and the comparatively low usage of some community facility buildings, the case for divestment was consulted on with the community, to gauge whether the Council should continue to fund their maintenance and upgrades. Any enhancements would necessitate raising rates to secure the required financing. The investment in these upgrades has been further deferred until years 2, 3 and 4 of the LTP to allow robust community consultation on future viability and possible divestment opportunities. [final text to be reviewed post deliberations]

Demand for general aviation and hangar sites remains strong at Alexandra Airport. Additional aircraft hangars were planned for 2021/22 but were delayed due to lack of water supply capacity and delays in being able to connect to the Lake Dunstan water supply. Demand for hangars had reduced slightly and so the development of additional hangars has been deferred until 2026/27 and will be reviewed if there is insufficient demand. Two new commercial hangar sites have been developed and leased to aviation related businesses which will be funded through additional rental income. All future developments are expected to be funded through rental income as part of the broader strategy for rates neutrality at the airport.

Public toilets will continue to be provided in areas within the district as deemed appropriate and where there is demand. New or refurbished toilets are planned for Naseby and will provide an improved experience for visitors as has taken place in Tarras, Cromwell, Clyde and Ranfurly in recent years. New toilets will continue to comply with accessibility requirements and will have unisex cubicles. Alexandra’s Molyneux Park toilet was scheduled to receive a full internal refurbishment or replacement. This has not been completed but is still planned, however due to deterioration, we may need to replace.

The demolition of the old Cromwell Memorial Hall and construction of the new Cromwell Memorial Hall commenced in May-June 2024. The new hall and events centre is estimated to cost $45.8m. Solid progress is being made on the construction of this new landmark building.

The Cromwell Community Board has developed a master plan including spatial planning initiatives and other initiatives with regard to rejuvenating the Cromwell Town Centre (Cromwell Town Centre Development project) estimated to cost $39.1 million, and has been identified in the draft Long-term Plan 2025/34. Land holdings in Cromwell will be a key funding source for initiatives.

Bannockburn industrial, an area of 52 hectares in Cromwell, is in the early stages of planning, with scheme plan design and financial modelling to reflect market interest, which will inform development timelines. Council is looking to develop the site in stages enabling progressive development within resource and investment constraints.

During the course of this long-term plan we will be rebuilding the Roxburgh Entertainment Centre following the complete loss of this building in February 2025.

Significant Negative Effects

There are no significant negative effects relating to this activity.

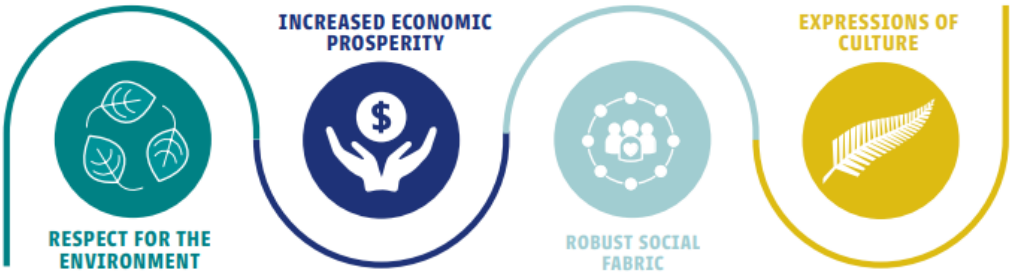
Service Centres and Libraries

Service Centres and Libraries

About our Activity



Council provides a front-line customer services team in its main Alexandra office and its three service centres in Cromwell, Roxburgh and Ranfurly.

We aim to give our community the best customer experience; one where they are put first and provided with fast, efficient, accurate and friendly results.

We aim to deliver the highest quality library service to meet our community's informational, educational, recreational and cultural needs. We provide a joint library service with Queenstown Lakes District Council.

In our district, we run libraries in Alexandra, Clyde, Cromwell and Roxburgh, and we have a partnership with schools in Millers Flat, Omakau and Maniototo.

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Central Otago is grounded in respect for, and protection of, the natural environment.

A healthy and resilient natural environment is a prerequisite for peaceful enjoyment, active recreation and high-quality, productive enterprise.

Central Otago is advanced by increased economic prosperity so that people can afford to live a satisfying, healthy, fulfilling life, characterised by enjoying a good work/ life balance.

Investment in infrastructure, innovation and technologies that enhances productivity, provide employment and sustainable business opportunities.

Central Otago is empowered by a robust social fabric through a strong sense of safety, belonging and connection.

Protecting a small-town feel, welcoming others, treating people fairly, being healthy and feeling safe are valued. Quality facilities and services and improved affordability is also important.

Central Otago is enriched by expressions of culture through its people and their creativity, valuing place and interaction with the landscape, acknowledging heritage and those who have gone before.

Continuing to show respect for tradition, celebrating regional identity, and adopting progressive thinking to ensure an enriching and sustainable future for those who come next.

Looking Ahead

Libraries

What we know from the past 20 years is that libraries are ‘not just books’ and how much our services and activities are being used, from photocopying and wifi, to attending library-based events.

We are growing our online services and recently launched our own Central Otago Libraries website, which we will continue to build.

Our aims over the next few years are to:

- Develop a Central Otago Libraries Strategy
- Build existing collections to meet community preferences
- Increase outreach services
- Furniture refresh for Cromwell Library
- Maximise awareness and use of digital platforms and library services.

Service Centres/Customer Services

Our customer services team will continue to look at ways we can enhance the service we deliver. A key way we will do this is growing our online services offering – online forms, payments and services – through the recently refreshed Council website.

In the next few years, are top priorities are:

- Genesys Contact Centre AI development
- FAQ knowledge base project
- Customer Resolutions project
- Genesys Contact Centre SMS project
- Level of service review.

Significant Negative Effects

Significant negative effect	How we are addressing this
The ageing library buildings are a concern, because their condition restricts our ability to create a modern community hub. Another repercussion of no modernisation is the negative impact this can have when we are trying to extend our customer base within the wider community.	Putting upgrades into future planning.

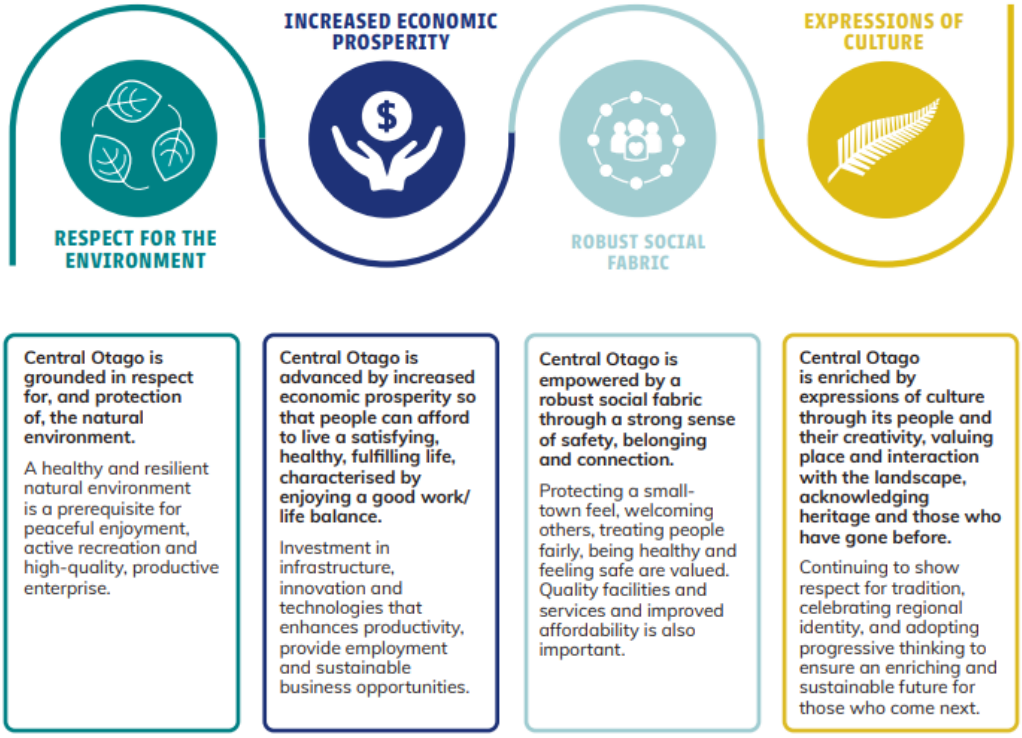
Community, Economic and
Strategic Development

Community, Economic and Strategic Development

About our Activity

Our community, economic and strategic development activities support a thriving and resilient community by enabling business and community-driven initiatives that align with Central Otago.

Council's Community Development programme supports and enables our local communities to define what is important to them and to drive the projects they are passionate about. Council provides a helping hand to a number of community-driven initiatives each year by issuing grants. These are allocated to groups wishing to host cultural, creative, sporting and community-based events or initiatives that meet identified community needs and strengthen community well-being.



The vision that drives Council's Economic Development effort is that Central Otago is a place of dynamic business, creative innovative talent, and where visitors and locals come to experience a world of difference. The Council's role in essence is that of an enabler, directly in terms of the various activities Council actually controls, in areas where it can influence through facilitation, coordination, provision of support services, grants and seed funding, and where it is able to apply interest via advocacy, lobbying and education.

Tourism Central Otago (TCO) is the Regional Tourism Organisation (RTO) for Central Otago. Our role is to coordinate and facilitate the management and marketing of Central Otago as a visitor destination for the benefit of our communities. This work is guided by the Central Otago Destination Management Plan (DMP), which outlines the aspiration of our communities and mana whenua for how tourism can enrich our communities' outcomes. Our marketing activity aims to attract visitors who want truly authentic Central Otago experiences, increasing the spread and spend of visitors throughout the district.

Our strategy and policy function is responsible for developing and articulating direction on key strategic issues and ensures that the organisation has robust and meaningful policies in place to guide organisational decision making.

We want to make sure our communities are involved in these decisions and activities – that people are kept up to date and are able to easily take part in Council engagement processes. Our communications team provides timely and accurate information and works to create meaningful opportunities for community involvement.

THIS ACTIVITY CONTRIBUTES TO THE FOLLOWING COMMUNITY OUTCOMES

Looking Ahead

Central Otago – *Our Place in the World* sets out a 50-year vision for Central Otago. It expresses the aspirations of the people of Central Otago and ensures that these aspirations are included as the foundation for future strategy and policy development. Over the next two years, the community, economic and strategic development activities will give effect to the district vision. This includes developing a set of indicators so that progress towards the vision can be tracked and the community can see if the district is moving in the right direction.

Work will be completed on adopting, then implementing, a new Economic Development Strategy for Central Otago, providing a clear framework to guide Central Otago towards sustainable, inclusive growth while preserving the unique values and identity that make Central Otago exceptional.

The District Vision is informing a refresh of *Central Otago A World of Difference*. The research undertaken for the District Vision confirmed that our regional identity values are enduring and are as relevant today as they were when they were created. Staff are working alongside Aukaha to ensure that the values continue to be expressed in a contemporary way.

We will be working with the Teviot Valley and Ranfurly communities to update their community plans.

In 2025 and 2026, Tourism Central Otago will enhance partnerships with neighbouring RTOs and national tourism entities to accelerate business and industry activity and encourage best practice collaboration. This includes continuing to lead the Otago Trails Marketing Group and to play a key role in the Southern Way collaboration, which promotes the best of NZ scenery and experiences in the lower South Island.

Improving how Council communicates and engages with our communities continues to be an area of focus and over the next two years, staff will investigate current and new possibilities with the intent of developing a new Communications Strategy for Council.

Significant Negative Effects

Significant negative effect	How we are addressing this
The high cost and time commitment of consultation and community engagement processes.	Using the most cost-effective means available, while keeping in consideration the need to seek out a varied audience. The proposed Communications Strategy will explore this further.
Long-term planning limits responsiveness to new opportunities.	Frequently undertaking environmental scans to plan ahead as much as possible and use the Annual Plan process for these new opportunities if elected members deem they are significant enough.

Governance
and Corporate Services

Governance and Corporate Services

About our Activity

The corporate services activities provide support across the organisation which allows Council to function efficiently and effectively. It includes people and culture, the office of the CEO, finance, information services, audit, legal and risk and procurement.

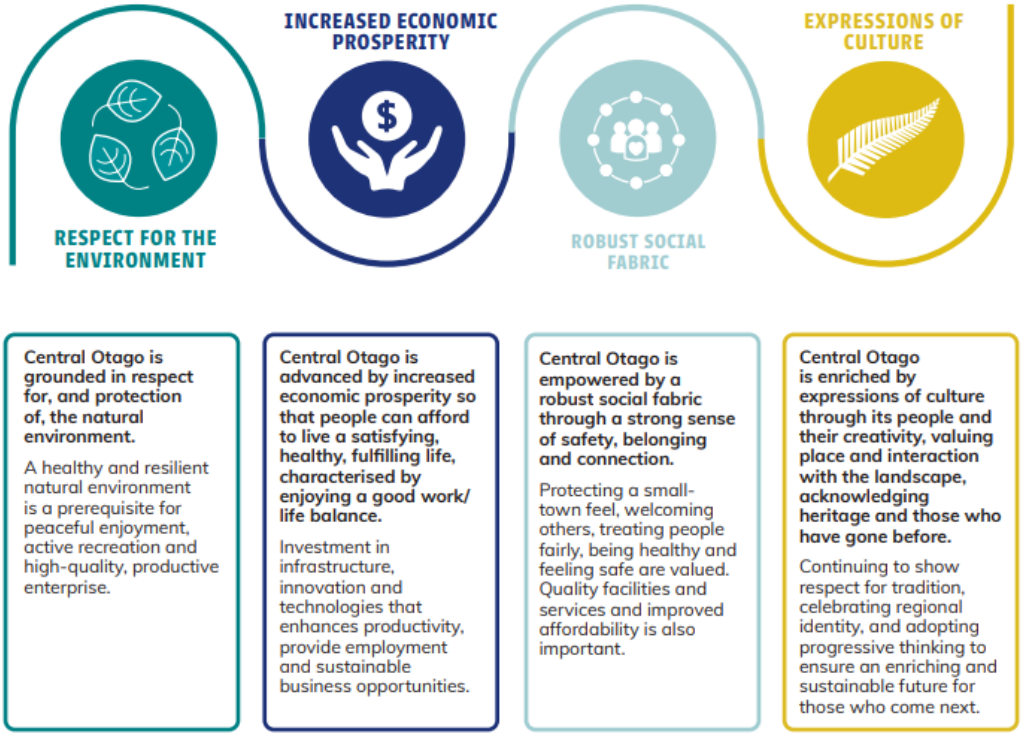
The governance activity supports elected members to be effective decision-makers. Within this activity, we facilitate and support Council and community boards, ensure agendas are published and available to the public, and run local body elections every three years.

We have a responsibility to plan and provide for civil defence emergency management within the district. Civil defence and emergency management is undertaken collaboratively across the Otago Region. Emergency management staff are employed by the Otago Regional Council. Otago Civil Defence Emergency Management provide emergency management planning, systems, and training. Two Emergency Management officers are dedicated to the Central Otago District area.

Looking Ahead

During the period of this Long-term Plan, we will hold local government elections in 2025 and 2028.

Our governance team will work to explore the continuous improvement of technology to increase civic engagement, accessibility and transparency. We will administer elections in 2025 and 2028, with a focus on providing elected members with the tools they need to make informed decisions.



Information Services will continue to lead and enable Council's digital journey. The focus will shift to optimisation, using what we have better, through the process automation and data driven decision making. Information Services will continue to maintain secure, stable, and accessible information and information systems.

Finance will continue to support the organisation in preparing for, and meeting its statutory obligations such as Annual Reports, Annual and Long-term plans, and the setting of rates. We will continue to refine and enhance financial reports to provide assurance to our elected members and community that the organisation is operating prudently and within the agreed budgets. We will endeavour to raise the level of financial acumen across the organisation by providing specialist advice and training to the business.

The Risk and Procurement function will focus on further improving procurement practices, embedding risk management throughout the organisation, and supporting corporate development.

People and Culture are committed to fostering a culture that prioritises the strengthening capabilities, the enhancement of Health and Safety and the cultivation of a positive environment. We believe in empowering each individual and in the period of this long-term plan will continue to develop and promote the tools and resources necessary for our staff to reach their full potential.

Strategies

Infrastructure Strategy

Preface

Council has taken the approach that it will transfer its three waters assets into a Council Controlled Organisation (CCO) and may see Councils across the region joining. If other Councils do not join, then the CCO will be operated by CODC alone. This has been reflected in year two and year three of the LTP with the water activities being transferred at the end of year two and no longer being reflected in the operations of Council from year three onwards.

Despite this future direction for three waters this strategy has been prepared with these activities included for the full 30 years of the strategy. In the future the new water organisation will have to prepare a Water Strategy and at that point the three water activities will be removed from council's infrastructure strategy.

Executive Summary

The provision of fit for purpose and functioning infrastructure provides the foundation on which our communities are built.

Infrastructure directly shapes the way we live, travel, recreate and work. Council owned infrastructure includes water supply, wastewater, stormwater and our local transport network, and is essential to delivering the activities that keep our communities connected, healthy and functioning.

Core infrastructure has considerable physical size, a long life span and significant financial cost, which means that getting it right is important, not just for our current population, but generations to come.

Central Otago District Council (Council) owns, manages and maintains an infrastructure portfolio worth over $1.2 billion. This includes assets such as 1,926km of roads, 188km of footpaths, 173 bridges, 468km of water supply reticulation, 284km of sewer mains, 81km of stormwater mains, 56 pump stations and 15 treatment plants.

Central Otago covers an area of 9,969 square kilometres and, due to our rural nature, we have one of the lowest population densities in New Zealand. Our relatively small and disperse population means providing and improving infrastructure, while ensuring it remains affordable can be difficult.

Our district has experienced a prolonged period of population growth, which continues today. Between the 2018 and 2023 censuses, the resident population grew by 3.2% p.a. (from 22,200 to 26,000) and in 2024 the estimated population of the district is projected to be 26,500 people.

Ensuring our communities have access to safe, reliable infrastructure is a core priority for our council. At the same time, we need to provide for growth and fund essential maintenance and improvements across the district.

While this can be a challenging mix to get right, the following infrastructure strategy seeks to outline the key issues and challenges faced, our strategic priorities across the infrastructure networks and how we plan to deliver our goals over a 30 year work programme.

Council has developed a comprehensive approach to navigate the intersecting challenges of aging infrastructure, financial constraints, increased demands, and the necessity for sustainable, resilient community infrastructure

There are a number of key decisions required across roading and three waters in the short term. Work undertaken over the next 18 months will directly inform the strategic decisions and priorities to be considered in the 2027 - 2037 Long-term Plan (LTP).

For roading, Council's Bridge Strategy and the development of an Unsealed Roads Strategy will provide the framework for guiding decisions on asset renewals, upgrades, and potential rationalisation.

A key focus during this period will be CODC's bid for NZTA co-funding in 2027, which will significantly impact CODC's ability to proceed with planned bridge replacements. Present Value End of Life (PVEOL) assessments will help build the case of co-investment. If funding is secured, Council can move forward with a structured programme of renewals and improvements. If not, difficult decisions will need to be made, whether to delay projects, seek alternative funding sources e.g. debt funding, implement lower-cost solutions or rely on alternative access routes.

For three waters, Council is consulting the public on two new entity options under Central Governments Local Water Done Well Policy, a Single Council CCO or a Multi Council CCO. The new entity is planned to be established by 01 July 2027, from then on any significant decisions on water infrastructure will be the responsibility of the new entity, not Council.

What is the Infrastructure Strategy?

All Councils are required to develop an Infrastructure Strategy under Section 101B of the Local Government Act 2002.

This Strategy identifies and provides information about the significant infrastructure issues that the Central Otago District will face over the next 30 years and outlines the principal options and implications for managing those challenges.

The Strategy is an indicative estimate of Council's future infrastructure needs and a statement of current assumptions and thinking on what infrastructure will be required to address the major issues facing the district over the next 30 years. It includes what to prioritise, and identifies risks associated with infrastructure provision and investment.

The infrastructure strategy aligns to and should be read alongside other strategic documents such as the financial strategy and the Long-term Plan. Together they provide the strategic framework for the more detailed activity management plans.

This Infrastructure Strategy has been structured as shown in the diagram below.

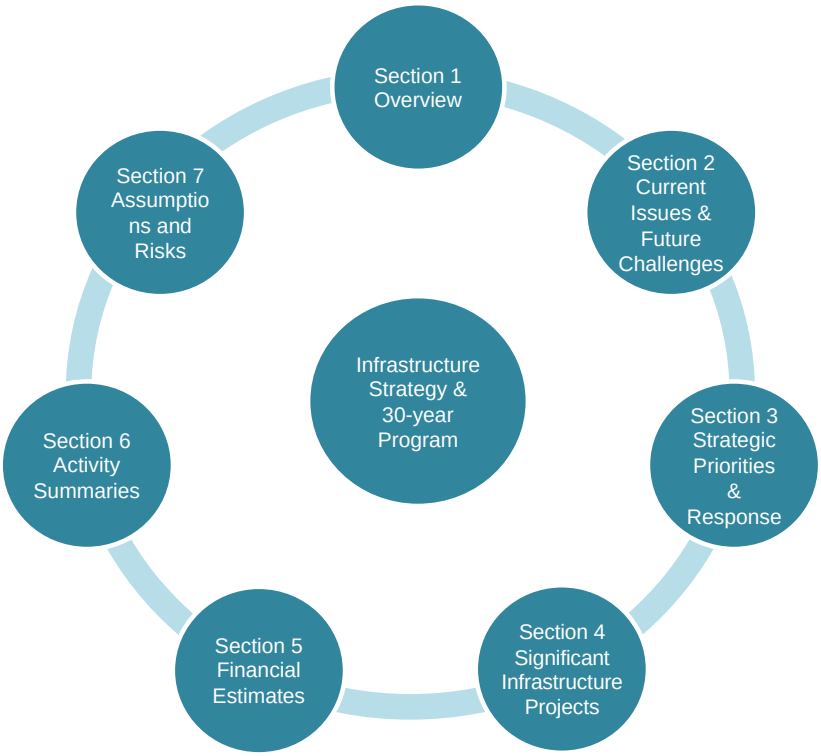

Figure 1: Infrastructure Strategy Components

Key issues and future challenges:

The current issues and future challenges for Central Otago's three waters and roading infrastructure include:

Compliance with changing legislation

Council is required by legislation to continue compliance with the Water Services Act and investment in assets and resources to meet the Drinking-water Standards for New Zealand (DWSNZ) and environmental standards.

Central Government's three waters reform programme has changed from 'Affordable Water' to 'Local Water Done Well'. This requires Council to focus on:

- Providing financially sustainable water services
- Ensuring water quality i.e. safe, reliable drinking water
- Improved management of wastewater and stormwater services

A core part of the 'Local Water Done Well' reform programme requires Council to develop of a plan on how we will transition to a new water services model that meets water quality and infrastructure investment rules, while being financially sustainable in the long term.

Similarly, with transport there is unpredictability in funding priorities due to changes in Government and subsequent changes to the Government Policy Statement on land transport (GPS). Shifting national priorities impacts local budgets, timelines, and strategic planning create ongoing uncertainties for Council budgets.

Meeting greater expectations around environmental impacts

Public expectations regarding how we manage the environmental impacts from infrastructure services have increased over the past decade and this is supported by government freshwater reforms, supporting legislation, changes to regional policies and plans, and increased compliance reporting and monitoring. Improved outcomes and increasing compliance expectations come with an increased cost.

Council operates our wastewater systems under resource consents granted by the Otago Regional Council. These consents apply to wastewater collection and discharge and require significant sampling, monitoring, operation and maintenance methodologies and regular reporting.

Population growth and demographic change

Central Otago district has experienced a period of rapid and prolonged population growth since 2013. This places ever increasing demands on existing infrastructure, and requires us to provide greater capacity for an increasing population.

Growth in the number of dwellings appears to be following growth in our resident population, although at a slightly lower rate.

At present, 60.8% of Central Otago District's population is of working age (15-64), 15.4% are aged 0-14, and 23.8% are aged 65 and over. The proportion of those aged over 65 is expected to increase over the next 30 years.

An ageing population may result in demand for additional smaller properties such as single person units and retirement villages. As a result, the demand for individual water connections is likely to increase. Single person households have a higher per capita water consumption as economies of scale are lost. As a result, demand for water is likely to increase.

An aging and deteriorating bridge network

We are facing significant challenges in maintaining the affordability and resilience of the district's aging bridge network.

The district's network comprises 173 bridges, with 58 expected to reach their economic end of life in the next 30 years, many situated on less-travelled roads with alternative routes available.

At least 30 of the bridges (representing 17% of the network) across the district will reach the end of their useful lives within the next 10 years. This presents a significant cost and a substantial funding gap.

An estimated $20 million is required for full replacement of these bridges, which is considerably more than the $9.8 million currently allocated in the budget for this LTP and further burdened by a $3.9 million bridge maintenance backlog.

Compounding this, the increasing number and weight of trucks, spurred by regulatory changes and agricultural productivity improvements, are adding to the strain on these structures.

Water source reliability

Our District has an arid climate and limited sources of water. The demand for water is very high and is closely associated with development. Industrial, agricultural, business and residential development all depend on the availability, quantity and quality of water.

Development in one sector ultimately has a flow on effect onto other sectors. This needs to be balanced to ensure there is adequate water across the district. Both for existing sectors, and to provide for growth.

The sustainable and efficient management of water in the District is expected to become increasingly important. There is a high demand for water as it is essential for human consumption, economic activity and stock habitation.

It is anticipated that the effects of climate change will result in increased frequency and intensity of severe weather events such as severe droughts and floods. It is essential that Council understands the effects of climate change and integrates these into the standard council considerations to provide a resilient water supply network. In particular, Council has seen a number of increased boil water notices due to turbidity events:

- Omakau/Ophir Water Treatment Plant Upgrade - The raw water for Omakau/Ophir is a surface water source and is vulnerable to turbidity following rain. High turbidity events result in plant shut down and the issuing of a boil water notice. The supply is also vulnerable to low river flow during summer when water restrictions may be required. The treatment upgrade will provide a more a resilient and compliant water supply.
- Ranfurly Water Supply - There is no protozoal treatment in the Ranfurly supply, and it is frequently impacted by elevated turbidity caused by weather events. During a wet weather event the treatment plant inhibits for extended periods until the source water is back within treatable limits. These events can result in a Boil Water Notice for the community. Since 2022 the Ranfurly community has eight days of boil water requirements.
- Patearoa Water Supply - In April 2023 a rain event caused increased organic matter in the source water. A boil water notice was put in place for seven days as a response to non-compliance with chlorine levels.

It will remain critical to ensure water supplies are resilient to frequent natural events, adequate response plans are in place for less frequent events, and water supply is reliable at a consistently adequate pressure, flow and quality.

A shortage of technically skilled people

The technical nature of infrastructure means it can be difficult to find the highly skilled people to help manage it on Council’s behalf.

Council's Three Waters Unit has traditionally been under-resourced. The Three Waters reform programme and ever-expanding environmental compliance requirements continues to place increased demand on our team. Internal changes and efforts to attract suitably qualified candidates have been successful, but finding and maintaining our team remains a challenge.

It is likely that a shortage of technically skilled people to design, construct and manage water assets will continue to have an impact on this activity in future years. This is a global issue which is also affecting other local authorities as this is a highly competitive market. Council will have to compete with other Councils and companies for a limited pool of suitably skilled and experienced engineers.

Affordability of infrastructure services

The industry has seen increased costs as a result of inflation, increasing standards, operations and maintenance requirements, monitoring costs and training and qualification requirements.

The value of Council's water and roading infrastructure increased from $895 million in 2021, to over $1.2 billion in 2025.

Roading costs have surged by 10-20% within the last three years. Rising traffic demands and material shortages are driving up costs, with a backlog in renewals and heavy vehicle traffic adding further strain.

This substantial increase in costs presents a critical issue for CODC's budgeting and planning. Without appropriate adjustments to the budget, the real output of the Roading program is at risk of a corresponding decline. Such a reduction could lead to service level reductions, as the district would find it difficult to maintain, renew, and enhance its road network within the constraints of the current budget.

Council's budget has been revised to accommodate the escalated costs, ensuring the continuation of vital road services and infrastructure upkeep.

Strategic priorities & response

This Infrastructure Strategy sets out the 30-year plan for maintaining and improving levels of services across our transport and water networks. With increasing pressures on the financial sustainability and affordability of infrastructure services, not all investment can be undertaken.

Level of Service Outcomes

Six level of service outcomes developed by Council have been used to plan for and prioritise infrastructure investment over the next 30 years. The outcomes are:

- Safe and healthy infrastructure
- Providing for accessibility and growth
- Ensuring resilience and reliability
- Caring for our environment and sustainability
- Community aesthetics
- Undertaking renewals.

Strategic priorities

The strategic priorities identified to address the current issues and future challenges are as follows:

1. Meet minimum standards for water and wastewater compliance
2. Provide infrastructure required to service growth
3. Maintain existing infrastructure in the most cost-effective manner

Meet minimum standards for water and wastewater compliance

Council is committed to complying with the minimum standards set by regulators for both water and wastewater. This will ensure all council supplied water and wastewater schemes are safe, reliable and resilient.

Some of the key projects over the next 10 years to help Council meet minimum standards include.

Installing protozoa barriers:

- Replacement of Protozoa barriers for water treatment upgrades (Cromwell).
- Replacement of the protozoa barrier in Ranfurly as the water supply does not comply with DWSNZ and the source water has significant issues - Council has received notification from Taumata Arowai that a protozoa barrier was required to be in place by December 2024.
- Upgrade to the Patearoa water treatment facility, providing protozoa barriers and inlet screen under the riverbed which had collapsed.

Addressing water source reliability:

- A new water treatment plant for Omakau and Ophir.
- Replacing the Roxburgh reservoir and increasing capacity as the existing tank only has several hours of storage during peak demand. Roxburgh also requires an alternative water source as sediment is entering the bore field from the Clutha River, resulting in non-compliance.
- New bulk water take points across the district to enable tankers to refill while complying with the DWSNZ.

Meeting new wastewater environmental performance standards:

- Treatment upgrades at the Cromwell treatment plant for nitrogen removal will be required to ensure the impacts of additional loading due to population growth does not negatively impact on the quality of discharges.
- Identify alternative treatment and discharge for the Alexandra treatment plant, which is discharging into the Clutha Matau River. Consent expires within the next five years.
- Purchase of critical plant spares to help mitigate consequences of failure while the treatment plant upgrades are underway in Alexandra and Clyde.

- The Naseby, Ranfurly and Roxburgh treatment plants are operating under abatement notices – improvements required at all three sites.
- Identifying alternative treatment and discharge for the Omakau treatment plant, which is discharging into the Manuherikia River. Consent expires in 2027.

Provide infrastructure required to service growth

As noted above, investment in infrastructure is required to help facilitate and provide for a growing population. This includes development and upgrades to a range of three waters and transport infrastructure.

Water and wastewater

A number of water and wastewater treatment upgrade projects are proposed to meet legislated standards and provide capacity for growth. These include:

- While the primary driver for treatment upgrades is compliance requirements, these are also needed to support rezoning of land. This is the case in Omakau, where zoning of additional residential land cannot occur until the discharge to the Manuherikia river is addressed.
- In Cromwell nitrogen removal is also now required for the Cromwell wastewater discharge to meet consent requirements. This is due to higher than anticipated growth. This project has been accelerated with construction now programmed in 2024/25.
- Wastewater reticulation for the remaining established areas of Clyde cannot be progressed until an Alexandra treatment upgrade is undertaken. This will limit the opportunities for infill development to occur in Clyde. New greenfield developments in Clyde are expected to be able to be serviced via reticulation and treatment at Alexandra.
- Including capacity for the next 10 years in the initial construction or including future growth needs beyond 10 years in the initial construction when this is most cost-effective way of providing this.
- Significant growth within the Cromwell, Alexandra and Clyde areas requires substantial network upgrades to provide for the increased demand.
- A general increase in population is expected to have only a minor effect on the demand for stormwater services. Intensive developments in the commercial and industrial sectors are more likely to create demand for stormwater services. Increases in demand due to subdivision and land development can be managed through construction standards and financial contributions.

Transport

- Traffic growth in commercial areas is eroding the experience and creating safety issues for active travel road users, visitors and locals. Council aims to maintain the transport planning budget to develop business cases.
- A number of projects planned under the Low-Cost Low-Risk Improvement Program over the next three years have been deferred. This decision reflects a

significant reduction in co-funding support from the New Zealand Transport Agency.

- For roading, where appropriate, all budget scenarios incorporate inflation forecasts and an allowance for network growth.

Maintain existing infrastructure in the most cost-effective manner

Maintaining existing infrastructure ensures it provides acceptable levels of service, and extends its useful life. Council is proposing a range of maintenance activities that are to be carried out in a cost-effective manner, ensuring value for money is provided to our residents and ratepayers.

Water and wastewater

- Safeguarding water source, treatment and distribution systems through optimum replacement of assets nearing the end of operational life. The cost for renewal work (that is - upgrades, refurbishment or replacement of existing facilities and pipes to maintain capacity or performance) is estimated to be:
    - Water Supply - $43 million over the next 10 years.
    - Wastewater - $38 million over the next 10 years.
    - Stormwater – $19 million over the next 10 years
- All renewal work is expected be funded by the annual depreciation provision where funds are available.

Roading

- Council has developed a new Bridge Strategy to help address the significant fiscal challenge. This strategy focuses on prioritising and rationalising bridge funding to reduce the service level gap over the next 30 years. This approach also aims to resolves the existing bridge maintenance backlog within five years.
- Currently, 30 bridges (17% of the network), are nearing end of their service, requiring an estimated $20 million for replacement, against the current budget of $9.8 million for this LTP.
- The plan acknowledges the challenges posed by limited footpath maintenance and renewal funding, which will require a focus on safety-related maintenance and may result in reduced service levels, such as renewing footpaths on only one side of the road or delaying renewal.
- Additionally, reductions in low-cost, low-risk improvement funding will limit the ability to implement enhancements beyond essential works, further emphasizing the focus on maintaining and renewing core infrastructure.

Section 1 - Overview

This is Central Otago District Council's (CODC) fourth infrastructure strategy and has been prepared to meet the requirements of section 101B of the Local Government Act 2002. The infrastructure strategy covers a 30-year period from 2024 to 2054 and is reviewed every three years.

The Local Government Act sets out the requirements of the infrastructure strategy. The strategy must identify the significant infrastructure issues for the Central Otago District for the next 30 years, the options for managing those issues, and the implications of the options.

Council must take into account the need to:

- renew or replace existing assets;
- respond to growth or decline in the demand for services;
- allow for planned increases or decreases in levels of service;
- maintain or improve public health and environmental outcomes or mitigate adverse effects on them;

Provide for the resilience of infrastructure assets by identifying and managing risks relating to natural hazards and by making appropriate financial provision for those risks.

The infrastructure strategy aligns to, and should be read alongside, other strategic documents such as the Financial Strategy and the Long-term Plan. Together they provide the strategic framework for the more detailed Activity Management Plans.

This Infrastructure Strategy has been structured as shown in the diagram below.

Figure 2: Infrastructure Strategy Components

Central Otago Snapshot

Central Otago is New Zealand's most inland region, located in the southern half of the South Island. It is breathtakingly different from the rest of New Zealand, with vast undulating landscapes, rugged snow-capped mountains, clear blue rivers and lakes, deep gorges, and tussock-clad hills.

Figure 3: High level boundary of CODC

Central Otago covers an area of 9,969km2 and has one of the lowest population densities per square kilometre in New Zealand. The community consists of a variety of small towns that are relatively dispersed, approximately half of the population lives in the main townships of Cromwell, Alexandra, and Clyde.

Our district has experienced a prolonged period of population growth, which continues today. Between the 2018 and 2023 censuses, the resident population grew by 3.2% p.a. (from 22,200 to 26,000) and in 2024 the estimated population of the district is projected to be 26,500 people.

Due to its unique landscape, Central Otago is a popular destination for tourists and holidaymakers, and the population increases to a total of 51,900 (residents and visitors) over the summer months.

The Central Otago economy has a strong primary sector, with construction, tourism, hydroelectricity, and professional services other significant contributors. Traditional sheep and beef industries are predominant in the primary sector, and there is a growing and thriving horticultural sector, including stone fruit, viticulture and apples.

Construction is the largest sector by GDP (Gross Domestic Product) and is currently driven by high demand for housing and industrial premises in both Central Otago and the neighbouring Queenstown Lakes area.

The professional, scientific, and technical sector is developing strongly and was the second highest in GDP growth contributor to Central Otago's economy in 2022. Improved communication infrastructure and air services from Queenstown and Dunedin have enabled individuals and companies to service national and international clients while opting for the Central Otago lifestyle.

Almost a quarter of Central Otago workers are self-employed, which is significantly higher than the national average. Central Otago has maintained its high levels of employment over time and the unemployment rate in 2023 was estimated be 1.1% compared to the national average of 3.3%.

The average annual earnings in Central Otago in 2022 was $58,650, which is 16% less than the New Zealand average of $69,585. Despite this, Central Otago has some of the lowest social deprivation in the country, with the rural and townships scoring between 2 and 5 out of 10 on the Social Deprivation Index.

Our Infrastructure Assets

Council owns and manages a large network of drinking water, wastewater, stormwater, roading, community services, waste management, and open space assets to deliver services to its community.

Council does not manage any flood protection and control works. The Otago Regional Council manages these activities within the Central Otago area. Community facilities, parks, properties and waste management have not been included in the infrastructure strategy, however may be included in future years.

The following core infrastructure services have been included in this strategy:

- Water supply
- Sewerage and the treatment and disposal of sewage (wastewater)
- Stormwater drainage
- Roads and footpaths.

The 2024 replacement value for the infrastructure assets covered in this strategy is $1.245 billion.

Asset	Description	Replacement Value	% of total
Water	Water extraction, treatment, and distribution	$232 M	19%
Wastewater	Wastewater collection, treatment, and discharge	$196 M	16%
Stormwater	Stormwater collection and discharge	$58 M	5%
Roads and footpaths	Roads, bridges, footpaths and carparks and associated assets.	$759 M	61%
TOTAL		**$1,245 M**	**100%**

Table 1: Most recent valuation numbers of infrastructure assets included in this strategy

Water Supply

Central Otago District Council's potable water supply network comprises of 468 kilometres of reticulation. There are approximately 10,000 connections which are metered (or operate on a restricted maximum flow). Council also manages nine water intakes, 14 storage facilities and 16 pump stations.

Wastewater

The wastewater network includes 284 kilometres of reticulation, 40 wastewater pump stations and 1,559 manholes. There are seven wastewater treatment plants; four that discharge to water and three that discharge to land.

Stormwater

There are five reticulated stormwater networks. The stormwater reticulated pipe network measures 80.7 kilometres. The remaining stormwater assets which are not part of reticulated networks are included within the roading asset data and valuation.

Roading

The roading assets include 1,926km of roads, with 1,753km of rural roads and 158km of urban streets. 72% of the roads are unsealed, a total length of 1,386km. There are 173 bridges (including five footbridges maintained by Council), 188km of footpaths and greenways and just over 5,300 culverts. The roading assets are contained in approximately 12,000 hectares of road reserve across the district, 3,800 hectares of which is formed and maintained carriageway.

How We Deliver Infrastructure Services

Under the Local Government Act 2002, Council's key role includes promoting 'the social, economic, environmental and cultural well-being of communities in the present and for the future'. In performing its role to meet the needs of the community, Council has a responsibility to deliver cost-effective, good quality local infrastructure. This includes the providing, maintaining and upgrading of core infrastructure services.

Core infrastructure is funded and managed by Council at a district wide level. Governance decisions are also made by Council and reviewed by the Audit and Risk Committee, which consists of the Mayor, three councillors, and an independent representative as chair.

Council's 2021 Asset Management Policy then provides the framework for Council to establish, maintain and improve its Asset Management System. The scope of the planning documents in the Asset Management System (shaded) and the Council planning context that informs, and is informed by, Asset Management Planning is shown below.

An update of the Asset Management Policy is planned for within the first couple of years of this LTP as well as an update of Council's asset management maturity assessment. This will ensure the categories measured align with the categories where targets have been set.

Figure 4 demonstrates (at a high level) the documents included in the Asset Management System, to inform planning and delivery of infrastructure.

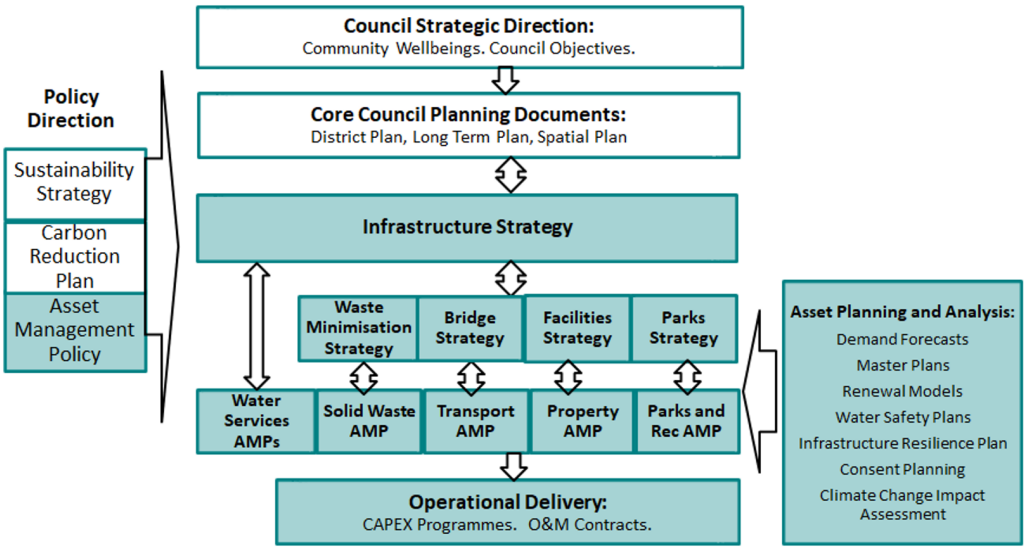

Figure 4: Council's 'Asset Management System' planning documents

Infrastructure Delivery - Reflective, Innovative and Forward Thinking

Central Otago District Council has the second lowest cost roading network in New Zealand. This has in part been achieved through a culture of reflection, and making changes in practices to improve service based on customer feedback and learnings. An all-inclusive, collaborative contracting model has been in place on roading since 2009, and this has provided a culture where ideas and innovative practices have been encouraged from both the contractor and council staff.

The three waters maintenance contract is a traditional contracting model with lump sum and unit rate payment methods. This contracting model, combined with management capacity challenges has resulted in less innovation in the delivery of three waters maintenance.

Construction and renewal work are undertaken by contractors on a project-by-project basis. If difficulties are experienced in attracting contractors to tender for work, or there are not sufficient contractors available to undertake the work, alternative approaches should be considered. Small projects could be undertaken in association with the Operations and Maintenance Contract, or work could be bundled to provide an attractive package. Council may also consider a preferred supplier approach where an alliance is formed with one or several contractors and prices are negotiated for project (e.g. target price method).

For large capital improvements, a variety of contracting models, including design build and maintain, collaborative, and traditional are being used. The procurement model selected for each project depends on the understanding of risks and cost-effective allocation of these, and the capability and capacity of the contracting market to deliver the work. Significant investigation work is undertaken on large capital improvement projects to ensure that innovative designs can be implemented, while still managing risk.

Project Management Framework

This framework has been developed as a tool to help manage all Council-led projects. The concepts and templates are designed to be used for both internal and external projects and for projects of varying size and complexity. By having one Council-wide system in place we can make sure that all of our projects are

consistently managed using the same basic principles. A risk management approach is also introduced to avoid unexpected budget and time overruns. The steps outlined in the framework are to be applied to all projects.

The Business Case is a key step in project development as it establishes whether or not the more complex and higher risk projects should go ahead, and how it should be carried out. If this step in the process is not adequately followed, then the project design and implementation phases may be hampered from the start (e.g. project could reach the design brief stage without adequate consideration of realistic timeframes, budget etc.).

The Policy Context

There are a number of national policies, plans and legislation that set the scene for Council's 30-year Infrastructure Strategy. Change is constant, and council regularly reviews the regulatory environment that influences future requirements and opportunities for delivering infrastructure services.

National Direction

Community Well-beings

The Local Government (Community Well-being) Amendment Act was adopted in May 2019. This provides for local authorities to play a broad role in promoting the social, economic, environmental, and cultural well-being of their communities, taking a sustainable development approach. The well-beings have been incorporated into a review of the Central Otago Community Outcomes, which are detailed in Section 3.

Note that in 2024, Central Government indicated they intend to remove community wellbeing's from legislation. There is no indication that this will impact Council's commitment to its current community outcomes, or delivery of core infrastructure services.

Three Waters

The national three waters policy landscape has been evolving since 2020. Following the recent repeal of the previous Three Waters Reform Programme, the Government has commenced further changes to the sector through its Local Water Done Well policy framework.

Under Local Water Done Well, the newly enacted Local Government (Water Services Preliminary Arrangements) Act 2024 establishes legislative requirements for the water services system. The Act requires Territorial Authorities to prepare, either individually or with other Councils, Water Services Delivery Plans by 3 September 2025. These plans must:

- Explain the current state of CODC's water services;

- Demonstrate a commitment to deliver water services in a way that ensures compliance with all regulatory quality standards; is financially sustainable; and supports growth;
- Explain the model or arrangements for delivering water services;
- Ensure revenue from water services is ring-fenced from CODC's other functions and activities;
- Include an implementation plan;

Cover a period of not less than 10 consecutive financial years starting from 2024/25.

The latest Local Government (Water Services) Bill (December 2024) ("The Bill") provides for:

- Arrangements for the new water services delivery system.
- A new economic regulation and consumer protection regime for water services; and
- Changes to the water quality regulatory framework and the water services regulator.

Under the new economic regulation regime for water services, the Commerce Commission will have a range of regulatory options, including:

- Information disclosure regulation;
- Revenue threshold regulation;
- Quality regulation;
- Performance requirement regulation;
- Price-quality regulation.

The Commission will also enforce a new 'ring-fencing' rule, under which regulated suppliers will be required to spend the revenue they receive from providing water services on providing those services.

The Bill amends the Water Services Act and the Resource Management Act to provide for a single standard for wastewater and stormwater environmental performance. This will ensure regional councils implement a single approach to resource consents, with a mechanism for exceptions. Regional councils will be unable to set additional requirements either higher or lower than the standard.

The Bill introduces a mechanism for establishing mandatory national engineering design standards to ensure consistent standards for the design and construction of water network infrastructure.

In addition to Local Water Done Well, it is anticipated that the following legislation and regulation will remain in place for the foreseeable future and continue to influence Council's three waters investment:

Water Services Act 2021: This sets out the regulatory framework to ensure drinking water suppliers (including CODC) provide safe drinking water to consumers. Under the Act, CODC has responsibilities for ensuring drinking water meets established standards, for developing and implementing drinking water safety plans, and identifying and managing risks to source water. It also provides Taumata Arowai with the regulatory tools to enforce consequences on water suppliers who do not satisfy their duty to provide safe drinking water. The Local Government (Water Services) Bill includes changes to the Water Services Act 2021 to

reduce the regulatory burden of the drinking water quality regime and improve proportionality in the application of regulatory powers.

National Policy Statement for Freshwater Management 2020 (NPS-FM): This provides CODCs with direction on how to manage freshwater under the Resource Management Act 1991 (RMA). It places emphasis on Te Mana o te Wai – working with mana whenua and prioritising the health and wellbeing of water bodies over the use of water bodies.

While currently still in effect, as at the time of drafting this document, the Local Government (Water Services) Bill repeals the requirements in water services legislation to give effect to Te Mana o te Wai, and Government has signalled its intention to replace the NPS-FM.

Roading

The Government Policy Statement on Land Transport 2024 (GPS) was published on June 27, 2024. It reflects the transport priorities of the newly elected government and will guide investments from the National Land Transport Fund over the next decade.

The GPS focuses on four strategic priorities, which shape the delivery of its goals:

- Economic Growth and Productivity (Overarching Strategic Priority)
- Increased Maintenance and Resilience
- Safety
- Value for Money

While Economic Growth and Productivity serves as the overarching strategic priority, the other three—Increased Maintenance and Resilience, Safety, and Value for Money—are equally weighted. Together, these priorities aim to deliver a transport system that supports economic growth and productivity.

The strategic priorities and their expected outcomes are summarised in the table below:

Table 2: GPS on land transport strategic priorities and expected outcomes

Strategic Priority	Description	Expected Outcomes
Economic Growth & Productivity	Efficient investment in land transport connects people and freight quickly and safely, supporting economic growth and creating social and economic opportunities including access to land for housing growth.	• Reduced journey times and increased travel time reliability. • Less congestion and increased patronage on public transport. • Improved access to markets, employment and areas that contribute to economic growth. • More efficient supply chains for freight. • Unlocked access to greenfield land for housing development and supporting greater intensification.

Strategic Priority	Description	Expected Outcomes
Increased Maintenance & Resilience	NZ needs a transport system that is resilient to the impacts of weather events and other natural disasters. Increasing maintenance and resilience enables effective management and reduces current and future risk.	• More kilometres of the road network resealed and rehabilitated each year. • Fewer potholes. • A more resilient road and rail network.
Safety	A safe transport system is critically important. The steady decline in deaths and serious injuries between the 1980s and early 2010s has slowed. Road deaths and serious injuries place a substantial burden on families, society, the economy, and the health sector each year, with significant direct costs incurred. The Government expects that the NZTA will make efforts to reduce barriers for third-party investment into road safety, including enabling third-party and market-based funding and delivery of safety initiatives and research.	• Reduction in deaths and serious injuries. • Increased enforcement.
Value for Money	Investment must deliver better outcomes for present and future generations. The value for money is a strategic priority guiding all transport investments under the GPS. It is necessary to demonstrate both efficiency and effectiveness while delivering the intended outcomes. Value for money is not just about seeking the lowest initial cost for a project – it must consider a project's whole of life costs and benefits.	• Better use of existing capacity. • Less expenditure on temporary traffic management.

Regional Context

Central Otago is under the jurisdiction of Otago Regional Council, who are developing the Land and Water Regional Plan, a combined resource management planning document

The plan is required in New Zealand law, replacing an outdated Otago Regional Council planning framework that is no longer fit for purpose.

The Government's National Policy Statement on Freshwater 2020 (NPS-FM) gives effect to new protection for our waterways, however in 2023 Government indicated it intends to replace the NPS-FM before the end of 2025.

Between 2020 and 2022 Otago Regional Council engaged with the community around the visions and values people wanted for waterways and the land affecting them in this new, more in-depth Plan. ORC also spoke with communities about actions that would help reach positive environmental outcomes – these were that Otago's freshwater and land activities need to be:

- Healthy for plants, animals, and people and look after our region for future generations.
- Safe for activities like swimming
- Beneficial for activities like fishing
- Sustainably managed; and
- Respectful of cultural and historical places.

Proposed new rules in the Land and Water Regional Plan (LWRP) for Otago are expected give new, comprehensive direction for managing land and water resources in the region.

At the time of writing this strategy, work on the draft plan is on hold while a new national framework on freshwater management is being developed by the Government.

Section 2 – Current Issues & Future Challenges

This section identifies the current infrastructures issues and future infrastructure challenges for Central Otago.

Compliance with changing legislation

Council is required by legislation to continue compliance with the Water Services Act and investment in assets and resources to meet the Drinking-water Standards for New Zealand (DWSNZ) and environmental standards.

As of 2021, the drinking water quality of Central Otago has been sitting well below the national average. The annual average drinking water quality index in Central Otago District was 62 in the year to June 2021 improving from 46 in the previous 12 months. In the year to June 2021, the annual average drinking water quality index in Central Otago District was worse than in New Zealand (87). Over the ten years to June 2021, the annual average drinking water quality score in Central Otago District was 63.

More recently in the Taumata Arowai Drinking Water Regulation Report 2023, Central Otago District Council had 4 schemes without Protozoa barriers in place, two supplier notifications for maybe or is unsafe water, two supplier notifications for maximum acceptable value (MAV) exceedances, one laboratory notification for chemical MAV exceedance and a total of 17 days in which a consumer advisory (boil water notice) was active.

Water source quality has become a front of mind topic after the outbreak of cryptosporidiosis in Queenstown, caused by Protozoa. Not all water treatment plants in Central Otago have protozoa barriers, including Omakau and Ophir, Patearoa, Cromwell and Ranfurly, which have varying types of source water.

Central Government's three waters reform programme has changed from 'Affordable Water' to 'Local Water Done Well'. This requires Council to focus on:

- Providing financially sustainable water services
- Ensuring water quality i.e. safe, reliable drinking water
- Improved management of wastewater and stormwater services

A core part of the 'Local Water Done Well' reform programme requires Council to develop of a plan on how we will transition to a new water services model that meets water quality and infrastructure investment rules, while being financially sustainable in the long term.

Council Controlled Organisation

At the time of writing, the Council is currently working through options about how to deliver water services in the future. At the November 2024 meeting, Council discussed the options for a Water Services Delivery Plan (WSDP), to be included in the 2025-2034 Long-term Plan discussions.

Council is planning to seek public feedback on two of the following options:

Status quo (must be one of the options presented) – set up water services as an in-house/internal business unit. Ownership remains within the council.

- Single Council – set up a Council Controlled Organisation (CCO) with CODC 100% shareholder as an independent water service company.

- Multi Council – set up a Council Controlled Organisation (owned by multiple councils in the southern region).

Council is also looking at the option of partnering with other councils in Otago-Southland as a regional approach to managing and delivering these water services.

Similarly, with transport there is unpredictability in funding priorities due to changes in Government and subsequent changes to the Government Policy Statement on land transport (GPS). Shifting national priorities impacts local budgets, timelines, and strategic planning create ongoing uncertainties for Council budgets.

Meeting greater expectations around environmental impacts

Societies expectations regarding mitigation of environmental impacts from infrastructure services has increased over the past decade. Practises that occurred in the past are no longer environmentally, socially or culturally acceptable or tolerated by the community.

This change is supported by government freshwater reforms, supporting legislation, changes to regional policies and plans, and increased compliance reporting and monitoring. Aside from the moral obligations to improve environmental outcomes, and reduce carbon emissions, there are levies and penalties being applied encourage improved performance.

Cost associated with activities which contribute to carbon emissions will continue to increase in the future. This includes the costs to dispose of sludge and screenings from wastewater plants to landfill as national increases to waste levies and the emissions trading scheme are implemented.

Increased treatment costs will occur to upgrade wastewater treatment plants to meet new freshwater standards, and to maintain these more technologically advance treatment processes.

A higher level of scrutiny of compliance with national and regional standards and consent conditions is occurring. Council is required to meet the increased monitoring costs of the regulatory authorities which undertaken this work, as well as meet its own costs of increased compliance testing, monitoring, and reporting.

Under the current legislative settings, any standards are ‘minimum’ standards. This means a regional council considering an application for a resource consent that relates to a wastewater network could not grant a consent with conditions that are less restrictive than the standards, but they could impose conditions over and above the standard.

The Local Government (Water Services) Bill amends the legislation so there will be a single standard, rather than a minimum (or maximum), which would be implemented in resource consents. A single standard approach is consistent with international best practice.

The wastewater standards will provide the requirements for a range of discharge treatment options (land, river, ocean). The preferred discharge option(s) will remain a local choice for district councils.

The Bill also provides for a new statutory tool, ‘infrastructure design solutions’, which will set out the design and operating requirements for standardised modular wastewater treatment plants or components of wastewater treatment plants that are deemed to meet the national wastewater environmental performance standards.

Regional councils will continue to be the consenting authority and will implement the standards through consent conditions. Regional councils will also continue to be responsible for monitoring and enforcing consent compliance in line with their functions under section 30 of the Resource Management Act 1991 (RMA).

Population growth and demographic change

Central Otago district has experienced a period of rapid and prolonged population growth since 2013. This places ever increasing demands on existing infrastructure and requires us to provide greater capacity for an increasing population.

From 2019 to 2024 the usually resident population for Central Otago district has grown at an annual average rate of 3.0%. Over the next 5 years this is forecast to reduce to 2.1% and even further to 1.3% by the end of the 30 year period this strategy covers. Figure 5 below shows the historic and projected population growth for the district.

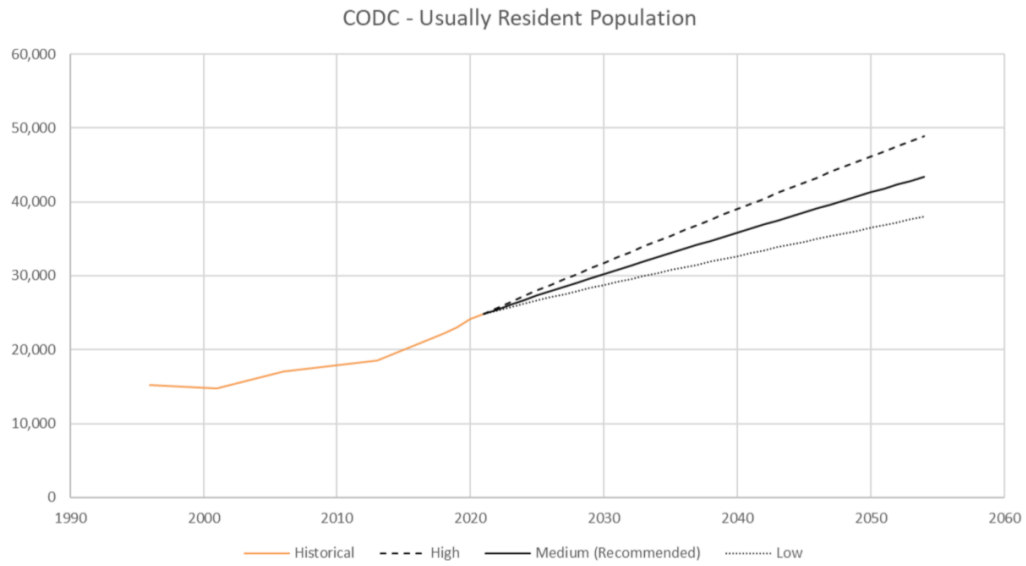

Figure 5: Central Otago projected population growth.

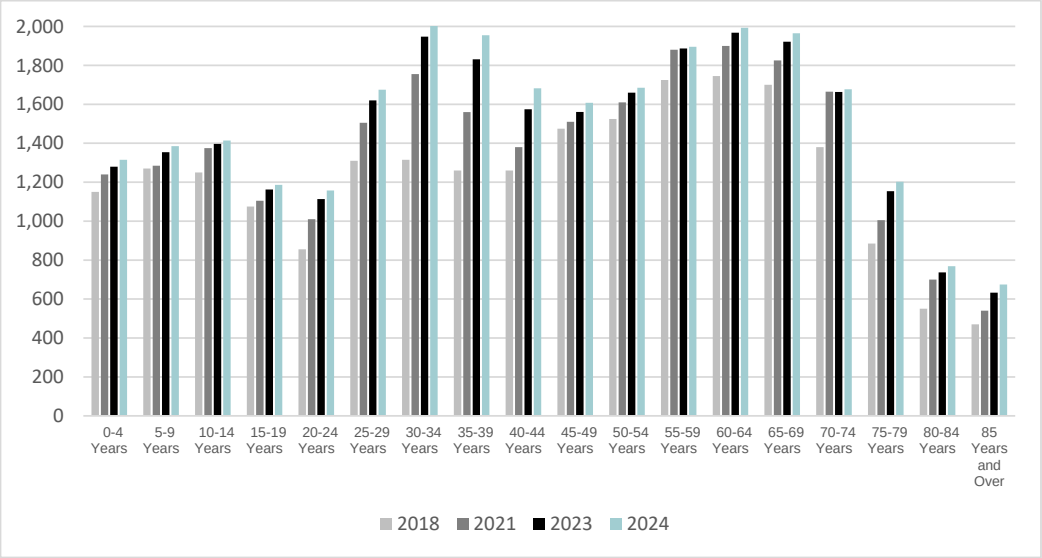
Employment opportunities have grown alongside the population growth, driven by agriculture, construction, and support services. Dwellings grew at a lower rate than the population (2.7% since 2013), and therefore occupancy and people per dwelling has increased. Population growth is expected to continue at a rate comparable with the last two years.



At present, 60.8% of Central Otago District's population is of working age (15-64), 15.4% are aged 0-14, and 23.8% are aged 65 and over. The proportion of those aged over 65 is expected to increase over the next 30 years.

When examining the population demographic changes, there is growth across all ages, however there is very high growth for adults between 25 and 40, likely driven by emerging employment opportunities and those seeking more affordable housing than that found in neighbouring Queenstown Lakes District. There is also a high growth in older adults in the 55-75 bracket, likely driven by lifestyle/retirement reasons.

The increased older population is expected to increase both the demands on our infrastructure and the affordability of our services to people on fixed incomes in the long-term. For example, an older demographic requires higher levels of service for footpaths and infrastructure that supports accessibility for people with restricted mobility.

Figure 6 below shows the breakdown of population growth by age demographic.

Figure 6: Central Otago population growth by age demographic

An ageing population may result in demand for additional smaller properties such as single person units and retirement villages. As a result, the demand for individual water connections is likely to increase. Single person households have a higher per capita water consumption as economies of scale are lost. As a result, demand for water is likely to increase.

Keeping up with Urban Growth

As well as population growth, there has been growth in business, tourism, and property development. This has led to changes in demand for parking, and use of public spaces, potentially eroding the experience for visitors and locals. Parking, cyclist, and pedestrian volumes within a confined area in Clyde and Cromwell have increased significantly.

The way key streets and lanes are used by people, cyclists and vehicles, and the lack of clarity of the function and purpose of these streets is confusing and potentially unsafe.

A lack of undeveloped urban zoned land in the main townships of Cromwell, Clyde and Alexandra has contributed to property price increases, which in turn, has increased demand in Omakau and Roxburgh where property prices are more affordable. Numerous private plan changes have been and are being implemented. This presents challenges in forecasting growth areas and infrastructure needs.

Growth is increasing traffic volumes in urban centres, on unsealed roads, and bridges, and development is increasing the length of road that needs to be maintained and replaced.

There are approximately 850m of new urban streets, and 2-3km of rural sealed road being vested to Council each year. This is increasing both operational and renewal costs.

An aging and deteriorating bridge network

We are facing significant challenges in maintaining the affordability and resilience of the district's aging bridge network.

The district's network comprises 173 bridges, with 58 expected to reach their economic end of life in the next 30 years, many situated on less-travelled roads with alternative routes available.

At least 30 of the bridges (representing 17% of the network) across the district will reach the end of their useful lives within the next 10 years. This presents a significant cost and a substantial funding gap.

An estimated $20 million is required for full replacement of these bridges, which is considerably more than the $9.8 million currently allocated in the budget for this LTP and further burdened by a $3.9 million bridge maintenance backlog.

Compounding this, the increasing number and weight of trucks, spurred by regulatory changes and agricultural productivity improvements, are adding to the strain on these structures.

Water source reliability

Our District has an arid climate and limited sources of water. The demand for water is very high and is closely associated with development. Industrial, agricultural, business and residential development all depend on the availability, quantity and quality of water.

Development in one sector ultimately has a flow on effect onto other sectors. This needs to be balanced to ensure there is adequate water across the district. Both for existing sectors, and to provide for growth.

The sustainable and efficient management of water in the District is expected to become increasingly important. There is a high demand for water as it is essential for human consumption, economic activity and stock habitation.

It is anticipated that the effects of climate change will result in increased frequency and intensity of severe weather events such as severe droughts and floods. It is essential that Council understands the effects of climate change and integrates these into the standard council considerations to provide a resilient water supply network.

In Central Otago, Water source reliability affects the townships during the summer months.

The Naseby, Ranfurly, and Patearoa networks are particularly vulnerable to dirty water impacting on treatment processes following storm events. Supply of water to these towns is also impacted by drought conditions within the Maniototo area impacting on availability of water, and limited source water options other than surface water takes.

In particular, Council has seen a number of increased boil water notices due to turbidity events:

Omakau/Ophir Water Treatment Plant Upgrade - The raw water for Omakau/Ophir is a surface water source and is vulnerable to turbidity following rain. High turbidity events result in plant shut down and the issuing of a boil water notice. The supply is also vulnerable to low river flow during summer when water restrictions may be required. The treatment upgrade will provide a more a resilient and compliant water supply.

Ranfurly Water Supply - There is no protozoal treatment in the Ranfurly supply, and it is frequently impacted by elevated turbidity caused by weather events. During a wet weather event the treatment plant inhibits for extended periods until the source water is back within treatable limits. These events can result in a Boil Water Notice for the community. Since 2022 the Ranfurly community has eight days of boil water requirements.

Patearoa Water Supply - In April 2023 a rain event caused increased organic matter in the source water. A boil water notice was put in place for seven days as a response to non-compliance with chlorine levels.

It will remain critical to ensure water supplies are resilient to frequent natural events, adequate response plans are in place for less frequent events, and water supply is reliable at a consistently adequate pressure, flow and quality.

A shortage of technically skilled people

The technical nature of infrastructure means it can be difficult to find the highly skilled people to help manage it on Council's behalf.

CODC's 3 Waters Unit has traditionally been under-resourced. The Three Waters reform programme and ever-expanding environmental compliance requirements continues to place increased demand on our team. Internal changes and efforts to attract suitably qualified candidates have been successful, but finding and maintaining our team remains a challenge.

It is likely that a shortage of technically skilled people to design, construct and manage water assets will continue to have an impact on this activity in future years. This is a global issue which is also affecting other local authorities as this is a highly competitive market. Council will have to compete with other Councils and companies for a limited pool of suitably skilled and experienced engineers.

Council is focusing on increasing both capability and capacity to effectively manage water operations. It recruited additional staff to increase the capacity of the team, undertook modelling of the Cromwell water network to identify future choke points, and held business case workshops relating to upgrades at its water and wastewater plants, catering for growth without compromising compliance.

Water supply management was a key activity in the operations space during the drier months of summer. The introduction of Lutra's Infrastructure Data software has provided greater oversight of operations during this time which allowed CODC to better manage water demand.

Affordability of infrastructure services

The industry has seen increased costs as a result of inflation, increasing standards, operations and maintenance requirements, monitoring costs and training and qualification requirements.

The value of Council's water and roading infrastructure increased from $895 million in 2021, to over $1.2 billion in 2025.

Roading costs have surged by 10-20% within the last three years. Rising traffic demands and material shortages are driving up costs, with a backlog in renewals and heavy vehicle traffic adding further strain.

Council failed to achieve its target percentage of resealing the road network of 3.9%, only completing 2.4% in 2023/24 and 3.0% in 2022/23. This was due to a number of higher-cost urban sites. Inflationary increases in labour, plant and material costs also contributed.

This substantial increase in costs presents a critical issue for CODC's budgeting and planning. Without appropriate adjustments to the budget, the real output of the Roading program is at risk of a corresponding decline. Such a reduction could lead to service level reductions, as the district would find it difficult to maintain, renew, and enhance its road network within the constraints of the current budget.

Council's budget has been revised to accommodate the escalated costs, ensuring the continuation of vital road services and infrastructure upkeep.

Unsealed Roads

Unsealed roads make up 72% of roads and account for approximately one third of proposed roading investment. There is a backlog of renewals work on unsealed roads, particularly on the lowest volume roads, which service land and back country areas.

The district is experiencing a surge in heavy vehicle traffic on its unsealed roads and bridges, primarily due to higher land use returns from agricultural and horticultural activities. This increase in profitability within these sectors has not only intensified road usage but has also led to a decrease in the availability of suitable gravel supplies, subsequently driving up the costs for these materials.

This increased heavy traffic is driving up the cost and frequency of renewals required to maintain the roads. This situation underscores the difficulty of maintaining quality and affordable road maintenance services in an economic environment characterised by rising costs.

Resilience

Resilience relates to the consistency of services that users can expect during emergency or extreme weather events. It also includes provisions for restoration of service following an event and alternative service, and public information.

Resilience During Natural Disasters

Earthquake hazards pose a major risk for the district. The Alpine Fault Study AF8 confirms that a major Alpine Fault rupture occurs every 300 years (and the last one occurred around

300 years ago) and there are many other local faults. In a major earthquake, it is likely that many roads will be blocked through landslips and the region may be isolated for some time.

An improvement action identified is to review the required functions of ‘back country’ roads that may be needed as alternate routes if highway closures are prolonged, such as in the 2016 Kaikoura earthquake. Additional funding has been provided within the roading programme to enable drainage and metalling to be undertaken on back country tracks.

These hazards will also have secondary effects through power and communications failures. Communication backup arrangements have been established by Council and Civil Defence Emergency Management, including satellite and radio. However, there is very little existing backup electricity generation capability on Council’s water and wastewater networks, with only two mobile generators available.

Climate Change

Many significant weather events have occurred in the district’s recorded history causing flooding, wind/snow damage and drought, and climate change is expected to exacerbate these hazards.

Central Otago District is predicted to warm by several degrees by the end of the century. Total precipitation is not projected to change much in the district, however; the distribution and intensity of rainfall is likely to alter, with a greater likelihood of more frequent extreme rainfall events. These events have occurred infrequently in the past, which provides valuable information regarding the consequences of these events to improve planning for the future.

Council commissioned Bodeker Scientific, in 2017, and the Otago Regional Council engaged Tonkin and Taylor, in 2021, to undertake analysis of the expected impacts of climate change on the district and wider Otago Region. The findings of each report provide a common base for long term planning across Council activity areas.

The potential impacts of climate change for infrastructure include:

Higher intensity and more frequent extreme rainfall events the headwaters of the Otago lakes, and rivers will lead to increased frequency of flooding in the Clutha and Manuherikia River catchments. This will impact on water supplies due to dirtier water needing to be treated, and flooding of vulnerable bore sites. Affected treatment sites are located at Roxburgh, Alexandra, Clyde, Omakau and to a lesser extent, Cromwell. The Omakau wastewater treatment site is also at risk of flooding from extreme events in the Manuherikia catchment.

Higher intensity and more frequent extreme rainfall will lead to increased frequency of road closures in locations where roads and bridges are below the flood plain. There is also increased risk of landslides in the Nevis, Danseys Pass, and Beaumont areas, and damage from alluvial fans in the Teviot area. More frequent damage to bridge approaches is expected from flooded rivers, particularly in the Maniototo and Manuherikia areas.

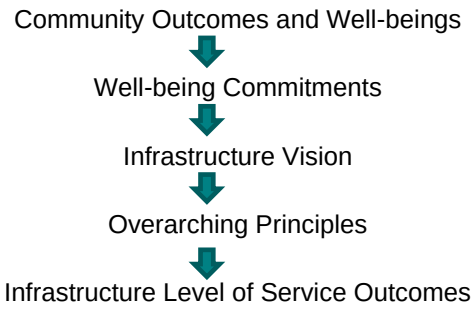
Increased frequency of drought, particularly in the Maniototo area. This has implications for the resilience of water supply for towns in the Maniototo.

Higher summer temperatures have implications for fire risk, particularly associated with road maintenance work. High temperatures will also cause bitumen to melt, causing damage to sealed roads.

Storm events during winter may result in very high snowfall - with implications for road availability and management, and access to treatment plants.

- A reduction in the number of winter frost days is likely to see a reduced hazard from ice on roads and freeze thaw issues on unsealed roads.

Recent flooding events have provided a challenge for maintaining the network across the district. In September 2023, the network saw widespread damage and several scouring issues on Council’s roads and structures requiring remedial works. This included significant damage to the road at the entry to Pisa Moorings and Swann Road.



Section 3 – Strategic Priorities

This section discusses potential responses to the current issues and future challenges laid out in Section 2. It uses Council's organisational framework and infrastructure principles to demonstrate how problems will be addressed through the 30-year capital programme.

Organisational Framework

Central Otago's infrastructure services are delivered within a framework of strategic objectives. This enables the alignment of strategic priorities across multiple activity and asset groups. This framework ensures that the understanding of need is the same between asset managers and governance decision makers, and that the work that is planned underpins the strategic direction set by Council and the community.

This strategic framework is:

Community Well-beings

The Local Government Act describes four strands to well-being:

Social well-being

Involves individuals, their families, whanau, hapu, iwi, and a range of communities being able to set goals and achieve them, such as education, health, the strength of community networks, financial and personal security, equity of opportunity, and rights and freedoms.

Economic well-being

Looks at whether the economy can generate the employment and wealth necessary to provide many of the requirements that make for social wellbeing, such as health, financial security, and equity of opportunity.

Environmental well-being

Considers whether the natural environment can sustainably support the activities that constitute healthy community life, such as air quality, fresh water, uncontaminated land, and control of pollution.

Cultural well-being

Looks at the shared beliefs, values, customs, behaviours and identities reflected through language, stories, visual and performing arts, ceremonies and heritage that make up our communities. Community outcomes are defined in the Local Government Act as the outcomes that a local authority aims to achieve in order to promote the social, economic, environmental and cultural well-being of its district in the present and for the future.

Community Outcomes

Our Long Term Plan documents the following community outcomes.

Respect for the environment	Increased Economic Prosperity	A robust social fabric	Expressions of culture
Central Otago is grounded in respect for, and protection of, the natural environment. A healthy and resilient natural environment is a prerequisite for peaceful enjoyment, active recreation and high-quality, productive enterprise	Central Otago is advanced by increased economic prosperity so that people can afford to live a satisfying, healthy, fulfilling life, characterised by enjoying a good work/life balance. Investment in infrastructure, innovation and technologies that enhances productivity, provide employment and sustainable business opportunities.	Central Otago is empowered by social wellbeing through a strong sense of safety, belonging and connection. Protecting a small-town feel, welcoming others, treating people fairly, being healthy and feeling safe are valued. Quality facilities and services and improved affordability is also important	Central Otago is enriched by expressions of culture through its people and their creativity, valuing place and interaction with the landscape, acknowledging heritage and those who have gone before. Continuing to show respect for tradition, celebrating regional identity, and adopting progressive thinking to ensure an enriching and sustainable future for those who come next

Table 3: Community Outcomes

Well-being commitments

Central Otago District Council has adopted the following organisational mission and vision statements as our commitment to delivering to these community outcomes.

Organisational Mission

To support and enable a safe, healthy and thriving community and environment

Organisational Vision

Together, we build a thriving, connected, and sustainable Central Otago, where everyone is valued, supported, and celebrated

Infrastructure Vision and Overarching Principles

Infrastructure Vision

We will deliver infrastructure services that support our community

The vision is supported by six overarching principles which underpin all decisions relating to delivery of infrastructure services.

The overarching principles are to deliver infrastructure services which:

- Represent value for money and are affordable;
- Are integrated, consistent, and fit for purpose;
- Are environmentally conscious;
- Are reflective, innovative, and forward thinking;
- Meet legal requirements,
- Are equitable for current and future generations.

Value for Money and Affordability

Value for money and whole of life cost is considered in determining the best option to address maintenance, renewal, and improvement work. Council uses advanced deterioration modelling of sealed roads and pavements, gravel roads, water pipes, and footpaths. This identifies the optimal mix of maintenance and replacement budgets and work programmes for these assets.

Advanced asset management tools require complete and accurate asset data to produce robust outputs. Council invests in the collection of data for roading and below ground three waters assets to ensure that accurate outputs can be produced.

Moving forward, Council is looking to carry on investing in improving asset data for water services, including:

- Developing asset data capture protocols

- Transition from Assetic to Asset and Work Manager (new asset management system).
- Monitoring rainfall patterns and consider trends as potential triggers to improvement and extensions of existing systems.
- Additional network modelling to ensure renewal and capital works are programmed appropriately and assist in the identification of faults in the system when low pressures or flows are identified

Integrated, Consistent, and Fit for Purpose

District wide funding is applied to all core infrastructure activities. All properties that receive Council three waters services pay the same rates for these activities regardless of their location. All properties pay for roads and footpaths.

District wide funding has enabled Council to undertake work where it is needed, when it is needed, and to set a consistent level of service for infrastructure across the district. This is providing improved value for money, and improved affordability of services.

Levels of service are set to meet the legal and resource consent requirements for treatment of three waters. Roading levels of service are set based on the national One Network road classification framework. Levels of service for capacity, and response to failures for all infrastructure services are based on the criticality of the service. This is largely driven by the numbers of people impacted by the failure.

Environmentally Conscious

Council expects all decisions made in regards to delivery of infrastructure to be environmentally conscious, and consider the environmental implications as well as the financial and level of service implications. Council's goal is to meet all environmental consent requirements, and to minimise the impacts that infrastructure services have on the environment.

Reflective, Innovative and Forward Thinking

Central Otago District Council has the second lowest cost roading network in New Zealand. This has in part been achieved through a culture of reflection, and making changes in practises to improve service based on customer feedback and learnings. An all-inclusive, collaborative contracting model has been in place on roading since 2009, and this has provided a culture where ideas and innovative practises have been encouraged from both the contractor and council staff. These are then trialled and rolled out where they are proved to add value.

Three waters capital improvements have been delivered separately to the maintenance contract. Significant investigation work is undertaken on large capital improvement projects to ensure that innovative designs can be implemented, while still managing risk. A variety of contracting models, including design build and maintain, collaborative, and traditional are being used. The procurement model selected for each project depends on the understanding of risks and cost-effective allocation of these, and the capability and capacity of the contracting market to deliver the work. A review of projects is occurring during and after final delivery to enable learnings to be incorporated into future projects.

Infrastructure planning involves the regular review of development and forecasts relating to technological advancements, government policy direction, society attitudes, population and demographic changes, and environmental and climate change and science. Council infrastructure staff participate in national workshops and meetings, regional work groups and attend industry presentations to ensure they are informed of changes and advancements in infrastructure delivery.

Meet Legal Requirements

Council has had a programme of water treatment upgrades underway since 2018, with the goal of having all schemes fully compliant with the New Zealand Drinking Water Standards by 2029. There have been delays in the delivery of projects in the 2018-2024 period due to unexpected issues being identified with the source water. This has required further investigation work, and changes to the proposed treatment processes. While the initial projects will be completed later than initially proposed, it is expected that all the supplies will still be compliant by 2029.

Additional staff resources have been provided to enable full compliance with all consent monitoring and reporting requirements. Investment has also been provided to enable upgrading of wastewater pump stations to ensure emergency storage and power supply is provided to avoid unconsented discharges.

Equitable for Current and Future Generations

One of the biggest challenges a council faces is balancing its community's ability to pay, with the need to maintain infrastructure and deliver services. Council aims to keep rates and charges affordable for current and future generations. At the same time, Council needs to focus on building community resilience, supporting economic development and promoting opportunities for growth that ensures our community is sustainable into the future.

To ensure that we continue with a balanced approach, we keep the two guiding principles of affordability and sustainability at the forefront of how we develop our infrastructure and financial strategies.

The desired outcome of this strategy is that Central Otago District Council's asset base and operational expenditure are managed in a cost-effective manner and continue to be funded in a manner that is sustainable for current and future generations.

Council rates for the majority of its depreciation, which is held in reserve to be spent on replacement assets and the payment of borrowings required to fund these assets. All roading and three waters infrastructure renewals are funded by depreciation reserves. Council may also choose to loan or rate-fund replacement assets if there is insufficient depreciation reserves.

Council has not previously fully rate-funded depreciation for bridge renewals, funding only to the level of planned renewal expenditure. This has left limited reserves set aside for the programme of bridge renewals in the 30 year infrastructure strategy. Ratepayers are being asked to fund the increased depreciation costs that result as well as the interest cost for the use of money in the early years of the programme. Because bridges are long life assets, external loan funding may be appropriate. Council has the capacity to borrow further in terms of its limit to total assets.

Increased level of service for significant capital works is primarily funded by loan. These loans will typically be for no longer than 30 years and funded either internally or externally dependent on the availability of cash reserves. Taking a loan in this instance means that future users of the asset help to pay for it over the asset's lifespan and current ratepayers are not burdened with the full cost.

When replacing or putting in new assets Council will consider whether to build the asset to cater for future growth. This may mean, for example, putting in a larger pipe than is needed for today's use to accommodate additional users in the future. Developers contribute to the capacity upgrades on existing infrastructure networks to service growth through payment of development contributions. This money is put in a reserve and used for the growth portion of capital projects.

Typically building additional capacity for growth in a network precedes the actual growth demand. The growth portion of the capital programme is funded through development contribution reserves. In most instances these reserves for growth typically run as deficits attracting interest that are in turn funded by development contributions.

Infrastructure Level of Service Outcomes

The Infrastructure Strategy sets a common level of service framework for all infrastructure activities. Levels of service are both defined and measured against the following outcomes:

- Safe and healthy.
- Accessibility.
- Resilience and reliability.
- Aesthetics (amenity and comfort provided for customers).
- Sustainability.

Safe and Healthy

This requires infrastructure which supports a safe and healthy community, and ensure the safety and wellbeing of our workforce.

Council will:

maintain and operate our infrastructure in a safe condition;

provide guidance on safe use and warn of hazards;

adopt the appropriate level of risk for our services.

Safe and healthy infrastructure is provided through ensuring that our roading network is safe to use for all modes, support heathy transport choices, provide streetlighting and street layouts that promote safe communities, safe water supplies, and wastewater treatment and discharges that support community health and wellbeing.

Safe and healthy infrastructure is measured through level of service objectives, as outlined in the table below:

Our objective level of service	How we measure success	Our aim
Provide a safe and healthy roading network	The change from the previous financial year in the number of fatalities and serious injury crashes on the local road network	Stable or decreasing trend
Provide a safe and healthy roading network	The total number of reported crashes per kilometre over the past 10 years on the network.	No stated target - *The number of crashes with serious injuries and fatalities within the classification is divided by the number of years of data.*
Provide a safe and healthy roading network	The percentage of footpaths that fall within the Council's level of service standard for the condition of footpaths	> 65%
Safe and healthy - the water is safe to drink	Compliance with the Drinking Water Quality Assurance rules for each supply	100%
Safe and healthy - wastewater discharges meet consent requirements	Compliance with discharge consents	Abatement notices - 3 Infringement notices - 0 Enforcement Orders - 0 Convictions - 0
	Fault response times	
	Attendance:	Target median time to get to site ≤ 1 hour
	Resolution:	Target median time to resolve the problem ≤ 6 hours
Safe and healthy – homes are not flooded	Number of habitable floors affected in flooding events	Target number of habitable floors affected ≤ 1 per 1,000 properties per flood event

Table 4: Safe and Healthy Performance Measures

Key projects to support this level of service outcome are:

Project Name	Description	Cost ($m)
Cromwell Water Treatment Plant Upgrade	Existing treatment does not meet protozoa treatment requirements, insufficient bore capacity to optimise treatment plant and meet future demand. Council has been notified that protozoa barrier must be in place by December 2025	$11.8
Omakau Water treatment Plant Upgrade	New Treatment Plant for Omakau and Ophir	$10.1
Roading safety improvements	As growth occurs, minor safety improvements will be required on a case by case basis	$8.574

Project Name	Description	Cost ($m)
Patearoa Water Treatment Plant	Upgrades to provide protozoa barrier and replace Inlet screen under river bed which has collapsed	$2.35
Ranfurly Water Treatment	Water supply does not comply with NZDWS and the source water has significant issues - Council has received notification from Taumata Arowai that protozoa barrier to be in place by December 2024. This project is for a combined Ranfurly Naseby Treatment Plant at Naseby.	$1.5

Table 5: Key projects to support safe and healthy outcome

Growth and Accessibility

Accessibility relates to the ability and ease of accessing our infrastructure networks and services.

Council is committed to:

Manage infrastructure assets and services to ensure accessibility for users wherever possible

Provide customer-focussed processes for those requesting access.

Council has resolved to approach planning for growth through the development of comprehensive spatial plans across the district. The spatial plans provide CODC with a high-level view of where growth might occur in each ward for the next 30 years informing infrastructure planning and investment and inform changes to the District Plan.

Spatial plans were adopted a for Cromwell in 2019 and for the Vincent area in 2022. A spatial plan for the Teviot Valley was adopted in November 2024.

Multi-Model District

The continued development of the New Zealand Cycle Trail route within Central Otago will result in an ongoing growth in cycle tourism and cyclists on the Central Otago Road network. The new trails will eventually provide over 500 kilometres of ‘destination’ off-road cycle trails that connect Queenstown, Wanaka and Cromwell with the existing Central Otago trail network at Clyde.

Development of the New Zealand Cycle Trail network linking Queenstown and Wanaka to Cromwell and Clyde is currently underway. This will require improvements on the roading network to provide safe linkages to commercial areas.

Work to develop the Cromwell Masterplan is ongoing, and is investigating arrange of improvements to the active travel and connectivity through and around the town centre.

Delivery of calming and intersection improvements at Sargood Road, Barry Avenue, Murray Terrace, and Waenga Drive. Cromwell Town Centre transportation infrastructure is now becoming congested at peak times, with intersections unable to manage the exponential traffic growth being experienced.

Development of a Programme Business Case for Cromwell is now at pre-implementation stage. The Cromwell Spatial Plan has identified the long list of projects that support the delivery of the outcomes desired for the Cromwell Town Centre. This includes funding for a Cromwell Link Lane to formalise a link through service lanes and car-parking. A project is underway looking at the options for improving this area with safety at the heart, this is a core inter-dependency on the Cromwell Town Centre project

Accessibility

Road accessibility includes all modes of transport, access to land, heavy vehicles accessibility, and access for services, and public events for social and cultural well-being. Water and wastewater accessibility includes connection to Council managed and maintained supplies where this is practical.

The water, wastewater and stormwater networks have been designed to supply properties within the designated supply areas. Council has hydraulic models for the existing water and wastewater networks. Further modelling is underway to understand the implications on water and wastewater networks from the adopted Cromwell spatial plan, and for the options identified for the proposed Vincent spatial plan.

Capacity and accessibility is measured through the following level of service objectives below:

Our objective level of service	How we measure success	Our aim
Provide a fully accessible roading network	The percentage of footpaths that fall within the Council's level of service standard for the condition of footpaths	> 65%
Provide a fully accessible roading network	The proportion of each road classification that is not accessible to Class 1 Heavy Vehicles and 50MAX Vehicles	No target - *Measure the proportion of network not available to heavy vehicles. Consider if there are any alternative routes around the restrictions or if there are economically practicable alternatives.*
Accessibility – there is adequate infrastructure and capacity to service planned growth needs	The percentage of real water loss from the network reticulation system (leaks, metering inaccuracies)	Target current annual real losses from the networked reticulation system ≤ 30% of water produced
Accessibility – there is adequate infrastructure and capacity to service planned growth needs	Number of dry weather sewerage overflows from sewerage scheme	Number of dry weather sewerage overflows ≤ 4 per 1,000 connections
Accessibility - There is adequate infrastructure and capacity to service planned growth needs	Number of flooding events that occurred	Number of flooding events that occurred < 3

Table 6: Growth and Accessibility Performance Measures

Projects to provide increased capacity, and accessibility are included in the 2024 Infrastructure strategy.

Key projects to support this level of service outcome are:

Project Name	Description	Cost ($M)
Cromwell Wastewater treatment Plant Upgrade	Additional treatment upgrade for nitrogen removal will be required to ensure the impacts of additional loading due to population growth does not negatively impact on the quality of discharges.	$11.3
Bannockburn Road Capacity Upgrade	Insufficient capacity in existing pipeline to Bannockburn to meet levels of service on network fringes, firefighting requirements and growth demand. Ad-hoc development between Bannockburn and Richards Beach has resulted in sub-optimal connection configurations.	$8.8
Pisa Network Upgrades	Additional capacity required to allow existing separate Pisa water supply be connected into Cromwell treated supply, to meet NZ Drinking Water Standards and provide capacity for growth.	$8.8
Cromwell Wastewater Treatment Plant Capacity Increase	Extending membrane treatment plant to cope with growth	$8.7
Road seal extensions	Road seal extensions at Sandflat Road, Māori Point Road and a number of intersections	$3.035

Table 7: Key projects to support growth and accessibility outcome

Environment and Sustainability

Under this principle, Council is committed to:

- improved environmental outcomes through reduced resource consumption, reduce costs and provide more sustainable services for the future.

Council expects all decisions made in regards to delivery of infrastructure to be environmentally conscious, and consider the environmental implications as well as the financial and level of service implications. Council's goal is to meet all environmental consent requirements, and to minimise the negative impacts that infrastructure services have on the environment.

Since 2021, Council has undertaken a comprehensive review and assessment of options for future water supply and wastewater in the district. Environmental impacts are a key focus, seeking to reduce the impact of water abstraction, particularly from ecologically vulnerable rivers and streams, and the impact of discharging treated wastewater to water bodies which also has a cultural and social impact. Improvements include new / alternate water sources, enhanced water supply and wastewater treatment processes, and reliably discharging wastewater to meet increased future consent conditions / standards, including potential for disposal to land at some sites.

Measurement of carbon emissions over the 2017-2020 period is providing evidence to understand the carbon implications of infrastructure services. Electricity consumption for

water and wastewater will continue to increase as higher technology treatment plants are completed, and as a consequence of population growth. A continuation of Council's water demand management programme has been included in the 2024 Long Term Plan. This includes public education on improved use of water, removal of irrigation networks from the treated water supply, and a review of pump operating practices.

Water meter installation was undertaken in most parts of the district in 2012. As the original meters reach the end of their economic life they will be replaced with more technologically advanced meters. These will provide for remote reading and enable real time information for residents.

Maintenance and renewal of the reticulated water network has a focus on addressing leaks to reduce water losses, helping to reduce total water demand and ensure that a higher amount of the water we abstract is used for its primary drinking water purpose. Specifications for new and renewal of pipes includes the use of crushed glass as a construction material. Offcuts of pipes are being recycled, and sustainability is being included as an attribute in procurement processes.

Increased funding has been included to enable all dust suppression sites to be sealed using a low cost sealing method, and use of waste oil as a dust suppressant has been discontinued.

Deterioration software is being used to optimise the renewal and maintenance of sealed roads, unsealed roads, and water pipes. This reduces premature replacement of assets, and reduces resource consumption and costs.

Our objective level of service	How we measure success	Our aim
Environment and sustainability – wastewater is managed to minimise the impact on the environment, reduce energy consumption	Compliance with discharge consents	Abatement notices - 3 Infringement notices - 0 Enforcement Orders - 0 Convictions - 0
Environment and sustainability – water demand is managed to minimise the impact on the environment, reduce energy consumption, and leakage is managed appropriately,	The percentage of real water loss from the network reticulation system (leaks, metering inaccuracies)	Target current annual real losses from the networked reticulation system ≤ 30% of water produced
Environment and sustainability – stormwater is managed to minimise the impact on the environment, discharges meet consent requirements	Compliance with discharge consents	Nil abatement notices, infringement notices, enforcement orders, and convictions

Our objective level of service	How we measure success	Our aim
Roading sustainability	The percentage of footpaths that fall within the Council's level of service standard for the condition of footpaths	> 65%

Table 8: Environment and Sustainability performance measures

Key projects to support this level of service outcome are:

Table 9: Key projects to support environment and sustainability outcome

Project Name	Description	Cost
Cromwell Wastewater treatment Plant Upgrade	Existing discharge is to the Kawarau Arm of Lake Dunstan, consent expires 2049. Likely that significant upgrade will be required at consent renewal time.	$61.9
Alexandra WWTP Upgrade	Alexandra treatment plant currently discharges to the Clutha Matau River. Consents expire within five years and require progress to have been made on identifying and working towards alternative treatment and discharge.	$35.6
Clyde Extension of Wastewater Reticulation	Stage 2 and 3 of the Clyde wastewater reticulation project. Town is currently serviced by septic tanks, and the density of these does not meet environmental or cultural expectations. Next two stages timed to occur after upgrading of Alexandra wastewater	$34.4
Omakau WWTP Upgrade	Omakau discharges to the Manuherikia River. Consent expires in 2027 and require progress to have been made on identifying and working towards alternative treatment and discharge away from the river by 2025.	$26.4

Resilience and Reliability

This relates to the consistency of service that users can expect under both normal operating conditions, and during emergency or extreme weather events. It also include provisions for restoration of service following an event and alternative service, and public information.

Council is committed to:

- Provide increasingly consistent levels of service
- Advise customers and keep them informed of interruptions to service, and when service will be restored
- Be prepared for response to incidents and emergency events

Provide alternatives when feasible

- Carry out mitigation to avoid disruption for critical services where appropriate

Over the last decade, Council has undertaken several studies aimed at understanding and improving the resilience of its three-waters and roads networks. The 2020 Resilience Plan collates information from those studies, along with more recent information, to provide a consolidated view of Council's critical assets and risks from hazards. The Resilience Plan also identifies potential mitigations to improve network resilience.

A significant amount of information has been collected as GIS data as part of this work. This information aims to facilitate hazard assessment, such as enabling the overlay of hazard maps (earthquake, flooding, slips) with critical asset maps to identify which assets are most exposed to the hazard. It also assists with rapid response, such as knowing how quickly wastewater will overflow from a pump station in a power outage, which assets are most critical and should be inspected and restored as a priority, and the backup capabilities for communications and power failures.

This relates to the consistency of service that users can expect under both normal operating conditions, and during emergency or extreme weather events. It also includes provisions for restoration of service following an event and alternative service, and public information.

The 2020 Infrastructure Resilience Plan, and Infrastructure Response Plans have been used to inform resilience mitigation projects that have been included in the work program for the next 30 years. The Infrastructure Response Plan details the response processes for infrastructure failures. These may be as a result of a number of events, including:
Natural disasters (e.g. extreme weather events, earthquake).

- Loss of dependent supplies (e.g., electricity, telecommunications).
- Critical asset failure/breakages from any other cause.

Stormwater management in urban areas is being reviewed as part of updating of Councils engineering standards for development. In urban areas streets are designed to act as secondary flow paths in extreme events. This enables the street to be flooded, rather than private property. Stormwater infiltration investigation and follow-up with property owners is being undertaken to reduce the impacts of extreme rain on wastewater networks.

Council sets aside $165,000 per annum in an emergency response fund specifically for roading, and has an emergency event fund which can be accessed if required for other Council services, including water and wastewater. This accumulates to provide funding for reinstatement following emergency or extreme weather events.

Council has insurance for above ground water and wastewater assets. Below ground assets, roads, and bridges are not insured. Council assumes that all below ground infrastructure would not be damaged in a single event. Council's general emergency event fund can be accessed for underground assets, with the added ability to loan fund reinstatement following an emergency event.

Bridges

We are facing significant challenges in maintaining the affordability and resilience of the district's aging bridge network.

Addressing the significant fiscal challenge, we have developed a Bridge Strategy focusing on prioritising and rationalising bridge funding. This strategy aims to reduce the service level gap over the next 30 years.

Currently, 30 bridges (17% of the network), are nearing end of their service, requiring an estimated $20 million for replacement, against the current budget of $9.8 million for this LTP.

This strategic approach aims to resolve the existing bridge maintenance backlog within five years. It encompasses improved long-term planning, enhanced asset management, and a refined understanding of risk factors. Crucially, it allows for present value end of life (PVEOL) assessments on end-of-life bridges over three years, forming the basis for well-informed bridge investment decisions ahead of the 2027-30 submissions to NZTA.

Resilience and reliability preparedness is measured through the following level of service objectives below:

Table 10: Resilience and Reliability Performance Measures

Our objective level of service	How we measure success	Our aim
Water resilience and reliability – water supplies are resilient to frequent natural events, adequate response plans are in place for infrequent events, and water supply is reliable at a consistently adequate pressure and flow	Fault response time to urgent call-outs	
	Attendance:	Target median time to get to site ≤ 1 hour
	Resolution:	Target median time to resolve ≤ 4 hours
	Fault response time to non-urgent call-outs	
	Attendance:	Target median time to get to site ≤ 4 days
	Resolution:	Target median time to resolve ≤ 4 days
	The average consumption of water per day per resident	To maintain water demand at < 600L/person/day
Wastewater resilience and reliability – wastewater networks are resilient to frequent natural events, with adequate response plans in place	Number of dry weather sewerage overflows from sewerage scheme	Number of dry weather sewerage overflows ≤ 4 per 1,000 connections
Stormwater resilience and reliability	Number of flooding events that occurred	Nil
Stormwater networks are resilient to frequent natural events, with adequate response	Number of habitable floors affected in flooding events	Target number of habitable floors affected ≤ 1 per 1,000 properties per flood event

Our objective level of service	How we measure success	Our aim
plans in place to manage infrequent events.	Response time to attend flood events	Target median time to get to site ≤ 1 hour
	Number of complaints received about stormwater performance	Total number of customer complaints ≤ 2 per 1,000 properties
Roading resilience and reliability	% of customer service requests relating to roads and footpaths to which Council responds within 10 working days.	≥ 90%
Roading resilience and reliability	The average quality of ride on a sealed local road network, measured by Smooth Travel Exposure (STE).	Smooth Travel Exposure ≥ 90%
Roading resilience and reliability	Percentage of sealed local road network that is resurfaced	> 3.9% of sealed road length resurfaced per annum
Roading resilience and reliability	The number of road closures with or without a detour provided and the number of vehicles affected by the closures annually.	Measure not reported for the 2021/24 LTP and therefore added to the improvement programme for implementation

Key projects to support this level of service outcome are:

Table 11: Key projects to support resilience and reliability outcome

Project Name	Description	Cost ($M)
Naseby Water Treatment Plant Upgrade Stage 1	To provide second treatment line to increase capacity of the treatment plant to keep up with peak demand and provide redundancy at other times to enable repairs to be undertaken without taking plant offline	$5.1
Replace Roxburgh reservoir and increase capacity	Existing reservoir has water safety issues related to security of the tank, only has several hours of storage at peak demand.	$4.7
District Wide Wastewater Pumping and Storage Capacity	Improving pumping and storage capacity to accommodate inflow during high flow, resulting in overflows to waterways	$4.5
Little Valley Bridge	Replacement of the timber components (deck and running boards) rather than replacement of the whole structure. Strengthening of piers following seismic assessment.	$4.66
Maniototo Road Bridge	Replacement of the bridge and explore divestment opportunities. Bridge detour is more than 20 km and bridge closure unlikely to be acceptable to the community.	$1.33
Scott Lane Bridge	Removal of existing damaged structure. Replacement with lower-level service structure or removal.	$0.27

Aesthetics

Aesthetics relates to the look, taste, smell, and feel of infrastructure services. This includes the comfort of the drive on roads, maintenance of the roadsides, and street cleaning in urban areas. It addresses the taste and smell of water, tidiness and smell of wastewater sites, and visual and odour impacts of discharges.

Our objective level of service	How we measure success	Our aim
Water aesthetics - odour from facilities and air valves is managed to acceptable limits	Total number of complaints for: • Odour • Faults • Blockages • Responses to wastewater service requests	Total number of complaints ≤ 14 per 1,000 connections.
Wastewater aesthetics - the water is clean in appearance, good to taste and has no smell	Total number of customer complaints for: • Water clarity • Water taste • Water odour • Water pressure and flow • Continuity of water supply • Responses to water service requests	≤ 20 per 1,000 connections
Roading aesthetics	The average quality of ride on the sealed road network, measured by smooth travel exposure	Smooth Travel Exposure ≥ 90%
Roading aesthetics	Percentage of sealed local road network that is resurfaced	> 3.9% of sealed road length resurfaced per annum

Table 12: Aesthetics Performance Measures

There are no projects specific to address aesthetic issues in the capital programme.

Renewals

In order to maintain the above level of service outcomes it is important to maintain existing infrastructure.

Council is committed to:
maintaining the value of the roading and three-water infrastructure; and

updating, repairing, or replacing existing public infrastructure as it deteriorates.

Roading

Price escalation poses a challenge, reducing purchasing power and limiting tactical responses to inflation. To maintain ratepayer affordability, the district may need to reduce the quantity of work across all categories, which could impact service levels and increase whole- of-life costs. This creates a balance between current expenditures and future risks to service levels and costs.

This strategy prioritises core maintenance and renewals to ensure the continued safety and functionality of the roading network while maintaining service affordability. Our district boasts one of New Zealand's most cost-efficient roading networks, evidenced by low costs per kilometre and per vehicle kilometre travelled.

Our proposed investment scenario involves increasing budgets to maintain service levels and address bridge and pavement challenges, with a significant focus on enhancing the bridge budget to avert potential bridge closures.

Our commitment to quality asset management, including comprehensive data collection and advanced deterioration modelling, allows for timely and cost-effective interventions. The roading physical works contract has established a collaborative approach to achieve optimal results within budget constraints, covering all maintenance tasks except lighting.

The plan acknowledges the challenges posed by limited footpath maintenance and renewal funding, which will require a focus on safety-related maintenance and may result in reduced service levels, such as renewing footpaths on only one side of the road or delaying renewal. Additionally, reductions in low-cost, low-risk improvement funding will limit the ability to implement enhancements beyond essential works, further emphasizing the focus on maintaining and renewing core infrastructure.

Three Waters

Investment in the current asset base will continue. However, Council has decided in the case of the Three waters activity for the first two years of the LTP to partially fund replacement of assets from debt with replacement of remaining Council assets funded through depreciation reserves.

Key projects to support this strategic priority are:

Project Name	Description	Cost ($M)
Sealed Road Renewals	Sealed road resurfacing and pavement reconstruction	$101
Unsealed Road Renewals	Unsealed metalling	$107
Bridge and Structures Renewals	Structure component replacements and bridge replacements	$38
Drainage Renewals	Drainage renewals	$21
Water Supply Renewals	District wide renewals of pipe, point and plant assets.	Pipe - $132 Point - $73 Plant - $49
Wastewater Renewals	District wide renewals of pipe and plant assets.	Pipe - $144 Plant - $82 Point - $23

Project Name	Description	Cost ($M)
Stormwater Renewals	District wide renewals of the network.	$24
Stormwater consent applications	ORC require 5-year consent gives stormwater operators time to map and monitor their discharges.	$0.50

Table 13: Key projects to support the renewal activity

Prioritisation

This strategy groups infrastructure issues and challenges into a framework of six key level of service outcomes that have been determined by CODC senior leadership as the 'most important' things that need to be addressed for successful infrastructure delivery. However, not all projects can be delivered with current financial and human resources, hence a prioritisation framework was developed around these outcomes to help determine the most critical projects for delivery.

The priorities are based on the six level of service outcomes and the risk associated with not delivering to these outcomes. Those projects with that help reduce the highest risk areas have been prioritised in the first 10 years.

The priorities were confirmed in an infrastructure strategy workshop in November 2024 and have provided a prioritisation framework for developing the 30-year capital programmes.

No.	Principal	Description
1	Safe & Healthy	Minimise threats to public health and safety through the delivery of infrastructure services.
2	Growth and Accessibility	Ensure the district can support growth and remain accessible for the current community.
3	Renewals	Maintaining the value of the existing infrastructure.
4	Resilience & Reliability	Withstand, adapt to, and recover from disruptions.
5	Environment & Sustainability	Complying with our environmental and sustainability requirements.
6	Aesthetics	Look after high-profile assets with significance to the public.

Table 14: Central Otago District Councils Prioritisation Framework

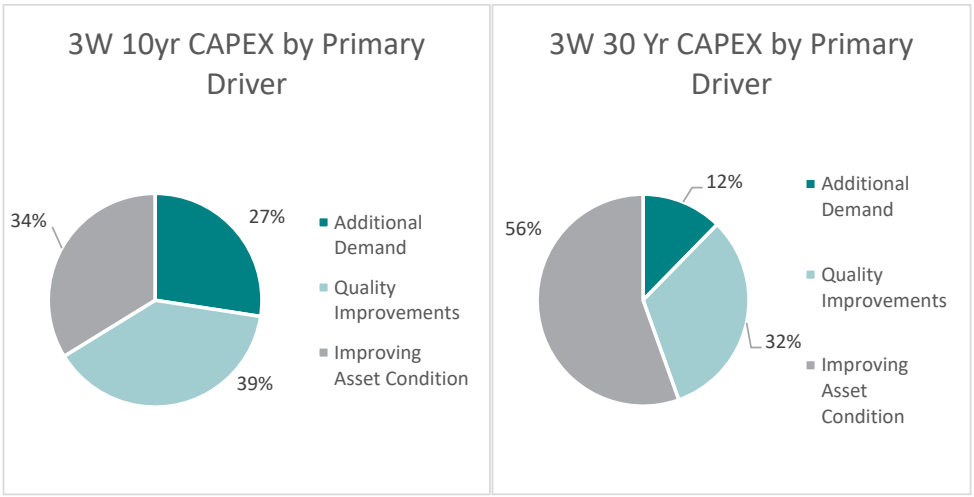
Prioritisation Matrix

This prioritisation matrix illustrates how the strategic priorities informed which projects and programmes are included in the capital programmes.

Priority	High	Medium	Low - Normal programming	Very Low (not within current programs)
Safe & healthy (ILOS)	High safety and/or reputational risk for an issue that has previously happened and is expected to happen again within next 3 yrs.	Known risk but functioning OK for now. Likely to occur within next 5 years	Known risk, but more likely to happen >5yrs	Known risk, but more likely to happen >10yrs
Accessible (Growth)	Immediate servicing issue for an issued consent which is within land currently zoned for this use	Known servicing problem, but can manage for 5 years	Known servicing issue needed >5yrs to service expected growth in area	Known servicing issue needed >10yrs to service expected growth in area
Renewal	Broken now and not working, or exceptionally high operational costs to keep working	Standard renewal programs	Standard renewal programs	Known future renewal requirements
Environment & sustainability (ILOS)	A formal compliance notice has been issued by the regulator and this work is required to lift the notice.	Partially compliant, but no formal notice issued, or resource consent expires in next 5 years	Known future requirement >5yrs	Known future requirement >10yrs
Resilience & reliability (ILOS)	Critical asset has been out of service for more than 2 occasions in the last 5 years due to resilience issues	Non-critical asset has been out of service for more than 2 occasions in the last 5 years with no available alternative	Non-critical asset has been out of service for more than 2 occasions in the last 5 years an alternative exists	Resilience risk identified, may have occurred once in the past.
Aesthetics (ILOS)			High profile asset which has a significant aesthetic issue which is resulting in widespread public dissatisfaction	Capital works for purely aesthetic reasons will likely sit in the very low category

Table 15: Prioritisation Framework used to develop the capital programme

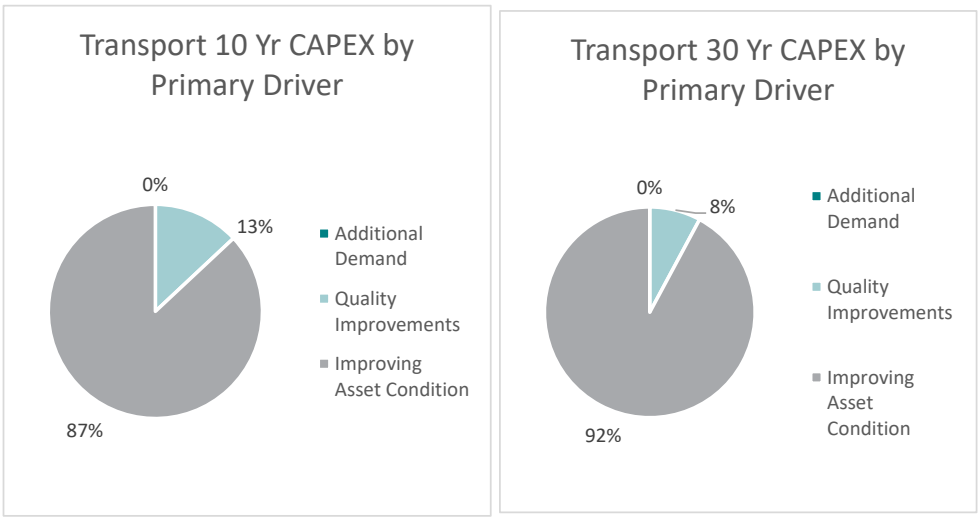
Summary of strategic priorities and response



Over the first 10 years of the strategy, the above prioritisation for three waters has resulted in a reasonably even spread of capital expenditure between the three primary drivers of:

- Additional demand and growth in Central Otago;
- Quality improvements of existing assets; and/or
- Improving the condition of our existing assets.

The slight majority of capital expenditure however is in providing quality improvements, which is dominated by the wastewater activity and meeting new environmental standards.



Beyond the first 10 years, the balance shifts back towards improving asset condition for the water activity followed by wastewater. This is to be expected as there is less certainty in the future growth and improved level of service requirements beyond year 10 of the strategy.

Figure 7: Primary drivers for three waters capital expenditure

The transport programme however is dominated by improving asset condition in both the 10 year and 30-year windows. This is largely driven by the fact that requests for low-cost, low-risk improvement funding have been denied, limiting the ability to implement enhancements beyond essential works, further emphasizing the focus on maintaining and renewing core infrastructure.

Figure 8: Primary drivers for transport capital expenditure (NOTE: This charge excludes transfers to reserves accounts for emergency works)

Inflation Provisions

Inflation reflects erosion in the buying power of money. Each dollar buys less and less goods and services over time. Depreciation staff, costs and some expenditure items have inflation applied from year 1 of the plan. Where cost change has been applied for year two onwards, Council has used the indices shown below. The indices are derived from the Business and Economic Research Limited (BERL) cost adjustor rates for the LTP period. After the LTP period, an annual inflation rate of 2% p.a. is applied for Roading, and 2.2% is applied to 3 Waters. There is a medium risk that inflation may increase at a higher rate. This would impact on the affordability of Council's services and would be addressed as part of Council's annual planning process.

Table 17: Inflation provisions

	Three Waters	Roading
Year 1	1.000	1.000
Year 2	1.042	1.031
Year 3	1.084	1.061
Year 4	1.126	1.091

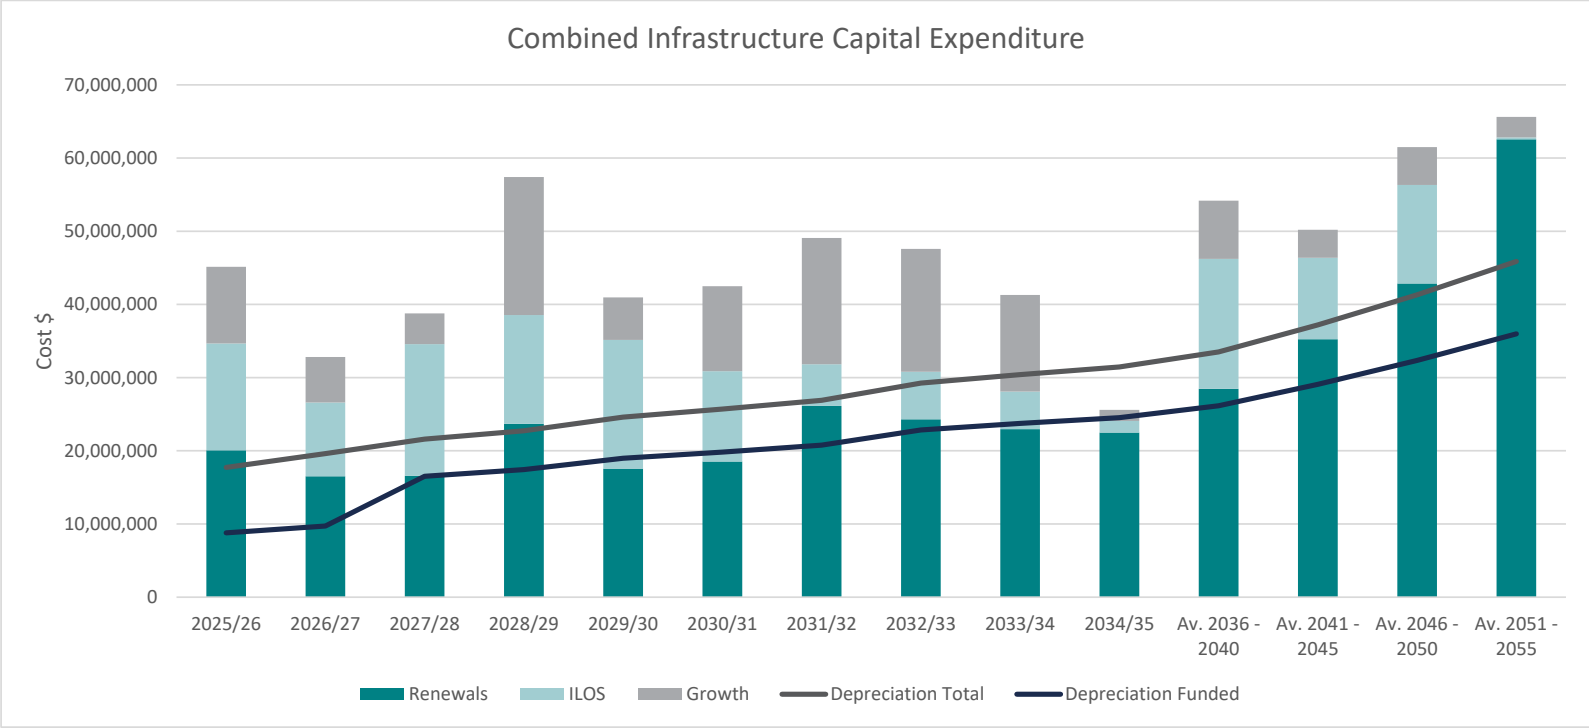
Section 5 Combined Infrastructure Financial Estimates

Figure 9: Capital expenditure for all infrastructure activities



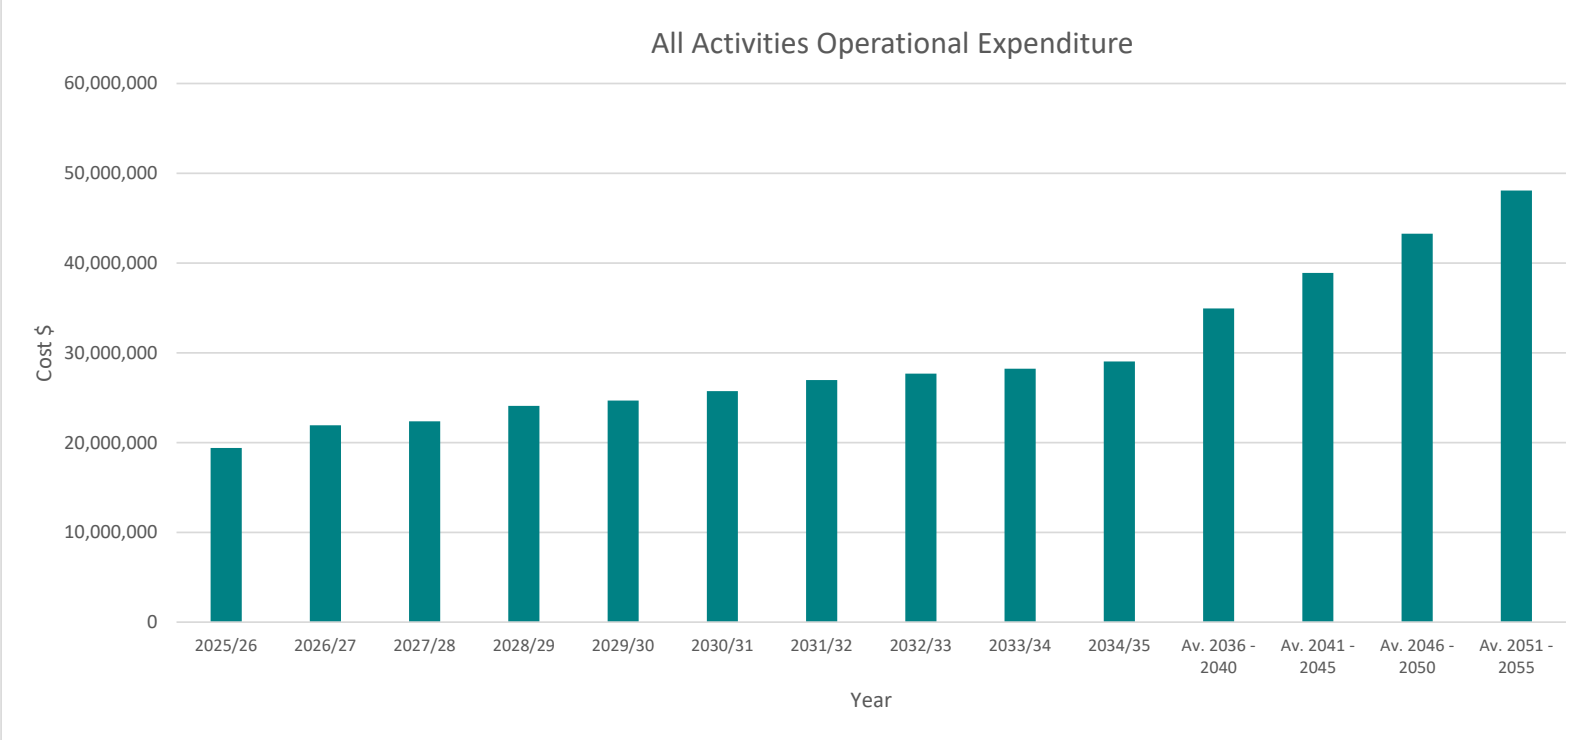


Figure 10: Operational expenditure for all infrastructure activities

Section 6 – Activity Summaries

There are a number of key decisions required across roading and three waters in the short term. Work undertaken over the next 18 months will directly inform the strategic decisions and priorities to be considered in the 2027 - 2037 Long-term Plan (LTP).

For roading, Council's Bridge Strategy and the development of an Unsealed Roads Strategy will provide the framework for guiding decisions on asset renewals, upgrades, and potential rationalisation.

A key focus during this period will be CODC's bid for NZTA co-funding in 2027, which will significantly impact CODC's ability to proceed with planned bridge replacements. Present Value End of Life (PVEOL) assessments will help build the case of co-investment. If funding is secured, Council can move forward with a structured programme of renewals and improvements. If not, difficult decisions will need to be made, whether to delay projects, seek alternative funding sources e.g. debt funding, implement lower-cost solutions or rely on alternative access routes.

For three waters, Council is consulting the public on two new entity options under Central Governments Local Water Done Well Policy, a Single Council CCO or a Multi Council CCO. The new entity is planned to be established by 01 July 2027, from then on any significant decisions on water infrastructure will be the responsibility of the new entity, not Council.

Roads and Footpaths

Overview

Central Otago Currently has 1,926km of roads, with 1,753km of rural roads and 158km of urban streets. 72% of our roads are unsealed, a total length of 1,386km. We have 173 bridges (including five footbridges maintained by Council), 188km of footpaths and greenways and just over 5,300 culverts.

These roading assets are contained in close to 12,000 hectares of road reserve across the district, 3,800 hectares of which has formed and maintained carriageway. The replacement value of our transport assets is $759 million. These assets are depreciating at the rate of $7.47 million per annum.

CODC is actively improving transportation networks, including road upgrades and new cycling infrastructure, while also addressing the challenges of rising property values and changing land use patterns, which are impacting traffic volumes and environmental sustainability.

Key challenges

The key challenges we will work towards addressing in the next nine years are:

The affordability and resilience of our aging bridge network: With 30 bridges (17% of the network) nearing the end of their service life within the next 10 years, significant investment is needed to replace and maintain these critical structures.

Increasing costs of managing our unsealed network: Rising traffic demands and material shortages are driving up costs, with a backlog in renewals and heavy vehicle traffic adding further strain.

Surging roading costs: Roading costs have increased by 10-20% within three years.

Unpredictability in funding priorities due to election changes and the 2024 GPS: Shifting national priorities could impact local budgets, timelines, and strategic planning, requiring adaptive management to address evolving challenges.

What are we proposing?

We are prioritising core maintenance and renewals to ensure the continued safety and functionality of the roading network while maintaining service affordability. Our district boasts one of New Zealand's most cost-efficient roading networks, evidenced by low costs per kilometre and per vehicle kilometre travelled.

Our commitment to quality asset management, including comprehensive data collection and advanced deterioration modelling, allows for timely and cost-effective interventions. The roading physical works contract has established a collaborative approach to achieve optimal results within budget constraints, covering all maintenance tasks except lighting. We also allocate significant plant resources to this contract, optimising both plant and labour use to minimise overall costs.

Our proposed investment scenario involves increasing budgets to maintain service levels and address bridge and pavement challenges, with a significant focus on enhancing the bridge budget to avert potential bridge closures.

Addressing the significant fiscal challenge, we have developed a Bridge Strategy focusing on prioritising and rationalising bridge funding. This strategy aims to reduce the service level gap over the next 30 years. Currently, 30 bridges (17% of the network), are nearing end of their service, requiring an estimated $20 million for replacement, against the current budget of $9.8 million for this LTP. This strategic approach aims to resolve the existing bridge maintenance backlog within five years. It encompasses improved long-term planning, enhanced asset management, and a refined understanding of risk factors.

Most Council roads are low volume, benefiting from favourable environmental conditions and a robust re-surfacing program, resulting in extended lifespans for our sealed road network assets. We have extended the maximum surface life of low-volume roads to 180-190% of their expected life (approximately 28 years) to maintain affordability, despite some associated risks.

Key issues and responses

Table 18: Roading key issues and responses

Level of Service Outcome	Key Issues	Key Responses
Safe and Healthy	• Reduced footpath maintenance and renewal funding • Reduced low-risk, low cost funding	• Focus on safety-related maintenance • Focus on maintaining and renewing core infrastructure.
Growth and Accessibility	• Central Otago district has experienced a period of rapid and prolonged population growth since 2013. This has seen increased traffic and increased active travel demands	• Development of the New Zealand Cycle Trail network linking Queenstown and Wanaka to Cromwell and Clyde • Road seal extensions at Sandflat Road, Māori Point Road and a number of intersections
Renewals	• 30 bridges, or 17% of our network, are nearing the end of their service life, requiring an estimated $20 million for replacements, against a current budget of $9.8 million.	• Developed a Bridge Strategy focusing on prioritising and rationalising bridge funding. Provided funding for upgrades and renewals at Little Valley, Maniototo Road and Scott Lane Bridges
Environment and Sustainability	• Increasing costs of managing our unsealed network • Roading costs have increased by 10-20% within three years.	• extended the maximum surface life of low-volume roads to 180-190% of their expected life to maintain affordability
Resilience and Reliability	• Unpermitted overloading may cause bridge collapse risking resilience, customer safety, and asset damage.	Identify structures requiring an increase in the current levels of service to permit heavy vehicle access.

Figure 11: Cost apportionments for roading capital expenditure (NOTE: This charge excludes transfers to reserves for emergency works)

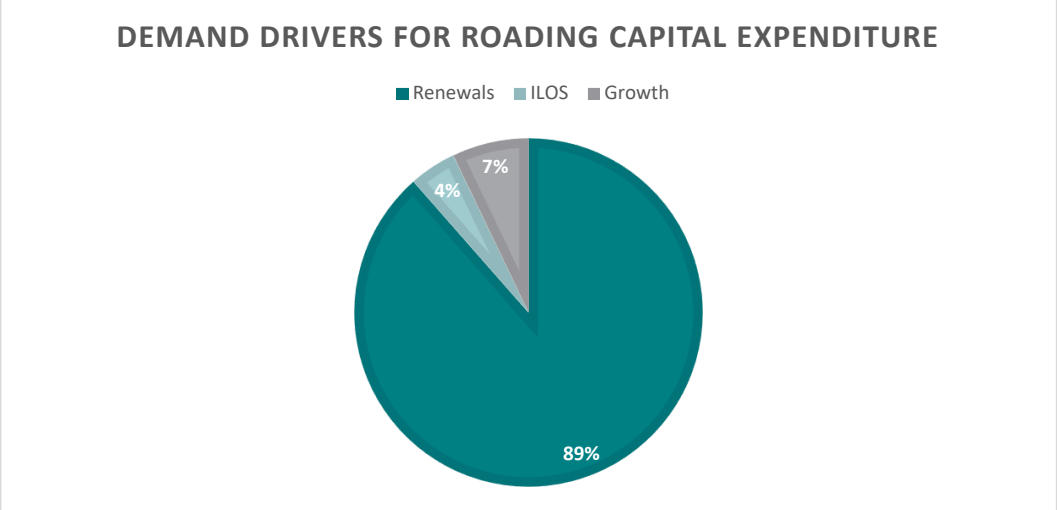

Figure 12: Roading capital expenditure (NOTE: This charge excludes transfers to reserves accounts for emergency work)

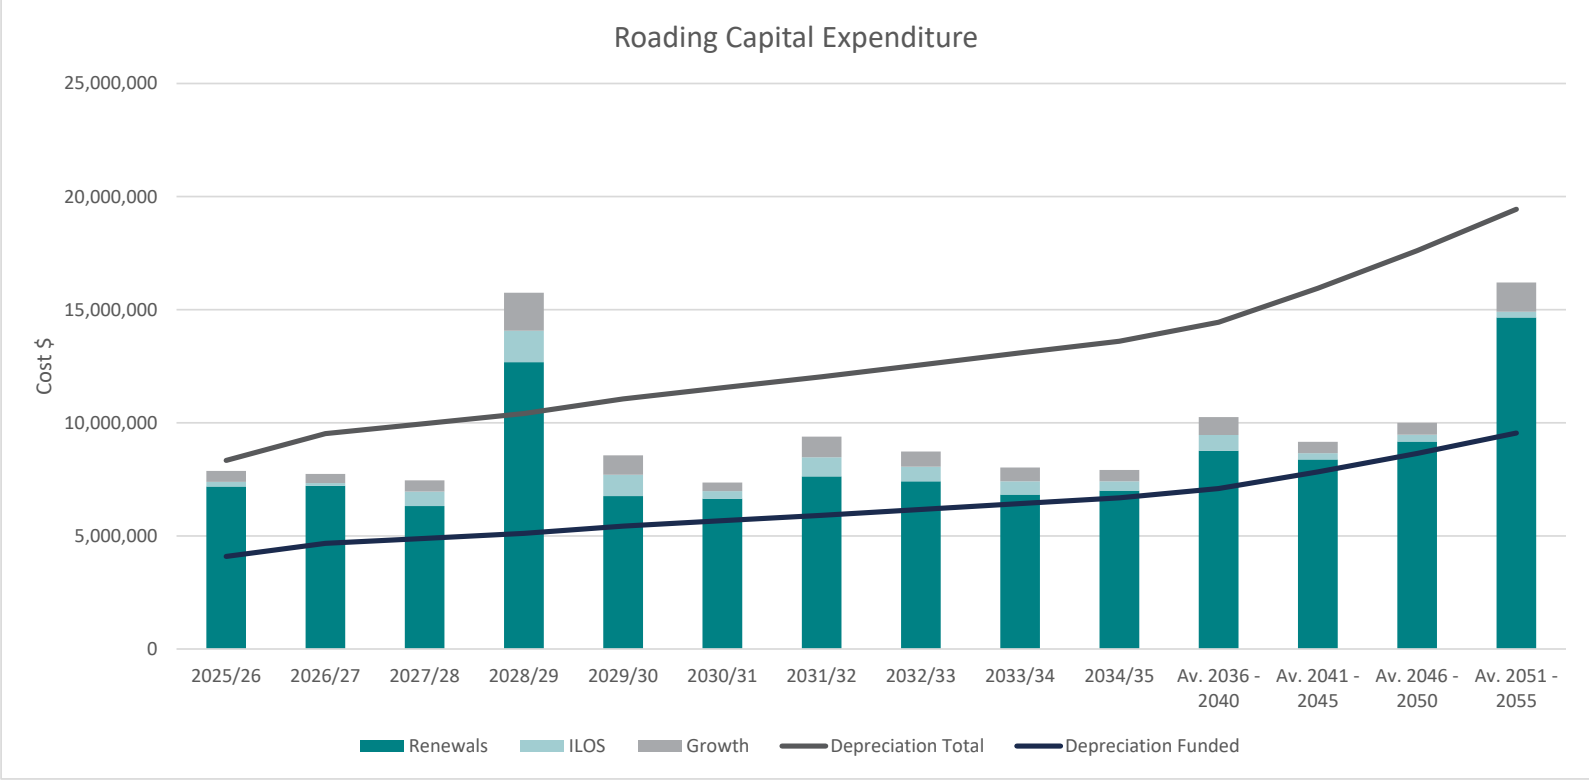

Figure 13: Roading operational expenditure (NOTE: This chart includes finance charges for the LTP years only as they are not modelled for years 11-30.)

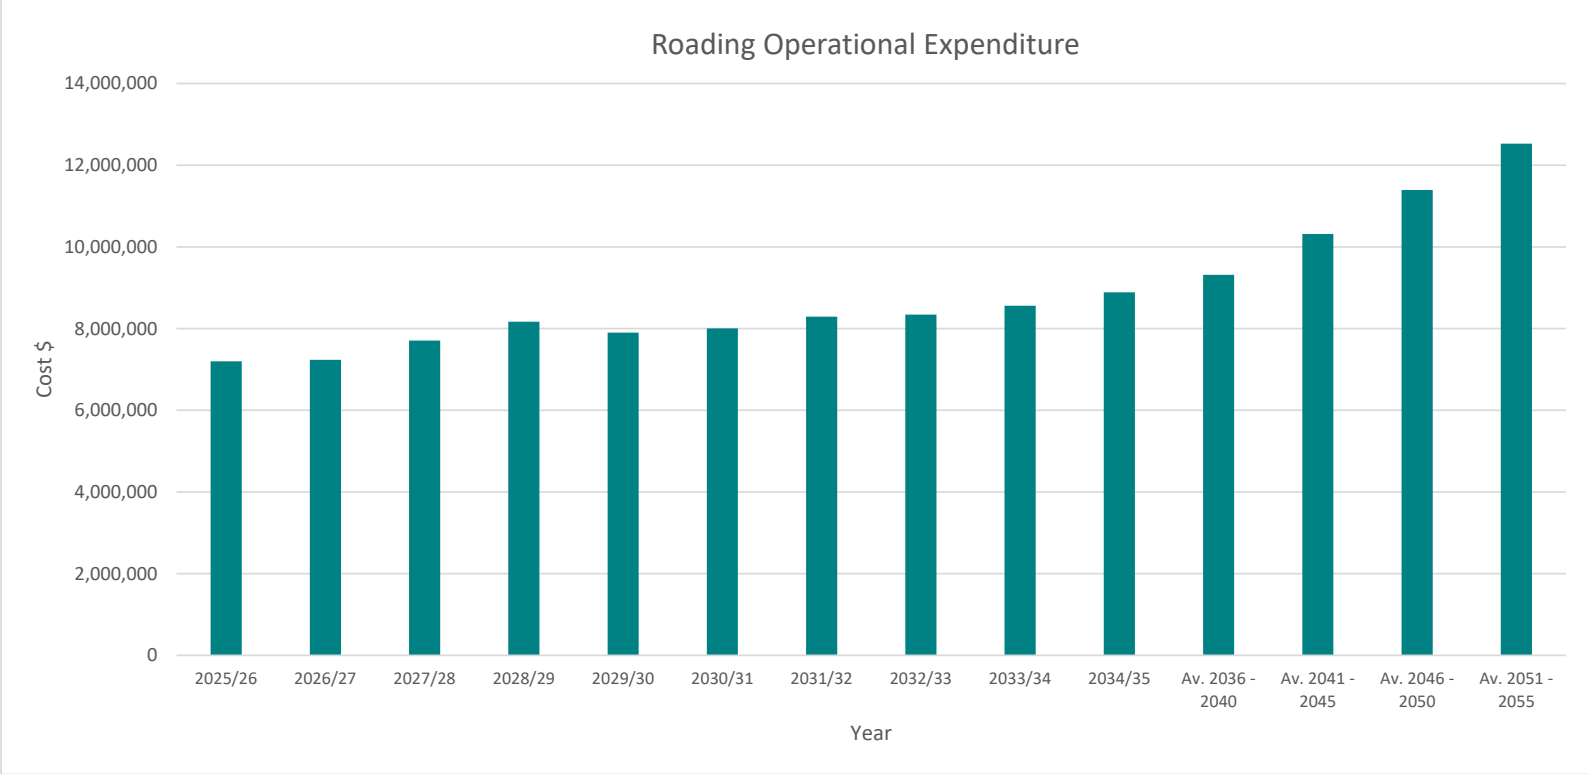

Table 19: Summary of key transportation projects in the capital programme

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Ida Valley Omakau Road Rehab	This section of the Ida Valley Road (RP10500-11540m) has been deteriorating over the past 2 to 3 years with increasing maintenance investment over this period.	A full design report was completed in July 2022. The recommended the preferred treatment for this site is scarification of the existing surfacing and a 200mm overlay of TNZ M/4:2006 AP40 aggregate.			2024/25	$1.2
Patearoa Road Rehab	We have seen deterioration of this 915m section of Patearoa Road (RP 0115-0930m). With expanding agriculture in the area including a large dairy farm at Paerau change of use has occurred. Seal width has been lost with widespread cracking, deformation and pumping of fines occurring.	Proposed treatment will be the same as Ida Valley Omakau road with scarification and construction of a 200mm overlay of TNZ M/4:2006 AP40 aggregate.			2025/26	$0.95

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Little Valley Bridge (#191)	Bridge expected to be end-of-life in the next 2-10 years.	Replacement of the timber components (deck and running boards) rather than replacement of the whole structure. Strengthening of piers following seismic assessment			2024-27	Deck Replacement: $2.55m (2024/25). Formation of Alternative Route and Contingency: $1.00m (2024/25). Pile Strengthening: $1.11m (2026/27).
Maniototo Road Bridge (#145)	Bridge expected to be end-of-life in the next 2-10 years.	Replacement of the bridge and explore divestment opportunities. Bridge detour is more than 20 km and bridge closure unlikely to be acceptable to the community.			2025-27	$1.06m (2025/26) + $0.27m (2026/27).

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Scott Lane Bridge (#121)			Removal of existing damaged structure. Replacement with lower-level service structure or removal.		2026/27	$0.27m (2026/27)
Unsealed Road Maintenance	Investment into unsealed road maintenance needs to occur due to changes in traffic volumes * heavy vehicles, land use changes, and issues raised by public.	Option 2 – Fund current average grading quantities (light grade).	Option 1 - Grading and additional Grading programme from dTIMS, plus aligned road sections (heavy grade) Option 3 - Funding current average grading quantities (heavy grade)		2024/25	$0.82

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Cromwell Town Centre	Cromwell Town Centre transportation infrastructure is now becoming congested at peak times, with intersections unable to manage the exponential traffic growth being experienced. Delivery of calming and intersection improvements at Sargood Road, Barry Avenue, Murray Terrace, and Waenga Drive. Project underway looking at the options for improving this area with safety at the heart	Cromwell Town Centre Master Plan (Barry Avenue / Murray Terrace multimodal Intersection Improvements)	Higher level of service options (e.g. traffic lights, raised pedestrian crossings) to improve traffic and safety outcome but at higher cost		2030-34	$0.02 for design in 2030/31 $0.47 for construction in 2033/34
		Cromwell Town Centre Master Plan (Barry Avenue / Waenga Drive Roundabout Intersection Upgrade)	Higher level of service options (e.g. traffic lights, raised pedestrian crossings) to improve traffic and safety outcome but at higher cost		2029-32	$0.84 for design in 2029/30 $1.67 for construction in 2031/32

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
	but it's a core inter-dependency on the Cromwell Town Centre project	Cromwell Town Centre Master Plan (Realignment of Murray Terrace at Sargood Road)	Higher level of service options (e.g. traffic lights, raised pedestrian crossings) to improve traffic and safety outcome but at higher cost		2027-30	$0.05 for design in 2027/28 $1.09 for construction in 2028/29 and $0.67 for construction in 2029/30
		Cromwell Town Centre Master Plan (Sargood Road / Murray Terrace Roundabout Intersection Upgrade)	Higher level of service options (e.g. traffic lights, raised pedestrian crossings) to improve traffic and safety outcome but at higher cost		2027-30	$0.11 for design in 2027/28 $1.36 for construction in 2028/29 $0.840 for construction in 2029/30.

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
		Cromwell Town Centre Master Plan (Waenga Drive / Murray Terrace Multimodal Intersection Improvements)	Higher level of service options (e.g. traffic lights, raised pedestrian crossings) to improve traffic and safety outcome but at higher cost		2030-34	$0.023 for design in 2030/31 $0.47 for construction in 2033/34
		Link Lane (Cromwell CBD legal road to formalise link through service lanes and car parking)			2029-34	$0.56 for design in 2029/30 and $0.825 for construction in 2032-33
Sandflat Road seal extension	Isolated section of gravel road remains in this area. Growth in traffic volume has resulted in excessive maintenance costs, safety issues, and an increasing number of dust complaints.	Sealing the remainder of Sandflat Road will address the need for frequent grading. Gravel costs are increasing significantly and expected to continue to do so, particularly in this area.	Defer and risk additional costs, safety issues and complaints		2027/28	$0.44

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Walking and Cycling Improvements (district wide)	Growth, aging demographic, and increased traffic exacerbates safety issues where there are gaps in the existing footpath network	Programme for new sections of footpaths, cycleway or associated improvements considering public requests and the development of spatial plans	Defer and not provide safety improvements		2029-33	

Water Supply

Overview

Central Otago District Council supplies water to over 71% of the District's population through the operation of eight individual water supplies. Over the last 30 years Council has progressively amalgamated water supplies, reducing the number of water supplies from 11 to the current 8 water supplies.

The Water Supply activity provides safe and effective treatment, storage and distribution of water to urban and some rural residential areas of the district. The water supplies contribute to improving, promoting and protecting public health, provide firefighting capabilities and contributes to the local economy.

Council supports this service by:

- Providing, operating and maintaining of water infrastructure in compliance with New Zealand legislation and standards
- Responding to call outs and service disruptions quickly and efficiently
- Planning for future development and needs

Council has a legal obligation under the Health Act 1956 to improve, promote, and protect public health within the District. The Water Services Act 2021 places a further obligation on Council to comply with the Drinking Water Standards for New Zealand. In terms of the Local Government Act 2002 and subsequent amendments, the continued operation of water supplies is required unless specific approval is sought to withdraw from the activity (in whole or part). The Council sees the provision of reliable and safe drinking water to the community as a major contribution to the well-beings of the residents and the District's economy.

Key issues and responses

Table 20: Water supply key issues and responses

Level of Service Outcome	Key Issues	Key Responses
Safe and Healthy	• Water quality in Central Otago sits well below the national average • Central Otago District Council had 4 schemes without Protozoa barriers in place.	• Upgrades of the Cromwell, Omakau, Patearoa and Ranfurly treatment plant.
Growth and Accessibility	• Central Otago district has experienced a period of rapid and prolonged population growth.	• Reticulation extension into Dunstan Flats area. • Cromwell Water Treatment Plant upgrades.
Renewals	• Aging and failing waters infrastructure.	• $132,100m of pipe renewals. • $73,500 of point renewals. • $48,500 of plant renewals.

Level of Service Outcome	Key Issues	Key Responses
Environment and Sustainability	• The Naseby, Ranfurly, and Patearoa networks are particularly vulnerable to dirty water impacting on treatment processes following storm events.	• Upgrades of the Cromwell, Omakau, Patearoa and Ranfurly treatment plant.
Resilience and Reliability	• CODC's 3 Waters Unit has traditionally been under-resourced. The Three Waters reform programme and ever-expanding environmental compliance requirements continues to place increased demand on our team.	

Figure 14: Cost apportionments for water capital expenditure

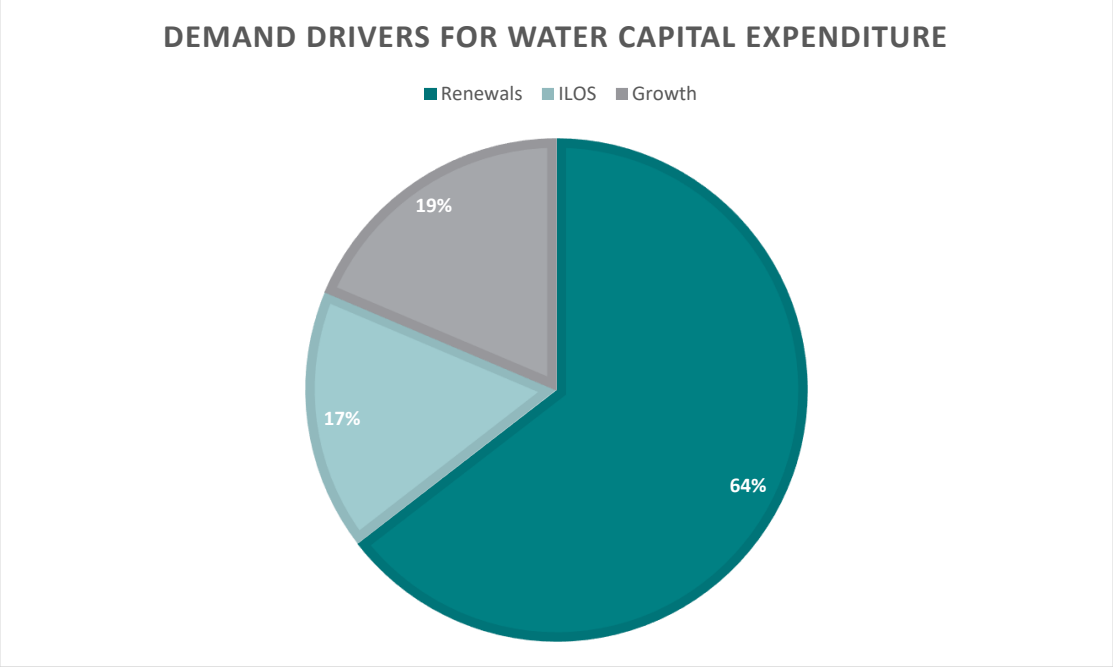

Figure 15: Water capital expenditure

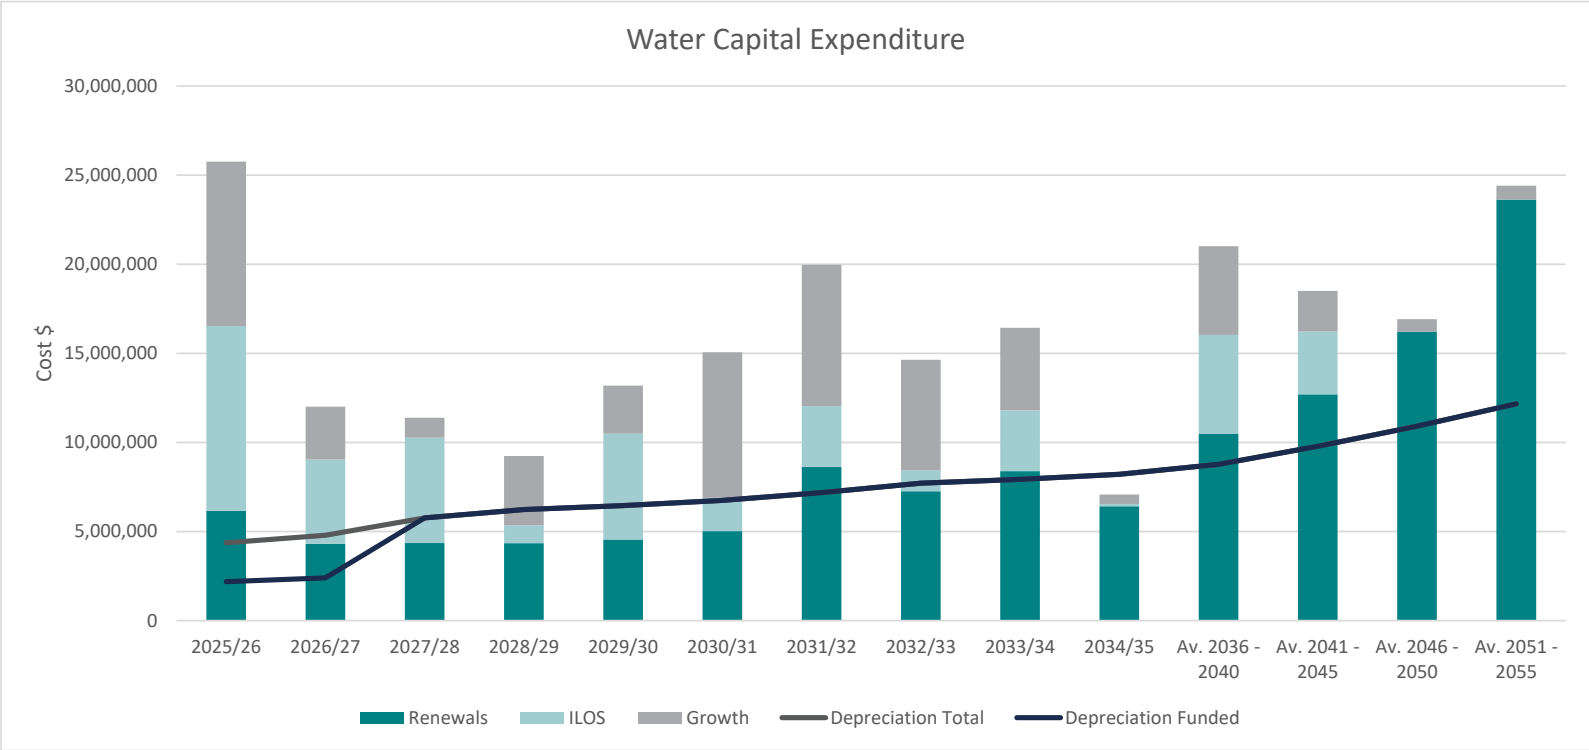

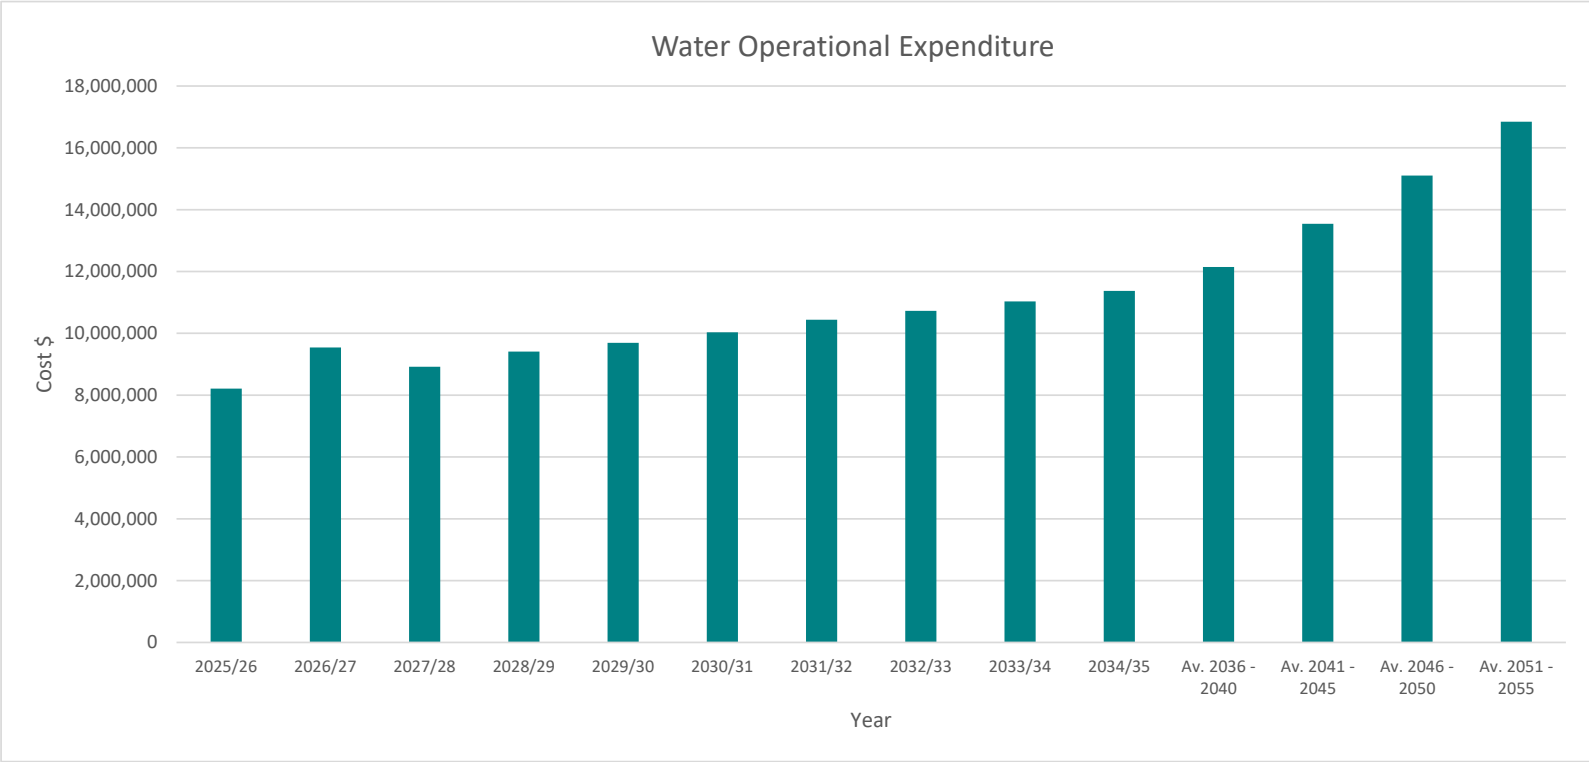

Figure 16: Water operational expenditure

72

Table 21: Summary of water supply projects in the capital programme

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Reticulation extension into Dunstan Flats area	Bores on some rural residential properties in the Dunstan Flats area run dry during the summer months. This is expected to get worse as irrigation practices change.	This project extends reticulation into the area between Alexandra and Clyde, called the Dunstan Flats	Leave properties on their individual private water supplies	LOS 80% Growth 20%	2035 +	$43.46
Cromwell Water Treatment Plant Upgrade	The existing treatment does not meet protozoa treatment requirements and there is insufficient bore capacity to optimise the treatment plant and meet future demand.	Protozoa barrier installation (must be in place by December 2025)	Defer compliance and accept risk	LOS:47% Renewal:13% Growth: 40%	2025/26	$11.8
Omakau/Ophir Water Treatment Plant Upgrade	The raw water for Omakau/Ophir is a surface water source and is vulnerable to turbidity following rain. High turbidity events result in plant shut down and issue of a boil water notice. The supply is also vulnerable to low river flow during summer when water restrictions may be required.	Treatment plant upgrade to provide a more a resilient and compliant water supply	Connect existing network to Lake Dunstan Water Supply	LOS:95% Renewal:4% Growth: 1%	2025/26 2026/27 2027/28	$0.35 $4.37 $5.42

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Bannockburn Rd capacity upgrade	Insufficient capacity in existing pipeline to Bannockburn to meet levels of service on network fringes, firefighting requirements and growth demand. Ad-hoc development between Bannockburn and Richards Beach has resulted in sub-optimal connection configurations.	Pipeline upgrade	Defer upgrade and risk being able to provide sufficient levels of water	LOS:10% Renewal:30% Growth:60%	2032/33 2033/34 2035+	$0.479 $1.29 $7.05
Pisa Network Upgrades	Additional capacity required to allow existing separate Pisa water supply be connected into Cromwell treated supply, to meet NZ Drinking Water Standards and provide capacity for growth.	Pipeline upgrade Requires a 1500m3 reservoir, dedicated 407mm ID rising main, dedicated 366mm min ID falling main, and a new 302mmID pipe along Luggate Cromwell Road	Defer upgrade and risk being able to provide sufficient levels of water	LOS:0% Renewal:0% Growth: 100%	2029/30 2032/33 2035+	$1.36 $2.61 $4.79

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Ranfurly Water Treatment Plant Upgrade	The Ranfurly water supply does not comply with Drinking Water Standards NZ and the source water has significant issues.	Protozoa barrier installation (must be in place by December 2024)	Investigations are ongoing to find a suitable source to provide for a combined Ranfurly/Naseby source and treatment plant	LOS:94% Renewal:5% Growth: 1%	2024/25 2025/26	$0.20 $1.5
Ripponvale pipe capacity and LOS upgrade	Insufficient capacity in existing pipeline to Ripponvale to meet levels of service on network fringes, firefighting requirements and growth demand.	Pipeline upgrade	Defer upgrade and risk being able to provide sufficient levels of water	LOS:20% Renewal:10% Growth: 70%	2032/33 2033/34	$0.68 $1.67
Cromwell Ring Main	Insufficient capacity in existing pipeline to Pearson Road and Sandflat Road to meet levels of service on network fringes, firefighting requirements and growth demand.	Pipeline upgrade	Defer upgrade and risk being able to provide sufficient levels of water	LOS:10% Renewal:20% Growth: 70%	2030/31 2031/32 2032/33 2033/34	$0.46 $2.46 $1.64 $2.51

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Bannockburn Reservoir and pipe upgrades	There is inadequate reservoir capacity at Bannockburn from 2024.	Pipeline upgrade A minimum additional 300m3 is required, as well as upsized pipe from Reservoir to Hall Road, and Hall Road to Bannockburn Bridge	Defer upgrade and risk being able to provide sufficient levels of water	LOS:10% Renewal:0% Growth: 90%	2024/25 2025/26 2026/27 2027/28	$0.42 $2.34 $2.08 $0.69
Ripponvale Reservoir	Shannon Farm development provides an opportunity to replace the existing Ripponvale Reservoirs with the new one going in on this development.	Pipeline upgrade Funding required to upsize developers reservoir and reconfigure existing Ripponvale network to feed off this. Current modelling identifies a reservoir size of 400m3 as required	Defer upgrade and risk being able to provide sufficient levels of water	LOS:20% Renewal:0% Growth: 80%	2024/25	$0.42

Wastewater

Overview

Council provides seven wastewater systems that collect, treat and dispose of liquid waste to acceptable environmental standards. These wastewater systems are located at:

- Cromwell/Bannockburn
- Alexandra/Clyde
- Ranfurly
- Roxburgh
- Omakau/Ophir
- Naseby
- Lake Roxburgh Village

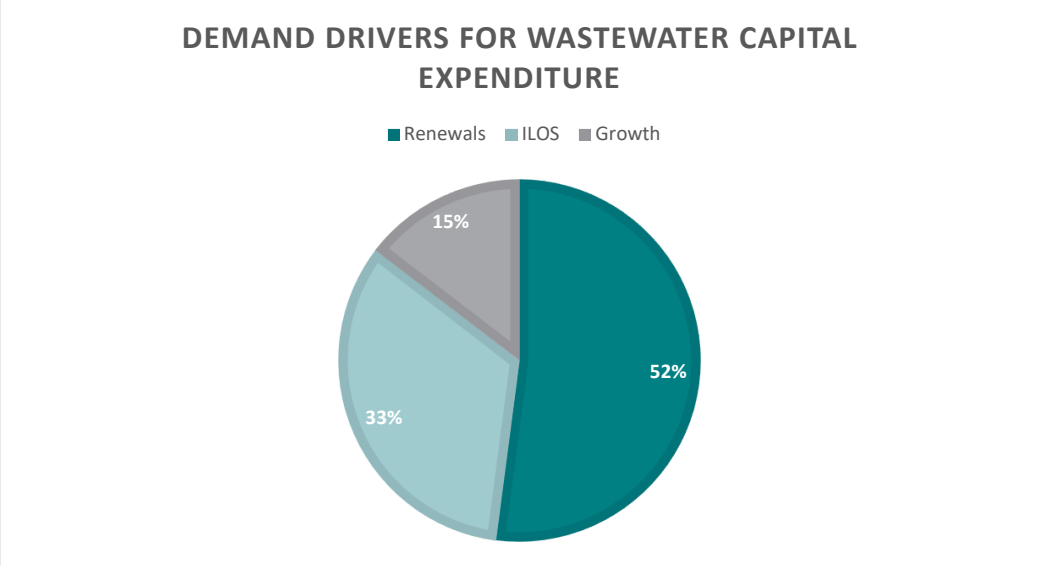
Council supports this service by:

- Providing, operating and maintaining wastewater infrastructure in compliance with New Zealand legislation, standards and resource consents
- Responding to call outs and service disruptions quickly and efficiently
- Planning for future development and needs.

Council has a legal obligation under the Health Act 1956 to improve, promote, and protect public health within the district. This includes identifying the need for wastewater services and either providing these directly or overseeing the service if it is provided by others.

The Council sees the provision of reliable wastewater collection and treatment services to the community as a major contribution to the district's economy and to resident's wellbeing. The Local Government Act 2002 requires ongoing wastewater services unless specific approval is sought to withdraw from this.

The Council sees the provision of reliable and safe wastewater services to the community as a major contribution to the well-beings of the residents and the district's economy.



Key issues and responses

Table 22: Wastewater key issues and responses

Level of Service Outcome	Key Issues	Key Responses
Safe and Healthy	• Increased treatment costs will occur to upgrade wastewater treatment plants to meet new freshwater standards.	• Cromwell Wastewater Treatment Plant Upgrade
Growth and Accessibility	• Central Otago district has experienced a period of rapid and prolonged population growth.	• Cromwell Wastewater Treatment Plant Upgrade

Level of Service Outcome	Key Issues	Key Responses
Renewals	• Aging and failing infrastructure. • Inflow and infiltration.	• District wide Inflow and Infiltration reduction.
Environment and Sustainability	• Sludge management. • Environmental compliance – Council operate the wastewater systems under resource consents granted by the Otago Regional Council. These consents require significant sampling, monitoring, operation and maintenance methodologies and regular reporting.	• Desludging of Cromwell Wastewater treatment Plant and Roxburgh treatment Plant to lower nitrogen levels to consent limits. • Ranfurly Wastewater Treatment Plant wetland upgrade to improve treatment efficiency and ensure compliance with environmental consent conditions. • Naseby Wastewater Treatment Plant aeration upgrade to improve treatment process and ensure compliance with environmental consent conditions. • Construction of a new modern Omakau Wastewater Treatment Plant on a new local site to enable discharge of treated wastewater to land.
Resilience and Reliability	• Ensure adequate in-house staff resource capacity and capability. • Increasing expectations on wastewater treatment practices.	• Alternative wastewater treatment and discharge options for Alexandra, Clyde & Omakau • Improve pumping and storage capacity to accommodate inflow during high flow, resulting in overflows to waterways.

Figure 17: Cost apportionments for wastewater capital expenditure

79

Figure 18: Wastewater capital expenditure

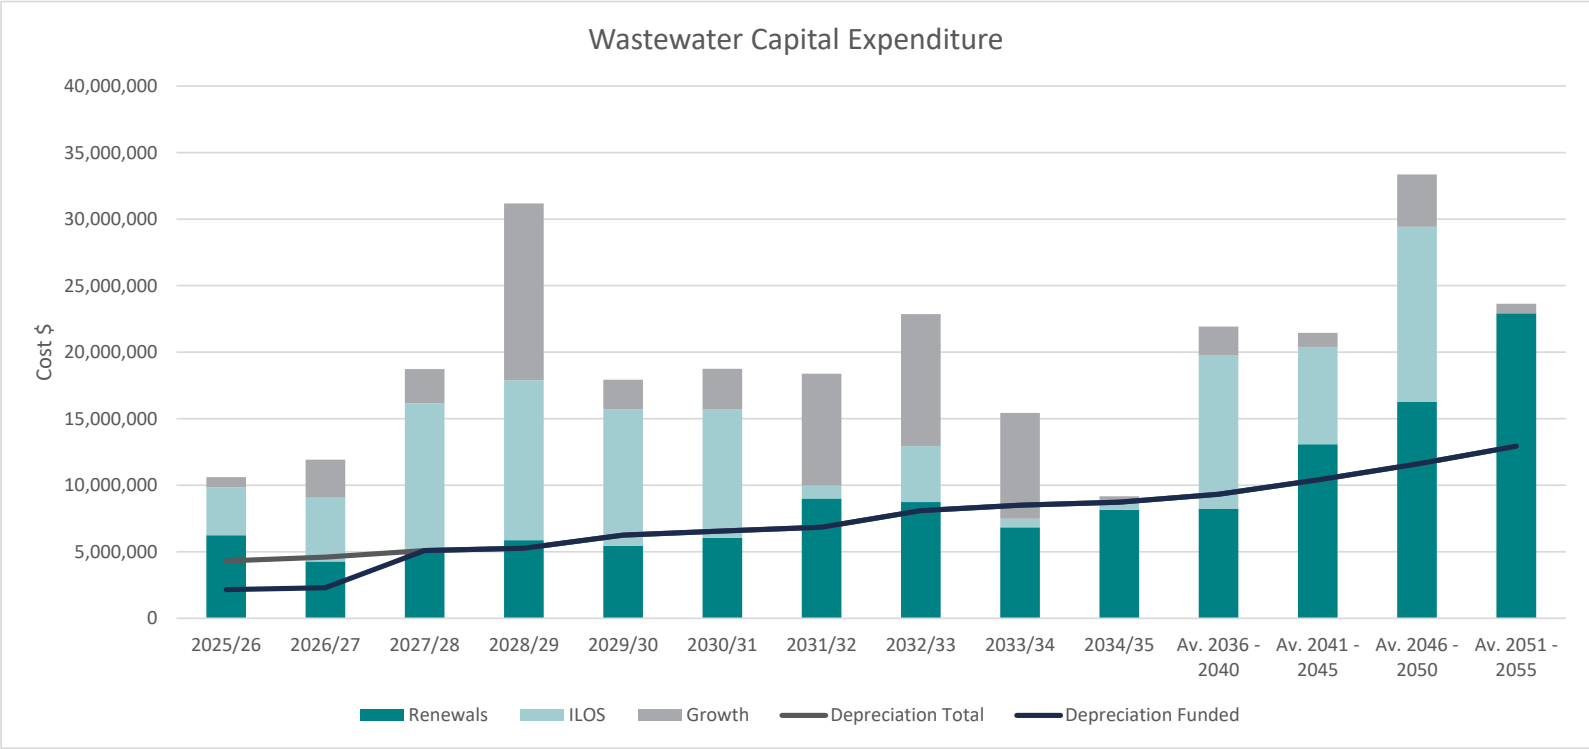


Figure 19: Wastewater operational expenditure

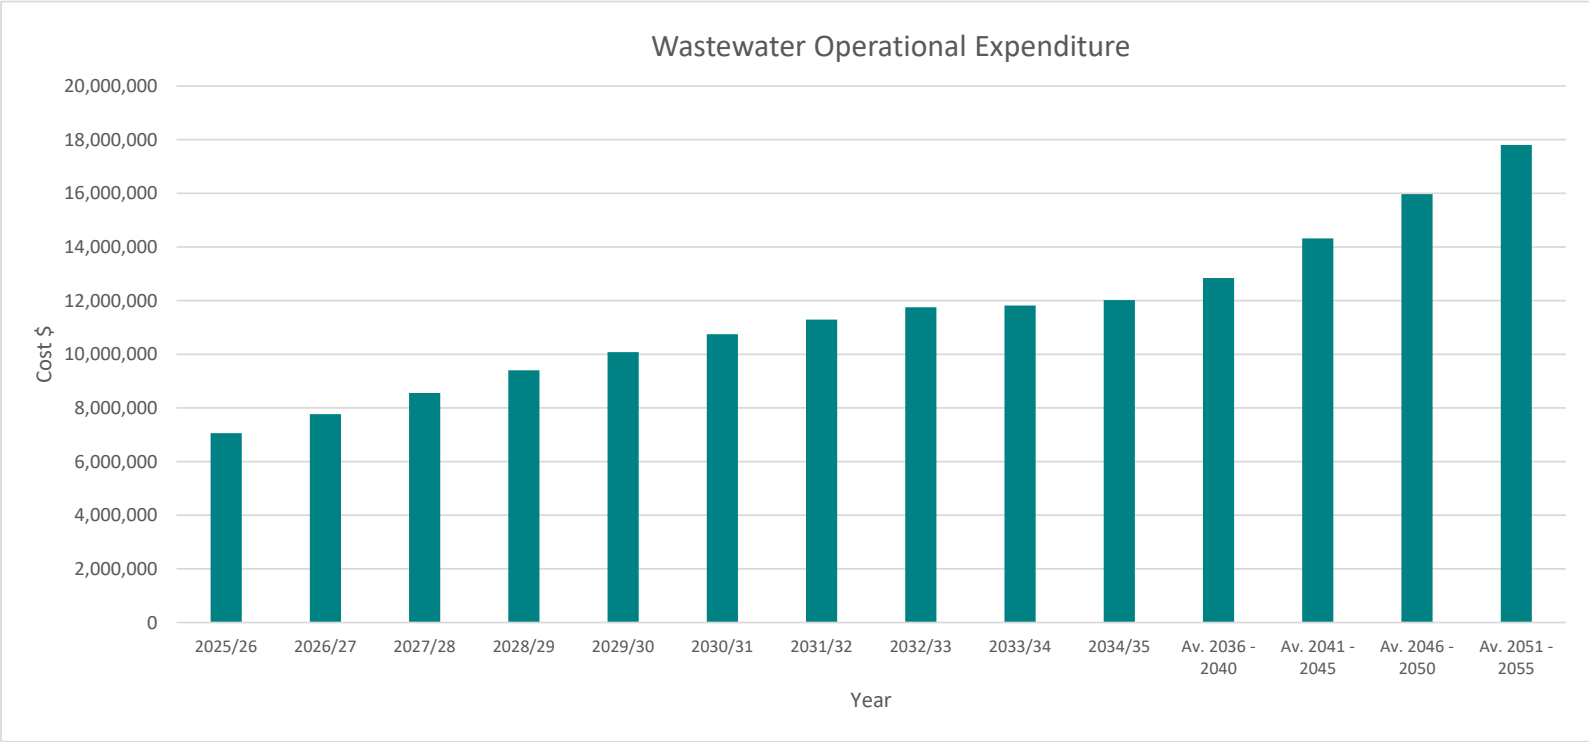

Table 23: Summary of wastewater projects in the capital programme

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Alexandra Wastewater Treatment Plant	Plant discharges to the Clutha Matau River. Consents expire within five years. Reduce risk of catastrophic plant failure & resource consent renewal	Upgrading the existing plant and continuing to discharge to the Clutha Matau River	Moving the WWTP and discharging to land.	LOS: 70% Renewal: 10% Growth: 20%	2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31	$0.28 $0.5 $5.61 $7.93 $6.38 $6.59 $8.56
Cromwell Wastewater Treatment Plant	Additional treatment upgrade for nitrogen removal will be required to ensure the impacts of additional loading due to population growth does not negatively impact on the quality of discharges.	Additional treatment upgrade for nitrogen removal The membrane treatment also need to be extended to cope with growth.	Defer upgrade and risk non-compliance	Growth: 100%	2024/25 2028/29	$0.17 $11.26

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	Year	Escalated Cost ($ Million)
Omakau Wastewater Treatment Plant	The resource consent expires in 2027.	Identifying and working towards alternative treatment and discharge	Connect to Alexandra WW network	LOS: 88% Renewal: 8% Growth: 4%	2024/25 2025/26 2026/27 2027/28 2028/29 2029/30 2030/31	$0.15 $0.78 $0.87 $5.98 $8.46 $6.28 $3.99
Renewals	Safeguarding the collection and treatment systems through optimum replacement of assets nearing the end of operational life.	Includes upgrades, refurbishment or replacement of existing facilities and pipes to maintain capacity or performance	Defer renewals programme and risk poor asset performance		LTP Period	$42.56

Stormwater

Overview

Council operates stormwater systems in ten community areas in the Central Otago District which provide a degree of protection against rainfalls of a moderate intensity. These stormwater systems are located at:

- Alexandra
- Clyde
- Bannockburn
- Cromwell
- Pisa Village
- Naseby
- Omakau
- Ranfurly
- Roxburgh
- Lake Roxburgh Village

Of the ten public stormwater systems, only the Alexandra and Cromwell systems are considered substantial. The remaining systems are small, consisting of a few pipes and open drains each.

The stormwater systems contribute to:

- The safe and effective collection, diversion and control of moderate intensity rainfall
- Protect property from damage
- Aid the health and safety of the community.

Council supports this service by:

- Providing, operating and maintaining of the stormwater infrastructure
- Responding to call outs and service disruptions quickly and efficiently
- Planning for future development and needs.

The stormwater activity excludes roads, kerb and channels, catchpits and the infrastructure necessary to connect these items to the stormwater drains, as these form part of the Roading activity.

Council is legally obliged under the Health Act 1956 to improve, promote and protect public health within the District. This includes identifying the need for stormwater services and either providing these directly or to oversee the service if it is provided by others. The Local Government Act 2002 requires ongoing stormwater services unless specific approval is sought to withdraw from this.

Council-issued building consents require that plans comply with the Building Regulations for drainage, which specify standards for protection of buildings against flood inundation. Council owned stormwater assets in urban areas must also comply with the Building Regulations. The Council sees the provision of reliable and safe stormwater services to the community as a major contribution to the well-beings of the residents and the District's economy.

Key issues and responses

Table 24: Stormwater key issues and responses

Level of Service Outcome	Key Issues	Key Responses
Safe and Healthy	• Greater intensity and frequency of extreme weather events are expected and appropriate response is to be developed	• Catchment Management Plans • Stormwater Management Plans
Growth and Accessibility	• Central Otago is among the fastest growing districts in New Zealand	
Renewals	• Addressing historic underspend on stormwater infrastructure	• District wide stormwater treatment upgrades.
Environment and Sustainability	• Increasing environmental standards for stormwater are expected in the future.	• Stormwater consent applications.
Resilience and Reliability	• Property Owners contributing to the stormwater rates have an increased expectation on Council's responsibility to provide adequate protection on properties through improved infrastructure.	• District-wide reduction in I/I to reduce rate of inflow of rainfall and stormwater into the wastewater system, reducing future demand and volume of discharge.

Figure 20: Cost apportionments for stormwater capital expenditure

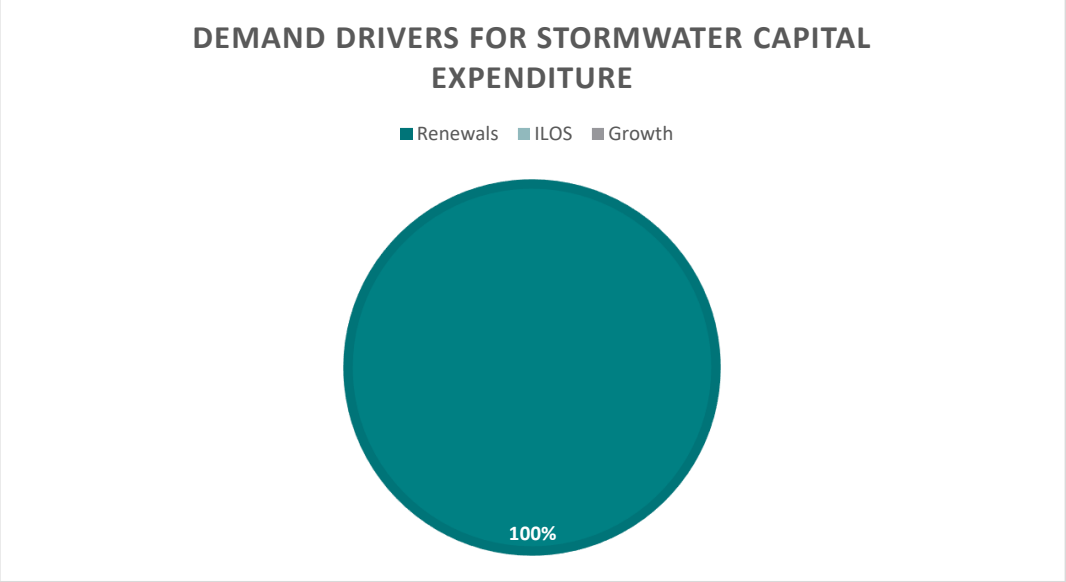

Figure 21: Stormwater capital expenditure

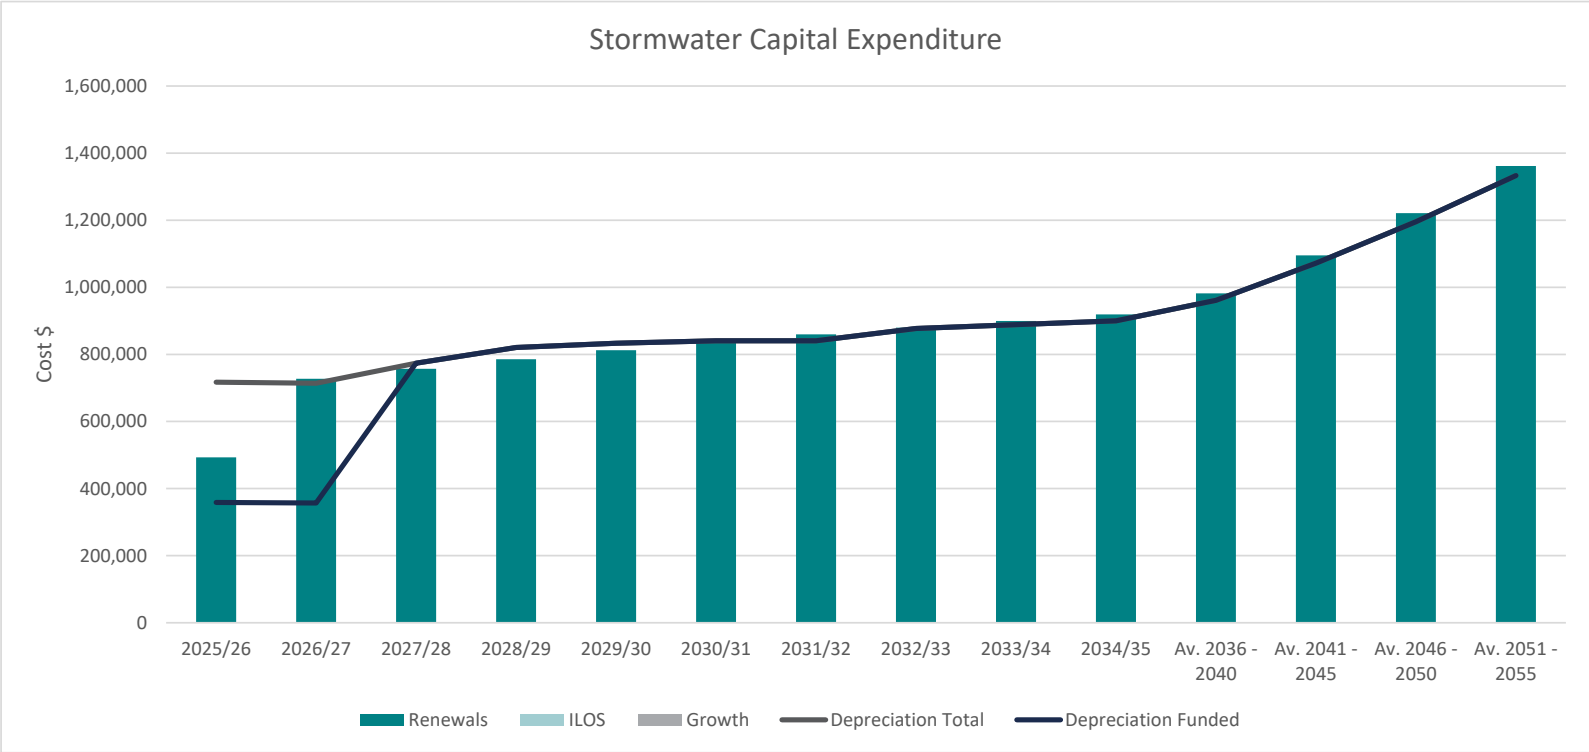

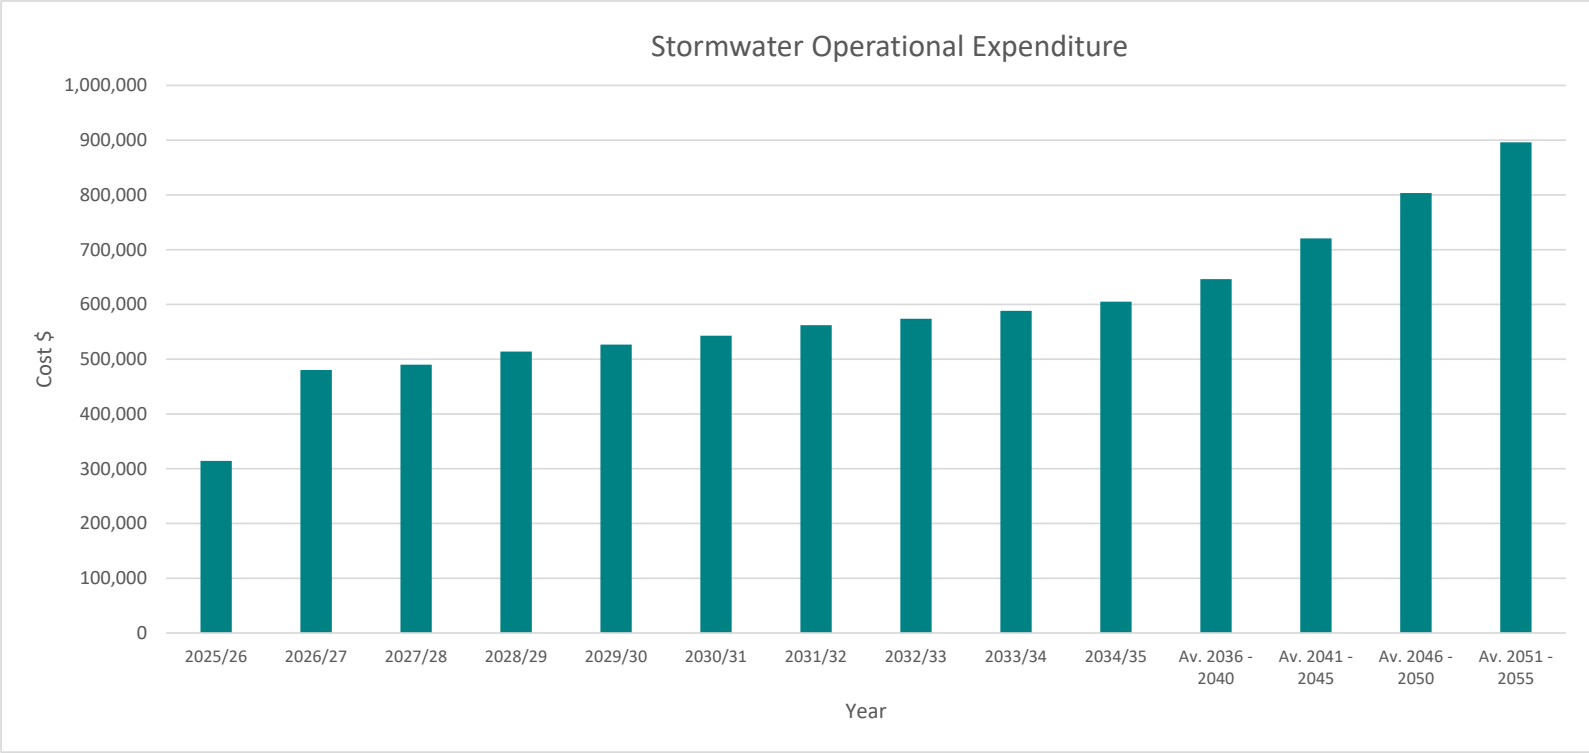

Figure 22: Stormwater operational expenditure

87

Table 25: Summary of stormwater projects in the capital programme

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	2020 Cost ($ Million)	Year	Escalated Cost ($ Million)
Catchment Management Plans	Ensuring that development occurs only in a sustainable way that will not encroach on flow paths and ensure that adequate stormwater network is created when and where required. They also identify any areas susceptible to erosion or poor water quality and set out appropriate actions to minimise this damage	11 plans - Pisa, Crom, Alex, Clyde, Bannockburn, LRV, Rox, Omakau, Naseby, Ranf, Lowburn at $35k per plan, to be delivered over 5 years. Not included - small towns such as Oturehua, Millers Flat, St Bathans where there is no densely populated urban areas.	Do not complete and risk unsustainable development	Renewal: 100%		2024/25 2025/26 2026/27 2027/28 2028/29	$0.035 $0.109 $0.109 $0.113 $0.039
Stormwater Risk Management Plans	Identifying any hazards and assess risk relating to the network in the district.	11 plans - Pisa, Crom, Alex, Clyde, Bannockburn, LRV, Rox, Omakau, Naseby, Ranf, Lowburn	Do not complete and risk missing hazards	Renewal: 100%		2024/25 2025/26 2026/27 2027/28 2028/29	$0.01 $0.03 $0.03 $0.03 $0.01

Project	Problem	Principal Option	Principal Alternatives	Capital Expenditure Split	2020 Cost ($ Million)	Year	Escalated Cost ($ Million)
Stormwater hydraulic models	Are required to aide drainage design by providing engineers with a set of tools for simulating and analysing various hydraulic scenarios.	Only for Cromwell, Alexandra 1 per annum driven by regulatory changes for stormwater in the new Regional Land and Water Plan	Do not complete and risk poor drainage designs	Renewal: 100%		2025/26 2026/27	$0.150 $0.156

Section 7 Assumptions and Risk

Both the Water Services and Roading Activity Management Plans outline the assumptions, negative effects and risks for the individual activities. These include specific activity risk registers that follow Councils Corporate Risk Management Policy.

The following tables identify the assumptions that have been made in developing the 30 Year Infrastructure Strategy and associated work programme, and the risks associated with these assumptions.

Table 26: Summary of key assumptions and risks

Assumption	Risk	Consequence	Likelihood	Mitigation
The growth scenario used is appropriate for Council's long term planning	Growth occurs at a different rate to the medium growth projections	Capacity improvements will need to occur sooner, or be delayed	Moderate	Growth projections are reviewed every three years, and project timing is reconsidered based on updated data
There will be more stringent requirements for Urban Water Quality discharges under new national Environmental Standards	The requirements, and timing of compliance are not yet known	The standard of discharge assumed may be overestimated or further costs if standard of discharge assumed is under estimated	Moderate	Upgrade requirements are reviewed every three years as new standards are developed
The implementation period for compliance new national Environmental Standards will occur when existing consents are due for renewal	The implementation period to comply with new requirements may be shorter than allowed for in project planning in this Infrastructure Strategy	Costly upgrades will need to be undertaken earlier	Moderate	Upgrade timelines are reviewed every three years as new standards are developed

Assumption	Risk	Consequence	Likelihood	Mitigation
There will be no further legislative changes regarding the level of treatment required to comply with the NZ Drinking Water Standards	It is possible that there will be further legislative change as Taumata Arowai continues to fulfil its role. It is unknown if this will change the level of treatment required	Financial penalties if prosecuted for not meeting the required standards	Unlikely	Projects to improve treatment of water schemes to meet the bacteria and protozoa requirements will be completed within the first 3 years of this LTP.
There will be legislative changes regarding treatment operations, monitoring, and reporting with the NZ Drinking Water Standards	These changes have been indicated through early engagement with Taumata Arowai and the proposed Water Services Bill	Financial penalties if prosecuted for not meeting the required standards	Almost Certain	Council has proposed to increase operational funding for resourcing to improve management and operations of water schemes
The options to solve the problems will be the same in the future as they are today	Technology advances may provide more cost effective options for addressing the problems in the future	Council may over-estimate the cost of addressing some of the problems	Moderate	Constant review of emerging technologies. 3 yearly reviews of the Asset Management Plans, Long Term Plan, and Infrastructure Strategy
The existing infrastructure will perform as expected and expected useful lives will be achieved on significant assets	Mechanical, electrical, biological, and complex process equipment could fail earlier than expected. Climatic conditions could impact on the effectiveness of biological processes. Sedimentation could affect bores at water sources	Additional renewal work could be required	Moderate	Performance monitoring of assets along with condition assessments to determine the timing of replacement of end of life assets

Assumption	Risk	Consequence	Likelihood	Mitigation
Inadequate human resources to deliver council services	Council is unable to attract or retain a sufficient number of people with the capabilities to deliver agreed services	Lowering levels of service and delays in capital projects Increase use of consultants at higher cost	Almost Certain	Workload management, positive workplace culture and leadership. Use consultants to assist with peak workloads. Streamline work processes to make better use of staff time. Use of collaborative contracting models with contractors and consultants to best optimise staff resources across all organisations.

Assumption	Risk	Consequence	Likelihood	Mitigation
The contracting industry does not have the resources to respond to the projected bow wave of central and local government investment in infrastructure	Contractors, consultants, and materials are not available	Higher tendered costs due to reduced competitiveness in the market	Almost Certain	Council staff meet with representatives from local large and medium sized contractors monthly to keep informed of workloads and contractor capacity. This provides information regarding the local market, and feedback from contractors is used to ensure tendering is timed to meet capacity, material order and lead in times are considered in programming, and contract deadlines are realistic and achievable. Contractor feedback is also considered when determining procurement options. Councils across Otago and Southland are also sharing information on upcoming tenders and construction work programs to manage conflicting demands on the market. Where practical, contracts within Central Otago will be of a size to enable medium sized contractors within the region to tender the work

Assumption	Risk	Consequence	Likelihood	Mitigation
Projects will be delivered on time in accordance with the funding timeline	Inadequate lead times are provided on projects to undertake investigations and consent work prior to programmed construction dates	Public dissatisfaction and reputational risk due to late delivery on consulted projects	Moderate	Provide adequate lead in times during project and financial planning to enable preliminary investigation, consent, and design work to be undertaken in preceding years to construction
There will be no significant earthquakes which cause widespread damage to Council infrastructure	A significant earthquake could have a catastrophic impact on Council core infrastructure	Service could be lost on parts of the networks	Unlikely	Network resilience and emergency response plans have been developed to improve our ability to respond to an event
There will be moderate natural disasters that interrupt day to day business and cause damage to Council infrastructure	That events are more severe or more often than anticipated	Loss of business continuity, significant damage to underground assets that are self-insured and increased insurance premiums	Almost Certain	Business continuity planning Council sets aside $165,000 per annum for disaster recovery to cover moderate events and damage to underground assets. Council also has the ability to raise debt for costs above the fund balance, which currently sit at around $2.6million
Population growth will occur in the expected locations	Demand for property, and increasing land value in Cromwell, Clyde and Alexandra may result in lower cost alternatives such as Maniototo and Roxburgh experiencing higher than anticipated demand	Greater demand will be placed on infrastructure in Maniototo, and Roxburgh.	Moderate	Infrastructure Staff monitor resource consent applications to get early warning of issues such as this Models will be updated more frequently if development occurs in different places than anticipated

Assumption	Risk	Consequence	Likelihood	Mitigation
External interest income rates are assumed to be 2% to 3% over the life of the plan	Interest rates move affecting interest income.	Greater cost through a either lower interest income.	Moderate	Duration of investments are set to minimise interest rate exposure Council invests in accordance with the Investment Policy
Internal interest rates are assumed to be 2% to 3% over the life of the plan	Interest rates move affecting interest income and the cost of borrowing	Greater cost through a either lower interest income or higher borrowing costs	Moderate	Duration of loans and investments are set to minimise interest rate exposure Council invests and borrows in accordance with the Investment Policy and Liability Management Policy
Economic growth will continue, and a recession will not occur	Austerity measures are required to reduce public spending	Reductions in levels of service, deferral of improvement and growth related work	Moderate	Annual plan revisions 3 yearly reviews of the Asset Management Plans, Long Term Plan, Financial Strategy and Infrastructure Strategy.
That inflation will occur at the rates forecast in the Berl report.	Inflation costs may be much higher, particularly in the next three years	Insufficient budgets to deliver proposed programmes, or levels of service	Unlikely	Work programs will be reprioritised to minimise impacts on levels of service 3 yearly reviews of the Long Term Plan, Financial Strategy and Infrastructure Strategy.
Net operational savings will be achieved equivalent to year 2 and 3's inflation rate	Savings are not achieved	Higher rates or reduced levels of service	Moderate	Depreciation and staff cost are excluded for this assumption Management committed to the process

Assumption	Risk	Consequence	Likelihood	Mitigation
Net expenditure in 2024/25 is the same as planned through the 2024/25 annual plan	Net expenditure does not equal the annual plan	Cash reserves and or fixed assets are not equal to the opening position for the 10 year plan	Moderate	Significant unspent expenditure is carried forward to year one of the plan with little effect on the 10 year plan. Other variance to operating budgets are moved to reserves
The Roading program presented in Council's Long Term Plan will be funded by Waka Kotahi NZTA	Waka Kotahi NZTA may not fund the full programme as presented	Reduced levels of service for roading activities, deferral of renewals work which could result in increased future cost.	Moderate	Waka Kotahi NZTA have been involved during the development of the programme. Where increased expenditure is proposed this is supported by evidence and a robust business case which meets Waka Kotahi NZTA requirements.
Levels of Service will not significantly change.	Public expectations may change drastically, along with demand for improved levels of service	Reduced public satisfaction	Moderate	3 yearly reviews of the Asset Management Plans, Long Term Plan, Financial Strategy and Infrastructure Strategy
Council will continue to deliver the core services included in this strategy.	Legislation may be changed to place responsibility for some core services with regional or national authorities	The responsibility and cost of delivering these services will be transferred to a different organisation	Almost Certain	Three waters included for now until a new water organisation is setup. 3 yearly reviews of the Asset Management Plans, Long Term Plan, Financial Strategy and Infrastructure Strategy
The asset base increases beyond predicted. (Private Water Supplies)	Operational budgets are insufficient to meet demand from increased assets	Level of service failure or unbudgeted expenditure occurs.	Likely	Council has resolved that any share of the initial costs to upgrade private supplies to meet the New Zealand Drinking Water Standards

Assumption	Risk	Consequence	Likelihood	Mitigation
Assets are vested in Council which do not meet level of service requirements and require immediate investment. (Private Water Supplies)	Capital budgets are insufficient to meet the costs of upgrading new vested assets to meet service requirements	Level of service failure or unbudgeted expenditure occurs.	Likely	that transfer to Council ownership and management are to be met by the private supplier and/or by the Council and will be considered on a case by case basis.
There will be no further tranches of government stimulus funding for water or wastewater upgrades, or to facilitate water reform.	Work in later years of the program may need to be brought forward. Inadequate staffing levels to deliver increased programme of work.	Opportunities to progress work which is of greatest value to the community may be missed.	Moderate	Progress planning for work which is in years 4 – 10 of the programme so these are ready to proceed if funding is made available.
Council will meet its proposed capital expenditure programme of work.	The programme of work is not delivered resulting in a backlog, and financial risk with the introduction of external borrowings to fund Councils capital programme of work	Possible impact on levels of service, delays in replacing assets and cost increases. Assets could fail before they can be replaced.	Moderate to Likely	Council can revise the speed of delivery in future annual plans. Any money already collected can be carried forward to a later year to be used at the point of construction.

Quality of Asset Data

The International Infrastructure Management Manual data confidence grading system is used. The following table indicates the level of confidence held in Council's data for roading and water services assets, where the confidence grades have the following meanings:

A **Highly Reliable** – Data based on sound records, procedure, investigations and analysis which is properly documented and recognised as the best method of assessment. Dataset is complete and estimated to be accurate to ±2%.

B **Reliable** – Data based on sound records, procedures, investigations and analysis which is properly documented but has minor shortcomings; for example the data is old, some documentation is missing and reliance is placed on unconfirmed reports or some extrapolation. Dataset is complete and estimated to be accurate to ±10%.

C **Uncertain** – Data based on sound records, procedures, investigations and analysis that is incomplete or unsupported, or extrapolated from a limited sample for which grade A or B data is available. Dataset is substantially complete, but up to 50% of data is extrapolated and estimated to be accurate to ±25%.

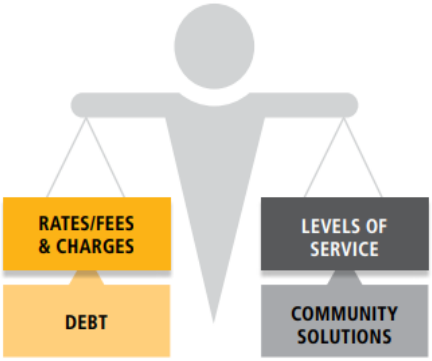
D **Very Uncertain** – Data based on unconfirmed verbal reports and/or cursory inspection and analysis. Dataset may not be complete, and most data is extrapolated or estimated. Dataset accuracy of ±40%.

E **Unknown** – No data, or very limited information, held.

The effect of data confidence on individual asset groups on the financial forecasts is defined as follows:

- Nil – no effect
- Minimal – data quality has approximately ±5% impact on budgets for this item
- Minor – data quality has ±15% impact on budget impact on budgets for this item
- Moderate - data quality has ±25% impact on budget impact on budgets for this item

Table 27: Summary of asset data confidence ratings



Asset Group	Asset Register	Replacement Costs	Asset Lifecycle	Condition Grade	Performance Grade	Data Confidence Effect on Forecast	Source of Rating
Land	B	D	A				
Formation	B	B	B				
Sealed Pavement Surfaces	B	A	B	A		Nil	Condition rating, and high speed data collection undertaken every 3 years
Sealed Pavement Structures	B	B	B	B		Minimal	Condition rating, high speed data, and falling weight deflectometer testing undertaken every 3 years
Unsealed Pavement Structure	B	B	B	B		Minimal	Annual inspections, and annual roughness survey
Car Parks	B	B	B				
Drainage	B	B	C	C		Minor	Visual inspection
Footpaths	B	B	B	A		Minimal	Annual roughness survey
Surface Water Channels	B	B	B				
Traffic Facilities	B	B	B				
Railings	B	B	B	B		Minimal	Visual inspection
Minor Structures	C	B	C				
Bridges and Major Culverts	A	A	B	B		Moderate	Visual inspection
Streetlights	A	B	B	A		Nil	Independent electricity supplier audit of asset data
Alexandra Airport	B	B	B				
Plant (Treatment) Assets	B	B	B	B	B	Moderate	No site validation for last 8 years
Non-Pipe Assets	B	B	B	B	B	Minor	Visual inspection
Pipe Assets	B	B	B	C	C	Minor	Review of historic records
Plant (Treatment) Assets	B	B	B	C	C	Moderate	No site validation for last 8 years
Non-Pipe Assets	B	B	B	B	B	Minor	Visual inspection
Pipe Assets	B	B	B	C	C	Minimal	CCTV and review of historic records
Pipe Assets	B	B	B	C	C	Minimal	Review of historic records

Financial Strategy 2025

Investing in our future

One of the biggest challenges a council faces is balancing its community's ability to pay with the need to maintain infrastructure and deliver services. Council aims to keep rates and charges affordable for current and future generations. At the same time, Council needs to focus on delivering core infrastructure services, building its community resilience, supporting economic development and promoting opportunities for growth that ensures the community is sustainable into the future. To ensure that Council will continue with a balanced approach, keeping the two guiding principles of affordability and sustainability at the forefront when developing the financial strategy.

Environmental and national standards are impacting Council's infrastructure projects and heavy investment is required to improve the quality of our services and to meet the higher standards. This is further challenged by the Government's proposed changes to the management of New Zealand's water, wastewater and Stormwater (Three Waters).. What does this mean for the delivery and funding of water under this Long-term Plan (LTP)? Council has taken the approach that it will transfer its three waters assets into a Council Controlled Organisation (CCO) and may see Councils across the region joining. If other Councils do not join, then the CCO will be operated by CODC alone. This has been reflected in year 2 and year 3 of the LTP with the water activities being transferred at the end of year 2 and no longer being reflected in the operations of Council from year 3 onwards.

Going into this Long-term Plan, Central Otago District Council continues its plan of funding its extensive capital programme through raising debt. It is anticipated that this level of debt will increase to $141M by year 2 of the plan then reduce significantly as the three waters activities with associated debt transition into a new CCO

The desired outcome of this strategy is that Central Otago District Council's asset base and operational expenditure are managed in a cost-effective manner and continue to be funded in a manner that is sustainable for the Council and our communities.

Funding Our Expenditure

Assets Replacement

Investment in the current asset base will continue. The exception to this is the three waters activities. It is Councils preference to transfer these activities to a new CCO by 1 July 2027. Council has decided instead of funding three waters asset replacements via funded depreciation it will only partially fund those replacements via depreciation and fund up to 50% of asset replacement via borrowing for year 1 and 2 of the LTP. This will have the effect of lowering the rates required to be contributed by the ratepayer in the first two years of the LTP while maintaining the replacement programme at the current levels. In other cases, Council rates for depreciation, which is held in reserve to be spent on replacement assets and the payment of borrowings required to fund these assets. All renewals are either fully funded or partially funded (in the case of councils 3 waters activities) by depreciation reserves. For renewal of assets where depreciation has not been fully funded, it is expected that the unfunded portion of the renewal will be funded by a third party or external debt.

For long-life assets, the renewal programme will fluctuate from year to year. If the reserve is underspent, the reserve will earn interest. At times these reserves may be overspent, in which case any interest cost will be rated for (except for development contribution reserves). Council may also choose to loan or rate-fund replacement assets if there are insufficient depreciation reserves. This financial strategy also recognises Central Government's Local Water Done Well policy initiative. This will mean that from year 3 of the Councils Long-term plan 3 Waters will no longer be provided by Council and this strategy should be read with that change in mind.

Growth Assets

When replacing or putting in new assets, Council will consider whether to build the asset to cater for future growth. This may mean, for example, putting in a larger pipe than is needed for today's use to accommodate additional users in the future. Council will fund the additional capacity through developers' contribution reserves. As part of a subdivision process, developers will contribute to the future growth of infrastructure networks. This money is put in a reserve and used for the growth portion of capital projects.

The Development Contribution Reserve

Typically, building additional capacity for growth in a network precedes the actual growth demand. The growth portion of the capital programme is funded through development contribution reserves. In most instances, these reserves for growth typically run as deficits attracting interest that are in turn funded by developers' contributions.

Asset Increased Levels of Service

The Long-term Plan will respond to increasing environmental and national standards.

While this plan concentrates on asset replacement and growth, there are a number of key projects that will increase the level of service provided by Council.

1. Completing water treatment upgrades to meet the New Zealand Drinking Water Standards remains a key focus. Within the first three years of this LTP Council expects

all of Council-provided water supplies to be fully compliant with the New Zealand Drinking Water Standards. This plan includes installing protozoa barriers at Cromwell, Ranfurly and Patearoa, along with investigating more secure water sources at Omakau/Ophir, Ranfurly and Roxburgh.

2. Completing wastewater treatment upgrades to meet new environmental performance standards are required at Cromwell, Alexandra/Clyde, Omakau along with improvements at Naseby, Ranfurly and Roxburgh.
3. Projects to improve water treatment, operational performance, and distribution of water to Bannockburn and Pisa are included in the LTP. These projects include additional capacity to meet future population growth.

Increased level of service for significant capital works is to be primarily funded by loans. To ensure that today's ratepayers do not pay for the building and using of the asset, loan repayment will be rate-funded. Council will rate-fund the depreciation collected on the asset and use these funds to pay the loan principal. This means that the cost of this asset is shared amongst current and future users of the asset. These loans will typically be for no longer than 30 years and funded either internally or externally dependent on the availability of cash reserves. Taking a loan in this instance means that future users of the asset help to pay for it over the asset's lifespan and current ratepayers are not burdened with the full cost.

Operational Costs

Funding of operational costs come from a number of sources such as rates, user fees, grants and subsidies. The plan has no significant changes in operational funded levels of service but is impacted by interest rates, population growth and inflation. Where possible and practicable, operational spending is funded through user fees or targeted rates.

Growth and Land Use

Growth in the district

The district has experienced strong growth, particularly around Cromwell and Alexandra. This was anticipated to start slowing in the first year of this LTP. However, analysis shows that growth is expected to average at 2.1% for the first five years and to slow to 1.8% for the final four years.

In Alexandra, Council has released reserve land back to the Crown to enable the land to be sold and developed into residential lots. The Vincent Community Board is currently undertaking a residential subdivision development of its freehold land in Alexandra, which adds sections of a range of different sizes to the market. To assist in meeting demand in Cromwell, the Cromwell Community Board is freeing up land for residential and industrial development. The Board has embarked on a Masterplan project for the wider Cromwell area, to address growth. The plan includes infrastructure planning, transport planning and cover community facility requirements to cater for growth. A spatial framework has been produced that addresses zoning and urban development, which will be implemented through a series of plan changes.

Council is in the process of reviewing its District Plan. This is a critical piece of work that helps us to set the standards for how our district responds to growth in a proactive and

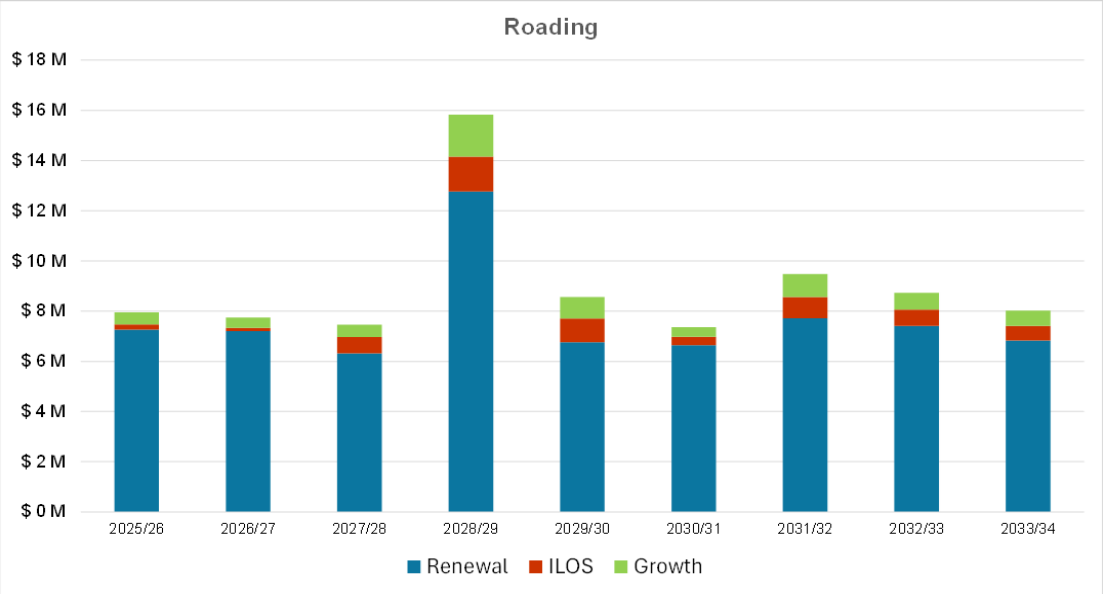
sustainable way. The plan review will look at all matters required under the Resource Management Act, with a particular emphasis on ensuring sufficient land is zoned for residential, commercial and industrial purposes for the next 10 to 20 years.

Underspends in years that have fewer costs associated with the District Plan are put into reserve to contribute to future years to help manage the cost of the District Plan.

An assessment of the district's growth to 2050 was undertaken in July 2020. Four scenarios were modelled:

- Low growth
- Medium growth
- High growth
- Business as usual

For this Long-term Plan, Council has used the business-as-usual model, which is 2.1% yearly average for the first five years, slowing to 1.8% for the final four years. This is down on the previous five years, when an average of 3.0% was experienced.



Capital Expenditure

Capital project

The following graph show the split between growth, changes to levels of service, and renewal or replacement of existing assets. Level of service represents the amount of capital expenditure that is planned as an increase to current levels of service.

Council has only included roading Capital Expenditure due to Council only managing 3 waters activities for the first two years of the plan.

The amounts spent on renewals are required to maintain the current levels of service. Renewals were funded by rates through depreciation charges. However, the Council has decided to partially fund depreciation on 3 waters renewals for the two years of the plan that we will hold 3 water assets. Expenditure for growth will provide existing levels of service to new ratepayers and is funded by development contributions.

Other Factors

Emergency Event

Council continues to build its initial response fund for any costs that are considered a Council essential service or group within the district that has been affected by an “act of God” or an “unplanned event” such as a pandemic, and which is not already covered by insurance. Essential service can include any services Council provides that impact on the four community well-beings (social, economic, environmental and cultural).

Due to the size and geographical distribution of the community, Council consider it unlikely that an event would affect the entire district at any one time, so modelling of Council exposure has taken this into account to determine the share of the funds required. Currently, the Emergency Event Reserve stands at $2.644 million and is projected to reach $5.361 million by Year 9. If an event caused damage that exceeded the balance of the reserve, Council has the borrowing capacity to raise debt for the balance.

Insurance

Council will ensure all Council-owned assets with the exception of underground assets and bridges, as underground infrastructure became difficult and expensive to insure following the Christchurch earthquakes. Council adopts the policy of self-funding underground infrastructure. Council has planned to set aside $120,000 each year into the Emergency Event Reserve commencing in year 1 of this Long-term plan, which can contribute towards Council’s excess that is not funded by Central Government. This fund covers any non-funded or uninsured expenses incurred in relation to natural disasters (an “act of God”) and unplanned events, including pandemics. In the event of a catastrophic event, Council would loan fund any expenses not covered by Central Government funding and the Emergency Event Reserve.

Debt Security

Council's Liability Management Policy currently allows Local Authority Bonds (which includes loan funding through LGFA) to be secured by either a general charge over rates or a specific asset of council.

Credit Rating

Council will obtain a credit rating from Fitch Ratings. This will have a twofold effect. Firstly, it will lower the Councils cost of borrowing and secondly it will lift the Councils borrowing limit to 280% of (defined) revenue. This will enable Council to undertake the capital programme it has planned. Without the credit rating and associated lift in debt capacity Council would approach its debt ceiling in both year 1 and year 2 of the LTP.

Bridges

There are 179 bridges on the district's roading network. Sixty-one bridges are expected to reach the end of their economic life within the next 30 years. A significant number of these bridges are located on low volume roads, and the economic viability of like-for-like replacement of these bridges will need to be carefully reviewed. Further investigation and analysis work is planned for the next three years, before any actual investment will occur.

Council's bridge network is ageing, and at least 30 bridges will reach or near the end of their useful life within the next decade. This backlog of replacements will continue over the next 30 years as a 'bow wave' of ageing bridges reaches the end of their service life. Maintaining current levels of service will require significant increases in both replacement and maintenance budgets.

To address these challenges, Council has developed a Bridge Strategy to prioritise and rationalise bridge funding. This strategy focuses on reducing the service level gap over the next 30 years and resolving the maintenance backlog within five years.

Key components include improved long-term planning, enhanced asset management, and a refined understanding of risk factors. The strategy enables Present Value End of Life (PVEOL) assessments for end-of-life bridges over the next two years, which will inform investment decisions ahead of the 2027-30 funding submissions to NZTA Waka Kotahi.

Historically, Council has not rate-funded depreciation for bridge renewals, resulting in limited reserves for the emerging programme of renewals over the next 10 years. Current projections incorporate the increased work required, with ratepayers being asked to fund both the additional depreciation costs and the interest associated with borrowing. Council now funds depreciation and maintenance to ensure it can renew these assets as needed.

Inflation

Inflation reflects erosion in the buying power of money. Each dollar buys fewer goods and services over time. Expenditure forecasts for each activity are input in today's dollars for the relevant year...

We apply the Business and Economic Research Limited (BERL) cost adjustor rates across all activities and costs except Payroll, where we use a rate appropriate to Councils situation.

Depreciation is adjusted through revaluations in the relevant years.

Development Contribution Reserve

In 2007-2008, when development contributions were in their infancy, the estimation of the growth portion of some roading assets was too high. This has left this reserve in a deficit that with interest charges would not recover to a sustainable point. This deficit was remedied by using debt to bring the account back to a sustainable level during the first year of the Long-term Plan.

Impact to Deliver Proposed Levels of Service

Just as the cost of running your household increases every year with inflation, so too does the cost of providing our services. This is because costs like energy, property, labour and construction continue to increase. This in turn affects how much it costs us to deliver services to you. Council has used inflation assumptions, provided by BERL, that are particular to councils. These assumptions underpin this Financial Strategy and are outlined in the financial section.

In planning for the long term, the only certainty is uncertainty. Therefore, creating a plan that accounts for every eventuality would be impossible. So, Council bases its forecasting on a set of assumptions and assesses the risks associated with each assumption to determine how to mitigate the consequences and ensure a robust plan that delivers on our promised levels of service.

A positive challenge is that our district is still a desirable place to live for many people. So although Council has a responsibility to provide infrastructure in anticipation of growth, it has the ability to more accurately plan for provision of services in areas where growth is projected to occur.

The review of Council’s District Plan will also create a significant opportunity to set the speed of development and growth, and more accurately forecast the demand on levels of service. Council has entered into a number of partnerships that help us deliver our services in a more efficient way. Council has some strong relationships with neighboring councils that its using to the benefit of our communities. One example is our shared library service with Queenstown Lakes District Council.

Financial Prudence Benchmarks

Disclosure Statement

What is the purpose of this statement?

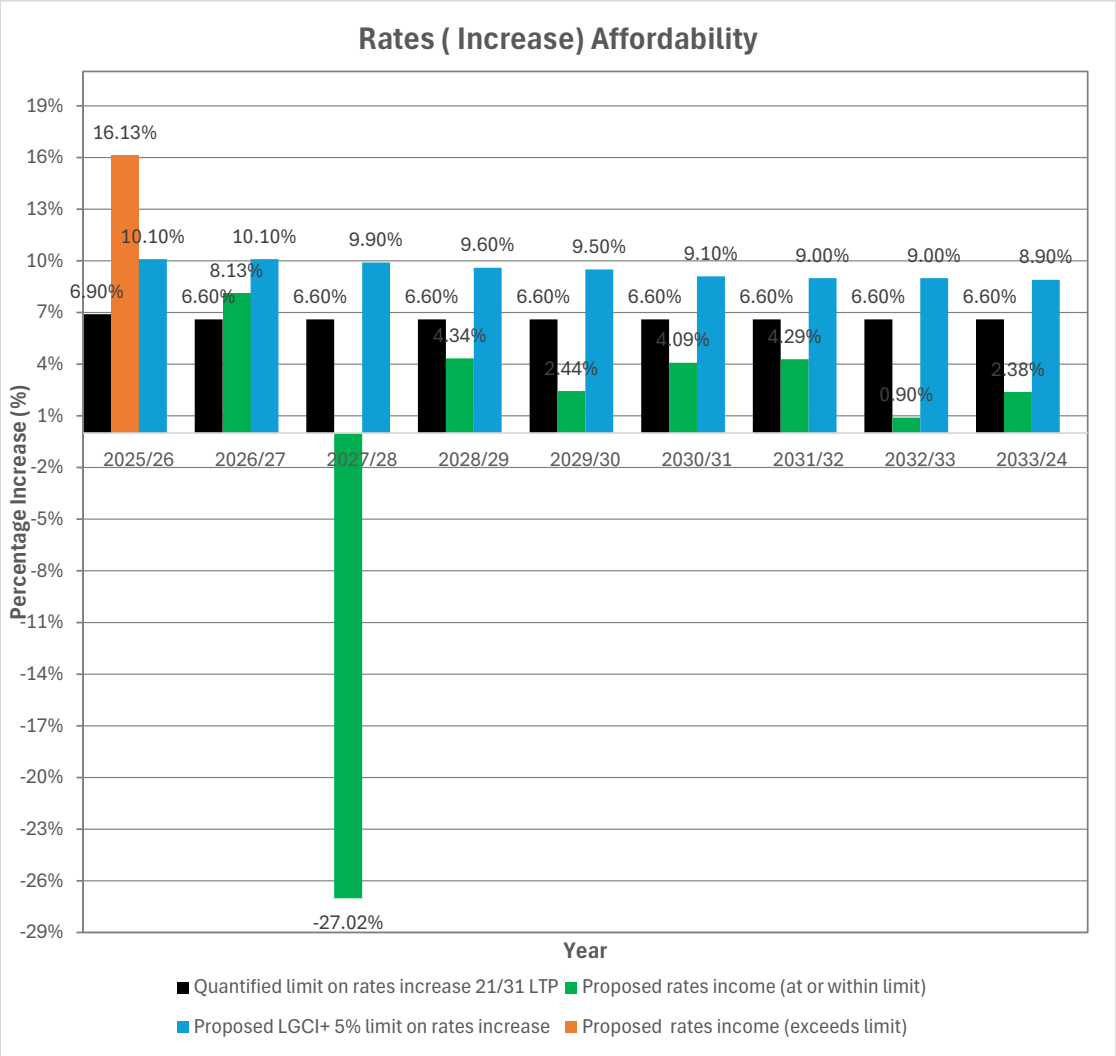
The purpose of this statement is to disclose the Council's planned financial performance in relation to various benchmarks to enable the assessment of whether the Council is prudently managing its revenues, expenses, assets, liabilities and general financial dealings.

The Council is required to include this statement in its LTP in accordance with the Local Government (Financial Reporting and Prudence) Regulations 2014 (the regulations). Refer to the Regulations for more information, including definitions of some of the terms used in this statement.

Rates Affordability Benchmark

It is appropriate, given Councils cost inputs to have a more robust measure of increases in rates. In the past some Councils have aligned their rates increases to CPI. CPI measures changes in prices of a basket of goods that do not apply to Councils how have a more infrastructure approach. Therefore, it is appropriate to move to a more construction focused index. It is proposed to use the Local Government Construction Index provided by BERL plus a factor to reflect the uncertainty of price rises going forward. The rates cap will be calculated using the LGCI plus 5%. This does not include the provision for growth currently projected at an average of 2.1% for growth for the first five years decreasing to 1.8% for the final four years.

This rate cap is an average for the whole district, which means that on an individual basis the combined cap does not apply. These rate increases will go beyond the 9 years, given the level of investment still to occur.

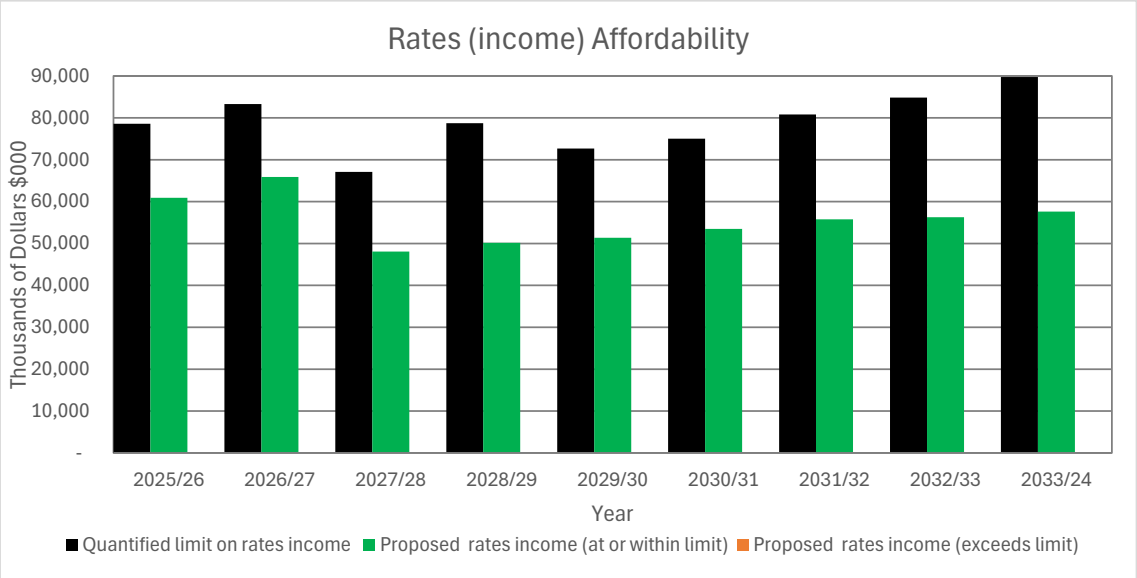


Anticipated Annual Growth	2024/25	2025/26	2026/27	2027/28	2028/29	2029/30	2030/31	2031/32	2032/33	2033/34
Rating Units	14,833	15,144	15,463	15,787	16,119	16,457	16,753	17,055	17,362	17,675

The Council meets the rates affordability benchmark if its planned rates income equals or is less than each quantified limit on rates. Council also sets a rate limit based on total expenditure. This limit has been set at 80% of total revenue and is a measure used across all local authorities. For the 9 years of this plan rates income does not breach this limit.

It is important to remember that this is an average across the district and that rate increases will vary from property to property, with some individual properties seeing increases above this limit, depending on a range of factors such as property valuations and targeted rates assessed on a ward basis.

The above graph includes both the old quantified limits on rates income measure to compare against the new measure of LGCI plus 5%.

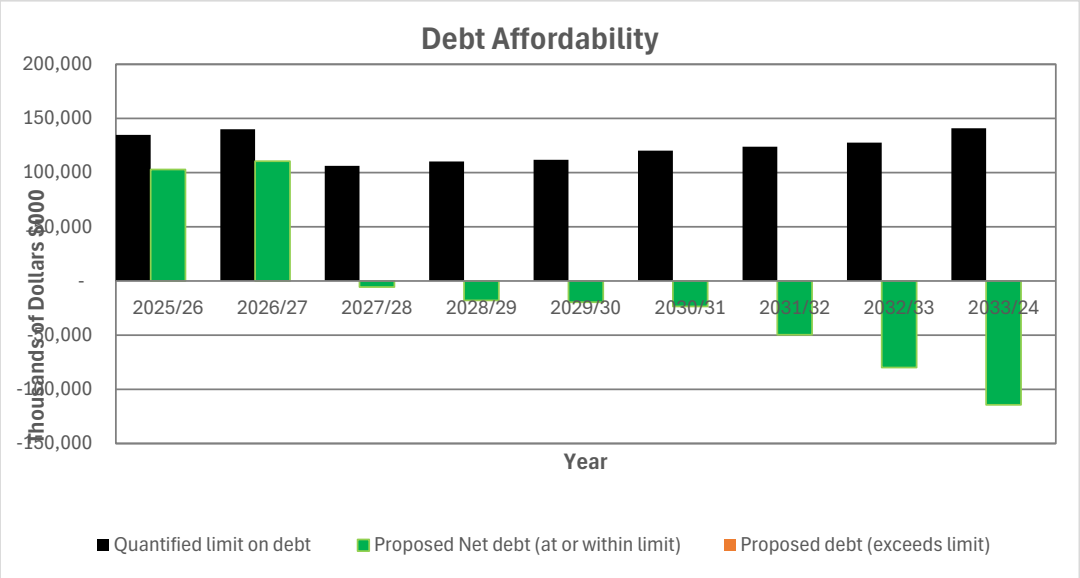


Note that the first year of this plan does not meet the benchmark. However Council consider this to be prudent in the lead up to the divestment of water services activities.

Rates are the main source of income for councils. Currently Central Otago District Council draws about 60% of our revenue from rates and proposes to limit the rates collected each year to a maximum of 80% of total Council revenue.

As mentioned earlier in this strategy Council is proposing to remove the 3 waters services from Council delivery and form a water organization (CCO) to own and provide those services. Both the Long-term plan and this strategy reflects this which has the effect of reducing rates revenue percentage increase in year 3 of the plan.

Council's strategy is to ensure that both current and future ratepayers pay their fair share of the cost of providing services. This intergenerational equity is achieved through loan funding the increased level of service of long-term assets and drawing rates to pay for the loan over an extended period of time. The loan will be funded by internal or external borrowing depending on availability of funds. This ensures that both current and future users pay for the service.



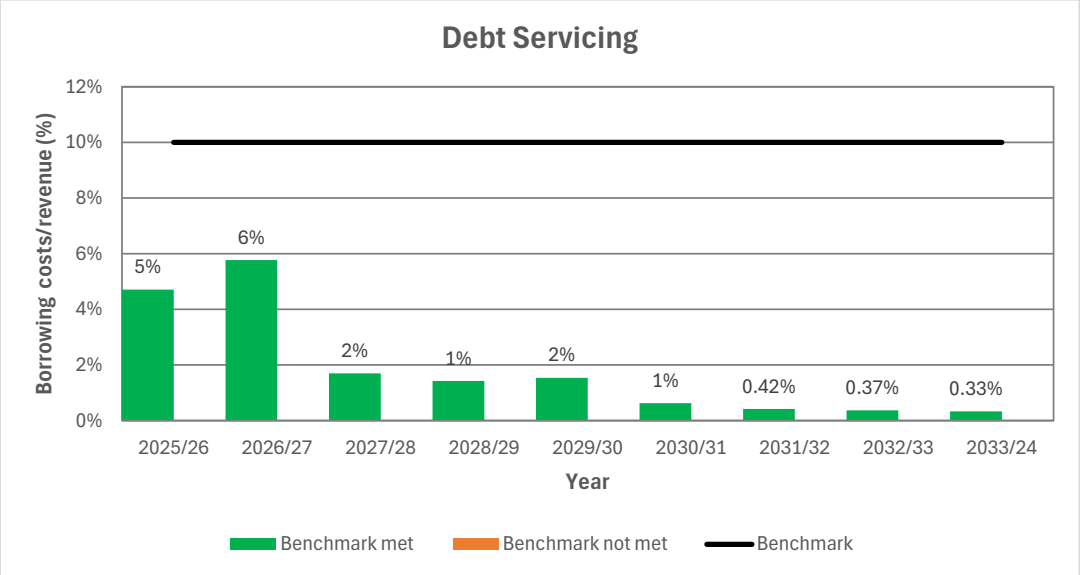
Rates (income) affordability compares the relationship between total revenue and total rates collected. The limit for total rates is set at 80% of total income. This benchmark has been met in each of the 9 years of the plan. Again, this benchmark has been prepared on the basis of 3 waters services and the corresponding rates income requirement no longer being provided by Council. These changes occur in the third year of the Long-term Plan.

Debt Affordability

The council meets the debt affordability benchmark if its planned borrowing is within each quantified limit on borrowing. The following graph compares the Council's planned debt with a quantified limit on borrowing contained in the financial strategy included in this LTP. The council meets the debt control benchmark if its actual net debt equals or is less than its planned net debt.

The following graph displays the council's proposed net debt as a proportion of planned net debt. In this statement, net debt means financial liabilities less financial assets (excluding trade and other receivables).

It should be noted that from year 3 of this plan net debt reduces significantly with the transfer of the 3 waters liabilities (along with assets) to the new water delivery entity. moves into a net cash position from 2027/28 driven mainly by endowment land sales in the Cromwell ward.



Debt Servicing

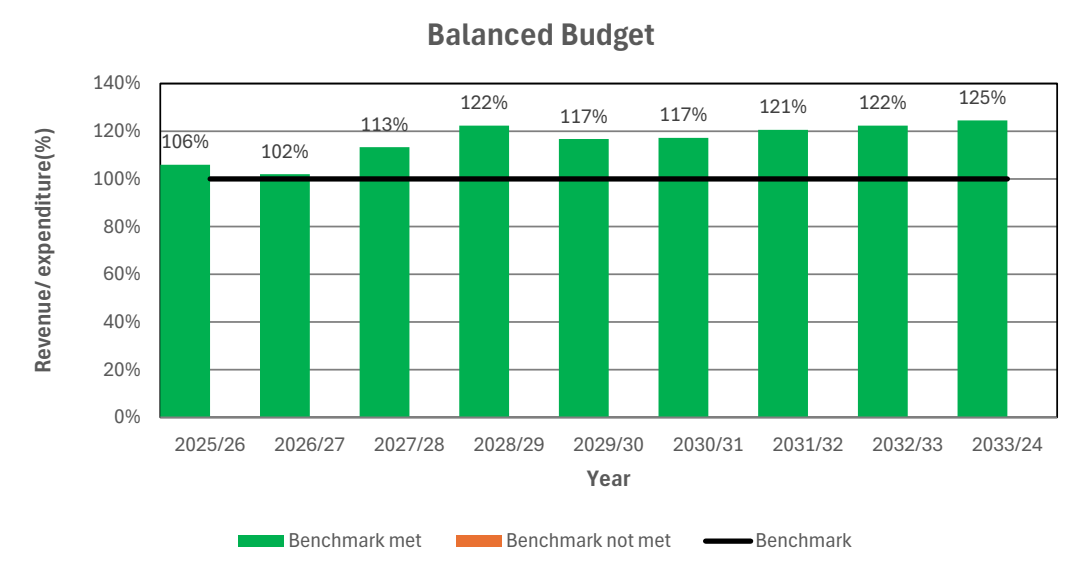
A borrowing limit of 10% of total assets has been set to assist in prudently managing borrowing. As the plan has sufficient cash reserves to internally fund any projects that need to be loan funded, debt in this 9-Year Plan will not exceed the 10% of total assets benchmark.

The following graph displays the council's planned borrowing costs as a proportion of planned revenue (excluding development contributions, financial contributions, vested assets, gains on derivative financial instruments, and revaluations of property, plant, or equipment).

Because Statistics New Zealand projects that the Council's population will grow as fast as the national population is projected to grow, it meets the debt servicing benchmark if its planned borrowing costs equal or are less than 10% of its planned revenue.

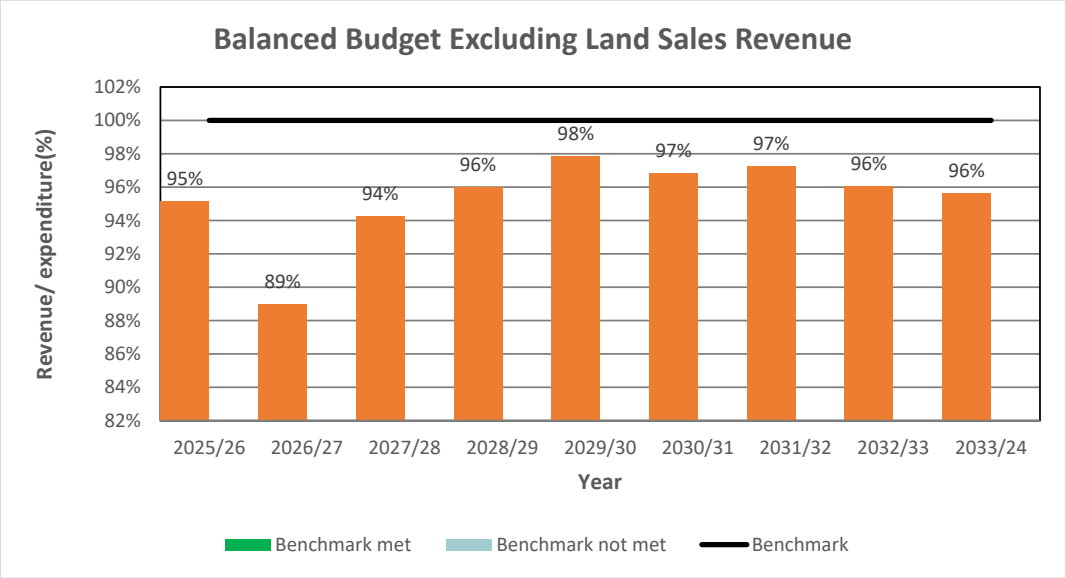
Investment

Council recognises that as a responsible public authority, any investments that Council holds should be of a relatively low risk. Council also recognise that lower risk generally means lower returns. Council aims to maximise investment income within a prudent level of investment risks. Currently Council has money invested with banks in New Zealand and its aim is to achieve market rates for these investments. Council may also consider other investments in accordance with the Investment Policy. Council's quantified target for returns on financial investments is to achieve a return equivalent to market rates. Council will ensure that all funds are placed in suitable deposit accounts and excess funds will be put on deposit.



Cash Reserves and Debt

Council currently has reasonable cash reserves. While much of these reserves relate to money set aside for asset replacement, there is a significant amount that has come from Cromwell land sales. In the next 10 years, sale of land is forecast to have a net value of $40 million, which will add to the estimated cash position. The plan reflects the reinvestment of the land proceeds into assets other than cash, such as the planned development for Cromwell.



Significant non-growth expenditure that is not depreciation funded or subsidised will be loan funded. Loans will be set up with repayments (less depreciation) being rated for. The source of these loans are forecast to come out of cash reserves or external borrowings.

Balanced Budget

Council is required to operate a balanced budget, in which operating revenues are set at a level sufficient to meet that year's operating expenses. A balanced budget is achieved when total revenue (less revaluations, developers' contributions and vested assets) is greater than operating expenditure. Council has decided to partially fund depreciation on three waters assets. Achieving the benchmark in the first three years of the plan will rely on the sale of land across those years.

Councils dependence on land sales is highlighted in the following graph which is the Balanced budget benchmark excluding land sales.

It is critically important that Council achieves the levels of land sales in the year they are budgeted.

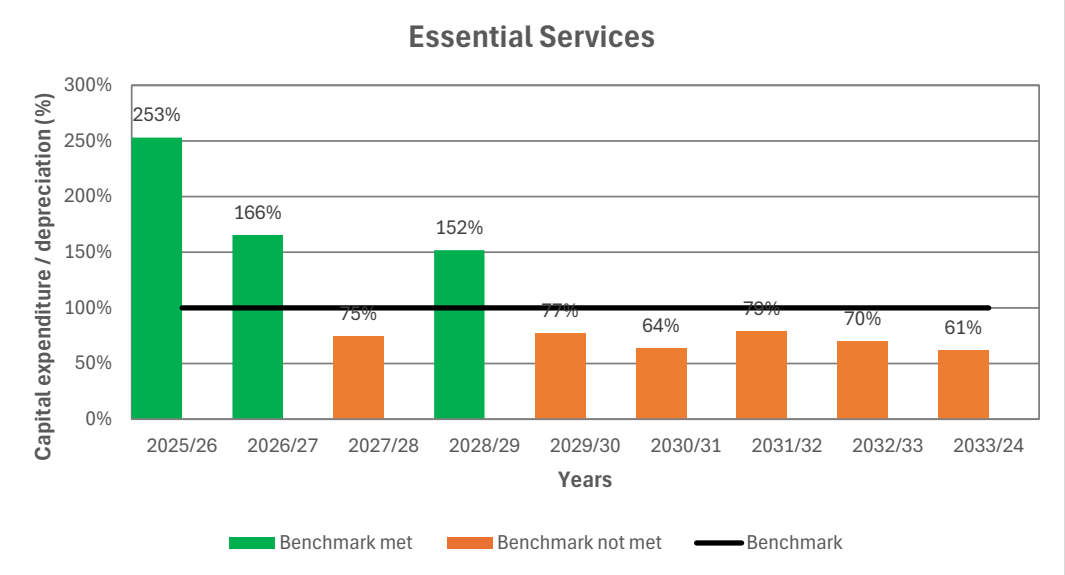
Surpluses can result when:

Rates are raised to repay loans. The rates income appears in the prospective statement of comprehensive revenue, but the repayment is a prospective statement of financial position item.

Income for capital purposes such as development contributions and capital donations appear in the prospective statement of comprehensive revenue. However, the corresponding capital expenditure is a prospective statement of financial position item.

New Zealand Transport Agency Waka Kotahi subsidies for roading are included in the prospective statement of comprehensive revenue. These are largely used to fund renewal expenditure, which is a prospective statement of financial position item.

Rates have been raised to build the self-insurance fund for emergency events. The rates income appears in the prospective statement of comprehensive revenue, but the reserve fund is a prospective statement of financial position item.



Deficits can result when:

Council's Revenue and Financing Policy indicates that in certain circumstances Council will not fully fund depreciation from rates income, for example, Council does not fully fund depreciation on roading assets. Most roading capital expenditure attracts a government subsidy; therefore, there is no need to fully fund depreciation for the portion that is subsidised.

There are circumstances when fully rate funding depreciation may result in some ratepayers bearing a funding burden that is not entirely fair and equitable. This is where funds for capital project replacement are provided from sources outside Council – for example, where a community has raised funds for a hall. Council would not rate-fund the depreciation on the hall, as any replacement of that facility would be the responsibility of that community.

Essential Services Benchmark

The following graph displays the Council's planned capital expenditure on network services as a proportion of expected depreciation on network services. The Council meets the essential services benchmark if its planned capital expenditure on network services equals or is greater than expected depreciation on network services.

The Essential Services Benchmark will become focused on Roading capital expenditure for 2027/28 and beyond. For years 2027/28 and into the future (except 2028/29) this benchmark in not met due to the current focus due to NZTA funding is more on maintenance.

Council's approach will involve maintaining a focus on affordability and the long-term consequences of decision-making. Council needs to balance affordability with suitable investment in our district to ensure progress continues and this remains a great place to live, work and play.

Accounting Policies

1. Reporting Entity

The Central Otago District Council (the Council) is a territorial local authority governed by the Local Government Act 2002 and is domiciled within New Zealand. The relevant legislation governing the Council's operations includes the Local Government Act 2002 and the Local Government (Rating) Act 2002.

The primary objective of the Council is to provide goods or services for the community or social benefit rather than making a financial return. Accordingly, the Central Otago District Council has designated itself as a tier 1 Public Benefit Entity (PBE) for the purposes of the new PBE International Public Sector Authority Standards (IPSAS).

The Council provides local infrastructure, local public services, and provides regulatory functions to the community. The Council does not operate to make a financial return.

The prospective financial statements comprise the activities of the Council. The Council will not have a majority interest in any other entities, the Council is proposing to transfer Three Waters Assets and operations to a CCO that is owned by mulitple Councils. The prospective financial statements of the Council are for the nine years ended 30 June 2026 to 2034. The financial statements were authorised for issue by the Council on 25 June 2025. Council does not have the power to amend the prospective financial statements after issue.

Basis of Financial Statement Preparation

The prospective financial statements have been prepared on the going concern basis, and the accounting policies have been applied consistently throughout the year.

2. Statement of compliance

The prospectice financial statements of the Council have been prepared in accordance with the requirements of the Local Government Act 2002 and the Local Government (Financial Reporting and Prudence) Regulations 2014 (LG(FRP)R), which include the requirement to comply with New Zealand Generally Accepted Accounting Practice (NZ GAAP). The prospective financial statements have been prepared in accordance with the Tier 1 PBE accounting standards. These financial statements comply with FRS 42 and use opening balances from the period ending 30 June 2025 incorporating actual financal results into the opening balances for year 1 of the Long-term Plan, where possible.

The financial statements are prepared on a historical cost basis, as modified by the revaluation of:

- Available for sale financial assets
- Forestry assets
- Certain classes of property, plant and equipment
- Investment property

The financial statements are presented in New Zealand dollars and all values are rounded to the nearest thousand dollars ($000).

Standards issued and not yet effective, and not early adopted
There has been no early adoption of any new accounting standards and amendments issued but not yet effective in the financial year.

The 2024 Omnibus Amendment to PBE Standards has been issued, effective for all reporting period commencing on or after 1 January 2026.

Application of the amendments to PBE IPSAS 1 is required for accounting periods which begin on or after 1 January 2026.

Application of the amendments to paragraphs 4A and 88A of PBE IAS 12 is required for accounting periods that end on or after 21 November 2024.

Other Changes in Accounting Policies
There have been no other changes to account policies.

Revenue Recognition
Revenue is measured at a fair value of consideration received or receivable. Revenue has been classified as prescribed in PBE IPSAS 1 which requires revenue to be categorised as arising from either non-exchange transactions or exchange transactions.

3. Revenue from non-exchange transactions:
Includes revenue from subsidised services and goods whereby the Council has received cash or assets that do not give approximately equal value to the other party in the exchange.

3.1 Rates
Rates are set annually by resolution of Council and relate to a financial year. All ratepayers are invoiced within the financial year to which the rates have been set. Rates revenue is recognised upon rates strike.

3.2 Goods Sold and Services Rendered
Revenue from the sale of goods is recognised when the significant risks and rewards of ownership have been transferred to the buyer.

3.3 Government Grants
Government grants are received from the New Zealand Transport Agency, which subsidises part of the costs of maintaining the local roading infrastructure. The subsidies are recognised as revenue upon entitlement, as conditions pertaining to eligible expenditure have been fulfilled.

3.4 Water Billing Revenue
Water billing revenue is recognised on an accrual basis. Unbilled usage, as a result of unread meters at year end, is accrued on an average usage basis.

3.5 Vested Assets

Where a physical asset is acquired for nil or nominal consideration the fair value of the asset received is recognised as revenue. Vested assets are recognised at the point when Council has issued the certificate prescribed under the Resource Management Act 1991 S224(c), relating to the respective subdivisions.

3.6 Other grants received

Other grants are recognised as revenue when they become receivable unless there is an obligation in substance to return the funds if conditions of the grant are not met. If there is such an obligation, the grants are initially recorded as grants received in advance and recognised as revenue when conditions of the grant are satisfied

3.7 User fees

The Council charges users for the use of some council services, such as libraries, swimming pools and visitor services. The Council also sets reasonable charges for regulatory services, such as waste collection and disposal, parks and reserves, property and land usage. All user fees are invoiced in the accounting period when the service was provided.

3.8 Revenue from exchange transactions:

Includes revenue where the Council has received cash or assets and directly gives approximately equal value to the other party in the exchange.

3.9 Direct Charges at Fair Value

Revenue from direct charges sold at a fair value are recognised when the significant risk and rewards of ownership have been transferred to the buyer. Direct charges include revenue from dog registration, dog control and recreational reserves.

3.10 Rental Revenue

Rental revenue from investment property is recognised on a straight-line basis over the term of the lease. Lease incentives granted are recognised as an integral part of the total rental revenue.

3.11 Interest Revenue

Interest revenue is recognised as it accrues, using the effective interest method.

3.12 Dividend Revenue

Dividends are recognised when the right to receive payment has been established.

3.13 Development Contributions

Development and financial contributions are recognised as revenue when the Council provides, or is able to provide, the service for which the contribution was charged. Otherwise, development and financial contributions are recognised as liabilities until such a time as the Council provides, or is able to provide, the service.

4. Operating Leases

An operating lease is a lease that does not transfer substantially all the risks and rewards incidental to ownership of an asset. Payments made under operating leases are recognised as an expense on a straight-line basis over the term of the lease.

5. Grant Expenditure

Non-discretionary grants are those grants that are awarded if the grant application meets the specified criteria and are recognised as expenditure when an application that meets the specified criteria for the grant has been received.

Discretionary grants are those grants where Council has no obligation to award on receipt of the grant application and are recognised as expenditure when a successful applicant has been notified of Council's decision due to no substantive conditions attached.

6. Income Tax

Income tax expense is the aggregate of current period movements in relation to both current and deferred tax. Current tax is the amount of income tax payable based on the taxable surplus for the current year, plus any adjustments to income tax payable in respect of prior years. Current tax is calculated using tax rates (and tax laws) that have been enacted or substantively enacted at balance date.

Deferred tax is the amount of income tax payable or recoverable in future periods in respect of temporary differences and unused tax losses. Temporary differences are differences between the carrying amount of assets and liabilities in the prospective financial statements and the corresponding tax bases used in the computation of taxable surplus.

Deferred tax is measured at the tax rates that are expected to apply when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at balance date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which Council expects to recover or settle the carrying amount of its assets and liabilities.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that taxable surpluses will be available against which the deductible temporary differences or tax losses can be utilised. Deferred tax is not recognised if the temporary difference arises from the initial recognition of goodwill or from the initial recognition of an asset and liability in a transaction that is not a business combination and, at the time of the transaction, affects neither accounting surplus nor taxable surplus.

Current and deferred tax is recognised against the surplus or deficit for the period, except to the extent that it relates to a business combination or to transactions recognised in other comprehensive revenue and expense or directly in equity.

7. Equity

Equity is the community's interest in Council and is measured as the difference between total assets and total liabilities. Public equity is disaggregated and classified into the following components:

- accumulated funds
- restricted reserves
- property revaluation reserve
- fair value through other comprehensive revenue and expense reserve

Restricted and Council created reserves are a component of equity representing a particular use to which various parts of equity have been assigned. Reserves may be legally restricted or created by Council.

Restricted reserves are those subject to specific conditions accepted as binding by Council and which may not be revised by Council without reference to the Courts or a third party. Transfers from these reserves may be made for certain specified purposes or when certain specified conditions are met.

Also included in restricted reserves are reserves created by Council decision. Council may alter them without reference to any third party or the Courts. Transfers to and from these reserves are at Council's discretion.

Property revaluation reserves relate to the revaluation of property, plant and equipment to fair value.

Fair value through other comprehensive revenue and expense reserves comprises the cumulative net change in the fair value of financial assets through other comprehensive revenue and expense.

8. Cash and Cash Equivalents

Cash and cash equivalents include cash balances deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

9. Debtors and Other Receivables

Debtors and other receivables are stated at their cost less any provision for impairment (see Impairment Policy).

Short-term receivables are recorded at the amount due, less an allowance for expected credit losses (ECL). The Council apply the simplied ECL model of recognising lifetime ECL for short-term receivables. In measuring ECLs, receivables have been grouped into rates receivables, and other receivables and assessed on a collective basis as they possess shared credit risk characteristics. They have then been grouped based on the days past due. A provision matrix is then established based on historical credit loss experience, adjusted for forward looking factors specifc to the debtors and the economic environment.

Rates are "written-off": when remitted in accordance with the Councils rates remission policy and in accordance with the write-off criteria of section 90A (where rates connot be reasonably recovered) and 90B (in relation to Maori freehold land) of the Local Government (Rating) Act 2002.

Other receivables are written-off when there is no reasonable expectation of recovery. Indicators that there that there is no reasonable expectation of recovery include the debtor being in liquidation or the receivable being more than one year over due.

10. Inventories

Inventories represent land purchased or held being developed for resale and are stated at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and selling expenses.

11. Available-For-Sale Financial Assets

Available for sale financial assets are classified as held for sale if their carrying amount will be recovered principally through a sale transaction rather than through continuing use. They are measured at the lower of their carrying amount and fair value less costs to sell.

Any impairment losses for write-downs are recognised in surplus or deficit.

Any increases in fair value (less costs to sell) are recognised up to the level of any impairment losses that have been previously recognised.

Non-current assets are not depreciated or amortised while they are classified as held for sale (including those that are part of a disposal group).

12. Financial Assets

Other financial assets (other than shares in subsidiaries) are initially recognised at fair value.

They are then classified as, and subsequently measured under, the following categories:

- amortised cost;
- fair value through other comprehensive revenue and expense (FVTOCRE); and
- fair value through surplus and deficit (FVTSD).

Transaction costs are included in the value of the financial asset at initial recognition unless the it has been designated at FVTSD, in which case it is recognised in surplus or deficit. The classification of a financial asset depends on its cash flow characteristics and the Council's management model for managing them.

A financial asset is classified and subsequently measured at amortised cost if it gives rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal outstanding and is held within a management model whose objective is to collect the contractual cash flows of the asset.

A financial asset is classified and subsequently measured at FVTOCRE if it gives rise to cash flows that are SPPI and held within a management model whose objective is achieved by both collecting contractual cash flows and selling financial assets.

Financial assets that do not meet the criteria to be measured at amortised cost or FVTOCRE are subsequently measured at FVTSD. However, the Council may elect at initial recognition to designate an equity investment not held for trading as subsequently measured at FVTOCRE.

Initial recognition of concessionary loans

Loans made at nil or below-market interest rates are initially recognised at the present value of their expected future cash flow, discounted at the current market rate of return for a similar financial instrument. For loans to community organisations, the difference between the loan amount and present value of the expected future cash flows of the loan is recognised in the surplus or deficit as a grant expense.

Subsequent measurement of financial assets at amortised cost

Financial assets classified at amortised cost are subsequently measured at amortised cost using the effective interest method, less any expected credit losses (ECL). Where applicable, interest accrued is added to the investment balance. Instruments in this category include term deposits, community loans, and loans to subsidiaries and associates.

Subsequent measurement of financial assets at FVTOCRE

Financial assets in this category that are debt instruments are subsequently measured at fair value with fair value gains and losses recognised in other comprehensive revenue and expense, except ECL and foreign exchange gains and losses are recognised in surplus or deficit. When sold, the cumulative gain or loss previously recognised in other comprehensive revenue and expense is reclassified to surplus and deficit. Debt instruments in this category are the Council listed bonds.

Financial assets in this category that are equity instruments designated as FVTOCRE are subsequently measured at fair value with fair value gains and losses recognised in other comprehensive revenue and expense. There is no assessment for impairment when fair value falls below the cost of the investment. When sold, the cumulative gain or loss previously recognised in other comprehensive revenue and expense is transferred to accumulated funds within equity. The Council designate into this category all equity investments that are not held for trading as they are strategic investments that are intended to be held for the medium to long-term.

Subsequent measurement of financial assets at FVTSD

Financial assets in this category are subsequently measured at fair value with fair value gains and losses recognised in surplus or deficit.

Interest revenue and dividends recognised from these financial assets are separately presented within revenue.

Other than for derivatives, the Council has no instruments in this category.

Expected credit loss allowance (ECL)

The Council recognise an allowance for ECLs for all debt instruments not classified as FVTSD. ECLs are the probability-weighted estimate of credit losses, measured at the present value of cash shortfalls, which is the difference between the cash flows due to Council in accordance with the contract and the cash flows it expects to receive. ECLs are discounted at the effective interest rate of the financial asset.

ECLs are recognised in two stages. ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). However, if

there has been a significant increase in credit risk since initial recognition, the loss allowance is based on losses possible for the remaining life of the financial asset (Lifetime ECL).

When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Council considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Council's historical experience and informed credit assessment and including forward-looking information.

The Council consider a financial asset to be in default when the financial asset is more than 90 days past due. The Council may determine a default occurs prior to this if internal or external information indicates the entity is unlikely to pay its credit obligations in full.

Council measure ECLs on loan commitments at the date the commitment becomes irrevocable. If the ECL measured exceeds the gross carrying amount of the financial asset, the ECL is recognised as a provision.

Shares in subsidiaries (at cost)

The investment in subsidiaries is carried at cost in the Council's parent entity financial statements.

13. Property, Plant and Equipment

The following infrastructural assets are shown at fair value, based on annual valuations by external independent valuers:

- Water
- Wastewater
- Stormwater
- Roading

All of the above were revalued on an optimised depreciation replacement cost basis.

Revaluations of land and buildings are completed every 3 years with the parks, reserves and swimming pools completed every 5 years by external independent valuers.

Revaluations will be undertaken by independent valuers, suitably qualified in the category and location of the assets. The valuation process shall include verification of asset registers, application of rates representing current replacement cost or market value (if any), asset optimisation and adjustments for asset condition and performance.

Valuations are performed with sufficient regularity to ensure revalued assets are carried at a value that is not materially different from fair value.

Where Council has elected to account for revaluations of property, plant and equipment on a class of asset basis, increases or decreases in the carrying amounts arising on revaluation of a class of assets are credited or debited to other comprehensive revenue and expenditure and are accumulated to an asset revaluation reserve in equity for that class of asset. However, the net revaluation result is recognised in the surplus or deficit to the extent it reverses a net revaluation decrease of the same class of assets previously recognised in the surplus or deficit.

Any accumulated depreciation at the date of revaluation is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.

All other property, plant and equipment is stated at historical cost less depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Additions
The cost of an item of property, plant, and equipment is recognised as an asset only when it is probable that future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably.
Work in progress is recognised at cost less impairment and is not depreciated.

In most instances, an item of property, plant, and equipment is initially recognised at its cost. Where an asset is acquired through a non-exchange transaction, it is recognised at its fair value as at the date of acquisition.

Costs incurred subsequent to initial acquisition are capitalised only when it is probable that future economic benefits or service potential associated with the item will flow to the Council and the cost of the item can be measured reliably.
The costs of day-to-day servicing of property, plant, and equipment are recognised in surplus or deficit as they are incurred.

Disposals
Gains and losses on disposals are determined by comparing the disposal proceeds with the carrying amount of the asset. Gains and losses on disposals are reported net in surplus or deficit. When revalued assets are sold, the amounts included in asset revaluation reserves in respect of those assets are transferred to accumulated funds.

Land is not depreciated. Depreciation on other assets is calculated using the straight-line method to allocate their cost or revalued amounts, net of their residual values, over their estimated useful lives.

Assets to be depreciated include:

OPERATIONAL ASSETS		INFRASTRUCTURE ASSETS	
Buildings		Bridges	30-100 years
- structures	5-100 years	Footpaths and cycle	20-100 years
- external fabric	5-100 years	Kerb and channel	70-100 years
- services	5-80 years	Roads – sealed	5-135 years
- internal fit out	5-80 years	Roads – unsealed	5-100 years
Equipment, furniture and fittings	3-30 years	Roads – land and formation	Not depreciated

Motor vehicles and plant	3-60 years	Sewerage plant and equipment*	2-46 years
Library books	5-10 years	Sewerage reticulation	4-80 years
Parks and reserves	2-100 years	Stormwater networks	77 years
Other assets	1-80 years	Water plant and equipment*	10-38 years
Parks, reserves and other assets – passive areas and land formation	Not depreciated	Water reticulation networks	21-90 years

* Water and wastewater district wide plant is recognised under motor vehicles and plant, ie. trailers and generators.

An asset's carrying amount is written down to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing proceeds with carrying amount.

These are included in the surplus or deficit. When revalued assets are sold, the amounts included in asset revaluation reserves in respect of those assets are transferred to accumulated funds.

Assets under construction are not depreciated. The total cost of the project is transferred to the relevant asset when it is available for use, and then depreciated.

14. Non-current Assets (or Disposal Groups) Held for Sale

Non-current assets (or disposal groups) are classified as held for sale and stated at the lower of their carrying amount and fair value less costs to sell if their carrying amount will be recovered principally through a sale transaction rather than through continuing use.

An impairment loss is recognised for any initial or subsequent write down of the asset (or disposal group) to fair value less costs to sell. A gain is recognised for any subsequent increases in fair value less costs to sell of an asset (or disposal group), but not in excess of any cumulative impairment loss previously recognised. A gain or loss not previously recognised by the date of the sale of the non-current asset (or disposal group) is recognised at the date of de-recognition.

Non-current assets (including those that are part of a disposal group) are not depreciated or amortised while they are classified as held for sale. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognised.

Non-current assets classified as held for sale and the assets of a disposal group classified as held for sale are presented separately from the other assets in the statement of financial position. Further, the liabilities of a disposal group classified as held for sale are presented separately from other liabilities in the statement of financial position. Those assets and liabilities shall not be offset and presented as a single amount.

15. Intangible Assets

Computer Software

Acquired computer software licenses are capitalised on the basis of costs incurred to acquire and bring to use the specific software. These costs are amortised over their estimated useful lives of 3-10 years using the straight-line method. Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred.

16. Other Intangible Assets

Other intangible assets that are acquired by Council are stated at cost less accumulated amortisation (see below) and impairment losses (see Impairment Policy).

Easements are not amortised.

17. Subsequent Expenditure

Subsequent expenditure on capitalised intangible assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates, and it meets the definition of, and recognition criteria for, an intangible asset. All other expenditure is expensed as incurred.

18. Amortisation

An intangible asset with a finite useful life is amortised over the period of that life. The asset is reviewed annually for indicators of impairment and tested for impairment if these indicators exist. The asset is carried at cost less accumulated amortisation and accumulated impairment losses.

An intangible asset with an indefinite useful life is not amortised, but is tested for impairment annually, and is carried at cost less accumulated impairment losses.

19. Forestry Assets

Forestry assets are predominantly standing trees which are managed on a sustainable yield basis. These are shown in the statement of financial position at fair value less estimated point of sale costs at harvest. The costs to establish and maintain the forest assets are included in the surplus or deficit together with the change in fair value for each accounting period.

The valuation of forests is based on discounted cash flow models where the fair value is calculated using cash flows from continued operations; that is, based on sustainable forest management plans taking into account growth potential. The yearly harvest from forecast tree growth is multiplied by expected wood prices and the costs associated with forest management, harvesting and distribution are then deducted to derive annual cash flows. The fair value of the forest assets is measured as the present value of cash flows from one growth cycle based on the productive forest land, taking into consideration environmental, operational and market restrictions. Forest assets are valued separately from the underlying freehold land.

The forestry assets are revalued annually as at 30 June.

Gains or losses arising on initial recognition of forestry assets at fair value less estimated costs to sell, and from a change in fair value less estimated costs to sell are recognised in the surplus or deficit.

20. Emissions Trading Scheme

New Zealand Units (NZUs) allocated as a result of council's participation in the Emissions Trading Scheme (ETS) will be treated as intangible assets and recorded at fair value upon recognition.

Liabilities for surrender of the NZUs (or cash) are accrued at the time the forests are harvested, or removed in any other way, in accordance with the terms of the ETS legislation.

21. Investment Property

Investment properties are properties which are held either to earn rental revenue or for capital appreciation or for both. Investment properties generate cash flow largely independent of other assets held by the entity.

Investment properties are stated at fair value. The portfolio is valued annually by an external, independent valuer, having an appropriate recognised professional qualification and recent experience in the location and category of property being valued. The fair values are based on market values, being the estimated amount for which a property could be exchanged on the date of valuation between a willing buyer and a willing seller in an arm's length transaction.

Any gain or loss arising from a change in fair value is recognised in the surplus or deficit.

Rental revenue from investment property is accounted for as described in the Revenue Policy (see Revenue Policy), above.

22. Reporting of Financial Instruments

The Council shall recognise a financial asset or a financial liability in its statement of financial position when, and only when, the Council becomes party to the contractual provisions of the instrument.

At initial recognition, the Council shall measure a financial asset or financial liability at its fair value plus or minus, in the case of a financial asset or financial liability not at fair value through surplus/(deficit), transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability.

Financial Assets are classified as either:

1. Amortised Cost
2. Fair value through surplus or deficit, FVTSD, or
3. Fair value through other comprehensive revenue and expenses, FVTOCRE.

A financial asset shall be measured at amortised cost if both of the following conditions are met:

a. The financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and
b. The contractual terms of the financial asset given rise on specific dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A financial asset shall be measured at FVTSD unless it is measured at amortised cost or at FVTOCRE. However, an entity may make an irrevocable election at initial recognition for particular investments in equity instruments that would otherwise be measured FVTSD to present subsequent changes in FVTOCRE. Subsequent measurement of financial assets are at amortised cost.

Term Deposits and Community Loans

Financial assets classified at amortised cost are subsequently measured at amortised cost using the effective interest method, less any expected credit losses. Where applicable, interest accrued is added to the investment balance. Instruments in this category include term deposits, community loans, and loans to subsidiaries and associates.

Subsequent measurement of financial assets at FVTSD
Financial assets in this category are subsequently measured at fair value gains and losses recognised in comprehensive revenue and expenditure. Interest revenue and dividends are recognised from these financial assets are separately presented within revenue. Other than unlisted shares, bonds and interest rate swaps, the Council has not assets in this category.

Listed and Unlisted Shares and Bonds
Financial assets in this category that are debt instruments (Bonds) are subsequently measured at fair value with fair value gains and losses recognised in other comprehensive revenue and expense, there is no assessment for impairment when fair value falls below the cost of the investment. When sold, the cumulative gain or loss previously recognise in other comprehensive revenue and expense is reclassified to surplus and deficit.

Financial assets in this category that are equity instruments designated as FVTOCRE are subsequently measured at fair value with fair value gains and losses recognised in other comprehensive revenue and expense. There is no assessment for impairment when fair value falls below the cost of the investment. When sold, the cumulative gain or loss previously recognised in the other comprehensive revenue and expense is transferred to accumulated funds within equity.

Expected credit loss allowance (ECL)
The Council recognise an allowance for ECLs for all debt instruments not classified as FVTSD. ECLs are the probability – weighted estimate for credit losses, measure at the present value of cash shortfalls, which is the difference between the cashflows due to Council in accordance with the contract and the cash flows it expects to receive.

ECLs are recognised in two stages, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). However, if there has been a significant increase in credit risk since initial recognition, the loss allowance is based on losses possible for the remaining life of the financial asset (lifetime ECL).

When determining whether the credit risk of a financial asset has increased significantly since initial recognition, the Council considers reasonable and supportable information that is relevant without undue cost or effort. This includes both quantitative and qualitative information and analysis based on the Council's historical experience and informed credit assessment and included forward looking information.

The Council consider a financial asset to be in default when the financial asset is more than 90 days past due. The Council may determine a default occurs prior to this if internal or external information indicates the entity is unlikely to pay its credit obligation in full.

23. Impairment of Financial Assets

Financial assets are assessed for evidence of impairment at each balance date. Impairment losses are recognised in the surplus or deficit.

Loans and receivables, and held-to-maturity investments
Impairment is established when there is evidence that the Council will not be able to collect amounts due according to the original terms of the receivable. Significant financial difficulties of the debtor, probability that the debtor will enter into bankruptcy, receivership, or liquidation and default in payments are indicators that the asset is impaired. The amount of the

impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted using the original effective interest rate. For debtors and other receivables, the carrying amount of the asset is reduced through the use of an allowance account, and the amount of the loss is recognised in the surplus or deficit. When the receivable is uncollectible, it is written-off against the allowance account. Overdue receivables that have been renegotiated are reclassified as current (that is, not past due).

Impairment in term deposits, local authority stock, government bonds, and community loans, are recognised directly against the instrument's carrying amount.

Financial assets at fair value through other comprehensive revenue and expense
For equity investments, a significant or prolonged decline in the fair value of the investment below its cost is considered objective evidence of impairment.

For debt investments, significant financial difficulties of the debtor, probability that the debtor will enter into bankruptcy, and default in payments are objective indicators that the asset is impaired.

If impairment evidence exists for investments at fair value through other comprehensive revenue and expense, the cumulative loss (measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognised in the surplus or deficit) recognised in other comprehensive revenue and expense is reclassified from equity to the surplus or deficit.

Equity instrument impairment losses recognised in the surplus or deficit are not reversed through the surplus or deficit. If in a subsequent period the fair value of a debt instrument increases and the increase can be objectively related to an event occurring after the impairment loss was recognised, the impairment loss is reversed in the surplus or deficit.

24. Impairment of Non-Financial Assets

The carrying amounts of Council's assets, other than inventories (see Inventories Policy), forestry assets (see Forestry Assets Policy), and Investment Property (see Investment Property Policy) are reviewed at each balance date to determine whether there is any indication of impairment. If any such indication exists, the asset's recoverable amount is estimated.

Non-financial assets that have an indefinite useful life are not subject to amortisation and are tested annually for impairment. Assets that have a finite useful life are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

Value in use is depreciated replacement cost for an asset where the future economic benefits or service potential of the asset are not primarily dependent on the assets ability to generate net cash inflows and where the entity would, if deprived of the asset, replace its remaining future economic benefits or service potential.

The value in use for cash-generating assets is the present value of expected future cash flows.

If an asset's carrying amount exceeds its recoverable amount the asset is impaired and the carrying amount is written down to the recoverable amount. For revalued assets the impairment loss is recognised against the revaluation reserve for that class of asset. Where that results in a debit balance in the revaluation reserve, the balance is recognised in the surplus or deficit.

For assets not carried at a revalued amount, the total impairment loss is recognised in the surplus or deficit. The reversal of an impairment loss on a revalued asset is credited to the revaluation reserve. However, to the extent that an impairment loss for that class of asset was previously recognised in the surplus or deficit, a reversal of the impairment loss is also recognised in the surplus or deficit.

For assets not carried at a revalued amount (other than goodwill) the reversal of an impairment loss is recognised in the surplus or deficit.

25. Third Party Transfer Payment Agencies

Council collects and distributes monies for other organisations. Where collections are processed through Council's books, any monies held are shown as accounts payable in the statement of financial position. Amounts collected on behalf of third parties are not recognised as revenue, but commissions earned from acting as agent are recognised in revenue.

26. Trade and Other Payables

Trade and other payables are initially measured at fair value and subsequently measured at amortised cost using the effective interest method.

27. Employee Entitlements

Provision is made in respect of Council's liability for the following short and long-term employee entitlements.

Short-Term Entitlements

Employee benefits that Council expects to be settled within 12 months of balance date are measured at nominal values based on accrued entitlements at current rates of pay. These include salaries and wages accrued up to balance date, annual leave earned to date, but not yet taken, at balance date, retiring and long service leave entitlements expected to be settled within 12 months.

Liabilities for annual leave are accrued at the full amount owing at the pay period ending immediately prior to the statement of financial position date.

Long-Term Entitlements

Where (for historical reasons) a retirement gratuity entitlement exists, where material, liability is assessed on an actual entitlement basis using current rates of pay taking into account years of service. All remaining staff with this provision in their contracts have completed the qualifying conditions.

Where (for historical reasons) a long service leave entitlement exists in an individual's employment agreement, the value of the entitlement will be recognised on an actual basis for staff who have completed the service entitlement, but not yet taken the leave, and on a discounted basis for the staff members who have not yet completed the qualifying service.

Superannuation Schemes

Defined contribution schemes – Obligations for contributions to defined contribution superannuation schemes are recognised as an expense in the surplus or deficit as incurred.

28. Borrowings

Borrowings are recognised at their fair value. After initial recognition, all borrowings are measured at amortised cost using the effective interest method.

Council has capitalised borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset, in line with PBE IPSAS 5.

Consequently, all borrowing costs are recognised as an expense in the period in which they are incurred.

29. Provisions

A provision is recognised in the statement of financial position when Council has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits, the amount of which can be reliably estimated, will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability.

30. Landfill Post Closure Costs

Council has several closed landfills. The resource consents for these include a legal obligation to provide ongoing maintenance and monitoring services throughout the life of the consent. The provision is measured on the present value of future cash flows expected, taking into account future events, including new legal requirements and known improvements in technology. The provision includes all costs associated with landfill post closure.

The discount rate used is a rate that reflects the current market assessments of the time value of money and the risks specific to Council.

The estimated future costs of meeting this obligation have been accrued and charged. The calculations assume no change in the legislative requirements for post-closure treatment.

31. Goods and Services Tax

The prospective financial statements are prepared exclusive of GST except for debtors and other receivables and creditors and other payables that are shown inclusive of GST. Where GST is not recoverable as an input tax it is recognised as part of the related asset or expense.

32. Cost Allocations

The costs of all internal service activities are allocated or charged directly to external service type activities. External service activities refer to activities which provide a service direct to the public. Internal service activities provide support for the external service activities.

Where the user of a service can be identified, the cost recovery is made by way of a direct charge. Where this has not been possible, the costs are allocated by way of general overhead, based on expenditure incurred within the activity.

33. Critical Accounting Estimates and Assumptions

In preparing these financial statements, estimates and assumptions have been made concerning the future. These estimates and assumptions may differ from the subsequent actual results. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations or future events that are believed to be reasonable under the circumstances.

The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities in the next financial year are:

- Estimating the fair value of land, buildings, and infrastructural assets.

Management has exercised the following critical judgments in applying accounting policies:

- Classification of property.

Fees and Charges 2025-26

While Council has aimed to provide a comprehensive and accurate schedule of charges, if any errors or omissions are identified, charges will be calculated by reference to the appropriate underlying authority/resolution. Council reserves the right to vary and introduce fees and charges at its discretion.

All fees and charges referred to are inclusive of Goods and Services Tax (GST) at 15%.

Estimated value of work, includes Project Check Fee. The cost of any peer review of professional documents is at the applicant's cost. All Building Control Fees are based on the average time taken to complete administration, processing and inspections based on the value of the building consent or other building work. Work in excess of this time may be charged for at time and disbursements. Any other charge for information, certification or inspection, or recording of safe and sanitary certificates not specifically provided for to be charged at time and disbursements ($150 minimum). Refunds will be available for withdrawn consents, with any time spend processing and administration costs being deducted. Any consents where processing or inspections are undertaken outside of CODC will be charged at cost.	**BUILDING CONTROL CHARGES**

All applications for resource and subdivision consent and changes to the District Plan will be charged on a time charge/hourly rate, plus disbursements basis although a minimum payment (deposit fee) is required as detailed. Applications will not be processed unless accompanied by the appropriate application or deposit fee. In accordance with Section 36 of the Resource Management Act where a charge is payable, the Council will not perform the action to which the charge relates until the charge has been paid in full. Note: This applies to all fees and charges in relation to Resource Management functions. Applications which are incomplete or require the applicant to undergo remedial works will incur further costs on a time and disbursement basis. All consents processed by external planning consultants/ contractors are charges at cost where this is above the CODC hourly rate.	**Subdivision Charges**

Revenue and Financing Policy

Purpose

This policy sets out the council's policies in respect of funding operating and capital expenditure. This policy has been reviewed in line with the Council's Long-term Plan and has considered the principles of our Financial Strategy.

Council's overall approach is that, where practicable, areas that directly benefit fund the service/activity or bundle of services in that area. It implements this philosophy through the use of district ward rating areas.

Funding Principle

Council has reviewed each individual activity with a view to determining an equitable funding policy. In doing so, Council considered the nature of the service and the benefits and beneficiaries for each service. Items considered during that deliberation were:

- Community outcomes to which an activity contributes
- The distribution of benefits between the community, identifiable parts of the community and individuals
- The period during which the benefits are expected to occur
- The extent to which actions, or inactions, of individuals or groups contribute to the need to undertake the activity
- Costs and benefits of funding the activity distinctly from other activities

The revenue and financing policy is not just an aggregation of policies for the individual activities Council carries out but is also a means for Council to consider the overall impact of any allocation of liability for revenue needs on the current and future social, economic, environmental and cultural well-being of the community.

Council has determined the following basic principles to guide the appropriate use of funding sources:

- User charges are preferred when a private benefit can be identified and it is efficient to collect the revenue;
- Subsidies, grants and other income options are fully explored prior to rates being used;
- Each generation of ratepayers should pay for the services they receive and borrowing can assist to achieve this outcome;
- Capital expenditure to replace assets that reach their projected economic life is firstly funded from rates, which accumulate in asset renewal reserves until needed. Borrowing is then used if there is a shortfall in the total funding required;
- Capital expenditure to upgrade or build new assets is funded firstly from other sources (e.g. subsidies, grants, fundraising, financial contributions) and then borrowing.

Complying with these principles can at times be challenging. The Council must apply judgment in assessing many options to determine appropriateness in its development of budgets or acquisition of assets and the choice of funding sources to implement these. The Council has also been guided by the following:

- Costs for each activity are collected unless the Council believes that to do so would not be fair or not be in the interest of residents and ratepayers or is in conflict with Council policy. As an elected representative body, the Council has the responsibility to make the final decision;
- The use of a uniform annual general charge for general rates and fixed amounts for targeted rates (including works and services rates) is based upon a judgment on how regressive or progressive the incidence of rates should be.
- Water, wastewater and stormwater services are provided directly to rating units in defined areas of benefit, and are funded through targeted rates for each activity. The charges are further differentiated into full and part charge (in the case of water and wastewater), to target those rating units receiving the service and those rating units capable of receiving the service. Council also charge users a volumetric charge for water they use. This reflects the differentiation of providing the service and associated infrastructure and the use of water
- The use of the general rate is generally reserved for activities of a district wide nature or for activities where the Council has judged that the service is better funded by way of a form of local taxation rather than a type of targeted rating.
- In some instances, ratepayer sector groups may fund more of the costs of an activity than they may directly benefit from. Council has taken into account the overall impact of any allocation of liability for revenue needs on the community in its considerations. In general, operating expenditure is for the current year and will be funded over the current year. In some exceptional cases reserve funding may be used to ease and spread the rate burden.

Policy

Financial Management

The Local Government Act 2002 places specific responsibility on Council to manage its revenue, expenses, assets, liabilities, investments and general financial dealings prudently and in a manner that promotes the current and future interests of the Central Otago District community. In doing so, Council is required to make adequate and effective provision for the expenditure needs of the Council.

Funding of Operating Expenditure

Council is required to have a balanced budget. It must set each year's projected operating revenues at a level sufficient to meet that year's projected operating expenses. Council may only vary this when it is financially prudent to do so.

Council must also consider the equitable allocation of responsibility for funding the provision and maintenance of assets and facilities throughout their useful life.

Operational expenditure is the cost of providing the level of service in a given year and includes depreciation on assets. Depreciation is defined as the measure of consumption of the economic benefits of an asset arising from its use over time. Those who benefit from the use of an asset should contribute towards its cost/consumption.

Because of the size of Council's depreciation expenses within a balanced budget, rate funding of depreciation provides resources to pay for the renewal of the asset at the end of its useful life or for related debt repayment.

There are circumstances when fully rate funding depreciation may result in some ratepayers bearing a funding burden that is not entirely fair and equitable. This is where funds for capital project replacement are provided from sources outside Council, for example where a community has raised funds for a hall. Council would not rate fund the depreciation on the hall, as any replacement of that facility would be the responsibility of that community.

Council reviews the effects on ratepayers of fully rate funding increased depreciation from the revaluation of assets. Council considers each revaluation and may in fact choose to not fully rate fund an increase or to introduce the increase in funding required over time.

In general, the funding hierarchy for operating costs is:

1. User charges;
2. Grants, sponsorship, subsidies and other income;
3. Reserve funds;
4. Targeted rates;
5. General rates.

Overview of Funding Mechanisms used by Council

Council will make use of a mix of revenue sources to meet operating expenses.

The extent to which the provision of a service by the Council is a public or private good will largely determine the extent to which rates, fees and charges become the funding source. The income from fees and charges and subsidies may vary based on economic circumstances. The mechanisms are outlined below:

User charges

User charges are used for services where there is a benefit to an individual or group. Users charges is a broad group of revenue charged directly to an individual or entity. It includes:

- Entry fees
- Service charges
- Hire
- Rent, lease, licenses for land and buildings
- Permits
- Regulatory charges
- Fines and penalties
- Connection fees
- Disposal fees
- Deposits
- Private works
- Memberships
- Planning and consent fees
- Statutory charges
- Retail sales.

The price of the service is based on a number of factors, including:

- The cost of providing the service
- The estimate of the users' private benefit from using the service
- The impact of cost to encourage/discourage behaviours
- The impact of cost on demand for the service
- Market pricing, including comparability with other councils
- The impact of rates subsidies if competing with local businesses
- Cost and efficiency of collection mechanisms
- The impact of affordability on users
- Statutory limits
- Other matters as determined by Council.

Council's ability to impose user charges is limited by the powers conferred to it by many statutes and regulations. As a general rule, fees for statutory functions should be set at no more than the cost of providing the service. In some cases legislation sets the fees at a level that is below cost and in other cases, where provided by legislation (e.g. Waste Minimisation Act 2008) Council may set fees at greater than the cost of providing the service. Council considers it appropriate to incorporate overhead charges in the determination of the cost of providing a service.

Where Council is charging for the sale of goods or services not required by statue, Council's preference is to charge a market price, having regard to the powers conferred by section 12. This includes leases, rents and licenses for land and buildings.

Actual fees and charges may be set by Council at any time and are reviewed by Council annually. A list of regular fees and charges is maintained on Council's website.

User charges revenue is allocated to the activity which generates the revenue.

Grants, sponsorship, subsidies and other income

Grants, sponsorship and subsidies are used where they are available. Many of these items are regular and predictable and therefore can be budgeted for. Some items of other income are unexpected or unpredictable and may not be able to be prudently budgeted (e.g. reparation payments, Civil defence and other reimbursements, legal settlements and insurance payouts).

Council expects to continue receiving substantial subsidies for road maintenance from government or its agencies.

Investment income

Council's approach to investments and investment income is documented in our Investment Policy. These investments may generate income such as interest, forestry returns and rents. Each source of income is receipted to the activity that owns the asset. Most investment income earned is allocated to reduce the rates requirements for operating costs.

Financial contributions

Council collects financial contributions under the Resource Management Act 1991. The purpose of these contributions is outlined in the Central Otago District Plan. Contributions are not used to fund operating costs.

Development contributions

Council does not use revenue collected through development contributions for operational costs. Development contributions are collected for capital growth projects.

Proceeds from the sale of assets and lump sum contributions

Council does not collect revenue from these funding sources to fund operating costs.

Reserve funds

Council maintains reserve funds which have generally come about from unspent rates, investment income or other revenue source in a previous year. Many of these reserve funds are for capital expenditure. However some of these reserve funds are available to meet operating costs.

We use these funds for the purposes that the reserve was created and usually for new projects additional to normal operating expenditure. Council at times may use these funds to minimise or smooth changes in rates.

Borrowing

Council does not borrow to fund operating costs. This is not allowed under Council's policies on borrowing, documented in the Liability Management Policy and Investment Policy.

Rates

Having been prudent and appropriately exhausting all other funding sources, Council funds its remaining operating expenses from rates. For many activities this is the main funding source.

Council must determine whether the portion of an activity to be funded from rates is to be funded from the general rate or a targeted rate.

In doing this, while considering all the matters of section 101(3), Council placed emphasis on "the area of benefit". By this Council means that it reviewed each activity and determined where the benefits from the provision of the service is received, and chose a rating option that most closely charges that group. Matters we have considered are:

Table 1: Our Rating Preferences

Type of Benefit	Preferred Rating Solution
To an area of the District (e.g. town)	Establish targeted rates based on areas defined by map. Rates established will be a combination of Capital Value or Land Value rates and uniform charges.
To the value of the land and property improvements	A general rate or a targeted rate partially through a Uniform Annual Charge and partially through a Capital Value rate or a Land Value rate.
To people	Targeted rate – Uniform basis (where everyone in the District who receive the service receives a similar level of benefit) eg. urban water.

Differentials

The Council utilises the following differentials.

1) Hydro differential for all Hydro dams within the District. These Dams are
    a. Clyde Dam
    b. Roxburgh Dam
    c. Earnscluegh Dam
    d. Paerau Dam
    e. Teviot Valley Dams.

    These differentials exist to ensure that the overall increase in rates liability for the dams remains aligned with the overall average increase in rates.

2) Tourism and Promotion.

    This differential allocates the Tourism and Promotion cost across those who benefit most from the activities covered by that rate.

    Categories are split as follows:

    Residential – all rating units categorised as residential by Council's valuations service provider.

    Rural – all rating units used categorised as dairy, horticulture, forestry, mining, lifestyle or specialist agricultural use by Council's valuation service provider.

    Commercial and industrial – all rating units categorised as commercial or industrial by Council's valuation service provider.

    Dams, Utilities and Other - the Clyde Dam, Roxburgh Dam, Paerau Dam, Teviot Dam and all rating units categorised as utilities by Council's valuation service provider, sports groups and other non-commercial community groups.

    The Tourism and Promotion differentials are assessed on land use and are Residential 1.00, Rural 0.77, Commercial/Industrial 5.37, Dams and Utilities 0.69.

    Promotion differentials are used at district level for District level activities such as District grants and at ward level for grants made be Community Boards.

Changes from Previous Policy

In September of 2024 Council decided, after consulting with its residents, to change the decision-making levels and therefore the sources of funding on the following activities to bring them into line with the majority of Council activities.

The Council also decided to remove most of the ward based targeted rates that would have funded those activities and will now fund them across the district.

The rates that will be removed and replaced are:

1) Works and Services rates calculated on Capital Value for each rating unit. This was used to fund housing and property, grants, recreation reserve committees

and other works. This will now be rated from a targeted rate called the Communities Facilities rate that will be calculated on a mix of Capital Value for each rating unit and a Uniform Charge per rating unit the mix of which will be determined by Council annually as part of its financial planning process.

2) Works and Services rates based on a uniform charge for each rating unit. This was used to fund Community Board Elected Members. This will now be funded from the General rate.

3) Recreation and Culture rates calculated on a targeted rate based on a uniform annual charge used to fund operations and maintenance of parks and reserves, swimming pools, museums, sports club loan assistance, community halls and other recreation facilities and amenities. This will now be rated from a targeted rate called the Communities Facilities rate that will be calculated on a mix of Capital Value for each rating unit and a Uniform Charge per rating unit the mix of which will be determined by Council annually as part of its financial planning process.

4) Molyneux Park rates calculated differentially across the district, set at a fixed charge per rating unit. This will now be rated from a targeted rate called the Communities Facilities rate that will be calculated on a mix of Capital Value for each rating unit and a Uniform Charge per rating unit the mix of which will be determined by Council annually as part of its financial planning process.

5) Tracks and Waterways rates calculated on a targeted rate across the district applied to the operations and maintenance of facilities associated with Lake Dunstan, the Clutha River and other tracks and waterways throughout the district. This will now be rated from a targeted rate called the Communities Facilities rate that will be calculated on a mix of Capital Value for each rating unit and a Uniform Charge per rating unit the mix of which will be determined by Council annually as part of its financial planning process.

6) Planning and Environment rates mention the funding of Rural fire. This is no longer a Council activity and will be removed from the description.

7) District Works and Public Toilets includes the provision of stormwater services. On a capital value basis. The Council to ensure ease of transfer of billing information and services to the new water services entity has decided to remove stormwater services from this rating category. Stormwater will now be funded from a targeted rate based on a uniform charge across the district.

Summary of Funding Sources For Operating Costs by Activity

Funding of Capital Expenditure

Council categorises capital expenditure into three main areas:

- Renewal of existing assets at the end of their useful lives
- Growth related assets
- Expenditure on assets that are an improvement or addition to the asset including expenditure on assets driven by statutory requirement. This expenditure is seen as an increase in the level of service provided and intergenerational by nature.

Council's use of funding mechanisms to fund capital expenditure are as follows:

Capital costs are those costs associated with the purchase and improvement of assets and for the repayment of debt.

The funding hierarchy for capital costs is:

1. User charges;
2. Grants, sponsorship, subsidies and other income;
3. Development contributions;
4. Financial contributions;
5. Reserve funds;
6. Proceeds from the sale of assets and lump sum contributions;
7. Borrowing;
8. Rates:
    a. Targeted rates;
    b. General rates.

User charges

User charges are generally not available for capital costs as individual user contributions are generally too large to be affordable. Borrowing and charging users annually for financing costs (interest and principal) via rates is often a more affordable method of charging user contributions.

Council does charge for capital works that are solely for private benefit (e.g. a network extension to a single dwelling) or where capital works are done outside of asset management plans at the request of individuals (e.g. a rural seal extension for dust suppression).

Grants, subsidies, and other income

Council relies on a significant subsidy for capital works in its roads and bridges activity. Other activities are able to access grants and subsidies from time to time. Other income can be from many and varied sources and is unlikely to be predictable enough to budget for in advance. Other income used to fund capital expenditure could include bequests, insurance payouts, and legal settlements.

Grants, subsidies and other income are used wherever they are available.

Financial contributions

Council collects financial contributions under the Resource Management Act 1991. The purpose of these contributions is outlined in the Central Otago District Plan.

Council's approach is to deposit receipts into a relevant reserve fund and to draw funds from that account for specific projects that meet the purpose for which the funds were collected.

Development contributions

Council collects development contributions under the Local Government Act 2002 LGA for network infrastructure across the district to ensure that a fair, equitable and proportionate share of the cost of assets that are required to meet the demands of growth.

Council's approach is to deposit receipts into a relevant reserve fund and to draw funds from that account for specific projects that meet the purpose for which the funds were collected.

Proceeds from the sale of assets

From time-to-time Council disposes of assets. Many of these are low value items and the revenue is received by the activity that owns the assets.

Council's property activity holds some higher value assets that are intended for sale. Unrestricted proceeds from the sale of these assets will be used to repay debt held by the property activity, and then applied as Council determines to other activities to repay debt Restricted revenues will be place in a reserve fund and used for the purpose required by the document that imposes the restriction (e.g. endowments).

Reserve funds

Council maintains various reserve funds for capital projects and will approve the use of the funds when a project meets the specific criteria of the reserve. Theses reserve funds may include bequests and depreciation or asset renewal reserves.

Council funds capital expenditure from either rates, subsidies or capital reserves. These capital reserves are built up from funded depreciation and any shortfalls in funding capital expenditure are treated as either internal loans or borrowed for externally.

Special Funds are also used for funding new capital and/or renewals. These funds are contributed from several sources, for example, historical funds, proceeds from the sale of assets and proceeds from the sale of endowment land.

Borrowing

For larger capital projects that provide a long-term benefit to the community, Council may determine that borrowing the funds is an appropriate method of allocating the costs of a project over time to users.

Borrowing, both the capital (principal) and interest components, is generally repaid by future rates. Council may resolve to capitalise interest repayments on some debt, where it considers it most likely (prudent) that another funding source (e.g. property sales) will be able to repay the accumulating debt.

Where it is not practical to obtain third party revenue and where reserve funds haven't previously been set aside, Council prefers borrowing as a funding source. Borrowing spreads the cost of the project over a longer period, smoothing changes in rates and contributing to help achieve intergenerational equity.

Lump sum contributions

Council has the option when undertaking a major project to seek lump sum contributions to the capital cost of the project from those who benefit. Lump sum contributions are provided for in the Local Government (Rating) Act 2002 and have stringent requirements placed on how they are used. Where a lump sum payment option is proposed ratepayers choose to participate or not. Council has previously used these provisions and may do so in the future.

For major projects, Council will consider requiring funding from borrowing and whether it wishes to seek lump sum contributions.

Income from investments

These are not used to fund capital expenditure.

Rates

Rates are used firstly to fund day to day expenses, including depreciation and both internal and external borrowing interest costs. A portion of rates funds the capital (principal) repayments of debt, generally using table loan calculations. Rates may be used to fund some small items of capital expenditure. With the exception of roading, rates are not a practicable method to fund large projects in the year of expenditure. Local share of roading is funded in the year the expenditure is incurred.

Council will fund in advance some capital projects that will maintain service levels by collecting rates for depreciation (an operating expense). These funds are placed in capital reserve funds until they are required.

Analysis for capital expenditure by activity

Council has applied the above preferences for the use of the funding sources for capital to each activity in its Funding Needs Analysis. Council will fund capital costs on the same basis as determined by the operating costs funding policy, unless Council resolves otherwise. It is not practicable to determine a funding policy for an unknown future project at this time.

Council uses the following guidelines when considering the funding of capital projects:

- All projects are first funded from grants, subsidy or other income;
- Renewal projects that maintain service levels are then funded from reserves set aside for this purpose; • Lump sum rating options are considered;
- Capital projects that have exhausted previous funding sources or are for new or increased service levels or for growth in non-network infrastructure are then funded from borrowing.

A single project may have a mix of each of these funding options.

Generally it is not practical to create separate funding policies for each and every capital project. Council will only do this when a project is particularly large, affects a particular group or does not fit with an existing funding policy or activity. Whenever Council resolves to consider a separate funding policy it will consider the sources of funds above, the Revenue and Financing Policy and complete a section 101(3) assessment to determine an appropriate funding policy for the project. Generally Council will resolve the funding policy at the time the project is proposed in an Annual Plan or Long-term Plan.

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					FEES AND CHARGES
		GENERAL RATE		TARGET RATE			
THREE WATERS							
THREE WATERS 	**Water** Council supplies households and the community with treated water at a suitable pressure and quantity. Water is treated to a required health standard and then pressurised for distribution and public firefighting. All water usage is measured through meters. Income from volumetric charging reflects the private benefit of water at the connection but is priced to achieve an overall objective of reducing per connection usage.			Moderate fixed charge per connection or serviceable rating unit		Moderate funded by volumetric charge per unit from metered water supply	Minimal grants and water fees
	Connected – any rating unit (including vacant sections) that is connected to (lateral/s provided) a Council operated water supply charged at 100%. Serviceable – any rating unit (including vacant sections) that is not connected to (no lateral provided) a council operated water supply but is within 100 metres of a Council operated water supply reticulation system, charged at 50%.						
	Wastewater Wastewater generated by private and public premises is conveyed and treated to minimise public health risks and impacts on the environment.			Most fixed charge per connection or serviceable rating unit			Minimal funded by trade waste fees

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					
		GENERAL RATE		TARGET RATE			FEES AND CHARGES
	Where wastes from industrial processes are known to dramatically increase demand for the activity, Council capture costs through our Trade Waste Bylaw.						
	Connected – any rating unit (including vacant sections) that is connected to (lateral/s provided) a Council operated wastewater system charged at 100%. Serviceable – any rating unit (including vacant sections) that is not connected to (no lateral provided) a Council operated wastewater system but is within 30 metres of a wastewater drain, charged at 50%. An additional 25% charge for subsequent urinal or water closet for commercial accommodation uses and rest homes for the elderly will apply. Clyde – a targeted rate set as a fixed charge per rating unit will fund the costs arising from wastewater activities in Clyde.						
	Stormwater The stormwater activity provides for the safe removal of excess rainfall that does not naturally permeate into the ground. Council has a responsibility to ensure individuals, households and businesses are not adversely impacted by localised flooding. Localised flooding risk is greater in urban areas where development reduces the permeability of the ground.			All Fixed charge across the District			

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					
		GENERAL RATE		TARGET RATE			FEES AND CHARGES
	Flood risks from large catchments, like the Clutha and Taieri rivers, are managed separately by the Otago Regional Council (ORC).						
		This is funded by a Targeted fixed rate to assist to reflect the benefit all ratepayers receive and to ringfence the stormwater charges required by the proposed water services legislation					
ROADING	Subsidised Roading – A core service for the public providing roads, bridges, road marking, signage, lighting, road safety and transport planning. The public benefits from our roading network by enabling economic activity throughout the district. The NZTA subsidises 51% of expenditure. This subsidy is funded through fuel taxes, road user charges, etc. and reflects the private benefit received.	Moderate General rate, assessed differentially					Moderate subsidy and fuel tax
		This is funded through the General rate as all ratepayers benefit from the activity.					
	Non-subsidised transportation – The provision of infrastructure and service such as footpaths, car parks, vehicle crossings, street lighting, access ways and				Most district-wide rate		Minority funded by inspection fees

		GENERAL RATE		TARGET RATE			
	corridor gardens benefits all ratepayers.						
		This can be funded through a rate on capital value or a fixed rate to reflect the fact that all ratepayers derive a benefit from this activity.					

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					
		GENERAL RATE		TARGET RATE			FEES AND CHARGES
ENVIRONMENTAL SERVICES							
ENVIRONMENTAL SERVICES 	Waste minimisation involves the education of the public and the provision, to the public, of services to minimise the impact of solid waste on our environment. The targeted rate has a fixed element per rating unit to fund core activities such as education and monitoring. Council use a “polluter pays” approach to fund the kerbside collection service and waste transfer. This is reflected in a targeted rate assessed on the level of service and transfer station fees.			Most targeted rate set by district, assessed differentially			Minimal transfer station charges and residual grants and subsidies
		The targeted rate will be assessed on the basis of where the rateable land is situated. The targeted rate will be assessed on rating units. The targeted rate will be assessed based on the level of service provided, that is with a Council provided collection service or not.					

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					
		GENERAL RATE		TARGET RATE			FEES AND CHARGES
PLANNING AND REGULATORY							
PLANNING AND REGULATORY 	Council prepare and manage the District Plan under the Resource Management Act (RMA). The District Plan controls the way Council use, develop and subdivide land by identifying what activities can take place, and what landscapes and features should be protected. The activity controls the development of the district and the protection of the natural environment for all. Council implements the District Plan by processing resource consent and LIM applications for individuals, companies and groups				District Planning Most: funded from a targeted rate set by district. **Consent Planning** Moderate		District Planning Minimal Resource consent and enforcement fees **Resource Consent Planning** Moderate
		Council waives resource consent fees for heritage items, or activities in a heritage precinct which require consent solely because of the rules relating to heritage values.					

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					
		GENERAL RATE		TARGET RATE			FEES AND CHARGES
BUILDING CONTROL	The purpose of building control is to uphold public safety in generally privately owned buildings. Council do this by issuing building consents, carrying out building inspections and responding to building-related enquiries and complaints. Buildings and their owners directly benefit also through consent that the building is safe and complies with the law.				Low targeted rate set across the district		High building consent fees
ENVIRONMENTAL HEALTH	This activity provides confidence to the public and visitors that our water, food premises, hairdressers, camping grounds and funeral directors are free from harmful contaminants. Premises directly benefit also by receiving certification that they are safe and comply with the law.				Minimal targeted rate set across the district		Most enforcement fees

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					
		GENERAL RATE		TARGET RATE			FEES AND CHARGES
DOG CONTROL AND REGISTRATION	Provide the public a healthy and safe environment, free from dangerous and aggressive dogs and to minimise nuisance. Dog owners benefit from legal registrations and impounded dogs being returned. Council feels, on the grounds of fairness and equity, the costs of controlling and registering dogs should be borne by those generating the demand: dog owners.		Minimal Funded from the General rate to recognise public good.				Most funding from registrations and fines
COMMUNITY DEVELOPMENT	We facilitate community planning and a modest promotional grants fund. There is direct benefit in community planning which assists our communities to grow in a sustainable way.		Full Funded from General Rate				

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					
		GENERAL RATE		TARGET RATE			FEES AND CHARGES
POOLS, PARKS AND CEMETERIES							
PARKS AND RECREATION 	Access to parks, reserves, rivers and recreational facilities are important for individual and public well-being. Maintaining high quality open spaces is what makes our district an attractive place to live, work and play. This includes Clutha River and Lake Dunstan recreation. Private users of sports fields and courts also benefit directly.			High targeted rate set by ward and district, assessed differentially			Low user charges and Minimal grants and subsidies
CEMETERIES 	The provision of cemeteries assists with peace of mind for people, knowing their loved ones will rest in peaceful, well-kept environments. We have a responsibility to the public, and under the law, for the maintenance of burial records, maintenance of cemetery grounds, burial of human remains, interment of			Low targeted rate set across the district			High User Fees

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					FEES AND CHARGES
		GENERAL RATE		TARGET RATE			
	human ashes and protection of the district's heritage.						
SWIMMING POOLS	Swimming pools contribute to the health and well-being of the community and add to the attractiveness of the area. They provide a place for people to be active and to learn to swim, particularly for our young people, which we have recognised as being increasingly important when so much of our district is surrounded by water. We also acknowledge that making charges too high would decrease usage.			High targeted rate			Low user charges
PROPERTY AND COMMUNITY FACILITIES							

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					FEES AND CHARGES
		GENERAL RATE		TARGET RATE			
ELDERLY PERSONS' HOUSING	We provide housing predominately for the elderly. Council owns flats in Alexandra, Clyde, Cromwell, Ranfurly and Roxburgh. This activity provides direct social and economic benefits to residents within housing. It also provides comfort to the wider community that our elderly residents are being assisted.	Minimal general rate set by District					Most market rents
PUBLIC TOILETS	Public toilets are provided by Council across the district. They provide social well-being to the public by maintaining health and hygiene. They also provide economic well-being by supporting tourism activity. We feel it is uneconomic and impractical to charge a fee for using public toilets.			All funding from a targeted rate set by district			
FORESTRY	We own and manage a number of forestry blocks across the district. These forests are regarded as a financial investment while						All Sale via tender or quote

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					FEES AND CHARGES
		GENERAL RATE		TARGET RATE			
	providing land stabilisation and amenity value for the community for walking and biking. Council seeks to obtain maximum value for timber sold with the aim of recovering costs plus some return on capital invested. Income will be raised on and by sale only.						
PROPERTY	We own and lease a variety of commercial and farm properties. We also develop land for sale that is not contributing to community outcomes and where it is considered unlikely to do so in the future.				Minimal targeted rate		Majority market rents
AIRPORTS	We manage the assets at the aerodromes at Alexandra, Cromwell and Roxburgh. Council believes the aerodromes are assets of importance to all residents of the district due to the potential role they play in emergencies and alternative transport options for tourists and business.	Minimal general rate set by district,					Most landing fees and rental

ACTIVITY GROUP AND COMMUNITY OUTCOME	RATIONALE FOR ALLOCATION	FUNDING SOURCE					FEES AND CHARGES
		GENERAL RATE		TARGET RATE			
	The users are generally recreational private pilots and some commercial users for such things as top dressing of farms.						
COMMUNITY FACILITIES	Our community facilities and buildings provide places for social, sporting and cultural interaction. They provide both private and public well-being to users within the respective ward, unless regarded as a district facility.			Most targeted rate			Minimal user charges

GOVERNANCE AND CORPORATE SERVICES							
GOVERNANCE 	While the Council and Community Boards provide many different services, it is the governance activity that supports elected members to be effective and responsible decision-makers. Each person has an equal right to partake in the democratic process of Council and so benefit equally. Community Boards represent residents of each ward and are funded as such.		All funding of Councillors	All Community Boards targeted rate set by ward			
		The targeted rate will be assessed on the basis of where the rateable land is situated.					
EMERGENCY MANAGEMENT 	We have the responsibility to plan and provide for civil defence emergency management within the district. This activity is for the safety of our community, as any part or all of the District may be affected by an emergency event. An emergency may be declared in response to threats to life or property. We fund this activity to				All targeted rate set by district

	reflect the property and residents we work to protect.						
CORPORATE SERVICES 	The corporate services activities provide both direct and indirect support across the organisation that allows Council to function efficiently and effectively. Residents requesting information or staff time is a direct private benefit.						Minimal use charges. Most due to Overhead allocation to other activities.

1. The Local Government Rating Act 2002 defines matters that may be used to define categories of rateable land. These are outlined below as per Schedule 2 of the Rating Act. CODC Uses Schedule 2 to define the apportionment of land for rateable purposes, and for the setting of differentials.

Rating Policy

Funding Impact Statement

Schedule of rates (Funding Impact Statement – rates)

General

Uneconomic Rates: Rates levied on anyone rating unit of less than $10.00 for the year are deemed by the Council to be uneconomic to collect.

Allocation: Where a payment made by a ratepayer is less than the amount now payable, the Council will apply the payment firstly to any arrears from previous years, and then proportionately across all current year rates due.

Differentials based on Land Use

The Council proposes to use this matter to differentiate the general rate, tourism rate, promotion rate, wastewater rate (2nd and Subsequent pan/urinal).

The differential categories are:

General Rate

The General Rate differentials exist to ensure that the overall increase in rates liability for the Dams remain closely aligned with the overall average increase in rates.

Large Dams: Clyde Dam – Earnscleugh and Roxburgh Dam – Roxburgh. Paerau Dam – Maniototo Teviot Dams – Roxburgh. All other properties.

Tourism and Grants Rates

Residential – all rating units categorised as residential by Council's valuation service provider.

Rural – all rating units used categorised as dairy, horticulture, forestry, mining, lifestyle or specialist agricultural use by Council's valuation service provider.

Commercial and industrial – all rating units categorised as commercial or industrial by Council's valuation service provider.

Dams, Utilities and Other - the Clyde Dam, Roxburgh Dam, Paerau Dam, Teviot Dam and all rating units categorised as utilities by Council's valuation service provider, sports groups and other non-commercial community groups.

Wastewater Additional Pan/Urinal

Commercial properties providing accommodation including motels, camping grounds and commercial rest homes for the elderly.

Differentials based on Location

Grants Rate

These rates are assessed differentially on the following locations:

- Vincent – the area within the Vincent Ward
- Cromwell – the area within the Cromwell Ward
- Teviot Valley – the area within the Teviot Valley Ward
- Maniototo – the area within the Maniototo Ward

Differentials based on Availability of Service

Water Supply

The categories for the proposed water supply rates are:

- Connected – any rating unit (including vacant sections) that is connected to (lateral/s provided) a council operated water supply
- Serviceable – any rating unit (including vacant sections) that is not connected to (no lateral provided) a council operated wastewater system but is within 100 metres of a water network

Wastewater

The categories for the proposed wastewater rates are:

- Connected – any rating unit (including vacant sections) that is connected to (lateral/s provided) a council operated wastewater system
- Serviceable – any rating unit (including vacant sections) that is not connected to (no lateral provided) or is able to be connected to wastewater infrastructure but is within 30 metres of a wastewater network, as defined in a map held by Council.

Environmental Services - Waste Management

The categories for waste management rates are:

- Waste management with collection – wheelie bins are provided by the Council and a kerbside collection service is available to the rating unit
- Waste management without collection – no wheelie bins are provided, and no weekly collection service is available to the rating unit
- Additional general refuse bin – additional general refuse bins supplied over and above the initial supply of service
- Additional mixed recycling bin – additional mixed recycling bins supplied over and above the initial supply of service
- Additional glass recycling bin – additional glass recycling bins supplied over and above the initial supply of service
- Additional organics bin – additional organics bins supplied over and above the initial supply of service

Due Dates for Payment of Rates

All rates other than metered water charges will be payable in four instalments due on:

- 20 August 2025
- 20 November 2025
- 20 February 2026
- 20 May 2026

Charges for Metered Water will be Due On

Meter Reading Area	Read Period	Billing Due Dates
Bannockburn, Ranfurly, Naseby, Patearoa, Omakau, Clyde and Roxburgh	July 2025 November 2025 March 2025	28 August 2025 8 January 2026 30 April 2026
Alexandra	August 2025 December 2025 April 2026	25 September 2025 29 January 2026 28 May 2026
Cromwell and Pisa Moorings	September 2025 January 2025 May 2026	30 October 2025 26 February 2026 18 June 2026

Read dates are an approximation depending on property numbers.

Penalties

The Council will apply penalties under section 57 and 58 of the Local Government (Rating) Act 2002 on unpaid rates (other than metered water rates) as follows:

- 10% on any outstanding amount of any instalment not paid by the due date.
- The penalty will be applied on 27 August 2025, 27 November 2025, 27 February 2026 and 27 May 2026 respectively for each instalment.
- 10% on amounts outstanding balances due from prior rating years, such penalties being applied on 1 October 2025 and 1 April 2026.
- Requests for waiver of penalties should be sent, in writing, to the Rates Officer as per Council Remission of Penalties Policy.

The Council will apply penalties under section 57 and 58 of the Local Government (Rating) Act 2002 on unpaid metered water rates as follows:
10% on any metered water rates unpaid after the due date.
The penalty will be applied on the date below for the respective instalments:

Meter Reading Area	Penalty Date
Bannockburn, Ranfurly, Naseby, Patearoa, Omakau, Clyde and Roxburgh	4 September 2025 15 January 2026 7 May 2026
Alexandra	2 October 2025 5 February 2026 25 June 2026
Cromwell and Pisa Moorings	6 November 2025 5 March 2026 4 June 2026

Requests for waiver of penalties on water accounts should be sent, in writing, to the Water Billing Officer, in accordance with the Council's Remission of Penalties Policy.

General Rate

A general rate will be set on land value under section 13 of the Local Government (Rating) Act 2002 on all rateable land.

The Council sets a general rate on a differential basis based on use (with the differential categories being “Large Dams”, “Paerau Dam - Maniototo”, “Teviot Power Scheme - Roxburgh” and “All areas excluding Large Dams, Paerau Dam - Maniototo, Teviot Dam - Roxburgh”) on all rating units (as defined in the General Rate category).

The rate is based on the land value of all rating units in the District according to the table below:

CATEGORY	Factor(s) for calculation liability	Rate factor per $ of Land Value	Total revenue sought from this category (GST inclusive)
All Other Properties	Land value	0.0013568	13,728,506
Large Dams	Land value	0.2957006	1,635,224
Paerau Dam – Maniototo	Land value	0.1198021	70,683
Teviot Power Scheme – Roxburgh	Land value	0.1666475	153,316

The general rate is used to fund in whole or part, the general activities of Council. Included are housing, district grants, community development, community engagement, regional identity, strategy and policy, communications, roading, noxious plant control, governance, service centres, airports and other infrastructure.

Uniform Annual General Charge (UAGC)

A uniform annual general charge will be set under section 15 of the Local Government (Rating) Act 2002 as a fixed amount per rating unit.

Its level is designed to obtain a balance between flat charges and rates on capital value that is acceptable to Council. It is not used to fund any special portion of the general expenditure of Council.

The Council sets a uniform annual charge on every rating unit.

CATEGORY	Factor(s) for calculation liability	Fixed Charge per rating unit $	Total revenue sought from this category (GST inclusive)
Uniform annual general charge	Rating unit	183.62	2,690,748

The uniform annual general charge is used to fund in whole or part, the general activities of Council. Included are housing, district grants, community development, community engagement, regional identity, strategy and policy, communications, roading, noxious plant control, governance, service centres, airports and other infrastructure.

Water Rates and Charges

A targeted rate will be assessed under section 16 of the Local Government (Rating) Act 2002 on each rating unit.

The Council sets a targeted rate for water as a fixed charge assessed differentially per connection to any rating unit (including vacant sections) within the district which is either connected to (lateral provided) at 100% charge, or serviceable, any rating unit (including vacant sections) that is not connected (no lateral provided) or is able to be connected to water infrastructure but is within 100 metres of a water supply reticulation system, at 50% charge. Rating units which are not connected to a scheme, and which are not serviceable will not be liable for this rate.

The categories for the water supply rates are:

- Connected – any rating unit (including vacant sections) that is connected or able to be connected to (lateral/s provided) a council operated water supply is charged a fixed charge per connection to the rating unit.
- Serviceable – any rating unit (including vacant sections) that is not connected to (no lateral provided) or is able to be connected water infrastructure but is within 100 metres of a water network, as defined by a map held by Council.
-

The rates for the water supply are shown below:

CATEGORY	Factor(s) for calculation liability	Fixed charge $	Total revenue sought from this category (GST inclusive)
Connected (Lateral Provided)	Per connection	509.23	5,816,210
Serviceable (No Lateral Provided)	Rating unit	254.61	22,024

The Council sets targeted rates for water charges under section 19 of the Local Government (Rating) Act 2002 that are based on volume of water supplied to consumers who will be metered and billed under the Council Water Supply Bylaw 2008.
The cost per cubic metre is set out in the table below. The first read for the rating period will be at the 2024/25 rate of $0.60, with subsequent readings for 2025/26 being recognised at the rate of $2.40 per unit. One unit equals one cubic metre which is 1000l or 1m3.

Water charges – residential, commercial and industrial including GST

Meter Reading Area	Cost per Unit $0.60	Cost per Unit $2.40
Bannockburn, Ranfurly, Naseby, Patearoa, Omakau, Clyde and Roxburgh	July 2025	November 2025 March 2025
Alexandra	August 2025	December 2025 April 2026
Cromwell and Pisa Moorings	September 2025	30 October 2025 January 2025 May 2026

The Council sets a targeted rate for the Ripponvale Water Scheme Upgrade as a fixed charge per rating unit within the Ripponvale community for those who did not contribute a lump sum towards the scheme upgrade in 2022. Those rating units that did not contribute a lump sum are recognised in the rating information database.

The targeted rate is based as a fixed charge for each rating unit for a finite ten-year period as follows:

CATEGORY	Factor(s) for calculation liability	Fixed charge $	Total revenue sought from this category (GST inclusive)
Ripponvale Water Management (targeted rate payment per year)	Rating unit	$602.57	38,865

Wastewater Rates and Charges

A targeted rate will be assessed under section 16 of the Local Government (Rating) Act 2002 on each rating unit.

The Council sets a targeted rate for wastewater as a fixed charge assessed differentially per connection to any rating unit (including vacant sections) within the district which are connected to (lateral/s provided) a council operated wastewater system at 100% or serviceable, any rating unit (including vacant sections) that is not connected to (no lateral provided) or is able to be connected to wastewater infrastructure, but is within 30 metres of a wastewater drain at 50%. Rating units which are not connected (no lateral provided), and which are not serviceable (service not available) will not be liable for this rate.

The categories for the proposed wastewater rates are:

- Connected – any rating unit (including vacant sections) that is connected to (lateral/s provided) a council operated wastewater system
- Serviceable – any rating unit (including vacant sections) that is not connected to (no lateral provided) or is able to be connected to wastewater infrastructure but is within 30 metres of a wastewater network, as defined in a map held by Council.

The Council sets a targeted rate as a fixed charge for each additional pan or urinal in excess of one wastewater connection, for those rating units providing commercial accommodation or commercial elderly rest homes as defined by the rating valuations rules 2008. This is calculated at 25% of the per connection charge.

The rates for this service are shown below:

CATEGORY	Factor(s) for calculation liability	Fixed Charge $	Total revenue sought from this category (GST inclusive)
Connected (Lateral Provided)	Per connection	1,114.54	10,621,016
Serviceable (No Lateral Provided)	Rating unit	557.27	68,879

Additional Pan Commercial Accommodation	Per additional pan	278.63	211,484

The Council sets a targeted rate for wastewater management as a fixed charge per rating unit within Clyde (identified by Valuation Roll 28461) not connected to the Wastewater network. The wastewater management charges will be applied for ground water monitoring and preliminary costs for a Clyde wastewater scheme.

CATEGORY	Factor(s) for calculation liability	Fixed Charge $	Total revenue sought from this category (GST inclusive)
Clyde Wastewater Management	Rating Unit	85.00	54,485

The Council sets a targeted rate for the Clyde Wastewater connection as a fixed charge per rating unit within the Clyde community for stage 1 those who did not contribute a lump sum towards the project. Those rating units that did not contribute a lump sum are recognised in the rating information database.

The targeted rate is based as a fixed charge for each rating unit for a finite ten-year period as follows:

CATEGORY	Factor(s) for calculation liability	Fixed Charge $	Total revenue sought from this category (GST inclusive)
Clyde Wastewater Capital Contribution Charge	Per connection	$1,277.00	176,098

Stormwater Charge

The stormwater charge is a uniform targeted rate. It recovers the funding required by Council for stormwater purposes. It is assessed on all rating units.

CATEGORY	Factor(s) for calculation liability	Fixed Uniform Charge $	Total revenue sought from this category (GST inclusive)
Stormwater Charge	Rating unit	10.64	157,799

Stormwater charge funds the operations and maintenance of stormwater within the district.

Waste Management and Waste Collection Charges

Where the Council waste collection service is available the charge is set on the basis of the number of containers of waste that the Council collects as part of its standard waste collection service, which is one household general refuse bin, one mixed recycling bin, one glass recycling bin and one organics bin. Where a household general refuse bin, mixed recycling bin, glass recycling bin or organics bin is provided in addition to the standard service Council will charge additional rates per additional bin. Standard waste collection service is compulsory for all improved rating units that are situated within a collection area.

290

The Council sets a waste management charge for rating units with no collection which contributes to Environmental education and districtwide waste collection activities such as public bins and transfer station operations.

CATEGORY	Factor(s) for calculation liability	Fixed Charge $	Total revenue sought from this category (GST inclusive)
Waste collection with collection 4 bins (availability of service)	Per rating unit	606.39	6,234,868
Waste collection additional general refuse bin (red) 240L	Per additional bin	352.92	342,330
Waste collection additional general refuse bin (red) 140L	Per additional bin	206.17	29,070
Waste collection additional mixed recycling bin (yellow)	Per additional bin	103.09	86,283
Waste collection additional glass recycling bin (blue)	Per additional bin	48.51	32,745
Waste collection additional organics bin (green)	Per additional bin	115.21	13,941
Waste collection upsized household rubbish bin (red) 240L	Per upsized bin	145.53	19,210
Waste management charge (no collection from rating unit)	Rating unit	133.41	605,564

Community Facilities Charge

The Council sets a targeted rate for community facilities within the district. The targeted rates will be based on a uniform charge per rating unit.

CATEGORY	Factor(s) for calculation liability	Fixed Uniform Charge $	Total revenue sought from this category (GST inclusive)
Community Facilities Charge	Rating Unit	566.24	8,399,111

Community Facilities charge funds the operations and maintenance of all parks and reserves, museums, community halls, other recreation facilities and amenities, public toilets, tracks and waterways.

Swimming Pools Charge

The Council sets a targeted rate for swimming pools as a uniform charge per rating unit across the district. The targeted rates will be based as a uniform charge for each rating unit as shown in the table below:

CATEGORY	Factor(s) for calculation liability	Fixed Uniform Charge $	Total revenue sought from this category (GST inclusive)
Swimming Pools Charge	Rating Unit	382.06	5,667,181

The Swimming Pools charge is applied to operations and maintenance of the communities swimming pools: Alexandra, Cromwell, Ranfurly, Roxburgh and Millers Flat.

District Library Charge

The Council sets a targeted rate for library services as a uniform charge per rating unit. The targeted rates will be based as a uniform charge for each rating unit as shown in the table below:

CATEGORY	Factor(s) for calculation liability	Fixed Uniform Charge $	Total revenue sought from this category (GST inclusive)
District Library	Rating unit	150.62	2,207,283

Library charge is applied to operations and maintenance of libraries.

Grants

The Council sets a targeted rate for Grants within each ward. For each ward the rate will be on a differential basis, based on the use to which the rating unit is placed (as defined in the table below).

The targeted rates are based on the capital value of all rating units as shown in the table as follows:

CATEGORY	Factor(s) for calculation liability	Rate Factor per $ of Capital Value	Total revenue sought from this category (GST inclusive)
Cromwell Ward			
Commercial and Industrial	Capital value	0.0000837	83,643
Residential	Capital value	0.0000115	62,679
Rural	Capital value	0.0000120	33,834
Dams and Utilities	Capital value	0.0000108	260
Vincent Ward			
Commercial and Industrial	Capital value	0.0000711	29,473
Residential	Capital value	0.0000133	38,833
Rural	Capital value	0.0000102	28,727
Dams and Utilities	Capital value	0.0000092	6,802
Teviot Valley Ward			
Commercial and Industrial	Capital value	0.0000000	0
Residential	Capital value	0.0000000	0
Rural	Capital value	0.0000000	0
Dams and Utilities	Capital value	0.0000000	0
Maniototo Ward			
Commercial and Industrial	Capital value	0.0000837	2,721
Residential	Capital value	0.0000156	3,194
Rural	Capital value	0.0000120	7,979
Dams and Utilities	Capital value	0.0000108	81

The Grants charge is used to provide grants to promote local areas within the ward and to provide funding for community groups or for individuals undertaking activities with a community benefit.

Planning and Environment

The Council sets a planning and environment rate on all rating units. The rate is based on the capital value of all rating units in the District according to the table below:

CATEGORY	Factor(s) for calculation liability	Rate Factor per $ of Capital Value	Total revenue sought from this category (GST inclusive)
Planning and Environment	Capital value	0.0001221	2,212,171

Planning and Environment rates are used to fund functions including Resource Management, Environmental Health, Enforcement, Liquor Licencing, Building and Civil Defence.

Economic Development

The Council sets an economic development rate on all rating units. The rate is based on the capital value of all rating units in the District according to the table below:

CATEGORY	Factor(s) for calculation liability	Rate Factor per $ of Capital Value	Total revenue sought from this category (GST inclusive)
Economic Development	Capital value	0.0000162	293,235

Tourism

The Council sets a tourism rate on a differential basis based on use of all rating units (as defined in the table below).
The rate is based on the capital value of all rating units in the district except “Sport and Recreation” (as defined by category code) in accordance with the table below:

CATEGORY	Factor(s) for calculation liability	Rate Factor per $ of Capital Value	Total revenue sought from this category (GST inclusive)
Residential	Capital value	0.0000720	548,697
Rural	Capital value	0.0000555	424,357
Commercial and Industrial	Capital value	0.0003861	583,473
Dams, Utilities	Capital value	0.0000497	65,916

The tourism rate will be used to fund visitor information centres, destination management and tourism development within the district.

Operational Rating Principles

Payment Options

Rates may be paid by:

- Cash
- EFTPOS (excluding from a credit card account)
- Direct debit (Council's preferred method of payment)
- Internet transfer or telephone initiated direct credit
- Or by prior arrangement with the Rates Officer
- Credit card via www.codc.govt.nz. There will be a service charge payable direct to Council's bankers by ratepayers who use this option.

During the hours of 8.30am to 5pm, Monday to Friday (except for Thursday 9.30am to 5pm) at any of the following:

- Council Offices, William Fraser Building, 1 Dunorling Street, Alexandra
- Cromwell Service Centre, 42 The Mall, Cromwell
- Maniototo Service Centre, 15 Pery Street, Ranfurly
- Roxburgh Service Centre, 120 Scotland Street, Roxburgh (9am to 5pm Monday to Friday, except Thursday 9.30am to 5pm)

Inspection of and Objection to Rating Information and Records

The Complete Rating Information Database (CRID) and the Rating Information Database and related rates records are available for inspection between 8.30am to 4.30pm, Monday to Friday, at any of the following:

- Council Offices, William Fraser Building, Dunorling Street, Alexandra
- Cromwell Service Centre, 42 The Mall, Cromwell
- Maniototo Service Centre, 15 Pery Street, Ranfurly
- Roxburgh Service Centre, 120 Scotland Street, Roxburgh (9am to 4pm)

Any interested person may inspect the CRID. Inspection is free but there may be a fee payable for the supply of particulars from the CRID.

- The following persons may inspect the rates records for a rating unit in accordance with the Local Government (Rating) Act 2002:
- The ratepayer
- Anyone authorised, in writing, by the ratepayer to do so
- Any person who has become liable to pay the rates under the recovery provisions of the Local Government (Rating) Act 2002
- A solicitor, landbroker or real estate agent
- Any member of the public with respect to rates assessed, but not including arrears, remissions or postponed rates

Any ratepayer named in the Rating Information Database (RID) can object to the information in the RID on the following grounds:

- Rating unit listed in the District Valuation Roll (DVR) has been omitted from the RID
- Information from the DVR has been omitted or incorrectly entered in the RID
- Information entered in the RID (other than information from the DVR) is incorrect
- A lawful amendment to the DVR has not been entered in the RID

Objections to the rates records of a rating unit may only be made by:

- The ratepayer, or

Someone who has become liable to pay the rates on the unit under the recovery provisions

Objections to rates records may only be made on the following grounds:

The rates have been incorrectly calculated, or

The balance shown as owing on the rating unit is incorrect

The Council will notify objectors in writing of its decision regarding an objection.

Owner of rating unit may require local authority to withhold information from database. Ratepayers may request, in writing, that Council withhold name and postal address be withheld (sec 28c Local Government (Rating) Act 2002). No reason need be provided.

Delegation

Section 132 of the Local Government (Rating) Act 2002 allows Council to delegate the exercise of functions, powers or duties conferred by this Act on the local authority to:

its Chief Executive Officer; or

any other specified officer of the local authority.

Council has put in place the following delegations:

1. The decision whether disclosure of a name is necessary to identify a rating unit (s28 (2) of the Act) – to the Chief Executive Officer (CEO) and Group Manager – Governance and Business Services, acting alone.
2. Authority to determine the fee payable for supplying a copy of the Rates Information Database (RID) (Section 28 (3) of the Act) – to the Group Manager – Governance and Business Services.
3. Authority to determine objections to the RID (Section 29 of the Act) – to the CEO, Group Manager – Governance and Business Services and Chief Financial Officer, any two acting jointly.
4. Authority to remove names from the RID (Section 35 (b) of the Act) – to the Group Manager – Governance and Business Services, Chief Financial Officer, and Rates Officer acting alone.
5. Authority to determine objections to rates records (Section 39 of the Act) – to the CEO, Group Manager – Governance and Business Services and Chief Financial Officer, any two acting jointly.
6. Authority to correct errors in RIDs and Rate Records (Section 40 of the Act) – to the Group Manager – Governance and Business Services, Chief Financial Officer and Rates Officer, acting alone.
7. Authority to fix the interest rate to be charged on reassessed rates (Section 42 (3) of the Act) – to the Group Manager – Governance and Business Services.
8. Authority to issue invoices based on previous year’s rates (Section 50 of the Act) – to the Group Manager – Governance and Business Services and Chief Financial Officer, acting alone.
9. Determine agreeable method of rates payments (Section 52 (2) of the Act) – to the Group Manager – Governance and Business Services.
10. Authority to recover unpaid rates from owner (Section 61 (1) of the Act) – to the Group Manager – Governance and Business Services, Chief Financial Officer and Rates Officer, any two acting jointly.

11. Authority to recover unpaid rates from persons other than owners (Section 62 of the Act) – to the Group Manager – Governance and Business Services, Chief Financial Officer and Rates Officer, acting alone.
12. Authority to commence proceedings for unpaid rates (Section 63 of the Act) – to the CEO and Group Manager – Governance and Business Services, acting jointly.
13. Commencement of rating sale or lease provisions (Section 67 of the Act) – to the CEO and Group Manager – Governance and Business Services, acting jointly.
14. Authority to sell by private treaty (Section 72 of the Act) – to the CEO and Group Manager – Governance and Business Services, acting jointly.
15. Authority to sell abandoned land (Section 77 to 83 of the Act) – to the CEO and Group Manager – Governance and Business Services, acting jointly.
16. Authority to administer remission and postponement policies (Sections 85/87 of the Act) – to the Group Manager – Governance and Business Services.
17. Authority to impose penalties on unpaid rates (Section 57 and 58 of the Act) - to the Group Manager – Governance and Business Services.
18. Authority to remit rates penalties as applied in accordance with section 57 and 58 of the Act to the Group Manager – Governance and Business Services, Chief Financial Officer or Rates Officer acting alone.
19. Authority to remit water rates penalties as applied in accordance with section 57 and 58 of the Act to the Group Manager – Governance and Business Services, Chief Financial Officer, Rates Officer or Water Billing Officer, acting alone.

Operational Rating Policies

Rates Remission & Postponement on Māori Freehold Land

Introduction

This policy aims to ensure the fair and equitable collection of rates from all sectors of the community recognising that certain Māori owned lands have particular conditions, features, ownership structures or other circumstances which make it appropriate to provide relief from rates.

Definitions

Māori Freehold Land – land whose beneficial ownership has been determined by the Māori Land Court by freehold order.

Policy Objectives

1. To recognise and support the relationship of Māori and their culture and traditions with their ancestral lands;
2. To recognise and take into account the presence of wāhi tapu sites of cultural significance or other cultural values that may affect the use of the land for other purposes;
3. To avoid further alienation of Māori Freehold Land as a result of pressures that may arise from the imposition of rates on unoccupied land;
4. To recognise and take into account the importance of land in providing economic and infrastructure support for marae and associated papakāinga housing;
5. To recognise and take into account the importance of land for community goals relating to:
    a. The protection of outstanding natural features;
    b. The protection of significant indigenous vegetation and significant habitat of indigenous fauna.

Conditions and Criteria

1. Māori Freehold Land is not subject to the general rate unless such land is used for commercial purposes.
2. Targeted rates for Water, Sewer, and Solid Waste services will apply to all Māori Freehold Land for which these services are provided.

Note: There is currently no Māori Freehold Land within the Central Otago District.

Postponement of Rates Policy

The objective of the Council's policy on postponement of rates is to assist ratepayers experiencing extreme financial circumstances which affect their ability to pay rates.
Only rating units used solely for residential purposes (as defined by the Council) will be eligible for consideration for rates postponement for extreme financial circumstances.
Only the ratepayer, or his/her authorised agent, may make application for rates postponement. Such application must be in writing.
The ratepayer must have owned the rating unit for at least five years.
When considering whether extreme financial circumstances exist, all of the ratepayer's circumstances will be relevant, including:

- Age
- Physical and/or mental disability
- Injury or illness
- Family circumstances
- Eligibility for DIA Rate Rebate

Additionally, Council must be satisfied that the ratepayer is unlikely to have sufficient funds left over, after the payment of rates, for:

- Normal health care
- Proper provision for maintenance of his/her home and chattels at an adequate standard
- Normal day to day living expenses

Any postponed rates will be postponed until the earlier of:

- The death of the ratepayer; or
- The sale of the rating unit

Postponed rates will be registered as a statutory land charge on the rating unit title. This means that the Council will have first call on the proceeds of any revenue from the sale or lease of the rating unit.

Postponement of rates will apply from the beginning of the rating year in which the application is made.

Postponed rates will incur a postponement fee, equivalent to interest calculated on the total amount postponed at 30 June each year, plus an administrative charge. The interest will be calculated at Council's internal investment rate, as used for internal loans.

Rates Remission Policy

Policy Objectives

- To facilitate the ongoing provision of non-commercial (non-business) community services or recreational opportunities for residents of the Central Otago District.
- To enable Council to remit penalties on rates where reasonable grounds exist;
- To enable Council to act fairly and equitably with respect to rates on properties which are contiguous, in the same ownership, and used jointly as one rating unit for which services are utilised at the rate of a single rating unit.
- To assist ratepayers who have excessive water charges due to a fault (leak) in the internal reticulation serving their rating unit whilst at the same time ensuring that consumers retain their responsibility for the maintenance of their private reticulation.
- To assist ratepayers who experience extreme financial hardship as the result of the effects of a natural calamity on a rating unit.

Previous Applications of Rates Remission Policy.

If a previous rates remission for Development Land has been applied that remission will continue until the period of time detailed in that remission has elapsed.

Remission of Penalties

The objective is to enable Council to act fairly and reasonably in its consideration of rates which have not been received by the due date due to circumstances outside a ratepayer's control.

A good payment history will be taken into account when considering any remission of penalty.

Remission of penalty will be considered in the case of death, illness or accident of a close family member (as defined by Council) as at the due date.

Remission of penalty will be considered when a payment plan for arrears is agreed and operational.

Remission of penalty will be considered where it facilitates the future payment of rates by direct debit within a specified timeframe.

Remission of penalty will be considered where remission will facilitate the collection of overdue rates and results in full payment of arrears and saving on debt recovery costs.

Remission of penalty will be considered if the ratepayer is able to provide evidence that there has been failure to act by a bank in the case of direct debits or credits.

Remission of penalty will be considered where the penalty has been incurred during the processing of settlements following changes in ownership of rating units.

Penalties will not be applied to rates accounts with an outstanding balance where an agreed payment arrangement is in place.

Penalties that arise from application of incorrect payment references when paying rates to Council may be remitted at the discretion of the Senior Rates Officer who amongst other matters will consider the frequency of the occurrences of incorrect payment references.

Penalties that arise from application of payments intended multiple rates assessments but use one valuation number as a banking reference instead of one payment per rating unit as stipulated on the rates assessment invoice when paying rates to Council may be remitted at the discretion of the Senior Rates Officer who amongst other matters will consider the frequency of this occurrence.

Application for remission of penalty must be in writing to the Rates Officer, or in the case of volumetric water charges, the Water Billing Officer.

Remission of Uniform Annual Charges and Fixed Charge Targeted Rates for Rating Units.

The objective is to prevent a ratepayer paying several uniform annual charges and fixed charge targeted rates on land where the land is contiguous. or separated only by a road, railway, drain, water race, river, or stream

Application for remission of uniform annual charges must be in writing to the Council. It will not be necessary to reapply each year unless circumstances change.

Remission will include any targeted rate set on the basis of a fixed dollar charge per rating unit, as well as any uniform annual charges, with the exception of water, wastewater and waste management with collection.

The ratepayer will remain liable for at least one set of each charge.

Remission of uniform annual charges and fixed charge targeted rates, where granted, will take effect from 1 July of the next rating year, or, at the discretion of the General Manager – Business Support, during the current rating year, if the applicant is the named ratepayer on the 1st of July of the rating year during which application is approved.

Exemptions

Remissions will not be granted where the Council views the contiguous properties as held for investment purposes; for example, where a new deposited plan has been approved.

Where a remission of uniform annual charges and fixed charge targeted rates has been granted to a rating unit, and that remission ceases to be applicable through change in ownership or usage, the rating unit will be charged a proportion of the targeted rates and uniform annual charges applicable for the remainder of the year, commencing from the beginning of the next rating instalment period.

Remission for Extreme Financial Hardship

The objective is to assist ratepayers who experience temporary extreme financial circumstances which affect their ability to pay rates.

To enable Council to verify extreme financial circumstances exist, an application must be in writing, on the prescribed form (available at Council offices or website). This form contains a

statutory declaration which must be completed in front of a Justice of the Peace, solicitor or another person authorised to take a statutory declaration. This statutory declaration is a legal document and should be treated as such. Ensure information is true and correct to the best of your knowledge and belief. You may face criminal charges if you knowingly make a false oath or affirmation.

This form must also be completed by the registered owner and occupier of the property and must relate to a residential property in the Central Otago District. This form is for residential ratepayers only. This application is not for commercial ratepayers.

This application is valid for 12 months, although a consecutive application may be considered but to a maximum of 2 years in totality.

Water, wastewater and waste management with collection charges will be excluded and not subject to remission under the Remission of Rates for Extreme Financial Hardship policy.

If the ratepayer would not qualify for the DIA rates rebate, Council may remit some of the rates due, based on its assessment of the situation.

Eligible ratepayers will receive a 50% remission of rates for two years. Remission will apply from 1 July of the next rating year, or, at the discretion of the General Manager – Business Support, during the current rating year, if the applicant is the named ratepayer on the 1st of July of the rating year during which application is approved.

Applications must be in writing, on the prescribed form (available on our website). This is to enable Council to verify that extreme financial circumstances exist.

Remission of Rates on Rural Land (with a Capital Value less than $1,000)

The objective is to recognise that undeveloped rural land with a capital value below $1,000 should only pay minimum rates.

To qualify, ratepayers must hold other land in the district on which full rates are payable.

The minimum rate may vary but is currently deemed to be $10.00.

Ratepayers eligible for such remission will be notified in writing before the first instalment falls due.

Eligible ratepayers will receive a remission of all with the exception of the minimum rate charge, currently $10.00 detailed in the Council rating Funding Impact Statement. Remission will apply from 1 July of the next rating year, or, at the discretion of the General Manager – Business Support, during the current rating year, if the applicant is the named ratepayer on the 1st of July of the rating year during which application is approved.

Water, wastewater and waste management with collection charges will be excluded and not subject to remission under this policy.

Remission of Rates on Land Protected for Natural, Historic or Cultural Conservation Purposes

The objective is to preserve and promote natural resources and heritage by encouraging the protection of land held for natural, historical or cultural purposes.

Ratepayers who own rating units that have some feature of cultural, natural or historical heritage that is voluntarily protected may qualify for remission of rates under this policy.

Applications must be made in writing to the Rates Officer and be supported by documented evidence of the protected status of the rating unit, for example a copy of the covenant or other legal mechanism.

In considering any application for remission of rates under this part of the policy, the Council will consider the following criteria:

- The extent to which the preservation of natural, cultural or historic heritage will be promoted by granting remission on rates on the rating unit
- The degree to which features of natural, cultural or historic heritage are present on the land
- The degree to which features of natural, cultural or historic heritage inhibit the economic use of the land
- The use of the property

In granting remissions under this policy, the Council may specify certain conditions before remission will be granted.

Applicants will be required to agree in writing to these conditions and to pay any remitted rates if the conditions are violated.

Council reserves discretion in the awarding of all remissions, with the value and duration being relative to scale of the maintenance or restoration project.

Ratepayers are only eligible to apply for this remission if they voluntarily protect any features of cultural, natural or historic heritage.

Water, wastewater and waste management with collection charges will be excluded and not subject to remission under this policy.

Land that is non-rateable under section 8 of the Local Government (Rating) Act 2002 and is liable only for rates for water supply, wastewater and waste management with collection will not qualify for remission under this part of the policy.

Remission of Rates for Heritage Buildings

The objective is to provide for the preservation of Central Otago's heritage by encouraging the maintenance and restoration of historic buildings. Provision of a rates remission recognises that there are private costs incurred for public benefit.

Applications must be made in writing to the Rates Officer and be supported by documented evidence.

Ratepayers who have buildings with a heritage classification may apply for a rates remission providing the following conditions are met:

- Buildings date pre-1900 **or** are listed on the Central Otago District Plan Schedule 19.4: Register of Heritage Buildings, Places, Sites and Objects and Notable Trees
- The property is listed on the Heritage New Zealand register as either Category 1 or Category 2
- The property must not be owned by the Council or the Crown, or their agencies
- Building owners will need to make a commitment to the ongoing maintenance of their building; and
- Provide details of the restoration project

Eligible ratepayers will receive a 50% remission of rates for two years. Remission will apply from 1 July of the next rating year, or, at the discretion of the General Manager – Business Support, during the current rating year, if the applicant is the named ratepayer on the 1st of July of the rating year during which application is approved.

Water, wastewater and waste management with collection charges will be excluded and not subject to remission under this policy.

Remissions for Community, Sporting and Other Organisations

The objective is to facilitate the ongoing provision of non-commercial community services and non-commercial recreational opportunities.

The purpose of granting rates remission to an organisation is to:

- Recognise the public good contribution to community well-being made by such organisations
- Assist the organisation's survival
- Make membership of the organisation more accessible to the general public, particularly disadvantaged groups including children, youth, young families, aged people and economically disadvantaged people

Council supports applications for financial assistance by any organisation not conducted for private profit.

The principal object of the organisation should be to promote the development of Central Otago and provide for at least one of the following: the public, recreation, health, enjoyment, instruction, sport or any form of culture, or for the improving or developing of amenities, where the provisions of any one of these areas is to the benefit of the area.

An organisation making an application should include the following information in support of its application:

- Evidence that other areas of assistance have been investigated if available
- That there is a need for assistance
- That there has been a reasonable effort made to meet the need by the organisation itself
- The organisation's most recent financial accounts

Applications must be made in writing to the Rates Officer and be supported by documented evidence.

Each application will be considered by Council in its merits, and provision of a remission in any year does not set a precedent for similar remissions in any future year.

Remissions to any qualifying organisation shall be on a case-by-case basis of reduction in rates and charges, except that no remission will be granted on targeted rates charged for water, wastewater and waste management collection, or areas used for commercial activities or bars.

Eligible ratepayers will receive a 50% remission of rates for two years. Remission will apply from 1 July of the next rating year, or, at the discretion of the General Manager – Business Support, during the current rating year, if the applicant is the named ratepayer on the 1st of July of the rating year during which application is approved.

Remission for Land Affected by Natural Disasters

The objective is to provide relief to ratepayers whose land or property has been seriously adversely affected by a natural disaster. A natural disaster is considered as including, but not necessarily limited to, flooding, earthquake damage, wildfire or storm.

Applications for remission under this part of the policy must be in writing to the Council. Applications should give evidence as to why the ratepayer's enjoyment of the land or property has been seriously adversely affected by the natural disaster.

This part of the policy will only be relevant if the natural disaster had a widespread effect in the district.

Remission of Water Rates Attributable to Leakage

Background

From time-to-time water consumers experience a loss as a result of leaks or damage to their water supply system. It is the normal practice for the consumer to be responsible for the maintenance of the reticulation from the water meter to the property, and to account for any consumption of water supplied through the meter. This is currently enforced through the Water Supply Bylaw 2008.

Council has taken the view that some consumers may experience an occasional water leak without them being aware of the problem. They have therefore decided that it would be reasonable to allow for a reduction in charges to these consumers in certain circumstances.

This policy statement addresses that decision.

Objective of the Policy

To standardise procedures to assist ratepayers who have excessive water rates due to a fault (leak) in the internal reticulation serving their rating unit.

Whilst at the same time ensuring that consumers retain responsibility for the maintenance of their private reticulation, as required by the Water Supply Bylaw 9.15.

Conditions and Criteria

The Council may remit the excess water rates where the application meets the following criteria:

- The policy will apply to applications from ratepayers who have excess water rates due to a fault(s) in the internal reticulation
- That all applicants are requested to submit their application in writing before the due date of an invoice
- That a report from a registered plumber be supplied stating that the property has experienced a water loss as a result of a leak
- That proof of the repairs to the internal reticulation be submitted for verification (i.e. plumber’s repair account) within 60 days of the due date of an invoice
- That the ratepayer be charged the full charge for normal consumption
- The maximum relief that will be provided will be 50% of the difference between the normal consumption and the actual water consumption for that period any remission under this policy will be limited to one application within any two-year period for any particular rating unit
- The Group Manager – Business Support be delegated authority to consider applications for remission of excess water rates and, if appropriate, approve or decline them.

Notes

- "Internal reticulation" refers to the underground and indoor pipe work and specifically excludes irrigation and leaking toilets, taps etc
- The "normal consumption" will be calculated at Council's discretion from the information available
- No adjustment shall be backdated beyond the current period invoiced
- This is a financial remission only based on the volumetric charge.

Remission of Rates Where a Rating Unit Spans a District Electoral Boundary

Where a rating unit is split across a district boundary and that rating unit is primarily assessed for rates in another district then 100% rates remission will be granted on all rates attributable to the portion of the land held within the boundary of the Central Otago District Council.

Consideration of the following factors should be taken into account when deciding to apply a rate remission;

- In which district is the rating unit's main residence located.
- Are there any other residential buildings on the property that have access to roading provided by Council.
- Is the property land locked or does it have any access to the roading network within the Central Otago District.
- Is the property connected to any services (water or wastewater) provided by the Central Otago District Council.

The authority to apply any remission under this heading has been delegated to the General Manager – Business Support.

General

In certain cases, applications will be referred to Council for a decision.

All applications considered by Council will be discussed in open session, or the results of its deliberations in closed session will be disclosed in open session at its next meeting.

Particularly requests for rate remission for:

- Land protected for natural, historic or cultural conservation purposes
- Land affected by natural disaster
- Heritage buildings
- Community sporting and other organisations

All other applications for remissions will be decided by the Group Manager – Business Support or duly delegated officer.

Investment Policy

1. Purpose

1.1 Sections 102(2)(c) and 105 of the Local Government Act 2002 (the Act) require local authorities to adopt an investment policy. It discloses the Council's principles of prudent financial management and risk mitigation strategies and they relate to the management of external debt.

1.2 The purpose of the policy is to establish a framework and guidelines within which the Council manages its treasury risks. While the Council does not seek to speculatively profit from its treasury activities, it recognises that active and prudent management of all its treasury risks, within defined management parameters, will assist the Council in achieving its overall commercial objectives.

1.3 It is recognised that the policy is an evolving document which can be amended and expanded to take account of changes in the Council's operational activities and operating structure. The policy must be regularly monitored for compliance and appropriateness and, where necessary, the document updated with any changes to be approved by the Council through its Annual Plan or Long-term Plan process. Notwithstanding this, a formal review of the policy must be completed every three years, or more frequently if required.

1.4 It is also recognised that the Council does not have a dedicated treasury function and the Group Manager – Business Support will be responsible for treasury risk management as well as other duties. Hence it is essential that this policy reflects this structure and the other resources available to assist in this area.

1.5 Legal requirements and cross references thereto (including the Act and the Trustee Act 1956) are:

Requirement	Reference
General policy	Entire policy
Shares	Section 8.1
Property held	Section 8.2
Mix of investments	Section 7.1
Revenue from investments	Section 5
Proceeds of sale of assets	Section 9
Procedures and reporting	Schedule 1
Risk assessment and management	Section 6

1.6 This policy will be reviewed by Council every three years or as required.

2. Principles and objectives

2.1 The objectives of this treasury function should be consistent with the Councils' overall commercial objectives, in particular recognising that the Council is a risk adverse organisation, which does not seek to profit from any speculative treasury activity.

2.2 The primary objectives of this investment policy are:

- Minimise the cost of the Council's borrowings through monitoring and implementation of cost-effective financing techniques giving consideration to balance sheet and other strategic limitations
- To ensure Council has appropriate working capital funds available to carry out its Long-term Plan, Financial Strategy and core objectives
- To ensure that funds are immediately accessible in the event of a disaster or unexpected failure of infrastructure
- To ensure that Council is able to meet its liability commitments as they fall due
- To ensure that legally restricted funds are appropriately accounted for and invested so as to earn reasonable income towards their purposes. (Legally restricted funds include trust funds, and bonds / deposits etc.)
- To ensure that where Council has resolved to set aside investments for particular purposes, these funds earn interest towards those purposes and are readily available when called upon. (It should be recognised that these funds are by policy of Council only and have no enduring legal status that would bind a future Council)
- Maintain dialogue and information flows to the Council's funding providers to enhance the commercial relationship between the parties
- To firstly protect Council/ratepayers capital and to secondly earn an acceptable income
- To ensure that all statutory requirements are met
- Safeguard Council's financial market investments by establishing and regularly reviewing investment parameters and ensuring that all investment activities are carried out within these parameters
- Produce accurate and timely information that can be relied on by senior management and Council for control and exposure monitoring purposes in relation to the investment activities of Council
- Ensure compliance with the Council's financing and borrowing covenants and ratios specified in this document
- Maintain adequate internal controls to minimise operational risk while recognising the limited number of personnel who participate in the Council's treasury function.
- Control cash in an effective and efficient manner.

3. Scope

3.1 This document is binding on Council, Committees of Council, Recreation Reserve Committees, Community Boards, Committees of Community Boards and any Trusts whose accounts are incorporated in the Council's Annual Report and Accounts. The term "Council" includes all the above bodies.

4. Investing Priorities

4.1 Council's priorities with regards to investing are:

- Disaster relief funds, working capital and contingency liquidity
- Capital expenditure that meets Council goals and strategic plan criteria
- Repayment of debt and internal loans (to reduce external risk exposures)
- Diversify investment portfolios where appropriate
- Financial instruments are diversified in term and institution.

5. Acceptable Uses of Investment Funds

5.1 The following are the guidelines for permitted uses of Council's investment funds:

Income/interest

- Reduction of rates (maintenance and operations)
- Capital expenditure and one-off projects
- Add to capital to increase ability of fund to meet intentions
- Reinvestment as part of a diversified portfolio
- Disaster relief funds and contingency liquidity.

Capital

- Capital expenditure
- One-off projects
- Disaster relief
- Debt repayment.

6. Risk Profile

6.1 This policy ranks investment opportunities as follows:

High risk

- Equity shares (other than those currently held)
- Real estate, commercial property and unit trusts (other than those properties held for Council operations)
- Forestry
- Managed investment funds
- Community groups and other local investments
- Repayment of current Council debt including internal loans
- Appropriately-rated fixed interest investments
- Cash on short and long term bank deposits should only be transacted with appropriately rated institutions.

6.2 To reduce interest rate exposure, instruments set out in Council's Liability Management Policy may also be utilised as part of this Investment Policy.

7. Policy Relating to Cash and Term Investments

7.1 All cash funds for the time being surplus are to be invested in New Zealand Registered Banks with a short term rating of at least A-. The terms or maturities for short term investments will be a mixture of on call up to 274 days, so that if necessary, the Council can call upon the funds at relatively short notice, after taking into account projected cashflows.

7.2 Longer term investments are entered into where:

- The investments can be traded on an efficient market.

7.3 Approved Investment Categories

7.3.1 Appropriately rated investments are:

- New Zealand Government investments
- New Zealand registered banks
- Local authority stock
- State owned enterprises
- Regional health entities
- Corporates.

7.4 On a case by case basis and approved by Council

7.4.1 Building societies.

- Council will not consider investing with third party institutions unless they meet an acceptable Standard and Poor's (or equivalent) credit rating, where applicable.

7.5 Diversification

7.5.1 Maximum amount per institution as set out in the table below:

Short Term and Long Term Investments (Approved Issuers, Instruments and Limits)

Authorised Asset Classes	Overall Portfolio Limit (as a % of the total portfolio)	Approved Financial Market (must be demonstrated in NZ dollars) Instruments	Credit Rating Criteria: Standard and Poor's or Moody's or Fitch equivalents)	Limit for Each Issuer Subject to Overall Portfolio Limit for Issuer Class
New Zealand Government	100%	• Treasury bills • Government stock	Not applicable	Unlimited
Rated Local Authorities	70%	• Commercial paper • Bonds/MTNS/FRNS	Short-term S&P rating of A1 or better Long-term S&P rating of A- or better Long-term S&P rating of A+ or better Long-term S&P rating of AA or better	$3 million $2 million $3 million $5 million
Unrated Local Authorities	50%	• Commercial paper • Bonds/MTNS/FRNS	not applicable	$2 million $2 million
New Zealand Registered Banks	100%	• Call/term deposits, bank bills/ commercial papers • Bonds/MTNS/FRNS	Short-term S&P rating of A1 or better Long-term S&P rating of A- or better long-term S&P rating of A+ or better	$20 million $3 million $5 million
State Owned Enterprises	50%	• Commercial paper • Bonds/MTNS/FRNS	Short-term S&P rating of A1 or better Long-term S&P rating of BBB+ or better Long-term S&P rating of A+ or better	$3 million $1 million $3 million
Corporates*	50%	• Commercial paper • Bonds/MTNS/FRNS	Short-term S&P rating of A1 or better Long-term S&P rating of A- or better Long-term S&P rating of A+ or better Long-term S&P rating of AA or better	$2 million $1 million $2 million $3 million

313

Authorised Asset Classes	Overall Portfolio Limit (as a % of the total portfolio)	Approved Financial Market (must be demonstrated in NZ dollars) Instruments	Credit Rating Criteria: Standard and Poor's or Moody's or Fitch equivalents)	Limit for Each Issuer Subject to Overall Portfolio Limit for Issuer Class
Financials*	30%		Short-term S&P rating of A1 or better Long-term S&P rating of A- or better Long-term S&P rating of A+ or better Long-term S&P rating of AA or better	$2 million $1 million $2 million $3 million

* The combined holding of Corporates and Financials shall not exceed 70% of the portfolio

7.6 Interest rate risk and term profile

7.6.1 There is a trade-off between availability of funds and interest rate risk. This policy accepts a greater degree of interest rate risk in order to have accessible funds.

7.7 Average return - Comparative benchmark

7.7.1 The short term portfolio shall be benchmarked against the published 90 day bank bill rate.

7.7.2 The emphasis is on capital protection rather than maximising returns. Nevertheless, returns should be maximised within the parameters of this policy.

7.7.3 The short term portfolio will be benchmarked against the ANZ 90 day bill index on a quarterly basis.

7.7.4 The long term portfolio will be benchmarked against the ANZ Corporate A Grade Index on a quarterly basis measurement, and this will be required to be within 2.5 and 3.5 years.

Compliance with the benchmarking and duration requirements is not necessary if the nominal value of the portfolio is less than $20 million.

8. Policy on other Forms of Investing

8.1 Equity Investments

8.1.1 Equity investments may be entered into by specific resolution of Council. Any equity sales must be by specific resolution of Council unless the shares are externally managed through a managed equity fund.

8.2 Real Estate, Commercial Property and Unit Trusts

8.2.1 There will be:

- Investment allowed by way of specific resolution of the Council
- Investment in property not directly contributing to community outcomes/activities where the investment is supported by a positive business case and provides income in addition to rating income.

8.3 Forestry

8.3.1 Existing forestry investment will continue having regard to existing contractual Arrangements, commercial return, best forms of land use, environmental and community outcomes.

8.3.2 Additional investment in forestry is permitted:

- On existing Council land subject to approval by Council, providing there is reasonable evidence to suggest that it is the best and highest use of that land; or
- In conjunction with meeting other goals, in which case it becomes a higher priority investment.

8.3.3 Expenditure incurred in developing and growing forestry will be treated as capital/investing expenditure for accounting purposes. Forestry will be valued annually at fair value less estimated costs to sell in the Council's Annual Report.

8.4 Repayment of Debt

8.4.1 Subject to Council resolution or a stated intention in the Annual Plan, it is permitted to use existing funds to repay debt, providing suitable internal arrangements are put in place to prevent any change in rates distribution among particular groups of ratepayers.

8.5 Community Groups

8.5.1 If there is to be investment in a community group, then:

- Consideration will be given as to whether a guarantee would be more appropriate
- Funds will only be lent upon a resolution of the Council
- No funds are to be lent until all conditions of approval are satisfied and it is unconditional.

8.5.2 A community group is defined as a non-profit locally based group.

8.5.3 Minimum securities and assurances are:

- Going concern assurance from committee; and
- Written agreement that assets financed will vest in Council or the community and will not be offered as security to any other party; and
- Legal advice and formalised security to be obtained for sums over $25,000 unless for buildings on Council land that would already vest in the Council pursuant to a clause in a lease document that has been prepared pursuant to legal advice; and
- Provision of annual audited accounts or, if in inaugural year, projections/budgets.

8.6 Advances to promote other objectives will be made:

- Only by specific resolution of Council; and
- Council require first mortgage over the property / assets

8.7 Market interest rates will be charged or where economic benefit to the District/community is considered greater sole discretion is given to Council.

8.8 New Zealand Local Government Funding Authority (LGFA)

8.8.1 Despite anything earlier in this policy, Council may invest in shares and other financial instruments in the LGFA, and may borrow to fund that investment. The Council's objective in making such an investment will be to:

- Obtain a return of the investment, and
- Ensure that the LGFA has sufficient capital to become and remain viable, meaning that it continues as a source of debt funding for Council.

8.8.2 Because of the dual objective, the Council may invest in LGFA shares in circumstances in which the return on investment is potentially lower that the return it could achieve with alternative investments

8.8.3 If required in connection with the investment, the Council may also subscribe for uncalled capital in the LGFA.

9. Proceeds from Sale of Assets

9.1 Net proceeds from asset sales will be invested for the following purposes:

- Capital expenditure; or
- Contingencies; or
- One-off operational items (e.g. grants if the Council is satisfied that the receiver of the grant is likely to be able to maintain the worth of the asset to the Community); or
- Reduce external debt; or
- Reinvestment for future gains.

Schedule 1

Organisational Responsibilities and Internal Controls

1. Council

- Approves any annual borrowing programme contained in the Annual Plan
- Approves any risk management strategy outside the delegated authorities outlined in this policy document
- Approve Investment policy
- Review treasury activity through regular reporting
- Approves new borrowing facilities from the banking sector and capital markets, including the Local Government Funding Agency (LGFA), upon recommendation from the Chief Executive (CE).

2. Chief Executive

- Submits to the Council new or amended borrowing facilities which have been negotiated by the Group Manager – Governance and Business Services (GM-GBS)
- Approves all debt-related interest management strategies submitted by the GM-GBS
- Approves any amendments to the Investment Policy recommended by GM-GBS, prior to submission to Council for approval
- Approve authorised electronic signatory positions
- In the absence of the GM-GBS, undertakes the following treasury transactions or delegates to the Chief Financial Officer where permissible under his/her permissions:
  a) Funding from bank facilities and the capital markets including the LGFA
  b) Interest rate derivatives transactions relating to the hedging of Council's debt.

3. Group Manager - Governance and Business Services

- Overall responsibility for the treasury function and the regular review of the Investment Policy
- Approve opening and closing of bank accounts and new banking facilities
- Arranges all new or amended borrowing facilities to then submit to the CE for approval and then to Council for final approval
- Submits all debt related interest management strategies to the CE for approval
- Provide policy advice as needed and reports to the CE and Council on overall treasury risk management issues regularly
- Manages the funding and liquidity activities of the Council
- Authority to electronically transfer funds between specified bank accounts that have been set up on the Council's bank cash management system
- Approve authorised electronic signatory positions
- Maintains lender relationships with the banks and capital markets, including the LGFA
- Monitors and reviews the ongoing treasury risk management performance of Council to ensure compliance with the policy parameters.

4. Chief Financial Officer

- Undertakes all treasury activities, which include but are not limited to:
- Investing activity, maximise returns within policy and legal requirements
- Interest rate derivatives relating to the hedging of the Council's debt
- Undertaking short-term borrowing transactions with the bank of LGFA for terms not exceeding 12 months
- Investing in bonds in the fixed interest market
- Authority to electronically transfer funds between specified bank accounts that have been set up on the Council's bank cash management system
- Approve authorised electronic signatory positions
- Current account management within policy
- Record keeping of all transactions and quotes for audit and review as required
- Reconciliation of all bank accounts and other investment and borrowing accounts
- Borrowing activity, minimising costs in accordance with policy and legal requirements, by seeking competitive bids for borrowing, subject to management approval as above
- Prepare quarterly treasury reports
- Checks external counterparty advices on treasury transactions to records generated internally by other staff.

Liability Management Policy

1. Purpose

1.1 Sections 102(2)(b) and 104 of the Local Government Act 2002 (the Act) require local authorities to adopt a liability management policy. Sub Part 4 of Part 6 of the Act (Sections 112 to 122) sets out the statutory framework for local authority borrowing.

1.2 The statutory definition of borrowing is:

'Borrowing'-

a) Means the incurring by any means of debt to raise money; and

b) Includes the incurring of debt-

(i) Under any contract or arrangement for hire purchase, deferred payment, instalment payment, sale and lease back or buy back, financial lease, loan, overdraft, or other arrangement for obtaining debt finance; or

(ii) By the drawing, acceptance, making, endorsement, issue, or sale of bills of exchange, promissory notes and other negotiable instruments and debt securities; or

(iii) by the use, for any purpose, of funds received or invested by the local authority for any other purpose if the local authority has resolved to repay, with or without interest, the funds used; but

c) Does not include debt incurred in connection with the hire purchase of goods, the deferred purchase of goods or services, or the giving of credit for the purchase of goods or services, if-

(i) The period for which the indebtedness is outstanding is less than 91 days and the indebtedness is not incurred again promptly after payment; or

(ii) The goods or services are obtained in the ordinary course of the local authority's performance of its lawful responsibilities, on terms and conditions available generally to parties of equivalent credit worthiness, for amounts not exceeding in aggregate an amount—

(A) Determined by resolution of the local authority as not being so significant as to require specific authorisation; or

(B) Recorded for the purposes of this subparagraph of this paragraph of this definition in the then current borrowing management policy of the local authority; and "borrow" has a corresponding meaning:

1.3 This policy will be reviewed by Council every three years or as required.

1.4 The policy recognises that Council has a strong preference for certainty in relation to debt repayment, is averse to risk and wishes to avoid administrative complexity.

1.5 Legal requirements and their cross references are:

Requirement	Reference
General policy	Entire policy
Interest rate exposure	3.1.4
Liquidity	3.1.7
Credit exposure	3.2
Debt repayment	3.3

2. Objectives

2.1 The objectives of this policy are:

- To ensure Council has appropriate working capital funds available to carry out its strategic plans as outlined in the Annual Plan and Long-term Plan.
- To ensure that the costs of any expenditure can be recovered at the time that the benefits of that expenditure accrue in accordance with Council's Revenue and Financing policies. In particular, debt will normally be used to fund capital expenditure that provides future service benefits.
- Ensure that Council has an ongoing ability to meet its debts in an orderly manner as and when they fall due in both the short term and long term, through appropriate liquidity and funding risk management.
- Arrange appropriate funding facilities for Council ensuring they are at market related margins utilising bank debt facilities and/or capital markets including the Local Government Funding Authority (LGFA) as appropriate.
- Maintain lender relationships with Council's general borrowing profile in the local debt and, if applicable, capital markets (including LGFA), so that Council is able to fund itself appropriately at all times.
- Control Council's cost of borrowing through the effective management of its interest rate risks, within the interest risk management limits established by the Liability Management Policy.
- Ensure compliance with any financing/borrowing covenants and ratios.
- Maintain adequate internal controls to mitigate operational risks.
- Produce accurate and timely reports that can be relied upon by senior management and Council for control and exposure monitoring purposes in relation to the debt raising activities of Council.

3. Policies

3.1 General

3.1.1 The Council should only raise debt in relation to its Long-term Plan, Annual Plan, specific council resolutions or the Financial Strategy, and core objectives after having first ascertained that there are no readily available uncommitted funds as outlined below:

- Cash investments under the control of the community board or committee responsible for the particular activity (repay by funded depreciation or internal loan methods).
- Cash investments under the control of the Council (repay by funded depreciation or internal loan methods).

3.1.2 Council maintains external borrowings in order to:

- Raise specific debt associated with projects and capital expenditures;
- Fund the balance sheet as a whole, including working capital requirements; and
- Fund assets whose useful lives extend over several generations of ratepayers.

3.1.3 External loans will normally be repaid as soon as possible from funds generated by operations and depreciation rated for and not otherwise committed, in accordance with revenue and financing policies.

Borrowing provides a basis to achieve intergenerational equity by aligning long-term assets with long-term funding sources and ensure that the costs are met by those ratepayers benefiting from the investment.

3.1.4 The interest rate exposures of Council shall be managed according to the parameters detailed in the following table and shall apply to the core debt of Council. Core debt is defined as the level of debt determined by the Group Manager – Business Support (GM-GBS).

Fixed Rate Hedging Percentages		
Term	Minimum Fixed Rate Amount	Maximum Fixed Rate Amount
0 - 2 Years	40%	100%
2 - 4 Years	25%	80%
4 - 8 years	0%	60%

To manage the interest rate risk associated with its debt, Council may use the following interest rate risk management instruments:

- Interest rate swaps
- Swaptions
- Interest rate options
- Interest rate collar structures but only in a ratio of 1:1
- Forward rate agreements.

Definitions of these can be found in Schedule One. For funding risk management purposes, to ensure that all of the Council's debt is not exposed to excessive refinancing risk at any one time, where practicable no more than 40% of all debt

facilities should mature within a rolling twelve-month period. Compliance with this provision is not required if total external debt is less than $10 million.

3.1.5 For liquidity purposes, Council shall aim to maintain liquidity of not less than 10% above projected core debt over the ensuing 12-month period. Liquidity includes committed bank facilities and liquidity assets such as cash, term deposits, Commercial Paper, Fixed Rate Bonds and Floating Rate Notes.

3.2 Counterparty Exposure

3.2.1 Counterparty credit risk is the risk of losses (realised or unrealised) arising from counterparty defaulting on a financial instrument where the Council is a party.

3.2.2 Credit exposure or credit risk will be regularly reviewed by the Group Manager – Business Support at least six-monthly. Treasury related transactions will be entered into with approved counterparties.

3.2.3 Interest rate derivative transactions and foreign exchange contracts must be transacted with NZ registered banks that have a minimum S&P Global Ratings (S&P) (or Moody's Investors Services (Moody's) or Fitch Ratings (Fitch) equivalents) long term credit rating of A or better.

3.2.4 New Zealand Local Government Funding Authority (LGFA)

Despite anything earlier in this policy, the Council may borrow from the LGFA and, in conjunction with that borrowing, may enter into the following related transactions to the extent it considers it necessary or desirable:

- Contribute a portion of its borrowing back to the LGFA as an equity contribution to the LGFA;
- Provide guarantees of indebtedness of other local authorities to the LGFA and of the indebtedness to the LGFA itself;
- Commit to contributing additional equity (or subordinated debt) to the LGFA if required; and
- Secure its borrowings from the LGFA and the performance of other obligations to the LGFA or its creditors with a charge over the Council's rates and rates revenue.

3.3 Debt Repayment

Borrowings are to be repaid from:

- Sale of assets;
- Realisation of investments;
- General funds and/or specific function revenues including rates and depreciation covered by revenue or rates; or Raising of other loans.

4. Internal Loans

4.1 General Council (including ward, community board or committee) investments may be used as a source for internal loans in relation to expenditure of a capital (or one-off) nature related to any activity that would normally be funded by external loan.

4.2 The interest to be applied to internal loans will be determined at the commencement of each financial year based on, and not exceeding, the interest offered on a 12-month

investment by the Council's bank at 1 July. It is permitted to apply rates of interest below that or zero in specific cases, after taking into account fairness and equity.

4.3 The term for any internal loan shall be not more than 50 years and will be set taking into account the ability to pay off the ratepayers affected, alternative uses of the funds, and the life of the assets to be funded; all terms of internal loans will be subject to review during the course of the loan.

5. Borrowing Limits

5.1 Borrowing will be managed within the following limits.

Item	Borrowing Limit / LGFA Lending Covenant
Net external debt as a percentage of total revenue	<175%
Net external debt as a percentage of total value of assets	<10%
Net external interest as a percentage of total revenue	<20%
Net external interest as a percentage of annual rates revenue (debt secured under debenture)	<25%
liquidity (term debt + committed loan facilities + available cash or cash equivalents) over existing external debt	>110%

For the purpose of calculating the above ratios:

- Revenue is defined as revenue from rates, government grants and subsidies, user charges, interest, dividends, financial and other revenue. It excludes non-government capital contributions (eg. developer contributions and vested assets).
- Annual rates revenue is defined as the amount equal to the total revenue from any funding mechanism authorised by the Local Government (Rating) Act 2002 together with any revenue received from other local authorities for services provided (and for which the other local authorities rate).

Cash/cash equivalents are defined as:

- Overnight bank cash and term deposits
- Commercial Paper
- Fixed Rate Bonds
- Floating Rate Notes
- Net external debt is defined as total external debt less cash/cash equivalents that would be available to repay debt.

6. Repayment of Borrowings

6.1 Repayment of Debt

6.1.1 Subject to Council resolution or a stated intention in the Annual Plan, it is permitted to use existing funds to repay debt, providing suitable internal arrangements are put into place to prevent any change in rates distribution among particular groups of ratepayers.

Council may also elect to use:

- Rating revenues established for that purpose;
- Proceeds from the disposition of surplus assets or investments;
- Regular instalments of principal and interest, especially with internal scheme capital works loans; and/or
- Refinancing with new debt.

Total debt levels are determined through the Long-term Plan, annual plans and asset management plans.

7. Authorised External Borrowing Sources

7.1 The following external borrowing sources will be utilised:

Bank Sourced Debt
Council may borrow from any New Zealand registered bank with a minimum S&P (or equivalent) short term rating of A-1 and a minimum long term rating of A. There will be no limit set on the amount of funds which any of the authorised banks may lend to the Council. When borrowing, Council will go out to tender in order to obtain the best rate possible.

Where debt is sourced from New Zealand registered banks, the following borrowing facilities may be used:

- Overdraft facilities;
- Committed term loan/cash advance facilities; and
- Standby term loan/cash advance facilities

Borrowings will be secured by either a general charge over rates or over a specific asset of the Council.

Local Authority Bonds
Council may authorise the issuance of local authority bonds (medium term notes), fixed rate bonds and floating rate notes.

The bonds will be secured by either a general charge over rates or over a specific asset of the Council.

This method of borrowing will be authorised by specific Council resolution in each instance.

Local Government Funding Agency (LGFA)
All council debt can be borrowed from LGFA. LGFA funding will be secured by a general charge over rates.

8. Benchmarking

8.1 For performance measurement purposes, the actual borrowing performance of Council shall be compared with the following external benchmark, which is predicted off the midpoints of the risk control bands contained in the fixed rate hedging percentages table contained in Section 3 of this policy.

9. Treasury Responsibilities, Compliance and Controls

9.1 Council

- Approves overall borrowing limits each year through the Annual Plan process
- Approves for charging assets a security over borrowing
- Approves any risk management strategy outside the delegated authorities outlined in this policy document
- Monitor treasury performance through the receipt of appropriate reporting, as per Schedule Two
- Approve new borrowing facilities from the banking sector and capital markets, including the Local Government Funding Agency (LGFA), upon recommendation from the Chief Executive (CE)
- Approve on an individual basis investment in Building Societies
- Approve Liability Management and Investment Policy
- Approve any hedging outside the parameters of this policy.

9.2 Audit & Risk Committee

- Monitor treasury performance through the receipt of appropriate reporting, as per Schedule Two.

9.3 Chief Executive

- In the absence of the Group Manager - Governance and Business Services (GM-GBS), oversee the funding, interest rate risk management and financial market investment activities of Council
- Approves any amendments to the Liability Policy recommended by GM-GBS, prior to submission to Council for approval
- In the absence of the GM-GBS undertakes the duties as detailed in this document as appropriate, including checking external confirmations against internal records
- Approve authorised electronic signatory positions
- Signs the documents relating to the financial market activities of Council.

9.4 Group Manager – Governance and Business Services

- Makes decisions regarding all funding and interest rate risk management activities of Council prior to implementation/execution
- Makes decisions regarding all financial market investment activities of Council prior to execution
- Refinancing of existing debt
- Manages the bank lender and capital markets relationships, providing financial information to lenders and negotiates new/amended borrowing facilities or methods for approval by Council
- Approves opening and closing of bank accounts and new banking facilities
- Approves authorised electronic signatory positions
- Provides policy advice as needed and reports to the CE and Council on overall treasury risk management issues regularly
- Conducts a review of the Liability Management and Investment Policy every three years or as required basis and submits any recommended changes to Council for approval once the CE has approved them and the necessary statutory processes have been followed
- Signs documents relating to the borrowing and financial market investment activities of Council
- Checks external confirmations against internal records.

9.5 Chief Financial Officer

- In the absence of the GM-GBS undertakes all his/her duties under a delegated authority authorised by the CE
- Approves authorised electronic signatory positions
- Executes treasury transactions
- Prepares regular reports to Council
- Checks external confirmations against internal records.

10. Internal Controls

10.1 Introduction

Arranging and agreeing transactions with external counterparties are required to occur in a framework of control and accuracy. It is vital to the internal control of Council that all transactions are captured, recorded, reconciled and reported in a timely fashion within a process that has necessary checks and balances, so that unintentional errors and/or fraud are identified early and clearly. Movements in financial market variables can be rapid, and exposures to such movements that are not known about due to inadequate transaction recording and reporting systems should not be allowed to occur.

10.2 Transaction Origination

The following authorities shall apply in respect to the execution of transactions with bank dealers and brokers on behalf of Council that can commit Council to all related contractual obligations under these transactions. All such transactions are generally

originated and agreed either verbally by telephone or by email. Therefore, it is important that procedures are in place to control the activity.

10.3 Funding from bank facilities, issuing Council debt, undertaking financial market investment transactions, including LGFA and entering into interest rate derivative transactions

- Funding from bank facilities, issuing council debt, undertaking Financial Market Investment Transactions, including LGFA and entering into Interest Rate Derivative Transactions with an approved banker broking counterparty entails the personnel of Council, who are approved to undertake these activities, verbally or by email agreeing with the bank or broker amount, term selection, rate accepted and the type of instrument being issued (in the case of borrowing), or transacted (in the case of a derivative transaction).
- Once the deal is agreed, details of the transaction shall be entered on the internal system
- Once the bank or broker confirmation of the transaction is received, the details should then be checked to ensure that the bank or broker confirmation is in accordance with the details on the Council's internal system.

Any discrepancies noted in the above procedures should immediately be communicated to the bank or broker so that the correct details of the deal can be agreed on. Where the GM-GBS has transacted the deal in the first place, the deal shall be ratified and signed off by either the CE or the Chief Financial Officer, and where the CE has transacted the deal in the first place, the deal shall be ratified and signed off by the GM-GBS or Chief Financial Officer. In this way, there is a clear division of responsibility and a self-checking system.

10.4 Settlement Procedure

All transactions are to be confirmed and reconciled to external confirmations and internal documentation before settlement.

Schedule 1

Definitions of interest rate risk management instruments

Forward Rate Agreement (FRA)
An agreement between Central Otago District Council (CODC) and a counterparty (usually a bank) protecting CODC against a future adverse interest rate movement. CODC and the counterparty agree to a notional principal amount, the future interest rate, the date and the benchmark rate, which is usually as detailed on the daily bank bill reference (BKBM) page, on the Reuters' financial market information system.

Objective
To provide CODC with certainty as to its interest rate cost on an agreed principal amount for an agreed period. An FRA typically applies to a three-month period, starting at some point within the next 12 months.

Interest Rate Swap (IRS)
An interest rate swap is an agreement between CODC and a counterparty (usually a bank) to manage Council's exposure to interest rate movements. CODC pays (or receives) a fixed interest rate and receives (or pays) a floating interest rate. The parties agree to a notional principal amount, the fixed interest rate, the settlement dates and the benchmark floating rate, which is usually BKBM off the Reuters' page containing the daily rate sets for various market reference rates.

Objective
To provide CODC with certainty as to its interest rate cost on an agreed principal amount for an agreed period. Floating rate periods are typically quarterly or semi-annual.

Forward Start Interest Rate Swap
Objective
To provide CODC with certainty as to its interest rate cost on an agreed principal amount for an agreed period which commences at a future point in time. All other conditions are as with an interest rate swap.

Option on a Swap Agreement – Swap Option
Objective
To provide CODC with the right but not the obligation to enter into a fixed rate swap at a future point in time on an agreed principal amount for an agreed period. A swap option is an option on a swap and typically requires a premium to be paid.

Interest Rate Options
The purchase of an interest rate option gives the holder (in return for the payment of a premium) the right but not the obligation to borrow (described as a cap) or invest (described as a floor) at a future date. CODC and the counterparty agree to a notional future principal amount, the future interest rate, the benchmark dates and the benchmark floating rate (usually BKBM on Reuters).

Objective
To provide CODC with worst case cover on its interest rate cost on an agreed principal amount for an agreed period. As for an interest rate swap, rate sets are typically quarterly or semi-annual for the life of the option.

Interest Rate Collar
The combined purchase (or sale) of a cap and the sale (or purchase) of a floor.

Objective
To provide CODC with certainty as to its interest rate cost on an agreed principal amount for an agreed period, but by limiting CODC's downside participation, typically avoiding the payment of a premium.

Limits on Selling Options
CODC will only sell an option if at the same time it purchases an option for a similar term with the same notional value.

The reasons for the use of any incidental arrangements will be explained within a specific resolution of Council, enabling such arrangements to be entered into.

Schedule 2

Quarterly Reporting Requirements

The quarterly report presented to the Audit and Risk Committee and Council should contain the following:

- Total debt utilisation, including sources of debt
- Interest rate hedging profile against hedging percentage limits
- New interest rate hedging transactions completed
- Weighted average cost of funds
- A statement of policy compliance

Details of any exception reports including remedial action taken or intended to be taken.

Significance and Engagement Policy

Purpose

The policy provides certainty on:

- When and how Council will engage or consult with communities.
- What Council assesses when deciding what is significant.
- When the community will have a direct opportunity to contribute to decision-making.

Central Otago District Council are committed to open, transparent, ongoing, and meaningful engagement with our diverse communities. We undertake ongoing general engagement in addition to specific consultation on a given topic or issue.

This policy outlines the types of things that the community can expect to be consulted about, such as the key issues in the Long-term Plan and Annual Plan, a decision that will change a service that the community expects and values, or something that will add cost to the ratepayer.

The policy guides Council's assessment of whether an issue or proposal is important, or significant to the community. It gives certainty and clarity that those important decisions will be treated in an agreed way with the community, and that Council will follow the local government rules of engagement and meet the purpose of local government: "to enable democratic local decision-making and action by, and on behalf of, communities…" Local Government Act 2002 (Part 2, Subpart 1, section 10).

Principles and objectives

The policy is grounded in the following principles and objectives:

- To ensure the community is engaged and informed about Council activities, with opportunities to participate.
- To provide practical guidance and consideration for Council and communities to work together to make decisions and deliver outcomes that create stronger and more connected communities.
- To partner with mana whenua and make mātauraka Kāi Tahu an integral part of decision-making.
- To ensure Council complies with all relevant legislation.

Scope

Many decisions made by Council are governed by specific Acts outside the Local Government Act 2002 [LGA]. These Acts prescribe the decision making and consultation processes required. Consequently, there are some decision-making processes that are not within the scope of this Significance and Engagement Policy. These include:

- Resource Management Act 1991

- Civil Defence Emergency Management Act 2002
- Land Transport Act 1998
- Local Electorate Act 2001

In addition, this policy will not apply, and engagement will not be required where:

- In the opinion of the Council, failure to make a decision urgently would result in unreasonable or significant damage to property, or risk to people's health and safety.
- There are any physical alterations to strategic assets that are required to prevent an immediate hazardous situation arising.
- Council must repair an asset to ensure public health and safety due to damage from an emergency or unforeseen situation.
- Council is required to act with urgency due to a crisis.

There are other circumstances where Council may choose not to consult or engage, as discussed in the relevant section of this policy.

Council is required to undertake a special consultative procedure on certain matters, as set out in Section 83 of the LGA regardless of whether they are considered significant as part of this policy.

Definitions

Activity	Refers to the list of Council activities identified in the Long-term Plan, which is a service or function provided by, or on behalf of, Council.
Community	A group of people with a shared interest, identity, experience, or values. This can include communities with a shared culture; or those with social, environmental, business, or political interests. Communities can also be found in geographical locations, such as townships and rural settlements. In this Policy we refer to 'the community' as all the people who are part of the diverse communities in Central Otago, including visitors.
Council	Central Otago District Council including both elected members to Council/Community Boards and relevant staff, as delegated.
Decision	Refers to the decisions of Council by formal resolution at Council and Council Committee meetings. Decisions of varying significance can also be made by Council officers or those under delegated authority.
Local Government Act 2002 (LGA)	The LGA is designed to provide democratic and effective local government that recognises the diversity of NZ communities. It provides a framework and powers for local authorities to decide which activities they undertake and the manner in which they will undertake them.

Significance	The degree of importance of an issue, proposal, decision, or matter, as assessed by Council, in terms of its likely impact on, and likely consequences for: • The district; • Any persons who are likely to be affected by, or interested in, the issue, proposal, decision, or matter; • The capacity of Council to perform its role, and the financial and other costs of doing so.
Special Consultative Procedure	This is a formal process under sections 83-87 of the LGA which enables the community to have their say on a significant decision. This is a more formal and specialised process than a regular engagement or invitation of feedback. Details of the Special Consultative Procedure are attached in Schedule 2.
Strategic asset	The LGA defines a strategic asset as: an asset or group of assets that the local authority needs to retain if the local authority is to maintain the local authority's capacity to achieve or promote any outcome that the local authority determines to be important to the current or future wellbeing of the community (Part 1, Section 5).

Policy

The policy is applied in four steps:

Step 1 – Determine the significance of the proposal/decision

Step 2 – Determine whether there is a requirement to engage or not, and if so, the level of engagement.

Step 3 – Decide how and when to undertake consultation or engagement, and

Step 4 – Report the outcome.

Step 1: Determining significance

The requirement to engage is guided by the level of significance.

Council determines the appropriate timing to make the assessment – this differs depending on the issue and the type of decision and process. Significance and engagement may be reassessed as a matter progresses.

Significance as a continuum

Significance exists on a continuum. At one end are matters that are ‘not important’ with low to no significance – such as a minor technical amendment to a Council policy. At the other end of the continuum are matters deemed to be ‘critical’ with very high significance, such as a new project that requires substantial, discretional funding, or a proposed policy change which may significantly change the application of a policy.

Figure: Society of Local Government Managers ‘Significance and Engagement Policies guide’ 2014

Determining significance assessment

Council assesses the degree of significance of a proposal or decision on a case-by-case basis using the table below to determine if the significance of a proposal is high, medium, or low.

High	If the proposal or decision triggers two or more of the criteria under the high significance level column, the level of significance is deemed to be high.
Medium	If the level of significance is not deemed to be high or low, the level of significance is deemed to be medium.
Low	If a proposal or decision triggers three or more criteria which are under the low significance level column, the level of significance is deemed to be low.

When the significance of a proposal or decision is unclear, Council will treat it as more rather than less significant.

The following criteria are used when determining significance:

Criteria	Lower significance	Medium significance	Higher significance
Recognition of mana whenua values and aspirations	Decision making occurs in line with our relationship agreement with iwi partner Aukaha. Aukaha have determined the areas of primary interest to iwi and CODC work in alignment with this agreement. For further detail see ‘Māori Participation’ section.		
Importance to the Central Otago District	The extent to which the matters will impact the people of the district, their social, economic, environmental and cultural wellbeing. Includes the extent to which a decision significantly alters the intended level of service provision for council activities (including a decision to commence or cease any such group of activity), or significantly affects the capacity of Council in relation to any activity identified in the Long-term Plan.		
	Lower impact decisions may provide a difference in the level of service at low or no cost to end users. e.g. changing the hours a pool may open over summer	Moderate impact includes a more than nominal alteration of a service. e.g. permanently changing the hours of operation of a swimming pool	Higher impact decisions may significantly impact rates, Council borrowing, or user charges, may limit access to community facilities, or significantly reduce levels of core service. e.g. closing or opening a public swimming pool
Community impact	The extent to which individuals, organisations, groups, and sectors in the community are affected by the decision, with a mind to the wellbeing and needs of future generations.		
	Impacts an individual person or household e.g. reducing the tier rating on a bridge that services three households (direct	Impacts a subgroup or groups within the community e.g. closing a bridge that services three households	Impacts a large proportion of the community e.g. closing a bridge on an arterial or primary feeder route

Criteria	Lower significance	Medium significance	Higher significance
	consultation with those households)		
Consistency with a prior decision or decisions/strategic alignment	The extent to which decisions are consistent with adopted policy and strategy, the likely impact of making decisions inconsistent with these, and consideration of the factors or matters that may make an inconsistent decision a preferred option.		
	Decision is consistent with existing policies and strategies, or a reasonable consequence of previous decisions. e.g. allowing a one-off pop-up stall outside the usual locations when Trading in Public Places	Decision or proposal is consistent but with some notable variations. e.g. changing the locations where Trading in Public Places is permitted	Decision or proposal is significantly inconsistent e.g. no longer allowing Trading in Public Places
Levels of public interest known	The extent to which the level of public interest is known. This includes topics discussed through pre-consultation or other forms of engagement, or areas with significant media interest.		
	Low levels of public interest known. e.g. replacing a swing in a playground	Moderate levels of public interest known. e.g. upgrading a neighbourhood playground	High levels of public interest known. e.g. removing a public playground
Ability to reverse the decision	The ease of which a decision or decisions can be reversed, should it be required in the future.		
	Low difficulty e.g. a policy amendment	Moderately difficult e.g. a plan lodged with a third party, such as a Speed Management Plan upgrading the treatment plant	Highly difficult e.g. building or removing a physical structure

Criteria	Lower significance	Medium significance	Higher significance
Level of financial consequences	The impact on Council finances or level of financial consequence. This includes in relation to unbudgeted operating costs and capital costs in the Long-term Plan.		
	Low financial impact. e.g. Minor change to planned spend on a new water treatment plant to account for inflation.	Decision is consistent with LTP or Annual Plan budgets but has some variation e.g. An unbudgeted increase in costs in installing a new pipe, that is within 10% of Council's planned capital expenditure.	Decision has an impact above 10% of Council's overall planned capital expenditure, or 5% of Council's overall planned operational expenditure. e.g. a significant change in construction of a new water treatment plant

Strategic assets

Decisions relating to the sale or transfer, or sale of shareholding of, any strategic asset is assessed as a matter of high significance.

Strategic assets, as defined under the LGA, are assets that the council needs to retain in order to maintain the council's capacity to achieve or promote any outcome that the council determines as important to the current or future wellbeing of Central Otago.

This includes:

- Any asset or group of assets listed as strategic in this policy
- Any equity securities held by the council in a port company and/or an airport company

The council determines our strategic assets to be those assets or groups of assets for which ownership or control by the council is essential to the long-term provision of services which are critical to achieving or promoting the council's community outcomes.

Strategic Assets (Individual)	
Alexandra Airport	Central Stories
Cromwell Airport	Cromwell Memorial Hall & Events Centre
Molyneux Stadium	Alexandra Community Centre
Maniototo Stadium	Ranfurly Railway Station
Roxburgh Entertainment Centre	

Some service delivery assets have strategic significance as an overall group. In these cases, the council takes a group of asset or network approach (i.e. council considers the group of assets or network as a whole to be strategic, rather than each individual asset or component of the network.)

An asset that is part of a network or group that is not integral to the functioning of the whole will not be regarded as strategic on its own.

Strategic Assets (Grouped)	
Councils Roading Arterial Network	Council operated pools
Primary Collector Roads	Council operated libraries
Secondary Collector Roads	Transfer stations
Bridge network	Property portfolio
Greenways network	Wastewater treatment plants and network
Parks network	Water supply plants and network
Cemeteries network	Council reservoirs
Elderly Persons Housing	

Step 2: Level of engagement

Council has a broad and ongoing process of sharing information with the community and seeking feedback on an ongoing basis.

Council engages with communities and stakeholders when:

- There is a statutory requirement
- The matter is considered significant
- The input of community and stakeholders will ensure Council make the best decision for the community
- The open engagement process will build relationships, ownership of issues and solutions, or trust and understanding.

Determining the level of engagement

The level of significance influences the time and resources Council invests in evaluating options and obtaining the views of affected and interested parties. The higher the degree of significance, the greater the level of engagement undertaken.

Council also considers the extent of engagement necessary to understand the community's view. A balance must be struck between the costs of engagement and the value it will add to the decision-making process.

The Central Otago district is made up of distinct communities with different engagement requirements. Council works to meet the differing needs of these communities, tailoring our engagement approach to suit a given issue, activity, community, demographic, or other need.

These factors mean Council is flexible about how engagement will take place, tailoring the approach to the needs of a given community, issue, or action. The following table outlines the general approach taken depending on the level of significance:

Significance	Description
For matters of low degree of significance	No engagement or consultation required. Council informs the community once a decision is made and is being implemented.
For matters that have a medium degree of significance	Engagement or consultation should be considered, depending on the circumstances. Council must make a formal resolution before action may be taken. This excludes matters covered in the Long-term Plan. The report to Council must include an assessment on the degree of significance and whether engagement and/or consultation is recommended. The report includes an assessment of the degree of significance, and whether engagement and/or consultation is recommended.
For matters with a high degree of significance	Consultation or engagement must take place. Council must make a formal resolution before action may be taken. This excludes matters covered in the Long-term Plan. This decision requires a report to Council outlining the assessment of the degree of significance of the issues, the degree of consultation or engagement proposed, the consultation or engagement plan proposed, and a recommendation. Council will apply the principles of consultation in the LGA and be guided by the Engagement Toolbox in Schedule 1.

Council uses the Special Consultative Procedure as required by legislation, including when decisions are made that impact strategic assets. See Schedule 2 – Special Consultative Procedure, and the 'Strategic assets' section below.

Step 3:

Council engage and consult with the community using a range of methods and tools designed to make it as easy as possible to participate.

Council's approach to engagement utilised the International Association of Public Participation's engagement spectrum, which is attached as Schedule 1.

Council has a multi-platform approach to engagement, including (but not limited to):

- Direct in-person engagement with individuals, stakeholders and community groups
- Written engagement, including letters and emails
- Print media, including media releases, advertising, posters and brochures
- Audio notifications, podcasts and interviews
- Council's online engagement platform 'Let's Talk - *Kōrero mai*'
- Council's social media platforms

Regardless of the method used, the essential elements of the practice of engagement remain the same:

- Decision / impact oriented
- Values based
- Relationship focussed
- Goal driven
- Equity centred

Step 4:

Council provides engagement analysis and reporting to elected members, that are publicly accessible through our website, reflecting the results of all consultation.

Council utilises various channels to update respondents as to the outcomes of engagement, including:

- Publishing summary reports on Council's website and/or Council's Let's Talk engagement platform
- Communicating outcomes through media and engagement outlets, in accordance with Council's Media Policy
- Providing direct responses, where resources allow.

Council seeks feedback on our engagement and consultative processes and channels to continuously enhance and improve their use.

When engagement is not required

There are times when Council would not normally engage with the community because the matter is routine, operational, or because there is an emergency. Council will not usually engage on:

- Matters where the Council already has a sound understanding of the views and preferences of those likely to be affected or interested in the matter.
- Situations where there is a need for confidentiality or commercial sensitivity.
- Emergency Management activities.
- Organisational decisions (such as staff changes and operational matters) that do not materially change a level of service.
- Matters where the costs of engagement outweigh the benefits of it, including matters where the community has limited ability to impact the outcome (i.e. activities tied closely to legislation).
- Matters that have already been addressed by the Council's strategies or plans, which have previously been consulted on (within the last ten years).
- Business as usual activities where the works are related to the operation and maintenance of a Council asset and responsible management requires the works to take place.
- Matters where the Council has engaged on the unchanged issue in the last three years.

Māori Participation Framework

Mana whenua are the tāngata whenua who hold traditional customary authority and maintain contemporary relationships within an area determined by whakapapa, resource use and ahīkaroa (the long burning fires of occupation).

In Otago, Kāi Tahu are mana whenua with four Papatipu Rūnaka (governing Rūnaka) holding mana whenua in the Central Otago takiwa:

- Te Rūnanga o Moeraki
- Kāti Huirapa Rūnaka ki Puketeraki
- Te Rūnanga o Ōtākou
- Hokonui Rūnanga.

These Papatipu Rūnaka are represented by iwi consultancy firm Aukaha. CODC respectfully acknowledges that Kā Rūnaka in the Aukaha rohe share authority with Ngā Rūnanga ki Murihiku (Te Rūnanga o Waihōpai, Te Rūnanga o Awarua and Te Rūnanga o Ōraka-Aparima) in the CODC area.

Various Acts provide a legislative requirement for the Council to engage with Māori. The LGA requires local authorities to facilitate participation by Māori in local decision-making processes. This recognises and respects the Crown's responsibility to take account of the principles of Te Tiriti o Waitangi (the Treaty of Waitangi) and to maintain and improve opportunities for Māori to contribute to and partner in local government decision-making

processes. These requirements are additional to general policies and processes for community engagement. Council aspires to move beyond statutory requirements to ensure meaningful engagement, recognising the value added through the sharing of this knowledge and wisdom.

Enabling mana whenua engagement ensures that Mātauraka Kāi Tahu is appropriately and authentically woven through all decision making. Council is taking steps to foster the development of Māori capacity to contribute to the decision-making processes of Central Otago District Council through a growing relationship with Aukaha that is governed by a relationship agreement. This partnership helps identify decisions of interest to mana whenua.

Council have committed, through the relationship agreement, to resourcing and funding arrangements that are reviewed in conjunction with each Long-term Plan; working together to ensure that the annual Council work programme appropriate reflects the priorities and interests of Kā Rūnaka, and to reporting and review arrangements.

Relationship element	Key aspects
Partnership protocol	The relationship between Central Otago District Council and the three Papatipu Rūnaka is formalised through a partnership protocol agreement between CODC and Aukaha. The partnership protocol agreement is a consistent Te Tiriti approach to the economic, social, environmental, and cultural wellbeing of Kāi Tahu Whānui, council staff, and the broader community across all the relevant duties and functions of Council. The following relationship elements within this table are established through the partnership protocol.
Resourcing and funding arrangements	CODC provides resourcing and funding arrangements as set out in the partnership protocol. These specific arrangements are reviewed and set as part of the Long-term Plan process.
Work programme	CODC and Aukaha work together to ensure the annual Council work programme appropriately reflects the priorities and interests of Kā Rūnaka. Two-way reporting on agreed workstreams is included as part of regular meetings between both parties.
Kanohi ki te kanohi	The partnership protocol provides for an operational relationship between relevant officers and representatives from both parties.

Relationship element	Key aspects
	Face to face interactions, including meetings in person or via Zoom/Teams are held four times a year, generally in February, June, September, and November.

The evolution of these arrangements is expected to lead to increasing the level of Māori participation in Council decision making.

Schedule 1: Engagement Toolbox

IAP2 Spectrum of Public Participation

IAP2's Spectrum of Public Participation depicts five levels of participation that the public can have on an outcome or decision through any public participation process. The Spectrum is used across other local government agencies and is found in public participation plans around the world.

INCREASING IMPACT ON THE DECISION

	INFORM	CONSULT	INVOLVE	PARTNER	EMPOWER
PUBLIC PARTICIPATION GOAL	To provide balanced and objective feedback in a timely manner	To obtain feedback on analysis, issues, alternatives, and decisions	To work with the public to make sure that concerns and aspirations are considered and understood	To partner with the public in each aspect of the decision making	To place final decision making in the hands of the public
COMMITMENT TO THE PUBLIC	"We will keep you informed." Example: Email newsletter to local communities and networks	"We will listen to and account for your concerns." Example: Online opportunities through the Let's Talk Kōrero Mai consultation platform	"We will work with you to ensure your concepts and aspirations are directly reflected in the decisions made." Example: Workshops or focus groups	"We will look to you for advice and innovation and incorporate this in decisions as much as possible." Example: Pre-consultation work	"We will implement what you decide." Example: Community Plans or binding referendums

Figure: International Association for Public Participation (IAP2) Federation

Council considers engagement methods and tools relative to the level of significance. These support community participation through an engagement spectrum approach, as set out in the following table:

Engagement tools

What?	How?	When?
Special Consultative Procedure	• Statutory Public Notice • Advertising radio, newspaper and online • Let's Talk – korero mai / Online feedback form • Press releases or media standup • Social media • Drop-in sessions / public events such as facilitated workshops • Hui (meetings) • Consider targeted consultation with special interest groups or stakeholders (email, letter or direct contact) • Hard copies available at Council facilities • Submissions (online, email and written) • Public hearings • Public decision • Direct feedback to all submitters	• Adoption and amendment of the Long-term Plan • Making, amending, or revoking a bylaw • Transfer of ownership (in whole or in part) of a significant strategic asset • Changes to financial policies • Setting rates • As required by other Acts.

Other consultation	• Advertising radio, newspaper and online
	• Press releases
	• Social media
	• Drop-in sessions / public events such as facilitated workshops
	• Hui (meeting)
	• Consider targeted consultation with special interest groups or stakeholders (email, letter or direct contact)
	• Hard copies available at Council facilities (e.g. Council offices, libraries)
	• Submissions (online, email and written)
	• Public hearings
		• Reserves Act
		  ○ Management plans
		• > Resource Management Act
		  ○ o Project delivery
		  ○ o Consents and licensing
		• > Local Government Act 1974
		  o Road closure
		• > Making minor bylaw changes
		• > Local Electoral Act 2001
		  o Representation Review

What?	How?	When?
	• > Public decision • > Direct feedback to all submitters	> District Plan changes > Developing masterplans, strategies and business cases
Information on Projects *i.e. updates on a particular project or decision-making* **Service Provision** *i.e. pool or library promotions* **Education** *i.e. behaviour change, such as flushing into wastewater*	> Statutory Public Notice (if required) > Targeted information to any special interest groups, stakeholders or affected parties (email, letter or direct contact) > Press releases > Stakeholder databases > Radio and newspaper interviews / columns > Advertising radio, newspaper and online > Social media > Let's Talk – korero mai / Online feedback form > Public forum at Council / Committee / Community Board meetings	> Roadworks > Streetscaping > Trees > Wastewater, Stormwater, Water supply > Reserve works > Service disruptions o Water outage o Boil water notice > Civil Defence preparedness o Weather/ Emergency
Community activity	> Targeted information to any special interest groups or stakeholders such as affected retail or neighbours (email, letter or direct contact) > Press release > Stakeholder databases	> Events > Facilitation > Social issues > Advocacy

What?	How?	When?
	> Radio and newspaper interviews / columns > Advertising radio, newspaper and online > Social media	

OTHER METHODS – There are lots of other ways we can consult and engage, including -			
Community forum/public meeting	Structured/facilitated workshops	Resident Opinion Survey	Other surveys
Displays at events	Letter drops	Newspaper inserts or advertising	Radio and other advertising
Brochures	Notices	Pop up stalls	Community road shows
Targeted education	Council website/social media	Editorials	Let's Talk – korero mai

Council has access to language assist software.

Schedule 2: Special Consultative Procedure

The Special Consultative Procedure is a formal consultation process that must be carried out in certain circumstances. The Council may also choose to use the special consultative procedure for other significant decisions.

The law requires the Special Consultative Procedure is used for:

- Making, amending, or revoking a bylaw,
    - With some exceptions in the LGA Part 8 Section 156
- Adopting and amending the Long-term Plan
- Other acts if expressly required by laws

Under the Special Consultative Procedure, Council must:

- Develop a Statement of Proposal and, if considered necessary, a Summary, and make them widely available
- Allow a minimum feedback period of one month
- Ensure people are given the opportunity to present their views to Council at a hearing.

Hearings and feedback

- Hearing of oral submissions are generally held in the Ngā Hau e Whā (Council chambers), William Fraser Building, 1 Dunorling Street, Alexandra. When an item is specific to a geographic community, Council may choose to hold the hearing at a closer location.
- Council can allow any person to present their views to the local authority by way of audio link or audio-visual link
- If asked to do so, Council may enable interpretation for/to New Zealand's other official languages – Te Reo Māori and New Zealand Sign Language, where practical.
- Following the conclusion of the consultation and/or engagement process, Council will be required to make a decision.
- Once a decision has been made, the community are informed of the decision using a method appropriate to the nature of the consultation.

Schedule 3: Activities with specific consultation requirements in legislation

This list is incomplete and intended to help inform relevant staff. It is continuously updated throughout the operation of the policy.

Dept	Activity	Action	Act	Requirements
CEO	**Civil Defence**	Civil Defence Plans	Civil Defence Emergency Management Act 2002	Specific notice and submission requirements.
Business Support	**Executive Function**	Long-term Plan, Annual Plan, and Annual Report	LGA 2002	Specific requirements, including content, timeframes, specific agents to report to, publication, and specific criteria for the consultation document.
	Governance	Pre-election report	LGA 2002	Specific requirements, including restrictions
		Public notice of polls, enrolment procedures, where the electoral roll is kept, returns, other issues	Local Electorate Act 2001	Specific requirements, including statutory timeframes
		Meeting times, agendas, and reports	Local Government Official Information Act 1987	Specific requirements, including statutory timeframes
		Triennial Agreements	LGA 2002	Specific engagement & disclosure requirements
		Pecuniary Interests Register	LGA 2002 (2022 Amendment)	Specific publication requirements
	Finance	Revenue and Financing Policy; Policy on Development Contributions; Policy on remission and postponement of rates on Māori freehold land	LGA 2002	Special Consultative Procedure
		17A Reviews	LGA 2002	Specific reporting and engagement criteria.
	Privacy	Rates	LGA 2002 & others	Specific engagement and/or disclosure requirements for multiple aspects of rating
Community Engagement	**Parks**	Reserve Management Plans	Reserves Act 1977	Specific requirements for public notice of intention to make plan
Community Vision	**Comms**	Significance and Engagement Policy	LGA 2022	Special Consultative Procedure
People & Culture	**People and Culture**	Protection of whistleblowers	Protected Disclosures (Protection of Whistleblowers) Act 2022	Specific publication requirements

Dept	Activity	Action	Act	Requirements
Planning & Infrastructure	**Planning**	Multiple functions	Resource Management Act 1991	Specific notification and publication requirements
	Regulatory	Alcohol	Sale and Supply of Alcohol Act 2012	Specific agents to notify and requirements to publish
		Building control	Building Act 2004 Building (Accreditation of Building Consent Authorities) Regulations 2006	Specific engagement with MBIE for changes to managers, employees, functions, policies, procedures, or systems. SCP for policy on dangerous, insanitary, and affected buildings. Specific requirements for earthquake prone buildings notices.
		Gambling	Gambling Act 2003 Racing Act 2020	SCP for policies relating to both pokies and TAB/board venues
		Dog control	Dog Control Act 1996	SCP for dog policy. Public notice requirements for dog control annual reporting. Dog control fees have notification requirements.
		Trading	Shop Trading Hours Amendment Act 2013 Psychoactive Substances Act 2013	SCP for Easter Sunday policy and Psychoactive Substances Policy
	Roading	All functions	Land Transport Act 1998 Land Transport Rules Land Transport Management Act 2003 LGA 1974	Multiple acts and rules prescribing what, when, how – very technical
	Waste	Waste Management and Minimisation Plan	Waste Minimisation Act 2008	Special Consultative Procedure

Significant Forecasting Assumptions and Risks

We have outlined the two key principles that underpin our 9-Year Plan, being affordability and sustainability. In everything we do as a Council we want to ensure we are operating in an affordable and sustainable manner.

We have acknowledged from the start that these issues are so significant and dynamic that we can only react to them as they arise. So, we are focusing our efforts on the long-term sustainability of our services. We want to build future resilience from these issues where we can. There is a risk in this approach.

This approach highlights the need for close and effective consultation that the community actually understands. It also highlights the need for Council and community boards to assume a strong leadership role.

Fortunately, we have the opportunity to update our 9-Year Plan each year during the annual plan process in the instance things do change dramatically.

In preparing forecasts, both financial and non-financial, there is a need to provide assumptions to address the uncertainties of the future. This is important for a number of reasons, including:

- allowing readers of the forecasts to understand the basis that financial information has been prepared on
- providing a means of explaining differences that will inevitably occur between the actual result and that which was forecast
- ensuring risks faced by the organisation in the future have been appropriately identified and evaluated

Risk Level definitions:

Level	Description
High	High risk which is not acceptable to Council, will require further monitoring and analysis. Some risk is high but outside of Councils control, in this situation, Council will monitor and further analysis should be undertaken to achieve a better understanding of the risk. Where possible, changes should be undertaken to reduce the criticality.
Medium	The risk may be acceptable; however, redesign or other changes should be considered if reasonably practical. Further analysis could be undertaken to achieve a better understanding of the risk. The risks should be monitored to discover changes which may influence the risk level and include consideration regarding potential measures have been implemented to mitigate any risk movements.
Low	Acceptable risk. The risk is low and further risk reduction measures are not necessary. The risks should be monitored to discover changes which may include the risk level.

Government Policy

This 9-Year Plan has assumed that there will be no changes in legislation under which Council operates, that will impact financial estimates over the 9-Year Plan except for Three Waters which is covered below. Changes in Government policy may directly impact the financial estimates of Council. This risk of this assumption is medium.

There are a number of national policies and plans, and legislation which set the scene for Council's 30-year Infrastructure Strategy. The Infrastructure Strategy documents Central Otago District Council's response to these national policies, plans, and legislation.

Three-Waters Reform

With the change of Government and the implementation of Local Water Done Well, Council will be undertaking consultation on its Water Service Delivery Plan which is likely to recommend creation of a standalone Council Controlled Organisation (CCO) and transfer of its assets and obligations into that new entity to deliver water services. Council has prepared its Long-term plan (LTP) on the basis that this transfer will occur at the end of year 2 of the plan. Accordingly, Council has created its LTP with the 3 waters activities no longer provided by Council from 1 July 2027. It is unlikely that any change in Central Government will be able to unwind actions taken by Council the risk of this assumption is low; because policy provided by Central Government is well known and decisions have been made and legislation is in place that will enable the delivery of Local Water Done Well. There is a high risk of uncertainty surrounding how the 3 Waters CCO will operate and there has been no independent legal advice sort on creating a CCO. The Council is organising a Transition manager to oversee the transition of the delivery of the 3 Water services from Council ownership to CCO. There are many unknowns including the management structure and fees, the Board and the Chief Executive. The share investment in the new CCO is calculated on the net asset assumption, which includes the fair value of the assets less liabilities (borrowing). The percentage of the Council ownership will be dependent on the final number of Councils that join the CCO. There is a key assumption that the level of ownership of the regional CCO will be consistent with relative contributions of net assets by each Council joining the CCO.

Sources of Funds for Future Replacement of Significant Assets

Sources of funds for the future replacement of significant assets are in accordance with Council's Revenue and Financing Policy. Sources of funding include, depreciation reserves, general reserves and borrowing. There is a risk that Council budgeting assumptions are wrong or the timing of the replacement is incorrect, which may impact reserves, accumulated depreciation and the level of borrowings. Council has significant reserves, and headroom for borrowings, therefore Council consider the risk of this assumption to be low.

Staffing and Resources

The gap between national and Central Otago wages has been a known issue for securing and retaining skilled staff. Council is addressing this through a strategic salary review. However, there remains an ongoing risk to the sustainability of our services due to on-going shortages of specific skill-sets required to meet Council services. There remains a unique lifestyle trade-off within this district that can still be offered to staff and Council will continue to focus on these. Should the risk occur, and Council cannot recruit or retain the required staff, then there is a risk of Council having a greater reliance on contractors and outsourcing key functions. This may impact on continuity of knowledge and institutional knowledge. The risk of this assumption is medium.

Growth Projections

Population, dwelling and demographic projections are produced three-yearly to support long-term planning. They underpin all demand projections within activity management plans. They are also incorporated into development contributions and income projections. Our resident population is projected to be 32,501 by 2034 from approximately 26,500 today. Our visitor peak day numbers are projected to be 31,136 in 2034 from approximately 25,150 today. Our growth projections are derived from Rationale with local growth factors included (this report is dated December 2022 with an update in May 2024).

An over or under estimation of growth could lead to an over or underinvestment in infrastructure and services. We monitor asset capacity and development contributions income against projections annually and adjust assumptions accordingly. The risk of this assumption is low, as Council tends to respond to growth after it has happened.

Council is considering the role the district has in balancing the affordability of sustaining our smaller rural towns over the next period of time. The risk of this assumption is medium.

Population Changes

Central Otago has a significantly larger proportion of older residents in its population compared to the rest of New Zealand. The current proportion of people aged 65+ in our district is 24%. This proportion is expected to grow in the future. Council has considered this shift and its effect in the planning for major capital projects. There is a risk that Council's assumption is higher or lower than stated. If the older population grows faster than Council assumes, there is a risk that additional services may be required to support accessibility and affordability. This risk of this assumption is medium.

Average Household Size

The average household size of a given area is the total resident population divided by the total number of households. A household can be one person who usually resides alone, or two or more people who usually reside together and share facilities in a dwelling. There may be more than one family in a household. The average household size for the district is currently low at 1.96 with minimal change projected change by 2034. There is a risk if this assumption is not correct and average household size increase that Council will experience a greater burden on its infrastructure. Alternatively, if household sizes decrease, then Council may experience greater demand on land resources and affordability due one income per household versus two or more. This risk of this assumption is low.

Third Party Funding Sources

A number of projects, including many community facility projects are reliant on funding from other sources. It is assumed that funding will continue at current levels to be available as planned, as a conservative approach has been taken. The risk of this funding not being available is low.

Vested Assets

From time to time Council will receive privately constructed infrastructure assets vested in Council for ongoing management. There is a great deal of uncertainty around the amount and makeup of vested assets and as such vested assets are not included in Council's plans. The long-term financial impacts of vesting assets into Council is assessed before transfer. The risk of this assumption is low.

Natural Disasters and Business Continuity

We assume that in the event of a significant disaster, natural or man-made, Council can continue to provide sufficient services to the community. Council has an Emergency Event Fund of just over $2.6 million in case of a natural disaster. This would likely only fund the initial response effort. We have assumed, if required, external borrowing would be utilised to fund the clean-up and ongoing capital work to rebuild damaged underground assets, for which we don't currently insure, should any major disaster occur. There is a risk, depending on the extent of the disaster the borrowing may be difficult to acquire. However due to the size and spread of our communities we consider it unlikely a disaster would affect the entire district at any one time, which should mitigate any borrowing difficulties. Alongside us, Central Government also has a role in disaster recovery and restoration works after natural disasters happen.

We are also undertaking lifelines planning for all core services to improve the resilience of infrastructure critical to the community's well-being. Assessments of all earthquake-prone buildings is also underway. Other than increased insurance costs, we have allowed ourselves some headroom in our borrowing capacity from LGFA should we require it. Equally, the occurrence of drought has a major impact by reducing the incomes of primary sector businesses; this will influence decisions on the affordability of the 9-Year Plan. The risk of this occurring is medium.

Council prepared an Infrastructure Resilience Plan, and Infrastructure Response Plan in 2020. The Resilience Plan identifies the natural events that will create risks to three waters and roading infrastructure and services, and the likelihood and consequence of these events occurring.

The Resilience Plan identifies where critical asset failures could occur and mitigations required to address these. Mitigation projects have been included in the infrastructure work program for the next 30 years.

Asset Sales

Selling some property assets has been proposed within this plan. Money collected from selling property assets will be used to fund proposed upgrades to infrastructure or to reduce financial liabilities. There is a risk that the proceeds from asset sales is not as much as anticipated nor occur when stipulated within the 9-year plan. Sale of property assets is a factor in achieving the balanced budget and repayment of external debt. Should this not happen council will have an unbalanced budget, incur additional borrowing costs outside the plan and Council may need to review its funding options, use of reserves and debt levels. The risk of this occurring is high.

Asset Purchases for investment purposes

The plan assumes proceeds for asset sales will be invested in cash due to the uncertainty of the type and timing of reinvestments. The operating and capital expenditure is not dependent on either asset sales or asset reinvestment. The risk of this occurring is low.

Climate Change

Central Otago District Council commissioned Bodeker Scientific to undertake analysis and prepare a report of climate change impacts on the Central Otago District in 2017. This includes the scenario under the worst case or highest warming scenario, as well as the implications this may have for the district. The Otago Regional Council has engaged Tonkin and Taylor to undertake analysis of the expected impacts of climate change on the wider Otago Region. The implications of climate change on Central Otago presented in the Tonkin and Taylor report are similar to those in the Bodeker Scientific report.

Central Otago District is predicted to warm by several degrees by the end of the century. Total precipitation is not projected to change much in the district, however; the distribution and intensity of rainfall is likely to alter, with a greater likelihood of more frequent extreme rainfall events. These events have occurred infrequently in the past, which provides valuable information regarding the consequences of these events to improve planning for the future.

Central Otago District Council declared a climate crisis in Central Otago on 25 September 2019. Further details of this can be found in the Infrastructure Strategy.

Council has joined the Toitū carbon reduce certification scheme which measures, manage and reduce it's greenhouse gas emissions. This is a key strategic focus of Council's Sustainability Strategy. The emission sources that Council is responsible for have been measured for the from 2017/18 to 2022/23 financial years. Emissions are broken down into three categories by the Greenhouse Gas Protocol, and by Council activity in order to better understand the source.

There is a risk that if this assumption are wrong, then Council could face growing costs from more frequent weather events, damage to assets and growing insurance costs. Council continues to monitor the impact of climate change across Council's assets. The risk of direct impact from climate change within the 9-Year Plan timeframe is medium.

Financial Assumptions

Our Financial Strategy specifies how we will manage our finances into the future. We also have a Revenue and Financing Policy that defines how we decide to fund Council expenditure. Each contains specific financial assumptions. The following assumptions are further to these.

Interest Rates

We plan to borrow externally within this 9-Year Plan. We have assumed the following interest rates:

- Interest on internal borrowings is 2.0% through to 5.0% throughout the 9-Year Plan
- Interest on external investments is 2.0% through to 3.0%
- Interest on external borrowing is 2.0% through to 5.0% throughout the 9-Year Plan

Council will have a greater level of risk with the increased borrowings to meet the water related services and to achieve the Cromwell MasterPlan. The Liability Management Policy sets out the parameters to manage this risk, including Council considering tools to protect the ratepayer against potential fluctuations.

We have also assumed that facilities to borrow externally will be available when required, based on recent discussions with our bankers. Overall Council believes the risk is medium.

Cost Increases

Inflation reflects erosion in the buying power of money. Each dollar buys less and less goods and services over time. Depreciation staff, costs and some expenditure items have inflation applied from year 1 of the plan. The majority of the balance of the expenditure forecasts for each activity are input in the dollars of the first year (e.g. water and wastewater renewals and other operational expenditure lines such as maintenance contracts). Where cost change has been applied from year two onwards, Council has used the BERL indices shown below. For all years from 2025 to 2034 the BERL indices shown below have also been applied. There is a

medium risk that inflation may increase at a higher rate. This would impact on the affordability of Council's services and would be addressed as part of Council's annual planning process.

	Year 1 2025/26	Year 2 2026/27	Year 3 2027/28	Year 4 2028/29	Year 5 2029/30	Year 6 2030/31	Year 7 2031/32	Year 8 2032/33	Year 9 2033/34
Inflation Adjustment Range	**0% to 5.0%**	**1.5% to 7.5%**	**1.5% to 10.0%**	**1.5% to 5.0%**	**1.5% to 16.0%**	**1.5% to 19.0%**	**1.5% to 5.0%**	**1.5% to 5.0%**	**1.5% to 27.0%**

Project Estimates

Project estimates of cost and timing are based on the best available scope, asset and market information available at the time of planning. Our Procurement policy defines the delegations and tendering requirements of projects. Significant estimates are independently peer reviewed. The timing of projects are assumed to be as planned unless significant changes to a project occurs. The risk of any significant changes is medium.

Asset Revaluations and Data Accuracy

Assets are revalued annually for key assets including waters assets, roading and waste assets. Five-yearly revaluations for parks and reserves and three-yearly for land and buildings to understand their worth and condition. We make assumptions on an asset's useful life and its replacement cost based on actual life and asset condition information, market rates, and professional knowledge. We mitigate the risk of these assumptions by revaluing some assets annually, undertaking asset testing, and regular visual condition rating.

Asset renewal and maintenance forecasts are based on the condition and the remaining life of infrastructure assets. This data is captured within the field and stored in dedicated databases. The accuracy of asset data has a direct impact on the accuracy of renewals and maintenance forecasts. We measure the accuracy of this data and have targets to improve its accuracy. We also have acceptable levels of confidence around asset valuations and data, which are also targeted for continuous improvement. Revaluations in the 9-year plan are based on BERL indices for the appropriate asset class.

If Councils assumptions are wrong, there is a risk that Councils assets are either under or over-valued and also under or over insured. Either scenario could have financial implication around insurance payments or insurance claims. The risk associated with the revaluations is considered low. Since 2019 Council has been working to improve confidence in the plant asset register and the data collected.

Depreciation

Depreciation of existing assets have used the current depreciation rates based on the remaining useful lives of the assets. New assets have been assigned estimated lives based on similar assets from the existing asset register. For larger assets the asset lives are based on the predominate asset. There is a risk that the life of an asset is significantly shorter or longer than Council assumptions. This could result in financial implications due to changes to the capital works programme, or insufficient funds collected to meet the renewal programme. The risk of any significant changes is low.

New Zealand Transport Agency funding

Each three-year period New Zealand Transport Agency Waka Kotahi funds the majority of Council's roading expenditure currently at a rate of 51%. The roading program presented in Councils 9 Year Plan also has planned funding from Waka Kotahi at a rate of 51% for all qualifying roading expenditure. Waka Kotahi is experiencing funding restrictions, which will impact the funding available to Councils. The risk of Waka Kotahi not funding Council's

proposed roading programme is medium. If this occurs then the work programme will be reduced, which will result in work being deferred which could result in a reduction in levels of service, and higher future costs.

Capital Expenditure Completion Rate

Council assumes it will meet its proposed capital expenditure programme of work. Council is proposing significant expenditure particularly in the three-waters space. These programmes of work are significant.

The key risk is that the Council is unable to deliver the works programmes as proposed. Should the programme not be fully achieved, a backload of work arises, which could impact on levels of service, delays in replacing assets and price increases. There is also the risk of assets failing before they can be replaced. There is also a financial risk with the introduction of external borrowings to fund Councils capital programme of work, that could affect the budgeted expenditure due to changes in construction costs and the timing of external debt uplifted. The risk with delays is higher due to the significant programme planned, the capacity of the construction sector, the progression of the Cromwell master plan, and three waters reform that may impact on the timing of the programme. Council does have the ability, however, should the projects fall behind schedule to revise the timing of the delivery by moving projects into future annual plans. Any money already collected can be carried forward to a later year to be used at the point of construction. Risk will be reduced on the works programmes when the 3 Water activities transfer to a CCO.

Development and Financial Contributions Policy

Significant Changes:

- The 2025 development contributions policy introduces new charges for community infrastructure, reserve land and reserve improvements.
- The policy is transitioning from financial contributions to development contributions to ensure a more streamlined and efficient policy. Therefore, financial contributions will only be collected for reserves if a development contribution cannot be levied.
- There is an uplift in water and wastewater development contributions due to increased capital programmes. This reflects the need for more substantial investment in infrastructure to comply with new standards and provide additional capacity to support growth for these activities.

Purpose:

1. Population and business growth create the need for new subdivisions and developments, and these place increasing demands on the assets and services provided by Central Otago District Council (Council). As a result, significant investment in new or upgraded assets and services is required to meet the demands of growth.

2. The purpose of the Policy is to ensure that a fair, equitable, and proportionate share of the cost of that infrastructure is funded by development. Council intends to achieve this by using:
    - development contributions under the Local Government Act 2002 (LGA02) for network infrastructure (water supplies, wastewater and transport), community infrastructure and reserves across the district including Alexandra, Clyde, Cromwell, Omakau, Ranfurly, Roxburgh, Naseby and Patearoa; and
    - financial contributions under the Resource Management Act 1991 (RMA) for reserves across the district will no longer be collected.

Navigating this document

3. The Policy outlines Council's approach to funding development infrastructure via development contributions under the LGA02 and financial contributions under the RMA.

4. The Policy has three main parts:
    - Part 1: Policy operation

- Part 2: Policy background and supporting information
- Part 3: Catchment maps for the development contributions

PART 1: POLICY OPERATION

5. Part 1 provides information needed to understand if, when, and how development contributions and financial contributions will apply to developments. It also explains peoples' rights and the steps required to properly operate the Policy.

6. The key sections of Part 1 are:
    - The charges
    - Liability for development contributions
    - When development contributions are levied
    - Determining infrastructure impact
    - Review rights
    - Other operational matters
    - Summary of financial contributions
    - Definitions

PART 2: BACKGROUND AND SUPPORTING INFORMATION

7. Part 2 provides the information needed to meet the accountability and transparency requirements of the LGA02 for the Policy, including explaining Council's policy decisions, how the development contributions were calculated, and what assets the development contributions are intended to be used towards.

8. The key sections of part 2 are:

    - Requirement to have the Policy
    - Funding summary
    - Funding policy summary
    - Catchment determination
    - Significant assumptions of the Policy
    - Cost allocation
    - Calculating the development contributions
    - Schedule 1 Development contribution calculations
    - Schedule 2 Assets and programmes funded by development contributions

PART 3: CATCHMENT MAPS

9. Part 3 provides the catchment maps that show where the development contributions in the Policy apply.

PART 1: POLICY OPERATION

DEVELOPMENT CONTRIBUTIONS

The charges

10. There are seven areas (catchments) within the Central Otago district (the District) where development contributions apply. The catchments where development contributions apply for each infrastructure activity are mapped in Part 3 of the Policy.

11. The related charges per Household Unit Equivalent (HUE) for each activity are in Table 1. See the *Determining infrastructure impact* section below for an explanation of a HUE.

12. For each infrastructure activity for which development contributions are required, the development contribution payable is calculated by multiplying the number of HUEs generated through the development by the charge for that activity. This is then aggregated for all activities to give the total charge.

13. For example, subject to any credits that may apply for the original lot, a three-lot residential development in Alexandra will pay three times the water, wastewater, transport, community infrastructure, reserve land and reserve improvement charges, totalling $175,126 (GST inc).

14. These charges may be adjusted for inflation annually in line with the Producers Price Index Outputs for Construction, as permitted by sections 106 (2B) and (2C) of the LGA02. The latest charges will be published on Council's website https://www.codc.govt.nz/services/planning/development-contributions.

Table 1: Charge per HUE at 1 July 2025 (GST inclusive)[1,2]

ACTIVITY	CHARGE PER HUE (GST INC)		
Water	**Scheme ($)**	**District ($)**	**Total ($)**
Alexandra and Clyde	21,905	136	22,041
Cromwell	13,002	136	13,138
Naseby	9,637	136	9,772
Omakau	15,449	136	15,585
Patearoa	6,029	136	6,165
Ranfurly	4,124	136	4,260
Roxburgh	4,600	136	4,736
Wastewater			
Alexandra and Clyde	22,536	180	22,716
Cromwell	7,288	180	7,469
Naseby	2,358	180	2,538

Omakau	20,966	180	21,146
Ranfurly	68	180	248
Roxburgh	1,158	176	1,334
Stormwater			
District	-	-	-
Transport			
District	-	803	803
Community Infrastructure			
District	-	2,511	2,511
Reserve Land			
District	20 m2	$500 per m2	10,000
Reserve Improvements			
District		304	304

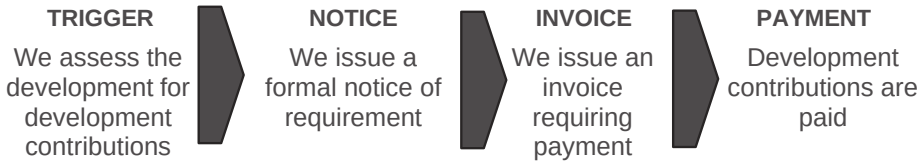
[1] GST has been applied at the rate of GST as at 1 July 2025 (15%). Should the rate of GST change, the charges will be adjusted accordingly. The GST exclusive charge per activity can be found in Schedule 1.

[2]The charges presented in Table 1 are for the 2025/26 financial year, which includes one year of inflation on the charges shown in Schedules 1 and 2, which are shown for the 2024/25 financial year.

Liability for Development Contributions

15. If subdividing, building, connecting to Council's services, or otherwise undertaking development in the District, development contributions may need to be paid. Development contributions apply to developments within the areas shown in the Development Contribution Catchment Maps in Part 3.

16. In some circumstances, development contributions may not apply or may be reduced. Further information on these circumstances can be found in the sections When development contributions are levied, Credits, and Limitations on imposing development contributions.



17. Financial contributions may also be required in some cases. This is discussed later in the Policy.

18. Development of new infrastructure sometimes means that areas not previously subject to the development contributions policy development contribution become so. For example, a bare section in a subdivision may be liable for development contributions whereas previously constructed houses on the same subdivision were not.

19. Council officers will be available to help resolve any uncertainty about development contribution liabilities.

When Development Contributions are levied

20. Once an application for a resource consent, building consent, certificate of acceptance, or service connection has been made with all the required information, the normal steps for assessing and requiring payment of development contributions are:

21. These steps are explained in more detail below.

TRIGGER FOR REQUIRING DEVELOPMENT CONTRIBUTIONS

22. Subject to the 3-step initial assessment outlined in paragraph 25 below, Council can require development contributions for a development upon the granting of:

    - A resource consent
    - A building consent or certificate of acceptance
    - An authorisation for a service connection

23. Council will generally require development contributions at the earliest possible point (i.e. whichever consent, certificate, or authorisation listed above is granted first). For new developments, the resource consent is often the first step in the process and therefore the first opportunity to levy development contributions. Where development contributions were not assessed (or only part assessed) on the first consent, certificate or authorisation for a development, this does not prevent the Council assesing contributions on a subsequent consent, certificate or authorisation for the same development (for the reasons set out in the following paragraphs).

24. Development contributions will be assessed under the Policy in force at the time the application for resource consent, building consent, certificate of acceptance, or service connection was submitted with all required information.

Initial Assessment

25. On receiving an application for resource consent, building consent, certificate of acceptance, or service connection, Council will check that:

    A. the development (subdivision, building, land use, or work) generates a demand for reserves, community infrastructure or network infrastructure; and

    B. the effect of that development (together with other developments) is to require new or additional assets or assets of increased capacity in terms of reserves, community infrastructure or network infrastructure; and

    C. Council has incurred or will incur capital expenditure to provide appropriately for those assets. This includes capital expenditure already incurred by Council in anticipation of development.

26. Council has identified the assets and areas that are likely to meet the requirements of (B) and (C), and these are outlined in Schedule 2 (Past and future assets funded by development contributions) and Part 3 Catchment Maps (development contribution catchment maps). In general, if a development is within one of the areas covered by the catchment maps it is likely that development contributions will be required.

27. Development contributions may be waived or reduced if:

    - a resource consent or building consent does not generate additional demand for any community facilities (such as a minor boundary adjustment); or
    - one of the circumstances outlined in the section Limitations on imposing development contributions apply; or
    - credits apply as outlined in the Credits section.

28. If a subsequent resource consent (including a change to a condition of a resource consent), building consent, certificate of acceptance, or service connection is sought, a new assessment may be undertaken using the Policy in force at that time. Any increase or decrease in the number of HUEs, relative to the original assessment, will be calculated and the contributions adjusted to reflect this.

29. This means Council will require additional development contributions where additional units of demand are created, and development contributions for those additional units of demand have not already been required.

30. Examples of where additional development contributions may apply after a subsequent trigger event include:

    - Minimal development contributions have been levied on a commercial development at subdivision or land use consent stage as the type of development that will happen will only be known at building consent stage.
    - Development contributions levied at the subdivision or land use consent stage were for a small home, but the home built is larger or is subsequently extended.

- The nature of use has changed, for example from a low infrastructure demand commercial use to a high infrastructure demand commercial use.

NOTICE

31. A development contribution notice will normally be issued when a resource consent, building consent, certificate of acceptance, or service connection authorisation is granted. In some cases, the notice may be issued or re-issued later. The notice is an important step in the process as it outlines the activities and the number of HUEs assessed for development contributions, as well as the charges that will apply to the development. It also triggers rights to request a development contributions reconsideratoin or to lodge an objection (see the section on Review rights below).

32. If multiple consents or authorisations are being issued for a development, a development contribution notice may be issued for each.

33. Development contribution notices do not constitute an invoice or an obligation to pay for the purposes of the Goods and Services Tax Act 1985.

FURTHER ASSESSMENT OF DEVELOPMENT CONTRIBUTIONS

34. Development contributions will be assessed further by Council:

    - If the time between the Initial Development Contribution Assessment and time at which the Council would normally invoice for those development contributions is more than 24 months, Council will apply any PPI indexing to the development contributions between the time of the original application and the time of payment.

    - If a development changes in scale or intensity since the original contribution, Council may require a further development contribution for the same purpose, under section 200(4).

INVOICE

35. An invoice for development contributions will be issued to provide an accounting record and to initiate the payment process. The timing of the invoice is different for different types of consents or authorisations (see Table 2).

Table 2: Invoice timing

	INVOICE TIMING
Building consent	At granting of the building consent
Certificate of acceptance	At the time of application for a certificate of acceptance

Resource consent for subdivision	At the time of application for a certificate under section 224(c) of the RMA (the 224(c) certificate). An invoice will be issued for each stage of a development for which 224(c) certificates are sought, even where separate stages are part of the same consent.
Resource consent (other)	At granting of the resource consent
Service connection	At the time of application for the service connection

36. Despite the provisions set out above, if a development contribution required by Council is not invoiced at the specified time as a result of an error or omission on the part of Council, the invoice will be issued when the error or omission is identified. The development contributions remain payable.

PAYMENT

37. Development contributions must be paid by the due dates in Table 3.

Table 3: Payment due date

	PAYMENT DUE DATE
Building consent	20th of the month following the issue of the invoice
Certificate of acceptance	At issue of the certificate of acceptance
Resource consent for subdivision	Prior to release of the certificate under section 224(c) of the RMA
Resource consent (other)	20th of the month following the issue of the invoice
Service connection	At issue of the connection approval

38. On time payment is important because, until the development contributions have been paid in full, Council may:

- Prevent the commencement of a resource consent.
- Withhold a certificate under section 224(c) of the RMA.
- Withhold a code compliance certificate under section 95 of the Building Act 2004.
- Withhold a service connection to the development.
- Withhold a certificate of acceptance under section 99 of the Building Act 2004.

39. Where invoices remain unpaid beyond the payment terms set out in the Policy, Council will start debt collection proceedings, which may involve the use of a credit recovery agent. Council may also register the development contribution under the Land Transfer Act 2017, as a charge on the title of the land in respect of which the development contribution was required.

Determining Infrastructure Impact

40. In order to have a consistent method of charging for development contributions, the Policy is centred around the concept of a household unit equivalent or “HUE” for infrastructure. In other words, an average household in a standard residential unit and the demands they typically place on community facilities. Table 4 summarises the demand characteristics of each HUE.

Table 4: HUE demand measures

ACTIVITY	UNIT OF MEASUREMENT	DEMAND PER HUE
Water	Litres per day	350 litres per day
Wastewater	Litres per day	280 litres per day
Stormwater	N/A	N/A
Transport	Trips per day	8 trips per day
Reserve Land	Available time per day	13.4 hours per day
Reserve Improvements	Available time per day	13.4 hours per day
Community infrastructure	Available time per day	13.4 hours per day

RESIDENTIAL DEVELOPMENT

41. In general, the number of HUEs charged is one per new allotment or residential unit created, although lower assessments can apply in some cases for minor and small residential units.

42. When calculating the number of HUEs for a residential subdivision, Council will adjust the assessment to account for any:

    - Credits relating to the site (refer to the Credits section below).
    - Allotment which, by agreement, is to be vested in Council for a public purpose.
    - Allotment required as a condition of consent to be amalgamated with another allotment.

43. A retirement unit or visitor accommodation unit will be assessed as generating 0.5 HUEs for each activity. If a unit could be used for residential or visitor accommodation purposes Council will determine the most appropriate classification based on the nature of the development.

Minor and small residential units

44. Council will permit lower assessments for minor or small residential units in relation to:

    - Building consents or certificates of acceptance.
    - Subdivision, land use consents, or connection authorisations where information is provided by the applicant that demonstrates that a minor or small residential unit(s) will be provided, to the satisfaction of Council. Council may enter into agreements with developers or landowners to give effect to a minor or small

residential unit assessment and bind the applicant to any conditions that accompany the assessment.

45. Such assessments are guided by the parameters outlined in Table 5.

Table 5: Small residential unit (RU) assessment guidance

	MINOR	SMALL	STANDARD
No. of bedrooms*	1	2	3 or more
HUE Discount (all services)	50%	25%	Nil
Proportion of HUE payable for all charges	0.5	0.75	1

*A definition of bedroom is provided in the glossary

46. Alternatively, for subdivisions, Council will assess each allotment as 1 HUE and may agree to postpone payment by the person undertaking the subdivision until a building consent is issued for an allotment. At that time, Council will adjust the assessment and the payment required accordingly. See the section on Postponement.

47. Should additional bedrooms be proposed to a minor or small residential unit that has been assessed under this section, Council will require additional development contributions in line with Table 6.

Table 6: Small residential unit (RU) extension assessment guidance (HUEs)

TYPE OF EXTENSION	TOP UP PROPORTION PAYABLE	TOTAL PROPORTION PAID
Extended minor RU to a small RU	0.25	0.75
Extended minor RU to a standard RU	0.5	1
Extended small RU to a standard RU	0.25	1

48. Multi-unit development that comprises the provision of a second one-bedroomed residential unit limited by consent to be for family use, whether attached or unattached to the main residence, shall be exempt from development contributions.

NON-RESIDENTIAL DEVELOPMENT

49. Non-residential subdivisions, land uses, or building developments are more complicated as they do not usually conform with typical household demands for each service.

50. In these cases, Council makes a HUE “equivalent” assessment based on the characteristics of the development and demand loadings likely to be placed on the services. To provide consistency, the demand measures in Table 4 have been

converted for assessing non-residential developments based on gross floor area, or GFA (Table 7). Council will use these rates for determining HUEs for non-residential developments for water and wastewater unless it seeks or accepts a special assessment.

Table 7: HUE per 100 m2 GFA (*except stormwater, which is based on total impervious surface area)

DEVELOPMENT TYPE	WATER	WASTEWATER	STORMWATER*	TRANSPORT	COMMUNITY INFRASTRUCTURE	RESERVE LAND	RESERVE IMPROVEMENT
Industrial	0.3	0.3	N/A	0.4	0.04	0.04	0.04
Commercial	0.5	0.5	N/A	0.4	0.15	0.15	0.15
Retail	0.5	0.5	N/A	3.0	0.09	0.09	0.09
Places of assembly	1.0	1.0	N/A	1.0	0.03	0.03	0.03
Other non-residential	Special assessment	Special assessment	N/A	Special assessment	Special assessment	Special assessment	Special assessment

51. If no proper assessment of the likely demand for activities is able to be carried out at the subdivision consent stage, a development contribution based on one HUE will be charged for each new allotment created and Council will require an assessment to be carried out at the building consent stage. This later assessment will credit any development contributions paid at the subdivision consent stage.

RESERVE LAND DEVELOPMENT CONTRIBUTIONS

52. Population increase, visitor growth and intensification in urban areas will mean our existing parks and open spaces will need to accommodate more use. While generally new open space areas will not be acquired in existing developed areas the capacity of existing open space will need to be improved either through upgrades or receiving a higher level of service. Development contributions are collected for the growth apportionment only.

53. A portion of development contributions paid to the Council is utilised for the provision of reserve land within Central Otago district. It is Council's aim to have an adequate provision of accessible reserve land of high quality to serve the population as it grows.

54. The reserve land contribution for each dwelling across the Central Otago area has been assessed at 20m² (charged as a cash or land contribution).

55. Land offered to the Council in lieu of cash development contributions for reserve land acquisition must be of a suitable standard, size and purpose to be accepted by the Council. This shall be at the discretion of the Council and must adhere to the CODC Open Spaces and Recreation Strategy 2024-54.

56. Where a cash contribution is required the value of the land shall be $500/m^2 (excluding GST).

RESERVE IMPROVEMENT CONTRIBUTIONS

57. Although provision of land used for recreation purposes is high, much of the land is underdeveloped and continual improvement is required to ensure reserve land is functional and of high quality. This generates the ongoing need for development contributions for reserve improvements as new developments continue to increase the usage of reserves across the district.

58. A portion of development contributions paid to the Council is utilised for the improvement of reserve land within the Central Otago District. In some instances, Council may accept or require a contribution to the equivalent value in the form of infrastructure.

59. Agreement and approval in writing must be provided from Council in respect of any Reserve Improvement infrastructure being provided, and evidence of expenditure for Reserve Improvements must be presented to Council to offset the development contributions levy for Reserve Improvements.

SPECIAL ASSESSMENTS

60. Developments sometimes require a special level of service or are of a type or scale which is not readily assessed in terms of HUEs – such as large-scale primary sector processors or service stations. In these cases, Council may decide to make a special

assessment of the HUEs applicable to the development. In general, Council will evaluate the need for a special assessment for one or more activities where it considers that:

- the development is of relatively large scale or uses; or
- The development has more than 6 bedrooms
- The development is likely to have less than half or more than twice the demand for an activity listed in Table 7 for that development type; or
- a non-residential development does not fit into an industrial, retail or commercial land use and must be considered under the other category in Table 7; or
- a non-residential development may use more than 5m3 of water per day.

61. The demand measures in Table 4 will be used to help guide special assessments.

62. If a special assessment is sought, Council may require the developer to provide information on the demand for community facilities generated by the development. Council may also carry out its own assessment for any development and may determine the applicable development contributions based on its estimates.

CREDITS

63. Credits are a way of acknowledging that the lot, home or business may already be connected to, or lawfully entitled to use, one or more Council services, or a development contribution has been paid previously. Credits can reduce or even eliminate the need for a development contribution. Credits cannot be refunded and can only be used for development on the same site and for the same service for which they were created.

64. Credits will be given for properties when:

- a development contribution for a lot has already been paid (at least in part). For example, most new subdivision lots will already have had development contributions levied and paid for at least one HUE; or
- the lot existed before 1 July 2004 and was within an urban zoning at that time under the District Plan (i.e. urban residential or urban industrial, commercial, or retail zoning). This excludes rural or rural residential properties; or
- the property was otherwise lawfully connected to a service as at 1 July 2004; or
- a rural or rural residential lot existed before 1 July 2004 (transport, community infrastructure and reserves only).

65. Credits given will be determined in accordance with Table 8.

Table 8: Standard credits

	CREDIT FOR EACH SERVICE FOR WHICH A DEVELOPMENT CONTRIBUTION HAS BEEN PAID	CREDIT FOR URBAN LOTS THAT EXISTED BEFORE 1 JULY 2004	CREDIT FOR LAWFULLY CONNECTED SERVICE AS AT 1 JULY 2004	RURAL RESIDENTIAL LOTS THAT EXISTED BEFORE * 1 JULY 2004	RURAL LOTS THAT EXISTED BEFORE * 1 JULY 2004
Residential units or lots	The number of HUEs	1 HUE for all services	1 HUE for the service(s) connected	1 HUE	1 HUE for any residential units on a lot as at 1 July 2004
Non-residential buildings or lots		Any underlying business lot shall be allocated a credit of one HUE, except for transport where deemed credits will not apply.			

* Transport, community infrastructure, and Parks & Reserves only.

Review Rights

66. Developers are entitled under the LGA02 to request a reconsideration or lodge a formal objection if they believe Council has made a mistake in assessing the level of development contributions for their development.

RECONSIDERATION

67. Reconsideration requests are a process that formally requires Council to reconsider its assessment of development contributions for a development. Reconsideration requests can be made where the developer has grounds to believe that:

- the development contribution levied was incorrectly calculated or assessed under the Policy; or
- Council has incorrectly applied the Policy; or
- the information Council used to assess the development against the Policy, or the way that Council has recorded or used that information when requiring a development contribution, was incomplete or contained errors.

68. To seek a reconsideration, the developer must:

- Lodge the reconsideration request within 10 working days of receiving the development contribution notice.

- Use the reconsideration form (found on https://www.codc.govt.nz/services/planning/development-contributions) and supply any supporting information with the form.
- Pay the reconsideration fee at the time of application, as set out in Council's Schedule of Fees and Charges.

69. Applications with insufficient information or without payment of fee will be returned to the applicant, with a request for additional information or payment.

70. Once Council has received all required information and the reconsideration fee, the request will be considered by a panel of a minimum of two, and a maximum of three, people. The panel will comprise people that were not involved in the original assessment. Notice of Council's decision will be given to the applicant within 15 working days from the date on which Council receives all required relevant information relating to the request.

OBJECTIONS

71. Objections are a more formal process that allow developers to seek a review of Council's decision. Developers have the right to pursue an objection regardless of if a reconsideration request has been made. A panel of up to three independent commissioners will consider the objection. The decision of the commissioners is binding on the developer and Council, although either party may seek a judicial review of the decision.

72. Objections may only be made on the grounds that Council has:

- failed to properly take into account features of the development that, on their own or cumulatively with those of other developments, would substantially reduce the impact of the development on requirements for community facilities in the District or parts of the District; or
- required a development contribution for community facilities not required by, or related to, the development, whether on its own or cumulatively with other developments; or
- required a development contribution in breach of section 200 of the LGA02; or
- incorrectly applied the Policy to the development.

73. Schedule 13A of the LGA02 sets out the objection process. To pursue an objection, the developer must:

- lodge the request for an objection within 15 working days of receiving notice to pay a development contribution, or within 15 working days of receiving the outcome of any request for a reconsideration; and
- use the objection form (found on https://www.codc.govt.nz/services/planning/development-contributions) and supply any supporting information with the form; and
- pay a deposit.

74. Objectors are liable for Council's actual and reasonable costs incurred in the objection process including staff arranging and administering the process, commissioner's time, and other costs incurred by Council associated with any hearings such as room hire and associated expenses, as provided by section 150A of LGA02. However, objectors are not liable for the fees and allowances costs associated with any Council witnesses.

Other Operational Matters

REFUNDS

75. Sections 209 and 210 of the LGA02 state the circumstances where development contributions must be refunded, or land returned. In summary, Council will refund development contributions paid if:

- the resource consent:
  - lapses under section 125 of the RMA; or
  - is surrendered under section 138 of the RMA; or
- the building consent lapses under section 52 of the Building Act 2004; or
- the development or building in respect of which the resource consent or building consent was granted does not proceed; or
- Council does not provide the reserve or network infrastructure for which the development contributions were required.

76. Council may retain any portion of a development contribution referred to above of a value equivalent to the costs incurred by Council in relation to the development or building and its discontinuance.

77. Council may retain a portion of a development contribution (or land) refunded of a value equivalent to:

- Any administrative and legal costs it has incurred in assessing, imposing, and refunding a development contribution or returning land for network infrastructure or community infrastructure development contributions.
- Any administrative and legal costs it has incurred in refunding a development contribution or returning land for reserve development contributions.

LIMITATIONS ON IMPOSING DEVELOPMENT CONTRIBUTIONS

78. Council is unable to require a development contribution in certain circumstances, as outlined in section 200 of the LGA02, if, and to the extent that:

- it has, under section 108(2)(a) of the RMA, imposed a condition on a resource consent in relation to the same development for the same purpose; or
- the developer will fund or otherwise provide for the same reserve, network infrastructure or community infrastructure; or

- a third party has funded or provided, or undertaken to fund or provide, the same reserve, network infrastructure or community infrastructure; or
- Council has already required a development contribution for the same purpose in respect of the same building work, whether on the granting of a building consent or a certificate of acceptance.

79. In addition, Council will not require a development contribution in any of the following cases:

- Where, except in the case of a new dwelling, the value of any building work for which a building consent is required is less than $20,000 exclusive of GST, unless the building consent is for a change of use.
- Where, in relation to any dwelling, replacement development, repair or renovation work generates no additional demand for reserve or network infrastructure.
- Where a building consent is for a bridge, dam (confined to the dam structure and any tail race) or other public utility.
- The application for a resource or building consent, authorisation, or certificate of acceptance is made by the Crown.

POSTPONEMENT AND REMISSIONS

80. Postponement of development contribution payment will only be permitted at Council's discretion and only:

- for development contributions over $50,000; and
- where a bond or guarantee equal in value to the payment owed is provided.

81. The request for postponement must be made at the time a resource consent, building consent or service connection is granted. Bonds or guarantees:

- Will only be accepted from a registered trading bank.
- Shall be for a maximum period of 24 months beyond the normal payment date set out in the Policy, subject to later extension as agreed by Council.
- Will have an interest component added, at an interest rate of 2 percent per annum above the Reserve Bank 90-day bank bill rate on the day the bond document is prepared. The bonded sum will include interest, calculated using the maximum term set out in the bond document. If Council agrees to an extension of the term of the guarantee beyond 24 months, the applicable interest rate will be reassessed from the date of Council's decision and the guaranteed sum will be amended accordingly.
- Shall be based on the GST inclusive amount of the contribution.

82. At the end of the term of the guarantee, the development contribution (together with interest) is payable immediately to Council.

83. If the discretion to allow a bond is exercised, all costs for preparation of the bond documents will be met by the applicant.

84. Bonds:

- Will only be accepted where the bond is guaranteed by a registered trading bank.
- Shall be for a maximum period of 24 months, subject to later extension as agreed by an authorised officer.
- Will have an interest component added, at an interest rate of 2 percent per annum above the Reserve Bank 90-day bank bill rate on the day the bond document is prepared. The bonded sum will include interest, calculated using the maximum term set out in the bond document.
- Shall be based on the GST inclusive amount of the contribution.

85. If the discretion to allow a bond is exercised, all costs of preparation of the bond documents will be met by the developer.

86. When considering a request for remission, Council will take into account:

- The purpose of development contributions, Council's financial modelling, and Council's funding and financial policies.
- The extent to which the value and nature of the works proposed by the applicant reduces the need for works proposed by Council in its capital works programme.
- Any other matter(s) that Council considers relevant.

DEVELOPMENT AGREEMENTS

87. Council may enter into specific arrangements with a developer for the provision and funding of particular infrastructure under a development agreement, including the development contributions payable, as provided for under sections 207A-207F of the LGA02. For activities covered by a development agreement, the agreement overrides the development contributions normally assessed as payable under the Policy.

FINANCIAL CONTRIBUTIONS

Summary of Financial Contributions under the District Plan

88. Council is transitioning from financial contributions to development contributions to ensure a more streamlined and efficient policy. As a result, financial contributions will only be collected for reserves if a development contribution cannot be levied. This change reflects the councils commitment to meeting the costs of servicing new growth through development contributions and making the charging process more certain and transparent.

89. Council may charge financial contributions under the RMA in the District for reserves, if a devlopment contribution cannot be levied.

90. Financial Contributions are defined by section 108 of the Resource Management Act (RMA) 1991 and collected using the provisions of the District Plan. Contributions are assessed based on the environmental effects of growth. These are defined in Chapter 15 of the Central Otago District Plan.

91. These charges are adjusted annually using the Special Consultative Procedure under section 83 of the LGA02 – so the Council's Schedule of Fees and Charges should be reviewed to see the current charges. These changes need to maintain compliance with section 108 of the RMA. Further information on financial contributions can be found in the District Plan on Council's website https://www.codc.govt.nz/publications/fees-and-charges.

Table 9: Financial contribution charges at 1 July 2025 (GST inclusive at 15%).

FINANCIAL CONTRIBUTION	FINANCIAL CONTRIBUTION CHARGE[1]	COMMENT
Reserve – Urban	$2,900 per allotment or dwelling	Land; or cash in lieu of land; or both
Reserve – Rural	$1,450 per allotment or dwelling	Land; or cash in lieu of land; or both

[1] Rounded to the nearest ten dollars.

FINANCIAL CONTRIBUTIONS FOR RESERVES – URBAN

92. A financial contribution of money (except as determined in accordance with Policy 15.4.5) towards the provision and/or enhancement of open space, recreation and reserve needs of the District may be levied on subdivision or land use resource consents, or for the erection of new dwellings where no subdivision is required in the Residential, Business, and Industrial Resource Areas (excluding boundary adjustments or subdivision resulting in an amalgamation of titles) and a financial contribution in terms of this rule shall be made with respect to allotments intended to accommodate a residential activity.

FINANCIAL CONTRIBUTIONS FOR RESERVES – RURAL

93. A financial contribution of money (except as determined in accordance with Policy 15.4.5) towards the provision and/or enhancement of open space, recreation and reserve needs of the District may be levied on subdivision or land use resource consents, or for the erection of new dwellings where no subdivision is required in the Rural Settlement and Rural Resource Areas (excluding boundary adjustments or subdivision resulting in an amalgamation of titles) and a financial contribution in terms of this rule shall be made with respect to allotments intended to accommodate a residential activity.

DEFINITIONS

In the Policy, unless the context otherwise requires, the following applies:

Accommodation unit has the meaning given in section 197 of the LGA02.

Activity means the provision of facilities and amenities within the meaning of network infrastructure, reserves, or community infrastructure for which a development contribution exists under the Policy.

Allotment (or lot) has the meaning given to allotment in section 218(2) of the RMA.

Asset Management Plan means Council plan for the management of assets within an activity that applies technical and financial management techniques to ensure that specified levels of service are provided in the most cost-effective manner over the life-cycle of the asset.

Bedroom means any habitable space within a residential unit capable of being used for sleeping purposes and can be partitioned or closed for privacy including spaces such as a "games", "family", "recreation", "study", "office", "sewing", "den", or "works room" but excludes:

- any kitchen or pantry;
- bathroom or toilet;
- laundry or clothes-drying room;
- walk-in wardrobe;
- corridor, hallway, or lobby;
- garage; and
- any other room smaller than $6m^2$.

Where a residential unit has any *living* or *dining* rooms that can be partitioned or closed for privacy, all such rooms except one shall be considered a bedroom.

Capacity life means the number of years that the infrastructure will provide capacity for and associated HUEs.

Catchment means the areas within which development contributions charges are determined and charged.

Commercial activity means any activity associated with (but not limited to): communication services, financial services, insurance, services to finance and investment, real estate, business services, central government administration, public order and safety services, tertiary education provision, local government administration services and civil defence, and commercial offices.

Community facilities means reserves, network infrastructure, or community infrastructure as defined by the LGA02, for which development contributions may be required.

Community infrastructure means:

- land, or development assets on land, owned or controlled by Council for the purpose of providing public amenities; and
- includes land that Council will acquire for that purpose.

Council means Central Otago District Council.

Development means any subdivision, building, land use, or work that generates a demand for reserves, network infrastructure, or community infrastructure (but does not include the pipes or lines of a network utility operator).

District means the Central Otago.

Gross floor area (GFA) means the sum of the total area of all floors of a building or buildings (including any void area in each of those floors, such as service shafts, liftwells or stairwells) measured:

- where there are exterior walls, from the exterior faces of those exterior walls;
- where there are walls separating two buildings, from the centre lines of the walls separating the two buildings;
- where a wall or walls are lacking (for example, a mezzanine floor) and the edge of the floor is discernible, from the edge of the floor.

See the National Planning Standards 2019.

Household unit equivalent (HUE) means demand for Council services equivalent to that produced by a nominal household in a standard residential unit.

Industrial activity means an activity that manufactures, fabricates, processes, packages, distributes, repairs, stores, or disposes of materials (including raw, processed, or partly processed materials) or goods. It includes any ancillary activity to the industrial activity.

LGA02 means the Local Government Act 2002.

Network infrastructure means the provision of transportation (roading), water, wastewater and stormwater infrastructure.

Place of assembly means Marae, community centres or facilities, halls, places of worship, indoor cultural, recreation, or sporting facilities, clubrooms, cinemas, theatres, and conference facilities.

Policy means this Development and Financial Contributions Policy.

Reserve means land for public open space and improvements to that land needed for it to function as an area of usable green open space. This land is used for recreation, sporting activities and the physical welfare and enjoyment of the public, as well as for the protection of the natural environment and beauty of the countryside (including landscaping, sports and play equipment, walkways and cycleways, carparks, and toilets). In the Policy, reserve does not include land that forms, or is to form, part of any road; or is used, or is to be used, for stormwater management purposes].

Residential unit means building(s) or part of a building that is used for a residential activity exclusively by one household, and must include sleeping, cooking, bathing and toilet facilities. See the National Planning Standards 2019.

Retail activity means any activity trading in goods, equipment or services that is not an industrial activity or commercial activity.

Retirement unit means any dwelling unit in a retirement village but does not include aged care rooms in a hospital or similar facility.

Retirement village has the meaning given in section 6 of the Retirement Villages Act 2003.

RMA means the Resource Management Act 1991.

Service connection means a physical connection to an activity provided by, or on behalf of, Council (such as water, wastewater or stormwater services).

PART 2: POLICY DETAILS

Requirement to have a policy

Council is required to have a policy on development contributions and financial contributions as a component of its funding and financial policies in its Long-term Plan (LTP) under section 102(2)(d) of the LGA02. The Policy meets this requirement.

Funding Summary

94. From 2001/02 to 2033/34 Council plans to incur $837,082,043 (before interest costs) on infrastructure, including works partially or wholly needed to meet the increased demand for community facilities resulting from growth. Of this cost, 22 percent will be funded from development contributions. Including interest costs, the total amount to be funded is $198,896,988.

95. Table 10 provides a summary of the total costs of growth-related capital expenditure and the funding sought by development contributions for all activities and catchments.

Table 10. Total cost of capital expenditure for growth and funding sources

Funding policy summary

FUNDING GROWTH EXPENDITURE

96. Council considers the provision of suitable infrastructure as one of its key strategic activities that aid in the provision of social, economic, environmental and cultural well-being of the community. Providing infrastructure in anticipation of growth is an obligation of Council. Council will often invest in infrastructure capacity well in advance of the uptake of that capacity. Therefore recouping the growth component of this investment is an obligation Council has on behalf of the community.

97. Population and business growth create the need for new subdivisions and development, and these place increasing demands on the assets and services provided by Council. Accordingly, significant investment in new or upgraded assets and services are required to meet the demands of growth.

98. Council has decided to fund these costs from:

- Development contributions under the LGA02 for:
  - water supply;
  - wastewater and
  - transport
  - community Infrastructure
  - reserve land
  - reserve improvements
- Financial contributions under the RMA for:
  - reserves

99. In forming this view, Council has considered the matters set out in section 101(3) of the LGA02 within its Revenue and Financing Policy, and within the Policy.

100. The Revenue and Financing Policy is Council's primary and over-arching statement on its approach to funding its activities. It outlines how all activities will be funded, and the rationale for Council's preferred funding approach.

101. In addition, Council is required under section 106(2)(c) of the LGA02 to explain within the Policy why it has decided to use development contributions and financial contributions to fund capital expenditure relating to the cost of growth. This assessment is below.

102. Council has chosen to use development contributions for water supply, wastewater, transport, community infrastructure and reserves activities. Historically, Council have collected financial contributions for reserves. However, with the addition of reserve land and reserve improvements included in this development contributions policy, financial contributions will no longer be collected for reserves. As Council works through the district plan review the transfer of reserves over to development contributions will be considered.

103. Council has considered whether development contributions and financial contributions are an appropriate source of funding considering each activity, the outcomes sought, and their links to growth infrastructure. Council's mission is to support and enable a safe, healthy, and thriving community and environment. Council has developed 4 outcomes to help express the needs of the community:

- Respect for the Environment
- Robust Social Fabric
- Increased Economic Prosperity; and
- Expressions of Culture

104. These outcomes seek a well serviced growing community that is financially sustainable. Council is committed to investing in Council infrastructure to renew plant when needed, to accommodate population growth, and to meet environmental and health standards. Development contributions and financial contributions provide a mechanism for funding of water, wastewater, stormwater, roading, community infrastructure and reserves needed to achieve our growth ambitions that may not otherwise be affordable to our community. As a dedicated growth funding source, they also offer more secure funding through which we can deliver on our outcomes for our growing communities.

Other funding decision factors (sections 101(3)(a)(ii) – (v))

105. Council has considered the funding of growth-related community facilities against the following matters:

- The distribution of benefits between the community as a whole, any identifiable part of the community, and individuals, and the extent to which the actions or inaction of particular groups or individuals contribute to the need to undertake the activity.
- The period in or over which those benefits are expected to occur.
- The costs and benefits, including consequences for transparency and accountability, of funding the activity distinctly from other activities.

106. A summary of this assessment is below.

Table 11: Other funding decision factors

WHO BENEFITS / WHOSE ACT CREATES THE NEED	A significant portion of Council's work programme over the next 10 years is driven by development or has been scoped to ensure it provides for new developments. The extent to which growth is serviced by, and benefits from, an asset or programme as well as how much it serves and benefits existing ratepayers is determined for each asset or programme. Council believes that the growth costs identified through this process should be recovered from development, as this is what creates the need for the expenditure and /or benefits principally from new assets and additional network capacity. Where and to the extent that works benefit existing residents and businesses, those costs are recovered through rates. The Catchment determination section below outlines how Council determined the catchments for development contributions in the Policy.

PERIOD OF BENEFIT	The assets constructed for development provide benefits and capacity for developments now and developments in the future. In many cases, the “capacity life” of such assets spans decades. Development contributions allow development related capital expenditure to be apportioned over the capacity life of assets. Developments that benefit from the assets will contribute to their cost, regardless of whether the developments happen now or in the future. Financial contributions to be secured on land use activities and/or subdivision activities which represent the cost imposed on the wider community in relation to remedying or mitigating adverse effects as a consequence of that land use activity and/or subdivision activity.
FUNDING SOURCES & RATIONALE INCLUDING RATIONALE FOR SEPARATE FUNDING	The cost of supporting development in the Central Otago District is significant. Development contributions and financial contributions send clear signals to the development community about the cost of growth and the capital costs of providing infrastructure to support that growth. The benefits to the community are significantly greater than the cost of policy making, calculations, collection, accounting and distribution of funding for development contributions.

Overall impact of liability on the community (section 101(3)(b))

107. The liability for revenue falls directly with the growth community. At the effective date of this Policy, Council considers that any negative impact on the social, economic, environmental and cultural well-being of this particular sector of the community is outweighed by a positive impact on the wider community. At any stage in the future where there may be impacts of this nature, Council may revisit this policy.

108. Council has also considered the impact of the overall allocation of liability on the community. In this case, the liability for revenue falls directly with the development community. Council considers that the level of development and financial contributions is affordable and does not consider it likely that there will be an undue or unreasonable impact on the social, economic, environmental and cultural wellbeing of this section of the community.

109. Moreover, shifting development costs onto ratepayers is likely to be perceived as unfair and would significantly impact the rates revenue required from existing residents who do not cause the need for, or benefit directly from, the growth infrastructure needed to service new developments.

110. Overall, Council considers it fair and reasonable, and that the social, economic, environmental and cultural interests of the District’s communities are best advanced through using development contributions and financial contributions to fund the costs of growth-related capital expenditure for community facilities.

Catchment Determination

111. When setting development contributions, Council must consider how it sets its catchments for grouping charges by geographic area.

112. The LGA02 gives Council wide scope to determine these catchments, provided that:

- The grouping is done in a manner that balances practical and administrative efficiencies with considerations of fairness and equity; and
- Grouping by geographic area avoids grouping across an entire district wherever practical.

113. Council has determined that there will be:

- Scheme based catchments for water supply and wastewater
- One district wide catchment for Transport
- One district wide catchment for Community Infrastructure
- One district wide catchment for Reserve Land and Reserve Improvements

114. Council considers that this strikes the right balance between practical and administrative efficiency, and considerations of fairness and equity for the following reasons:

- Using scheme-based catchments for water supply and wastewater ensures that there is a direct link between additional demand and growth costs imposed on the scheme.
- Going down a further level to consider additional demand to individual supply zones is considered inefficient and would likely result in significant movements in the contributions from policy to policy.
- All developments within the district's boundaries have the ability to use the transport network therefore all developments shall be assessed for a development contribution. Transport development contributions fund growth related capital expenditure for all components of the transportation network.
- All developments, irrespective of location, have access to new Community Infrastructure and Parks & Reserves and can benefit from it if they choose to.
- Going down a further level to consider additional demand to individual wards is considered inefficient, especially that these assets are now districtised, and would likely result in significant movements in the contributions from policy to policy.

Significant Assumptions of the Policy

METHODOLOGY

115. In developing a methodology for the development contributions in the Policy, Council has taken an approach to ensure that the cumulative effect of development is considered across each catchment.

PLANNING HORIZONS

116. A 10-30-year timeframe has been used as a basis for forecasting growth and growth-related assets and programmes. This is set out in Council's asset management plans.

PROJECTING GROWTH

117. The District has experienced strong population and economic growth, and this growth is forecast to increase further. Statistics New Zealand (Stats NZ) figures indicate strong population growth in the District, with the number of residents increasing by 3.3% per annum since 2013.

118. Using growth projections developed by Rationale Ltd as a base, the key assumptions about future growth are:

- Years 2025-2034:
  - Population growth in the District of around 1.9% (or around 573 people) per annum.
  - Residential unit growth in the District of around 1.8% (or around 290 units) per annum.
  - Commercial and industrial rating unit growth in the District of around 1.5% (or around 20 units) per annum.
- Years 2034-2054:
  - Population growth in the District of around 1.5% (or around 544 people) per annum.
  - Residential unit growth in the District of around 1.3% (or around 274 units) per annum.
  - Commercial and industrial rating unit growth in the District of around 1.0% (or around 10 units) per annum.

119. A five-yearly breakdown of population and household forecasts are in Table 12.

Table 12: Five-yearly breakdown of population and household forecasts

120. Council forecasts demand of approximately 450 rating units for business development over the next 30 years to accommodate population growth.

121. The combined demand forecast is approximately 8,400 rating units over 30 years – 7,950 HUEs for households and 450 HUEs for business. Further information about these forecasts can be found in Council's 2025-2034 Long-term Plan and on Council's website https://www.codc.govt.nz.

BEST AVAILABLE KNOWLEDGE

122. Development contributions are based on capital expenditure budgets included in Council's asset management plans. The capital expenditure budgets and projected estimates of future asset works are based on the best available knowledge at the time of preparation. As better information becomes available the Policy will be updated, generally through the Annual Plan process.

KEY RISKS/EFFECTS

123. There are two key risks and resulting effects associated with administering development contributions. These are:

- That the growth predictions do not eventuate, resulting in a change to the assumed rate of development. In that event, Council will continue to monitor the rate of growth and will update assumptions in the growth and funding predictions, as required.
- That the time lag between expenditure incurred by Council and development contributions received from those undertaking developments is different from that assumed in the funding model, and that the costs of capital are greater than expected. This would result in an increase in debt servicing costs. To guard against that occurrence, Council will continue to monitor the rate of growth and will update assumptions in the growth and funding models, as required.

SERVICE ASSUMPTIONS

124. It is assumed that methods of service delivery and levels of service will remain substantially unchanged and in accordance with Council's Long-term Plan, asset management plans and Infrastructure Strategy.

FUNDING MODEL

125. A funding model has been developed to calculate development contributions under the Policy. It accounts for the activities for which contributions are sought, the assets and programmes related to growth, forecast growth and associated revenue. The funding model embodies several important assumptions, including that:

- All capital expenditure estimates are inflation adjusted and GST exclusive.
- The levels of service (LOS)/backlog, renewal and maintenance portions of each asset or programme will not be funded by development contributions. See the Cost allocation section below.
- The growth costs associated with an asset are spread over the capacity life of the asset and any debt incurred in relation to that asset will be fully repaid by the end of that capacity life.
- Interest expenses incurred on debt accrued will be recovered via development contributions and shared equally over all forecast HUEs over a 10-year period for each activity/catchment.

Cost Allocation

126. Council must consider how to allocate the cost of each asset or programme between three principal drivers – growth, LOS/backlog, and renewal. Council's general approach to cost allocation is summarised as:

- Where a project provides for and benefits only growth, 100% of a project's cost is attributed to growth. To qualify for this, there would have to be no renewal element (see below) or material level of service benefit or capacity provided for existing residents and businesses.
- Where a project involves renewal of existing capacity: The following approach is used.
  - A renewal project that renews an asset to its original condition and capacity is 100% renewal.
  - If the capacity is increased as part of the renewal, then the renewal portion is estimated using the age of the asset over its expected standard life.
  - If the asset age is unknown, then the growth portion will be based on the proportion that growth (in HUEs) will make up of the future community (in HUEs). The remainder is apportioned to renewal.
- If a project provides for growth and LOS, after deducting any share of costs attributable to renewal, Council will split the cost between growth and LOS based on the future beneficiary split. Under this approach, the cost attributed to:
  - Growth will be based on the proportion that growth (in HUEs) will make up of the future community (in HUEs)".]
  - LOS will be based on the proportion that the existing community (in HUEs) will make up of the future community (in HUEs).
  - If the asset age is unknown, then the growth portion will be based on the proportion that growth (in HUEs) will make up of the future community (in HUEs). The remainder is split between LOS and renewal.

127. For particularly large and expensive projects, Council may undertake a specific cost apportionment assessment that differs from the general approach outlined above.

Calculating the development contributions

128. This section outlines how the development contributions were calculated in accordance with section 203 and Schedule 13 of the LGA02.

PROCESS

129. The steps needed to determine growth, growth projects, cost allocations, and to calculate the development contributions charges are summarised in Table 13.

Table 13: Summary of development contribution calculation methodology

STEP	DESCRIPTION / COMMENT	EXAMPLE ($ GST EXC)
1. Forecast growth	Council estimates potential land supply and likely take up of that land. The estimates help provide household and business growth forecasts for up to 30 years. See the *Projecting growth* section above for further information.	Existing Cromwell HUEs = 4,800. 20 yr growth = 1,500 HUEs
2. Identify projects required to facilitate growth	Council develops the works programme needed to facilitate growth. In some cases, Council may have already undertaken the work. The future programme in the Policy is for 10 years.	WS Cromwell WTP Upgrade = $10.2M
3. Determine the cost allocation for projects	The cost of each asset or programme is apportioned between renewal, growth, and LOS/backlog in accordance with the approach outline in the *Cost allocation* section of the Policy. Schedules 2 and 3 of the Policy outline the amount required to fund growth from development contributions for each of these assets or programmes.	Growth % = 1500/(4800+1500) = 24% Growth $ = 24% * $10.2M = $2.4M
4. Determine growth costs to be funded by development contributions	Council determines whether to recover all of the growth costs identified in step 3 from development contributions, or whether some of the growth costs will be funded from other sources.	100% of growth costs funded from development = $2.4M
5. Adjust for interest costs and charge inflation adjustments	The raw cost requires adjustments in the funding model to ensure total revenue received over 10 years equals total costs after accounting for interest costs. These costs are shared equally among all HUEs in the relevant catchment over 10 years. These adjustments impact the final charges.	Interest costs estimated at $0.14M means total cost to fund via DCs = $2.54M
6. Divide development contribution funded growth costs by capacity lives	The growth costs from step 5 are divided by the estimated capacity life (defined in HUEs) to provide a charge per HUE for each future and past asset and programme. This is done on a year by year basis so that the consumption of an assets capacity can be considered annually.	Cost per HUE = $2.54M/1500 HUEs = $1,700 per HUE
7. Sum all per asset charges	For each catchment and activity, add up the per HUE asset or programme charges to provide a total development contribution. This is done over the future 10 year analysis window to give a charge that reflects the capacity consumed over the next 10 years. For each activity and catchment, development contributions fund the programme on an aggregated basis.	Total growth costs in 10 yr analysis window = $1.25M. Total HUEs in 10 yr analysis window = 909 HUEs. Charge per HUE = $1.25M / 909 HUEs = $1,374 per HUE

SUMMARY OF CALCULATIONS

130. Schedule 1 summarises the calculation of the charge per HUE for each activity/catchment (step 7). Schedules 2 and 3 provide information on each asset or programme including the information in steps 2 - 6.

Schedule 1 – Charge per HUE calculations

This schedule summarises the calculation of the charge per HUE for each activity for each catchment. This includes the components of the charge related to capital expenditure on past assets, capital expenditure on future assets, and interest costs. All figures exclude GST.

Community Boards

The Council has four community boards covering the entire district. Community boards provide a link between Council and the community. Our Council is one of the few in the country that maintains a comprehensive community board structure with significant delegated powers.

Long-term Plan Survey Report

Introduction

Every three years Council adopts a Long-term Plan (LTP) that outlines the strategic direction and funding priorities for the future. Consultation provides a basis for public participation in decision-making for the LTP. This consultation includes a number of issues that are significant/important to the district and its communities.

For the 2025-2034 LTP, Council asked the community 'What's important?". Nine key issues were presented with options for consideration. In addition, four significant strategies and policies were reviewed through the LTP process.

The following report details the feedback received from the community on Central Otago District Council's consultation on the 2025-34 draft Long-term Plan.

Research Design

The LTP consultation was conducted between 1 April - 1 May 2025. Public submissions were received via the LTP consultation survey as well as a student survey.

LTP Consultation Survey

A total of 903 submissions were received. Submissions were received via Council's Let's Talk - Kōrero Mai consultation platform (461 submissions) and through hard copy (442). One staff submission was received regarding fees and charges for fast-track applications. Participants who submitted through Let's Talk Kōrero Mai were required to register on the consultation platform. Those who submitted on hard copy were not registered on Let's Talk – Kōrero Mai. Hard copy submissions and submissions received via email were manually entered into the engagement platform for data analysis purposes. Everyone had an opportunity to participate, thus the sample gathered was based on self-selection.

In this survey respondents were asked nine multiple choice questions (excluding demographic questions) and two open-ended questions. Every multiple-choice question had the option to add comments. The "Community halls and facilities" question provided an option to identify specific halls or facilities and provide comment on each.

There was also an opportunity to attach supporting documents both to the "Community halls and facilities" question and then again after the "Other comments" question. Attachments received in hard copy were scanned and included with the hard copy submission. All attachments have been analysed and are included in the results section of this report. Apart from demographic questions, no questions were mandatory, allowing respondents to skip past questions that they did not prefer to answer.

The demographics of respondents show a disproportionately high response rate from the Vincent Ward. Of significance, is the even distribution between age groups of those who chose to provide their age. Typically, there is a higher response rate from those 55 and older. For this survey, the age groups which had the highest response rates were the 18-24 year olds and the 45–54 year-olds, with a strong representation from both the 24-34 age group and the 35-44 age group.

When looking at respondents' connection to the district, 83% either live, work or pay rates in Central Otago District (17% of respondents did not answer that question or indicated that they were a visitor to the district).

Based on the number of submissions received (n=903) and the population of the Central Otago District (25,500[1]), the data in this survey is accurate to a 95% confidence level with a margin of error +/- 3.2 %[2]. However, it is noted that the survey sample is not stratified to match the demographics of the district.

LTP Student Survey

A total of 313 survey responses were received. Submissions were received via Council's Let's Talk - Kōrero Mai consultation platform and through hard copy. Hard copy submissions were manually entered into Let's Talk – Kōrero Mai for data analysis. Everyone had an opportunity to participate, thus the sample gathered was based on self-selection.

The student survey was designed to encourage young people (under 18 years old) to get involved in the LTP. The student survey was a simplified version of the submission form and did not include the question "What's our plan for water?" and the question "Volumetric water charges". Other questions were simplified to focus on overall support or opposition, with details around funding options removed. In total, there were seven multiple-choice questions (excluding demographic questions), each with the opportunity to provide comment. There was also an option to attach supporting documents.

The demographics of youth respondents show a disproportionately high response rate from the Vincent Ward (83%). The largest number of responses came from the 13-15 age group (48%) and the 16-17 age group (32%).

Based on the number of student survey responses received (n=313) and the population of the Central Otago District (25,500), the data in this survey is accurate to a 95% confidence level with a margin of error +/- 5.5 %[3]. However, it is noted that the survey sample is not stratified to match the demographics of the district.

Pre-Consultation Promotion

Conversations about the Long-term Plan began with 25 Council-organised Hall committee meetings (schedule below). These meetings served as an information sharing platform. Based on information provided at those meetings, a comprehensive document was created that outlines all of the key data on each hall being considered for divestment. Click here to read the Halls and Facilities Guide.

Facility	Date	Location
Maniototo Community Meeting facilitated by Amie Pont	28 Jan	Māniatoto Art Centre

Council staff engaged in early conversations about LTP topics and promoted upcoming community meetings at three local A & P Shows:

A & P Show	Date
Omakau A & P Show	8 Feb
Māniatoto A & P Show	12 Feb
Mt. Benger A & P Show	15 Feb

Consultation Promotion

The survey was promoted heavily, including a series of Community Information Sessions (6) and Q & A Drop-ins (5) throughout the district, as well as an online session. The calendar and number of community members who attended is below.

Community Information Sessions	Date/Time	Number of attendees
Alexandra	2 April 5.30pm – 7.30pm	34
Millers Flat	3 April 5.30pm – 7.30pm	29
Cromwell	7 April 5.30pm – 7.30pm	25
Roxburgh	8 April 5.30pm – 7.30pm	14
Ranfurly	9 April 5.30pm – 7.30pm	9
Omakau	17 April 5.30pm – 7.30pm	16
Q & A Drop-ins	Date/Time	Number of attendees
Alexandra	10 April 11am – 1pm	10
Cromwell	14 April 11am – 1pm	6
Roxburgh	15 April 11am – 1pm	1
Ranfurly	16 April 11am – 1pm	5
Clyde	28 April 9.30am – 11am	8
Online Information Session	Date/Time	Number of attendees
Online	22 April 8pm – 9pm	20

In addition to the Community Information Sessions, Online Information Session and Q & A Drop-ins, this consultation was promoted through a number of channels.

CODC communicated with local media with media releases on 31 July One District Central Otago - Central Otago District Council (codc.govt.nz) and 27 March Start of LTP consultation delayed a few days - Central Otago District Council. A column about the LTP was featured in the Central App. Related stories were also in the Central App and The CO News, and coverage of the Ida MacDonald Roxburgh Pool Punawai Ora Keyin the Teviot Bulletin.

Radio New Zealand covered the issue of Council's proposed divestment of select community halls on 5 May 2025 https://www.rnz.co.nz/news/thedetail/559901/in-central-otago-historic-buildings-on-the-council-chopping-block.

Districtwide print advertising was placed including The Noticeboard in The CO News, Positively Maniototo, Teviot Bulletin, Cromwell Bulletin and the Central App. The Burn radio advertising was also used to reach the Maniototo communities.

Council engaged with the community on social media as well, posting 24 times on Facebook about the LTP.

Mayor Tamah Alley promoted the consultation through weekly discussions on Radio Central and a session on Burn Radio in the Māniatoto. Mayor Alley also published a column in the Central App, attended numerous community group meetings, such as the Alexandra Council of Social Services. Mayor Alley also promoted this consultation on social media.

Elected members were also involved in promoting the LTP in their respective communities, through one-on-one interactions, attending community meetings and posting on social media.

A short video was created to help explain the key topics being considered. The video was shown at all Community Information Sessions and was further promoted on CODC's Let's Talk – Kōrero Mai engagement platform and on social media. The video can be viewed on YouTube by clicking this link CODC LTP Consultation 2025-34 - Mayor Tamah Alley.

An outreach strategy was designed to engage face-to-face with groups who Council don't often hear from through our normal channels. Youth and young families were identified as target groups based on the topics included in this LTP, and efforts were made to engage with those groups and seek feedback about what Council can do to encourage involvement.

- Central Otago REAP Choices class, Alexandra
- Central Otago REAP Super Skills – Super Grans
- Maniototo Social Services Network, Ranfurly
- Puna Rangatahi, Alexandra and Districts Youth Trust
- Youth Network Hui, Alexandra
- Young Families Collective, Cromwell
- Young Families Coordinators, Alexandra
- Mums for Mums, Cromwell
- LTP kid's colouring in page
- Uruuruwhenua Health, Alexandra
- Schools districtwide, provided advertising for school newsletters (focus on school families and students)

- Sports clubs
- Council engagement email (25 individuals and organisations who have expressed an interest in receiving information about community engagements)
- Dunstan High School Head Girl spoke about the LTP and encouraged her fellow students to get involved at the student assembly on 4 April.
- Alexandra and Districts Youth Council
- Youth organisations (Puna Rangatahi, Cromwell Youth Trust)

Other outreach efforts included:

- LTP reminder postcards sent to all ratepayers who receive rates bills via the mail (9,362 recipients)
- LTP reminder on April digital rates bills (3,503 recipients)
- Mailed rates invoices (8,567 recipients)
- Tourism Central Otago newsletter reminder to get involved in LTP
- Screen display at all Council Service Centres, libraries and pools
- Internal Council email signature displayed LTP message for entire campaign period

Information about engaging in this consultation was distributed through three email databases

- Rates (3,503 recipients)
- Pools (4,573 recipients)
- Let's Talk (929 recipients)

Submission Results

Let’s Talk Consultation Survey

Consultation feedback was compiled and analysed with the assistance of an artificial intelligence (AI) tool. While AI helped sort through large amounts of data quickly and spot patterns, our team made sure the findings were accurate, thoughtful and easy to understand.

By default, each question includes an About section which includes select demographics and a Summary. Ward is always included but age and gender are only selectively included. An analysis of each option is also included for each question.

Overall Survey Insights & Themes

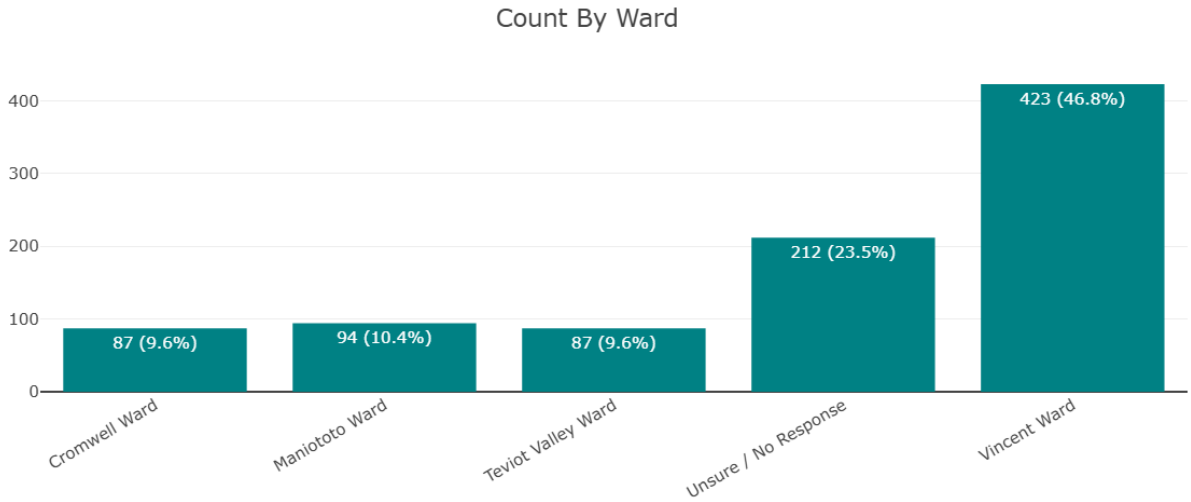
Introduction
The LTP consultation survey received 903 submissions and covered a range of topics. These topics included water plans, volumetric water charges, community halls and facilities, pools, community hubs, the Supercars Championship, and artificial turf at two schools.

Total Unique Submitters Processed: 903

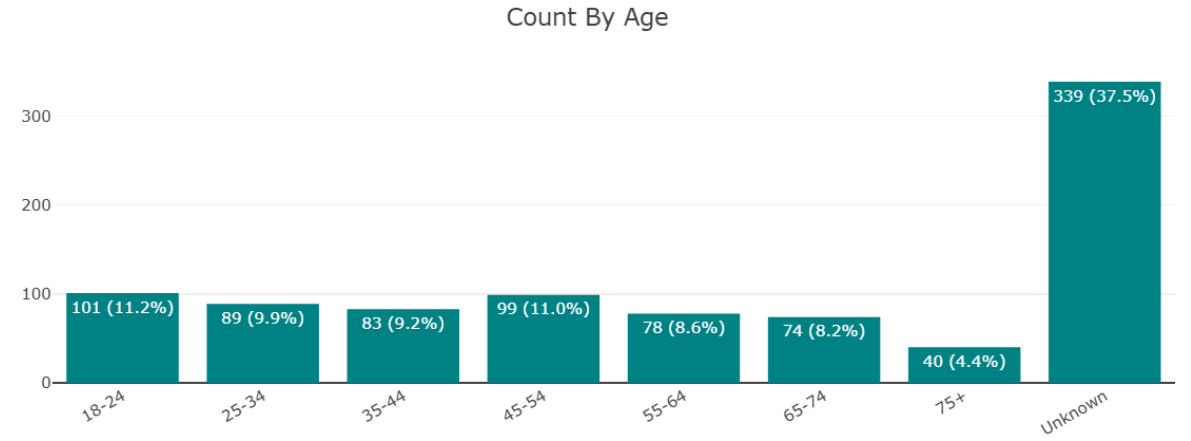
Highlights

Based on the survey data, survey data indicated several recurring positive themes. A strong emphasis was placed on the importance of community facilities such as the Manuherekia Valleys Community Hub and the artificial turf projects at both Maniototo Area School and Dunstan High School, with respondents highlighting their potential to enhance community connection, provide versatile spaces for sports and activities, and reduce travel burdens for families. There was also support for council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora, driven by the desire to ensure the pool's sustainability and its importance for water safety education and recreation. Finally, a notable number of respondents favoured retaining the Alexandra outdoor pool, recognising its value as a safe and enjoyable swimming venue, particularly during the summer months, and its unique role in hosting events like ice swimming championships.

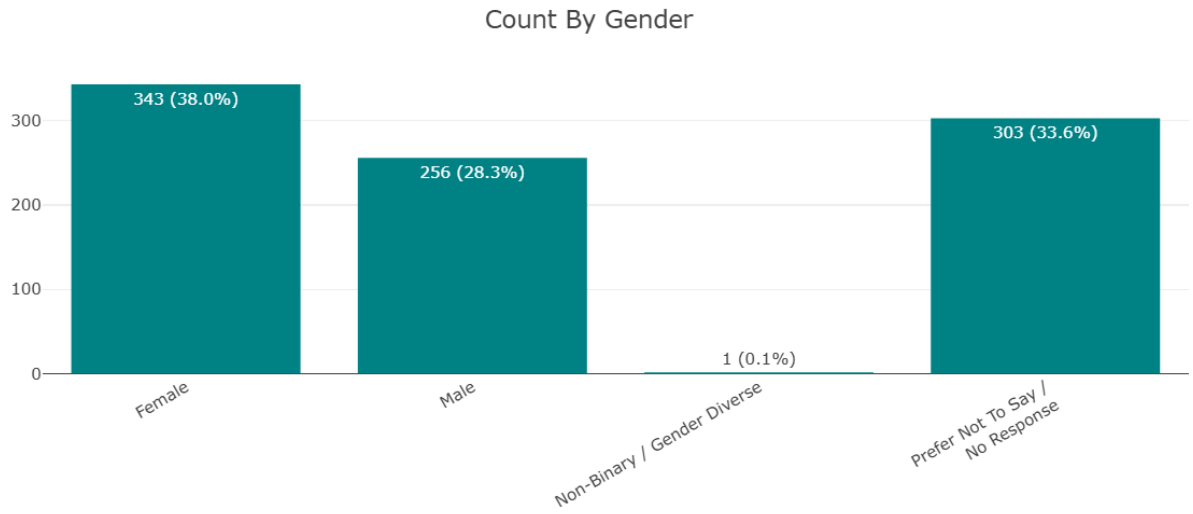
Areas for Improvement



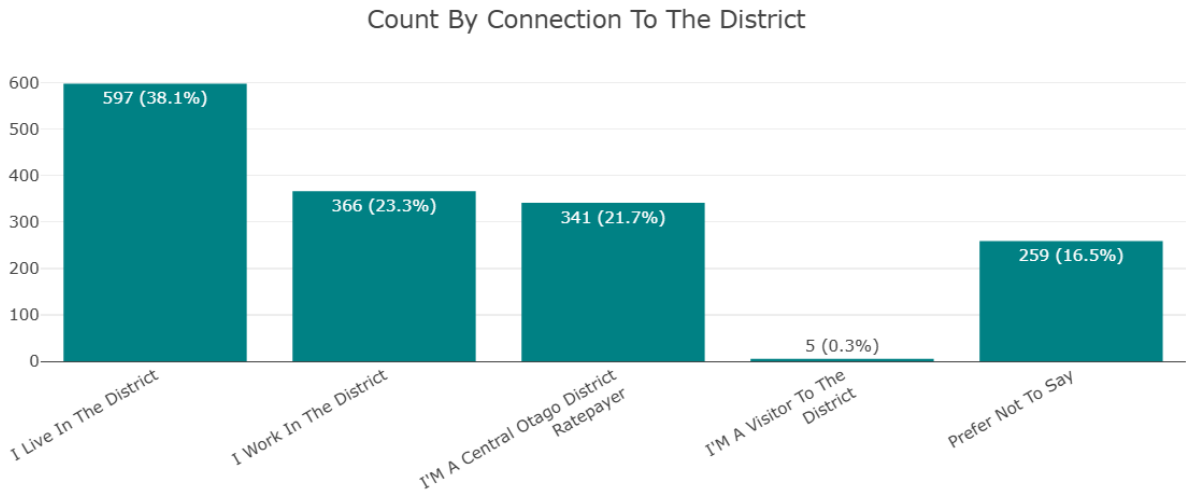
Based on the survey data, several recurring themes indicate areas of concern. Firstly, there was widespread apprehension regarding increased costs to ratepayers, whether through new water charges, funding community hubs, or supporting events like Supercars. This was often coupled with a desire for greater transparency and accountability in Council spending and decision-making. Secondly, there was a consistent tension between community-led initiatives and Council responsibility, particularly evident in discussions around community halls, swimming pools, and the Manuherekia Hub, with concerns about equitable resource distribution and the long-term sustainability of community-run facilities. Finally, there was a recurring debate about prioritising essential services versus 'nice-to-have' projects, especially in the context of limited resources and rising rates, with some respondents questioning the value and necessity of certain projects like artificial turfs and the Supercars event, advocating instead for focusing on core community needs and infrastructure.



Summary



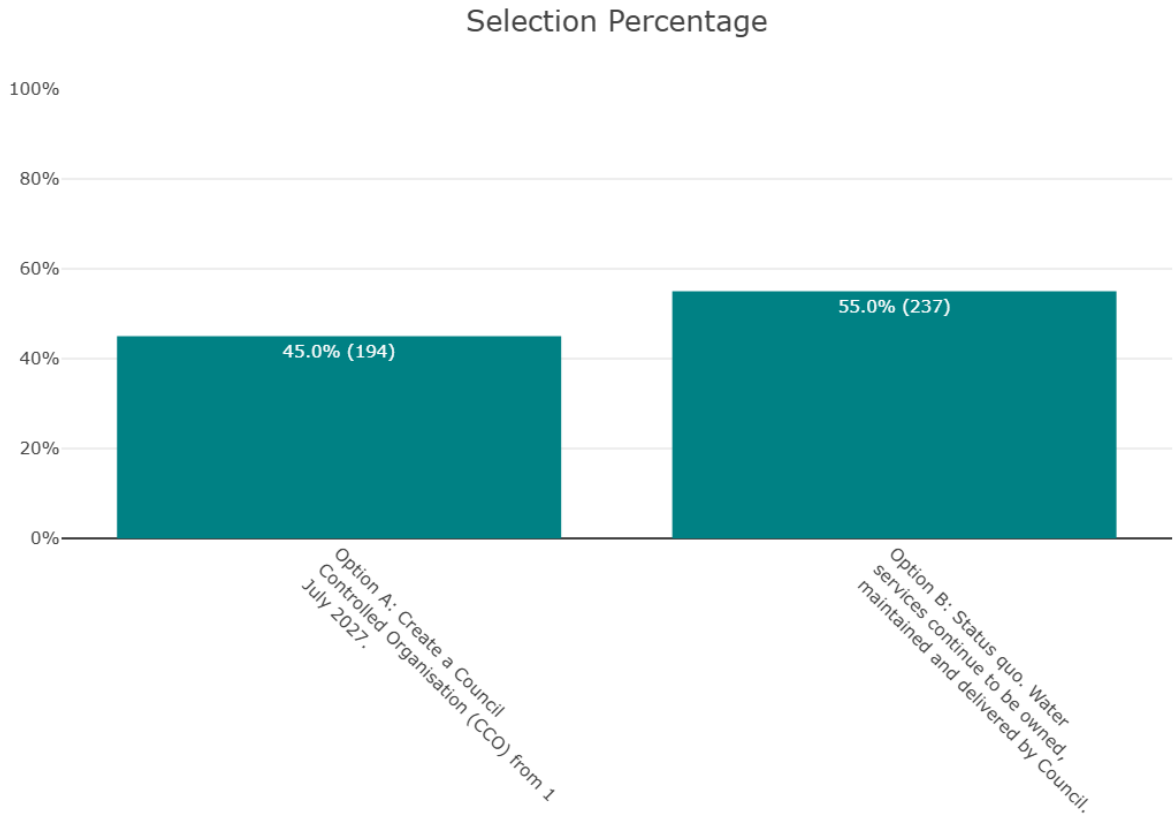
The survey, encompassing 903 unique submissions, reveals a community with diverse opinions on key issues. While there is support for projects aimed at enhancing community well-being, such as the Maniototo and Dunstan High School turf upgrades and the Manuherekia Valleys Community Hub, concerns about funding sources and financial implications are prevalent. Additionally, there are mixed views regarding water management and charges, and differing opinions on the allocation of resources for community assets like pools and the Supercars event, highlighting the need for careful consideration of community values and financial sustainability in council decision-making.



Submitter Demographics

Understanding the demographic profile of survey participants provides context to the feedback received. This section breaks down the 903 submitters by key categories such as ward, age, and gender, offering insights into the different groups who shared their perspectives on the consultation.

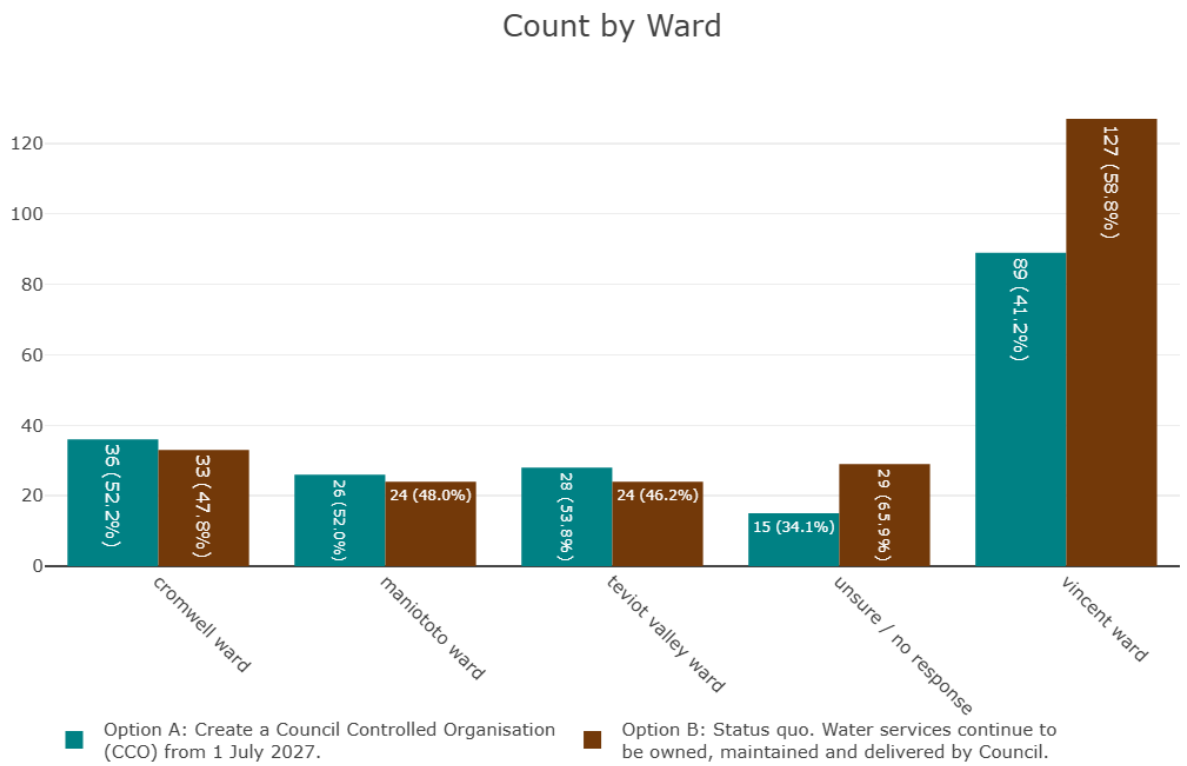
Please note that respondents were able to select more than one option on this question.



What's our plan for water

n=431
comments: 134

About



The question asks about the future of water services, presenting two options: establishing a Council Controlled Organisation (CCO) by 1 July 2027, or maintaining the current status where the council owns, maintains, and delivers water services.

There were 431 total responses: 194 voted for 'Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027. ', 237 voted for 'Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.'. 134 people made a comment.

Responses By Ward

Preferences varied across the wards. Respondents from Cromwell ward showed a slight preference for Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027, while Vincent ward respondents favoured Option B: Status quo. Water services continue to be owned, maintained and delivered by Council. The Maniototo and Teviot Valley wards had similar numbers selecting both options, and those who selected 'unsure / no response' tended to favour Option B: Status quo. Water services continue to be owned, maintained and delivered by Council slightly more than Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.

Summary

Respondents were split on the water plan, with 55% favouring the status quo (Option B) and 45% preferring a Council Controlled Organisation (CCO) from 1 July 2027 (Option A). Concerns about potential cost increases, bureaucracy, and influence from other councils, particularly QLDC, were prominent themes. Many respondents also highlighted the need for more information to make an informed decision, and some expressed concerns about the potential for privatisation or reduced local control.

Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.

comments: 64

Summary

The sentiment towards Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027 is mixed. While many respondents support the idea of a CCO for potential financial benefits, economies of scale, and access to greater funds, there are significant concerns about loss of local control, potential for increased costs and bureaucracy, transparency, and the risk of partnering with councils that have different values or financial challenges. Some respondents also expressed concerns about potential privatisation and the need for community input on pricing and service levels.

Key Points

- Some respondents expressed concerns about potential cost increases and inefficiencies associated with a CCO, suggesting the need for robust oversight and clear accountability.
- Several respondents highlighted the importance of transparency and community input in the decision-making processes of a CCO, particularly regarding pricing and service levels.

- A number of respondents raised concerns about partnering with other councils, specifically QLDC, fearing potential domination and financial burden.
- Some respondents emphasised the need for safeguards against privatisation and advocated for in-house projects and maintenance.
- Several respondents stressed the importance of addressing water quality issues in specific areas like Ophir and Naseby, regardless of the chosen governance model.

In-depth Analysis
Arguments For

Many respondents supported Option A, creating a Council Controlled Organisation (CCO), for its potential to improve efficiency and effectiveness in water management. They anticipate financial savings in the short and long term, along with access to a higher debt ceiling and the ability to spread costs over a longer period. Several respondents highlighted the benefit of working with experienced professionals from other councils to avoid a silo mentality and share resources. Some respondents agreed that a CCO might alleviate the financial pressure on local government and enable access to greater funds.

Arguments Against
Several respondents expressed concerns about the potential risks associated with Option A. These include the lack of transparency and community input, potential for increased costs and reduced service levels, and the possibility of future privatisation. Some respondents were concerned about partnering with other councils, particularly Queenstown Lakes District Council, fearing that their challenges could dominate funding. A few respondents were worried about the CCO becoming a bureaucracy, governance inefficiencies, cost blow outs, and a privatised model with higher user costs. Some respondents also raised concerns about the CCO's rules of engagement and the need to protect CODC from poor decisions made by other councils.

Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

comments: 70

Summary

Overall sentiment towards maintaining the status quo (Option B) is mixed. While it was the most selected option, many respondents expressed concerns about potential cost increases and a lack of transparency with a Council Controlled Organisation (CCO). Respondents who preferred the status quo valued local control and accountability, and some believed that a CCO would lead to unnecessary bureaucracy and duplication of costs, drawing parallels to negative experiences with similar entities elsewhere in New Zealand. Others felt they lacked sufficient information to make an informed decision about the CCO option.

Key Points

- Respondents favour the status quo due to concerns that a CCO would increase costs through additional bureaucracy and staffing.
- A number of respondents expressed a lack of information to make an informed decision, but still preferred the status quo.
- Several respondents raised concerns about potential partnerships with other councils, particularly QLDC, and the risk of inheriting their water issues.
- Some respondents believe water services are a core council function and should not be delegated to a separate entity.
- A few respondents suggested improvements within the current model, such as better communication and accountability, rather than a structural change to a CCO.

In-depth Analysis
Arguments For

Many respondents favoured maintaining the status quo because they believe the council is best positioned to manage water services, ensuring local control and accountability. Some respondents expressed concerns that a CCO would lead to increased bureaucracy, costs, and a lack of transparency, drawing parallels to negative experiences with similar entities like Wellington Water. A few respondents also highlighted the importance of local people controlling water resources and tailoring solutions to specific community needs, such as securing a water supply for Ophir.

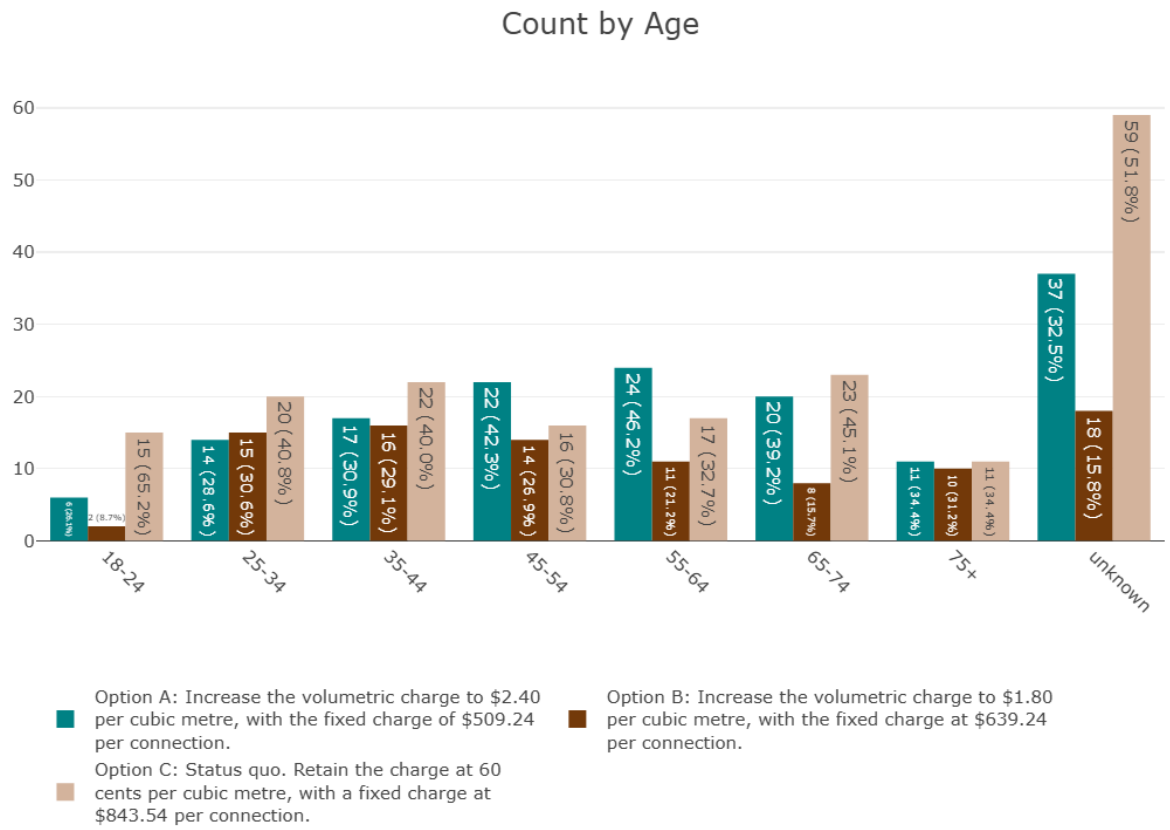
Arguments Against

Several respondents expressed concerns about the lack of information available to make an informed decision, particularly regarding the costs and structure of a potential CCO. Some respondents worried that a CCO could lead to increased costs for ratepayers due to duplicated administration and governance, as well as potential debt. A few respondents also voiced distrust of other councils, particularly QLDC, and feared that joining with them could burden Central Otago ratepayers with additional problems. Concerns were also raised about the potential for a CCO to be a step towards privatisation and a loss of local control over water resources. One respondent felt the council was withholding information to sway the decision, and another felt that the options presented were too limited.

Volumetric water charges

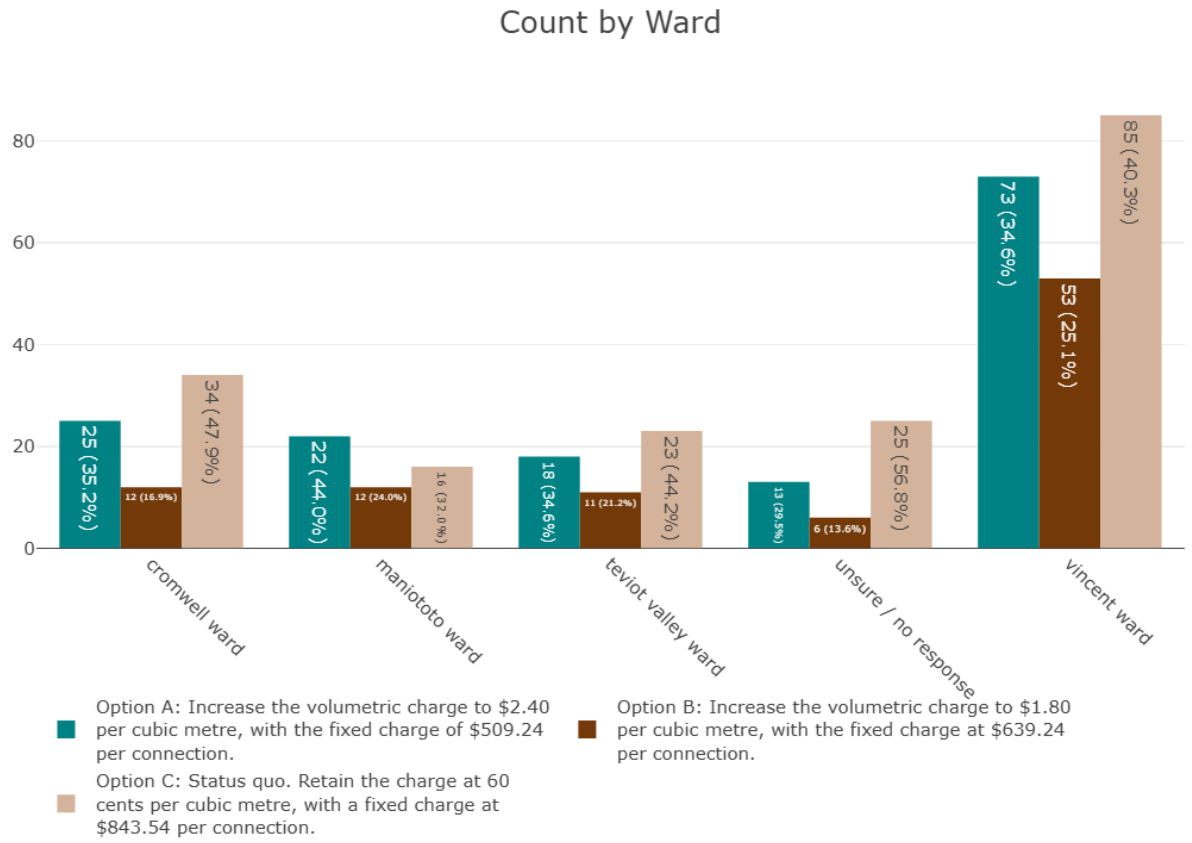
n=428
comments: 141

About



The question asks about volumetric water charges, presenting three options: increasing the volumetric charge to $2.40 with a $509.24 fixed charge, increasing the volumetric charge to $1.80 with a $639.24 fixed charge, or maintaining the status quo of 60 cents per cubic metre with an $843.54 fixed charge per connection.

There were 428 total responses: 151 voted for 'Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection. ', 94 voted for 'Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.', 183 voted for 'Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.'. 141 people made a comment.



Responses By Age

Respondents aged 18-24 showed a stronger preference for retaining the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection compared to other age groups. Those aged 55-64 showed a stronger preference for increasing the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection. Respondents aged 75+ were relatively evenly split between retaining the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection and increasing the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection, with a reasonable amount also for increasing the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.

Responses By Ward

Preferences for volumetric water charges varied across wards. The Cromwell ward showed a preference for the status quo (Option C), while the Maniototo ward responses leaned towards Option A. The Vincent ward also favoured the status quo (Option C). Respondents who were unsure or did not respond showed a slight preference for the status quo (Option C).

Summary

Option C, retaining the status quo, was the most selected (42.8%), while Option A had a substantial number of selections (35.3%). Feedback indicates concerns about affordability and the impact on gardens and community aesthetics if volumetric charges increase significantly. Many respondents expressed that the proposed increases were disproportionate to service quality, while some supported user-pays principles and responsible water usage, particularly with Option A.

Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.

comments: 56

Summary

Overall sentiment towards Option A appears mixed to positive. A common theme was the 'user pays' principle, with many respondents agreeing that higher volumetric charges encourage responsible water usage and that high users should pay their share. Some respondents, however, expressed concerns about the impact on sports clubs and pensioners, while others suggested further reducing the fixed charge and increasing the volumetric charge even more.

Key Points

- Many respondents support the user pays principle and believe Option A encourages responsible water usage.

- Several respondents, particularly low water users and part-time residents, find Option A beneficial as it potentially lowers their costs.
- Some respondents suggest further reducing the fixed charge and increasing the volumetric charge even more.

- A few respondents raised concerns about the impact on sports clubs and other organisations with public facilities, suggesting potential exemptions or reductions.
- One respondent highlighted a potential error in the council's calculations regarding cubic metre units.

In-depth Analysis
Arguments For

Many respondents supported Option A because it aligns with a "user pays" system, promoting fairer charges and encouraging water conservation. Some respondents believed that increasing the volumetric charge would incentivise responsible water usage and reduce waste, particularly among high users. A few respondents noted that this option benefits low water users, including part-time residents, and encourages the use of rainwater tanks. One respondent liked that it gives home occupiers options and incentives to manage water use in line with their ability to pay.

Arguments Against
Some respondents expressed concern about the potential impact on sports clubs and other organisations with public facilities, fearing increased expenses due to toilet usage. A few respondents felt the charges were exorbitant for pensioners and those on fixed incomes, and one asked about hardship allowances. One respondent expressed concern that the council will bump up the fixed charge in the near future, leaving the low users worse off again. A respondent also raised concerns about the accuracy of the council's calculations and the units used. Some respondents indicated that the council's own water usage should be minimised before charging ratepayers. One respondent stated that the council chose an expensive means of achieving protozoa protection and now the ratepayers are left to pay for it.

Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.

comments: 24

Summary

The sentiment towards Option B is mixed. Respondents felt it was a more measured approach than Option A, softening the blow of increased water charges, and incentivising conservation. However, concerns were raised regarding the impact on families, the cost of living, and the need for further incentives and education around water conservation, as well as the impact on community assets like sports grounds and golf clubs. Some respondents suggested a gradual increase or alternative charging models for tenanted properties and questioned the fairness of charges relative to water quality in certain areas.

Key Points

- Some respondents felt Option B provided a more measured approach to increasing water charges compared to higher increases.
- Several respondents suggested Option B could incentivise water conservation and provide revenue for infrastructure upgrades.
- A few respondents highlighted the potential impact on larger families and sports grounds/golf clubs with increased water usage.
- Some respondents expressed concerns about the cost of living and suggested a different charging model for tenanted properties.
- One respondent suggested that rates should reduce if water charges triple.

In-depth Analysis
Arguments For

Some respondents supported Option B as a more measured approach to increasing volumetric charges, viewing it as a transitional measure that softens the impact on water users compared to higher increases. The respondents said that a user-pays system is the best way forward and that increased pricing reduces wastage. One respondent noted that this option would incentivise the public to conserve water while providing additional revenue for infrastructure upgrades. Another respondent supported a higher volumetric charge for environmental reasons and a user pays system.

Arguments Against

Some respondents expressed concerns about the cost of living and the impact on families, gardeners, and those on fixed incomes. Some respondents felt that any increase was unreasonable. One respondent felt that the increase was too much and should be done incrementally. A respondent suggested that if consumption decreases, it could leave a hole in funding. Another respondent raised concerns about water quality and consistency of delivery. One respondent stated that the fixed charge only decreases by a mere 39% while the volumetric charge is a 400% increase.

Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

comments: 61

Summary

Overall sentiment towards Option C was mixed. While many respondents supported maintaining the status quo due to concerns about affordability and disproportionate impacts on larger households, some felt that the fixed charges were still too high. Concerns were raised about the potential for increased costs, the impact on gardens and the visual appeal of the town, and the fairness of the charging system, with some suggesting alternative approaches like a sliding scale or targeting high water users specifically.

Key Points

- Many respondents support maintaining the status quo (Option C) due to concerns about affordability, particularly for those on fixed incomes, families, and businesses.
- Respondents expressed that significant increases in volumetric charges, as proposed in other options, could negatively impact the visual appeal of the town, increase fire risk, and reduce the ability to grow gardens and produce food.
- Some respondents felt that Option C provides cost certainty and avoids penalising households that cannot realistically reduce their water usage.
- Several respondents highlighted that there is no increase in service quality or infrastructure capacity to justify significant cost increases in other options.
- A few respondents suggested that if changes are unavoidable, a smaller, incremental increase to volumetric charges would be preferable to the large jumps proposed in Options A and B.

In-depth Analysis
Arguments For

Many respondents supported maintaining the status quo (Option C) because it provides cost certainty and avoids penalising households that cannot realistically reduce their water use. Several respondents on fixed incomes stated that they preferred this option due to concerns about affordability and increasing costs of living. Some respondents felt the current system works fine and doesn't need changing. One respondent

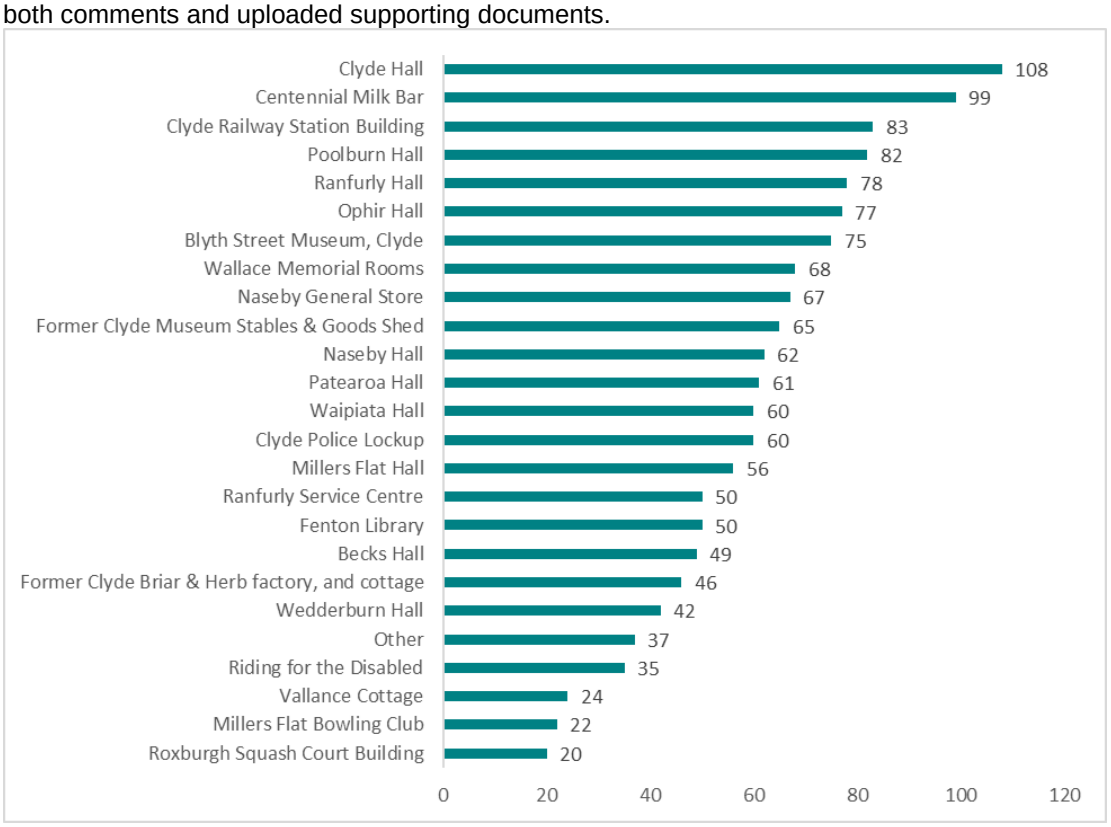
stated that compared to other options, it was more manageable on a pension. Another respondent highlighted that higher per-connection fees and lower water usage charges ensure a minimum funded amount for local water costs.

Arguments Against

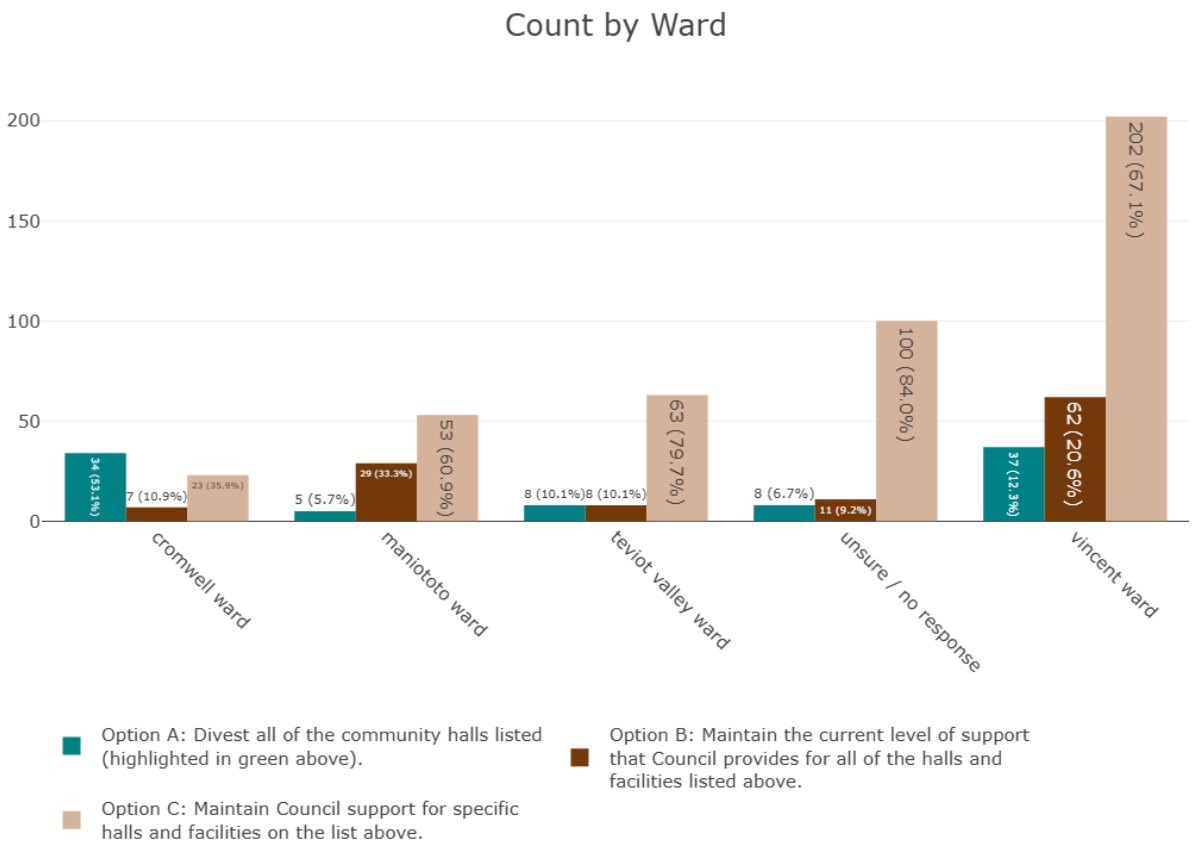
Some respondents found the fixed charge expensive and suggested reducing it. Other respondents felt that the volumetric charges should be changed to reflect the amount of water used by high users. Some respondents expressed concern about the visual appeal of the town if people reduce watering their lawns and gardens due to cost. One respondent stated that the proposed increases were too much of a jump and would place a heavier burden on ratepayers. A respondent mentioned inequities in low users paying proportionally more because of the relationship between the fixed and volumetric charges. One respondent stated that water should be lime free if volumetric charges increase.

Community Halls & Facilities

n=650



About



Respondents were asked their preference regarding community halls and facilities, with options to divest all halls, maintain current support levels, or maintain support for specific halls and facilities only.

There were 650 total responses: 92 voted for 'Option A: Divest all of the community halls listed (highlighted in green above).', 117 voted for 'Option B: Maintain the current level of support that Council provides for all of the halls and facilities listed above.', 441 voted for 'Option C: Maintain Council support for specific halls and facilities on the list above.'.

Response distribution of halls and facilities that people commented on. Please note that this chart captures both comments and uploaded supporting documents.

Respondents in Cromwell ward showed a stronger preference for Option A: Divest all of the community halls listed (highlighted in green above) compared to other wards, while respondents in Teviot Valley ward showed a notably stronger preference for Option C: Maintain Council support for specific halls and facilities on the list above. Maniototo ward respondents leaned more towards Option B: Maintain the current level of support that Council provides for all of the halls and facilities listed above compared to Cromwell Ward. Vincent ward responses were more closely aligned to the overall trend, with a preference for Option C, but also a higher preference for Option B than Cromwell ward.

Vincent Ward Halls & Facilities

OPHIR HALL

comments: 64

About

Public were asked for their views on whether Council should divest or maintain support for the Ophir Hall. The following summarizes the opinions and reasons provided.

Arguments For

The respondents expressed strong support for retaining the Ophir Hall under council control, emphasising its importance as a community hub with a long history dating back to 1926. They highlighted its frequent use for various events such as movie nights, concerts, weddings, funerals, and community gatherings, as well as its role as a Civil Defence location. The respondents noted the community's significant investment in

upgrading the hall, including improvements to the kitchen, toilets, and accessibility, often with minimal council support. Many respondents valued the hall's central location within the historic precinct, enabling residents, especially the elderly, to walk to events and maintain social connections, which they felt was vital for their well-being. The respondents also stated that the hall contributes to the unique identity of Ophir and that a new facility in Omakau would not serve the same purpose.

Arguments Against
A few respondents suggested divesting the Ophir Hall, with one stating that the money would be better spent on Omakau's new hall, as it is only a few minutes away. One respondent suggested that the building should be considered surplus depending on the amount of EQP required and its usage. Another respondent mentioned that the population of Ophir is too small for the council to continue to own and maintain the hall but also noted that they did not know the costs associated with the hall.

Summary
The overwhelming sentiment is in favour of retaining the Ophir Hall due to its central role in the community's social life, its historical significance, and the community's active involvement in its upkeep; however, a few respondents suggested that it may be more financially prudent to focus resources on the new facility in Omakau, or that the hall should be divested due to the small population of Ophir.

POOLBURN HALL

comments: 65

About

Public were asked for their views on whether Council should divest or maintain support for the Poolburn Hall. The following summarizes the opinions and reasons provided.

Arguments For

The respondents indicated that the Poolburn Hall is a vital community asset, serving as the heart of the Ida Valley. Many respondents emphasised its importance as the only meeting place for the community, especially since the closure of the local hotel. The hall is used extensively by the Poolburn School for assemblies, productions, prize-givings, and sports events, with respondents noting the lack of alternative spaces for these activities. Several respondents highlighted the hall’s historical significance, housing war memorials and memorabilia. The hall also facilitates community connections through playgroups, weddings, funerals, birthday celebrations, and sports clubs. Respondents also mentioned the community’s active involvement in maintaining the hall through cleaning rosters, lawn mowing, and working bees.

Arguments Against

One respondent suggested that the building should be considered surplus depending on the amount of equipment required and its usage. Another respondent suggested closing the hall and using the new Omakau hall instead. A few respondents simply stated "Divest" or indicated opposition to retaining the hall with the council without providing specific reasons.

Summary

The feedback indicates widespread agreement that Poolburn Hall is a crucial community hub with significant historical and social value, particularly for the school and community gatherings, although a few responses suggested divesting or exploring alternative facilities, the overwhelming sentiment supports retaining the hall due to its unique role and lack of comparable alternatives in the area.

CLYDE POLICE LOCKUP

comments: 57

About

Public were asked for their views on whether Council should divest or maintain support for the Clyde Police Lockup. The following summarizes the opinions and reasons provided.

Arguments For

Some respondents believe the Clyde Police Lockup has historical value and should be retained, potentially as part of a future Clyde museum or as a valuable and interesting part of the community if made accessible to the public. Promote Dunstan supports the submissions made by Clyde Museum on the Clyde Lock-Up, the Stables and the Goods Shed. The Clyde Museum has expressed interest in relocating the building to the rose garden area at the Blyth St Clyde Museum Site.

Arguments Against

A number of respondents support divesting the Clyde Police Lockup, with some suggesting it has nil use or is inaccessible in its current location. One respondent suggested dispensing with the facility altogether. Several comments suggest divestment due to a perceived lack of maintenance or financial burden.

Summary

Feedback regarding the Clyde Police Lockup is divided, with some advocating for its retention and integration into a museum or community space due to its historical significance, while others support divestment due to its perceived lack of use or financial burden, with the Clyde Museum offering to relocate the building to their site.

CLYDE RAILWAY STATION BUILDING

comments: 72

About

Public were asked for their views on whether Council should divest or maintain support for the Clyde Railway Station Building. The following summarizes the opinions and reasons provided.

Arguments For

Many respondents expressed strong support for retaining the Clyde Railway Station Building in council ownership. The building’s historical significance was a recurring theme, with several respondents noting it is one of the few remaining original stations and a valuable part of local heritage. Its importance to the Otago Central Rail Trail and its contribution to the local tourism industry were also highlighted. The presence of SheBikesHeBikes as a tenant was seen as a positive, with many respondents explicitly supporting their continued lease and their contribution to the area. Furthermore, the building’s use as a museum and community space was considered beneficial, enhancing its value to both locals and visitors. Some respondents noted the building generates revenue through its lease, offsetting maintenance costs.

Arguments Against

A few respondents suggested divesting the building, with one suggesting it be sold to private biking companies. One respondent suggested disposal, and another proposed selling it on the open market to tourism operators, provided they maintain its historic presentation. One respondent suggested that if the cost to council is too high, the rental should be increased to break even.

Summary

The overwhelming sentiment is to retain the Clyde Railway Station Building due to its historical significance, its role in tourism, and the positive contribution of the current tenant, SheBikesHeBikes. A minority of respondents suggested divestment, primarily to reduce costs or allow private businesses to utilise the space, but with the caveat of maintaining its historical character.

FORMER CLYDE MUSEUM STABLES AND GOODS SHED

comments: 60

About

Public were asked for their views on whether Council should divest or maintain support for the Former Clyde Museum Stables and Goods Shed. The following summarizes the opinions and reasons provided.

Arguments For

Several respondents expressed support for retaining the Former Clyde Museum Stables and Goods Shed, often emphasising its historical significance and its role within the Clyde historical precinct, alongside the Railway Station and Police Lockup. Some respondents highlighted the building's potential for showcasing Clyde's history, particularly its connection to the Rail Trail story. The Clyde Museum itself relies on the Goods Shed for collection storage and has requested a long-term lease agreement and the right of first refusal if divestment occurs. One respondent mentioned the desire to lease or purchase the building, noting that previous attempts were unsuccessful due to earthquake concerns.

Arguments Against

Conversely, a number of respondents advocated for the divestment of the Former Clyde Museum Stables and Goods Shed. Some respondents suggested that the building should be considered surplus depending on equipment requirements and usage. Some respondents stated the building has nil use and should be divested. One respondent described the building as a disgrace, suggesting it should be sold off, with items moved to the Blyth St Museum.

Summary

Feedback regarding the Former Clyde Museum Stables and Goods Shed is divided, with some advocating for retention due to its historical value and current use for museum storage, while others support divestment, citing a lack of use or the building being a disgrace and should be sold off to a business so the public and tourists can view and enjoy the history, or that it should be moved to the Blyth St Museum instead. The Clyde Museum has requested a long-term lease or right of first refusal if divestment proceeds, while others have expressed interest in leasing or purchasing the building for business purposes if council retains it, or purchase if council decides to divest, if it is deemed not earthquake prone.

BLYTH STREET MUSEUM, CLYDE

comments: 59

About

Public were asked for their views on whether Council should divest or maintain support for the Blyth Street Museum, Clyde. The following summarizes the opinions and reasons provided.

Arguments For

Many respondents expressed strong support for retaining the Blyth Street Museum in Clyde, emphasising its importance as a community asset and a valuable resource for local history. Several submissions highlighted the museum's role in preserving and making accessible the history of Clyde and the surrounding area, with one respondent noting it houses collections found nowhere else in the district. A number of respondents recommended a long-term lease agreement to ensure the museum's sustainable future, with some specifying a preference for a 10+10+10 year arrangement. These submissions often included requests for council support in covering capital expenses for facility improvements and for equitable operational funding compared to other museums in Central Otago. Some respondents also requested a right of first refusal to acquire the museum for $1 if the council decides to divest it.

Arguments Against

Some respondents were in favour of divesting the Blyth Street Museum. A few suggested selling the building on the open market, with one respondent proposing it could be purchased by tourism operators who would maintain its historical presentation. One respondent suggested consolidating museums in Clyde to reduce costs. Another respondent expressed the opinion that the building's architecture is not pleasing and does not enhance the town's streetscape, suggesting it should be sold, provided the funds are used to develop the old museum site and adequately house the town's historic treasures. One respondent suggested the museum needs to generate income, potentially by incorporating a bike shop or a hireable meeting room.

Summary

Feedback regarding the Blyth Street Museum in Clyde reveals widespread support for retaining the museum due to its community value and historical significance, with many advocating for a long-term lease agreement and continued council support; however, a minority suggested divestment, proposing alternative uses for the building or consolidation of museum resources to reduce costs.

comments: 86

About

Public were asked for their views on whether Council should divest or maintain support for the Clyde Hall. The following summarizes the opinions and reasons provided.

Arguments For

The respondents indicated that the Clyde Hall is a well-used and integral part of the Clyde community. Many respondents highlighted its frequent use by various groups, including theatre groups, badminton clubs, the Air Training Corps, and the library. Some respondents emphasised the hall’s importance as a social hub, particularly with the growing population of Clyde, and noted that it is the only public community space in Clyde. Several respondents mentioned recent upgrades to the hall’s facilities, making it a more desirable venue. A few respondents also noted the hall’s historical significance, as the land was gifted to the community.

Arguments Against

A few respondents supported divesting the Clyde Hall, citing expense. One respondent suggested selling it on the open market to tourism operators, requiring them to maintain its historic presentation. Another respondent suggested divesting the building to a business so the public and tourists can view and enjoy the history, such as a cafe.

Summary

Feedback indicates widespread support for retaining the Clyde Hall due to its heavy use, community importance, and recent upgrades, with a few respondents suggesting divestment due to cost or to allow for tourism-related business opportunities while preserving its historical aspects.

BECKS HALL

comments: 34

About

Public were asked for their views on whether Council should divest or maintain support for the Becks Hall. The following summarizes the opinions and reasons provided.

Arguments For

The respondents highlighted Becks Hall as a vital community asset, serving as a gathering place for various groups and events, including playgroups, rural meetings, weddings, parties, and funerals. They emphasised the hall's importance due to the lack of alternative locations in the area, particularly for young families and community activities. Several respondents noted the hall's role as an emergency hub, citing its use during a snowstorm in 2013 and its designation as a future emergency hub by the CODC and Emergency Management Otago. The hall's well-maintained condition, lack of required earthquake strengthening, and active community support through fundraising and volunteer efforts were also mentioned as reasons to retain it.

Arguments Against

Some respondents suggested divesting the hall, with one proposing that the community form an organisation to manage it. Another respondent suggested that users of Becks Hall could use the new multi hub facility in Omakau and decommission Becks Hall.

Summary

The feedback indicates widespread agreement that Becks Hall is a crucial community facility, particularly for its role as a gathering place and emergency hub in a rural area with limited alternatives; however, a few respondents suggested divesting the hall and exploring alternative facilities in nearby Omakau, or community management options.

VALLANCE COTTAGE

comments: 19

About

Public were asked for their views on whether Council should divest or maintain support for the Vallance Cottage. The following summarizes the opinions and reasons provided.

Arguments For
Some respondents expressed that Vallance Cottage has historic significance and should be kept as a museum and promoted more to the community. One respondent noted its importance to the community streetscape and heritage, highlighting the rarity of such a well-supported historical building. The Vallance family expressed a desire for the cottage to be restored to its pre-collapse state and then divested to an organisation capable of ensuring its ongoing survival as a historic place, with a Memorandum of Understanding to clearly define responsibilities.

Arguments Against

Many respondents opposed the divestment of Vallance Cottage, particularly in its current state of disrepair. Several respondents highlighted that the Council has a duty to preserve and protect the cottage, especially as it was gifted to the town and is one of the few remaining historical buildings. The New Zealand Historic Places Trust (HNZPT) does not support the disposal and advocates for it to remain part of Council facilities. Some respondents suggested reconsidering divestment only after the building has been stabilised and restored to allow public access. The Vallance family expressed concern that under the stewardship of the Council the Cottage has steadily deteriorated.

Summary

Feedback indicates a divergence of views, with some supporting eventual divestment to a capable organisation after restoration, while others strongly oppose divestment, especially in its current state, emphasising the Council's responsibility to preserve this historic building for the community and future generations. There is widespread agreement that the cottage should be restored to its pre-collapse state before any further discussion on divestment occurs and then on a much wider scope that financial debt on our community facilities register.

RIDING FOR THE DISABLED

comments: 22

About

Public were asked for their views on whether Council should divest or maintain support for the Riding for the Disabled. The following summarizes the opinions and reasons provided.

Arguments For

Some respondents highlighted the importance of Riding for the Disabled, noting it as a valuable facility for young disabled children and a good charity for the community. One respondent shared a personal experience of a young boy with autism who enjoys the weekly riding outing, and another mentioned the pleasure it provides to children and the sense of community belonging it fosters.

Arguments Against

A number of respondents suggested divesting the property, citing nil use and potential vandalism. One respondent claimed the council had previously displaced Riding for the Disabled and suggested demolition if it’s not owned. Another respondent criticised the building’s design and construction quality, suggesting private repurposing if it benefits the community.

Summary

Feedback regarding Riding for the Disabled is divided, with some emphasising its community value and positive impact on disabled children, while others advocate for divesting due to perceived lack of use, potential costs, and the building's condition. There is also a suggestion to offer the site to Ngai Tahu for incorporation into their development plans, addressing potential contamination issues.

FORMER CLYDE BRIAR AND HERB FACTORY, AND COTTAGE

comments: 40

About

Public were asked for their views on whether Council should divest or maintain support for the Former Clyde Briar and Herb factory, and cottage. The following summarizes the opinions and reasons provided.

Arguments For

Some respondents suggested that the property could be sold on the open market, particularly to tourism operators who could maintain its historical presentation while running a business. One respondent suggested it could be developed as the Clyde Museum, while another suggested placing it in the hands of the Historic Places Trust. Promote Dunstan supports the submission made by the Clyde Museum, noting the heritage value of the stone cottage and stamper battery on the property. One respondent felt the building has real value as part of the town's history and is worth retaining, noting tourists have asked about when it is open.

Arguments Against

A number of respondents were in favour of divesting the property. Several respondents expressed concerns regarding the ownership of the land, stating a review is required to clarify the decision made regarding the historic ownership of the land upon which both the rented cottage and Holden's Cottage are located before any divestment decision is made. One respondent stated the cottage is a bit of an anachronism and would sell it for removal. One respondent stated that they were not aware of the building and had no opinion, while another stated it is not used by the community and should be sold.

Summary

Feedback regarding the former Clyde Briar and Herb factory and cottage is mixed, with some respondents advocating for divestment, some suggesting alternative uses such as a museum or tourist attraction, and others raising concerns about land ownership needing clarification before any decision is made. There are also conflicting views on the building's value to the community and its historical significance, with some believing it should be retained and others seeing it as obsolete.

Maniototo Ward Halls & Facilities

RANFURLY HALL

comments: 47

About

Public were asked for their views on whether Council should divest or maintain support for the Ranfurly Hall. The following summarizes the opinions and reasons provided.

Arguments For

The respondents indicated that the Ranfurly Hall is a vital community asset, particularly for the Maniototo Theatre Group, who use it for approximately nine weeks each year for productions and have invested significantly in its upkeep. It is also used by local schools for concerts, prize-givings, and speech competitions. The respondents emphasised the hall's importance as a gathering point for community events and its unique facilities, such as the stage and acoustics, which are not easily replicated elsewhere. Some respondents suggested that the council should retain the hall, potentially divesting other halls to fund earthquake strengthening.

Arguments Against

Some respondents suggested divesting the Ranfurly Hall, citing concerns about its cost and perceived low usage based on rental revenue. One respondent expressed concern about the cost of earthquake strengthening outweighing the hall's usage. Another suggested that the community could use the Rugby Hall instead.

Summary

Feedback indicates that the Ranfurly Hall is valued as a unique venue for arts and community events, especially by the Maniototo Theatre Group and local schools, with some advocating for its retention and upgrade, while others suggest divesting due to cost concerns and perceived underutilisation, with alternative venues proposed by a few respondents.

NASEBY HALL

comments: 37

About

Public were asked for their views on whether Council should divest or maintain support for the Naseby Hall. The following summarizes the opinions and reasons provided.

Arguments For

Respondents indicated that Naseby Hall is a vital part of the town's history and provides a necessary space for community gatherings. Several respondents mentioned its importance for events such as ANZAC Day services, funerals, fund-raising activities, book sales, birthdays, reunions, and other community events. Some respondents highlighted that it is the only building in Naseby large enough to accommodate these functions. Respondents also noted the hall's contribution to the town's unique character and its role as a cultural and social centre.

Arguments Against

Some respondents suggested divesting Naseby Hall, citing financial concerns and the need for significant earthquake upgrades. A few respondents stated that the hall does not generate enough revenue through rent, suggesting it is underutilised. One respondent proposed that if the community wishes to retain the hall, they should form an organisation to manage it. One respondent questioned the necessity of a hall for such a small population.

Summary

Feedback regarding Naseby Hall reveals a divide between those who see it as a crucial historical and community asset and those who view it as a financial burden requiring significant upgrades, with some suggesting community-led management as a potential solution to ensure its preservation and continued use.

PATEAROA HALL

comments: 43

About

Public were asked for their views on whether Council should divest or maintain support for the Patearoa Hall. The following summarizes the opinions and reasons provided.

Arguments For

Respondents indicated the Patearoa Hall is a vital community hub, especially with the loss of the school and the uncertain future of the pub. They highlighted its importance for various events like weddings, funerals, community meetings, and as a gathering place. Many requested delaying divestment to Year 9 of the Long-term Plan to allow the community time to explore options and fundraise for a long-term solution. Some submissions emphasised the hall's historical significance, its role in community identity, and the necessity of retaining public toilet facilities.

Arguments Against

Some respondents supported divesting the Patearoa Hall, citing the high costs of earthquake strengthening and the perception that it isn't used enough to justify the expense. One respondent suggested that if the community wants to keep it, they should form an organisation to run it themselves. Another concern raised was the low NBS rating of the hall, with one person stating they were not comfortable allowing people to use a hall with such a low rating.

Summary

Feedback regarding the Patearoa Hall reveals a split between those who see it as a crucial community asset needing time to explore future options and those who believe divestment is the most practical solution due to the hall's condition and associated costs, although there is a general agreement that public toilet facilities need to be maintained regardless of the hall's fate.

WAIPIATA HALL

comments: 48

About

Public were asked for their views on whether Council should divest or maintain support for the Waipiata Hall. The following summarizes the opinions and reasons provided.

Arguments For

Many respondents expressed strong support for retaining the Waipiata Memorial Hall, emphasising its significance as a community asset and memorial space. They highlighted its role as an emergency hub, particularly due to its equipment and generator support from Kai Tahu, and its importance for community gatherings, Anzac services, and other events. The Waipiata Community Development Committee requested that any consideration of divestment be put on hold while the community explores options for greater use of the hall. Some respondents noted the potential for increased usage due to population growth and the hall's location near the Central Rail Trail. They also suggested improvements, such as regular maintenance, heating, and better marketing, to enhance its appeal and functionality.

Arguments Against

Some respondents supported divesting the hall, citing expenses, the need for earthquake upgrades, and a perceived lack of revenue. One respondent suggested selling it to a community board via a 10-year interest-free loan or on the open market. Another suggested that if the hall is not used regularly (possibly six times per year or more), it should be disposed of. One respondent felt that the hall should be considered surplus depending on the amount of equipment required and usage.

Summary

Feedback regarding the Waipiata Hall is divided, with many respondents advocating for its retention due to its community value and emergency role, while others suggest divestment due to costs and underutilisation; a common suggestion was to allow the community to decide and/or manage the hall themselves, or to wait for new government guidelines regarding earthquake strengthening before making a final decision.

WEDDERBURN HALL

comments: 27

About

Public were asked for their views on whether Council should divest or maintain support for the Wedderburn Hall. The following summarizes the opinions and reasons provided.

Arguments For
Some respondents expressed that retaining the Wedderburn Hall would benefit the community, emphasising its role as a hub, especially for rural communities where travel to larger locations may be impractical. One respondent mentioned the community is actively exploring ways to encourage the hall's use and enjoyment, and another noted the importance of having a neutral space for community meetings, suggesting it be sold to the community group if the council decides to divest. A respondent mentioned the hall is used monthly for community coffee mornings.

Arguments Against
Several respondents were in favour of divesting the Wedderburn Hall, citing expenses, the need for earthquake upgrades, and a perceived lack of revenue generation due to infrequent use. One respondent suggested that if the community wants to keep the hall, they should form an organisation to run it. Another respondent noted a local business interest in purchasing the building, suggesting the council should support this option. One respondent suggested it should be considered surplus depending on EQP requirements and usage.

Summary
Feedback regarding Wedderburn Hall is divided, with some respondents emphasising its importance as a community hub and advocating for its retention or sale to the community, while others highlight the financial burden and advocate for divestment, suggesting potential sale to private interests or community organisations to manage the hall independently. There is widespread agreement that the hall needs earthquake upgrades, and that the council should consider this when making a decision.

FENTON LIBRARY

comments: 22

About

Public were asked for their views on whether Council should divest or maintain support for the Fenton Library. The following summarizes the opinions and reasons provided.

Arguments For

Many respondents expressed support for retaining the Fenton Library, emphasising its importance as a community hub. They highlighted its current use as the home of Burn Radio and Positively Māniatoto, which provide essential community connection and communication, especially during emergencies. Some respondents noted the building's historical significance and its role in supporting community events and disseminating local news and information. The alignment with the Central Otago Council's Long Term Plan, particularly in fostering vibrant, connected, and resilient communities, was also mentioned by respondents.

Arguments Against

A few respondents suggested decommissioning or divesting the Fenton Library, with one stating they had “Never heard of it.” Some respondents suggested decommissioning if usage is low.

Summary

Feedback regarding the Fenton Library is largely in favour of retaining it due to its current function as a community hub and its historical significance, with Burn Radio and Positively Māniatoto playing a vital role; however, a small number of respondents suggested decommissioning or divesting the library, particularly if its usage is perceived as low. The respondents see the building as important for community connection and

communication, especially in emergencies, while also aligning with the council's long-term community goals.

NASEBY GENERAL STORE

comments: 37

About

Public were asked for their views on whether Council should divest or maintain support for the Naseby General Store. The following summarizes the opinions and reasons provided.

Arguments For

The respondents indicated that the Naseby General Store is a vital community asset, serving as a hub for locals and visitors alike. The respondents said it provides essential goods and services, including postal services, and acts as a meeting place and source of local knowledge. The respondents highlighted its importance during times of isolation, such as winter and pandemics, and its role in supporting the elderly and those without reliable transport. Some respondents emphasised that the store’s continued operation relies on the council’s ownership of the building, ensuring affordable rent for the proprietor.

Arguments Against

Some respondents suggested divesting the store or increasing the rent, with one respondent noting the potential for private purchase if the council decides to sell. One respondent suggested it could be kept as a museum manned by volunteers. One respondent expressed concern about the potential impact on the general store and postal depot if the building were sold, citing recent changes in ownership. Another respondent raised the issue of the rent being very cheap and suggested it should be reviewed.

Summary

The respondents largely believe the Naseby General Store is essential to the community's well-being and should remain in council ownership, while a few suggested divesting the store, increasing the rent, or converting it into a museum, raising concerns about its financial viability and continued operation under private ownership.

CENTENNIAL MILK BAR

comments: 84

About

Public were asked for their views on whether Council should divest or maintain support for the Centennial Milk Bar. The following summarizes the opinions and reasons provided.

Arguments For

Many respondents expressed strong support for retaining the Centennial Milk Bar, citing its historical and architectural significance as an Art Deco building and its importance as a visitor attraction. They noted that the building houses the Art Deco Museum, the only one in the Southern Hemisphere, which draws approximately 4,000 visitors per year and boosts local tourism. The respondents highlighted the museum’s operation by unpaid volunteers, the educational resources it provides, and the presence of an Opportunity Shop and other community services within the building. They also mentioned the minimal capital expenditure required for the building’s maintenance and the potential for future community initiatives, such as an ‘Artist in Residence’ program. The respondents believe the Centennial Milk Bar is a cornerstone of the community's heritage and should be preserved for future generations.

Arguments Against

A few respondents suggested divesting the Centennial Milk Bar, with one suggesting it be sold on the open market as a business premise. One respondent questioned what was currently happening with it. Another respondent suggested moving the service centre into the Milk Bar. One respondent stated that it should be in private hands.

Summary

Feedback indicates widespread agreement that the Centennial Milk Bar is a valuable asset to the community due to its historical significance, contribution to tourism, and provision of community services, although a small number of respondents suggested divesting the property, preferring it in private hands or repurposed as a service centre.

RANFURLY SERVICE CENTRE

comments: 60

About

Public were asked for their views on whether Council should divest or maintain support for the Ranfurly Service Centre. The following summarizes the opinions and reasons provided.

Arguments For

Some respondents indicated that the Ranfurly Service Centre is the face of the Council in the area and should be retained, also noting its importance as an art deco feature. One respondent stated that Council would need to have this building to continue their presence in the town. Another respondent agreed with the Long-term Plan decision.

Arguments Against

A number of respondents suggested divesting the Ranfurly Service Centre, with some proposing to move it to the Ranfurly Railway Station Building or the heart of town into the milk bar. One respondent suggested selling the building and turning it into accommodation. One respondent felt that the exercise was a smokescreen and that a sale would produce very little, with less cost for insurance and maintenance being the only saving. One respondent mentioned that they do not visit the centre much since the toilets were relocated. One respondent suggested giving it over to the community. One respondent suggested closing it.

Summary

Feedback regarding the Ranfurly Service Centre is divided, with some respondents advocating for its retention due to its role as the Council's presence and its architectural value, while others suggest divesting, relocating, or repurposing the building to improve efficiency or community use.

WALLACE MEMORIAL ROOMS

comments: 59

About

Public were asked for their views on whether Council should divest or maintain support for the Wallace Memorial Rooms. The following summarizes the opinions and reasons provided.

Arguments For

Respondents indicated that the Wallace Memorial Rooms are an important community asset for several reasons. The rooms serve as a memorial space, generate income for the council, are ideal for small gatherings, are structurally sound, and are accessible. The Maniototo Bridge Club uses the rooms regularly, and promotion of the building could increase usage. Some respondents highlighted that the building is well-used, brings in revenue, and does not require earthquake upgrades. One respondent suggested that the current level of council support should continue.

Arguments Against

One respondent stated they had no idea what the Wallace Memorial Rooms were. Another respondent suggested that if the rooms are not being used regularly (possibly less than 6 times per year), they should be disposed of. One respondent noted the building is not used for its original intended purpose.

Summary

Feedback indicates widespread agreement that the Wallace Memorial Rooms are a valuable community asset due to their historical significance, income generation, suitability for small gatherings, structural integrity, and accessibility, although some respondents were unaware of the rooms or suggested disposal if not used frequently enough, and one respondent noted the building is not used for its original intended purpose.

Teviot Valley Ward Halls & Facilities

MILLERS FLAT HALL

comments: 42

About

Public were asked for their views on whether Council should divest or maintain support for the Millers Flat Hall. The following summarizes the opinions and reasons provided.

Arguments For

The respondents indicated that the Millers Flat Hall is a well-used and important community space, with regular bookings for conferences, concerts, funerals, weddings, community meetings, and school events. Several respondents highlighted its role as a strategic asset for civil emergencies, especially given its location on the Clutha River. The respondents emphasised the successful shared maintenance model between the council and the local community, and the hall’s importance as a hub for social connection, learning, and development. Some respondents mentioned the hall’s facilities, such as the kitchen, large carpeted area, wooden floor, toilets, wheelchair access, and large carpark. Some respondents also noted the hall's historical significance and the active involve’ent of the local committeee.

Arguments Against

Some respondents suggested divesting the hall, with one suggesting using the hall in Roxburgh instead. One respondent argued that the hall does not generate revenue through rent, implying low usage. One respondent suggested selling the hall to a community board or on the open market if the community is not interested.

Summary

The feedback indicates widespread support for retaining the Millers Flat Hall due to its frequent use, community importance, and role as an emergency center, with a few respondents suggesting divestment

due to financial concerns or perceived low usage. The loss of the Roxburgh Entertainment Centre has further increased the importance of the Millers Flat Hall for the community.

MILLERS FLAT BOWLING CLUB

comments: 18

About

Public were asked for their views on whether Council should divest or maintain support for the Millers Flat Bowling Club. The following summarizes the opinions and reasons provided.

Arguments For

Some respondents suggested keeping the Millers Flat Bowling Club, with one stating it is important to keep people active if transport to Roxburgh is an issue for the older community. Another respondent indicated that the facility would be valuable for tournaments such as rugby sevens and netball. The Millers Flat Sports & recreation Hub project noted the potential for the pavilion to enhance the ambience and amenity of the hub for participants and spectators, suggesting uses such as a sun deck, changing rooms, kitchen, maintenance sheds, and a hall for sports tournaments or fundraisers. They suggested deferring divestment until the potential lease option is considered.

Arguments Against

A number of respondents suggested divesting the Millers Flat Bowling Club, with some stating it is unused and should be disposed of. One respondent suggested knocking it down and replanting the area with trees. Another respondent suggested that if the community wants to keep it, they can form a community organisation to run it. One respondent stated that if the premise has nil use it should be divested.

Summary

Feedback regarding the Millers Flat Bowling Club is divided, with some respondents advocating for divestment due to perceived lack of use, while others highlight its potential value for community activities and sports events, particularly within the context of the Millers Flat Sports & recreation Hub project, suggesting a deferred decision on divestment pending further consideration of a lease option and funding outcomes for the hub project.

ROXBURGH SQUASH COURT BUILDING

comments: 17

About

Public were asked for their views on whether Council should divest or maintain support for the Roxburgh Squash Court Building. The following summarizes the opinions and reasons provided.

Arguments For

Some respondents indicated the building is important as a resource for future communities. One respondent noted the operational expenditure (Opex) is very low and it would be a shame to see it fall into disrepair or be divested.

Arguments Against

Several respondents suggested divesting the building due to it being unused or having nil use. Some proposed selling it, transferring it to a club, or offering it to a community board via a loan. One respondent simply stated “No”.

Summary

Feedback regarding the Roxburgh Squash Court Building is divided, with some respondents advocating for its retention as a community resource, while others suggest divesting or selling it due to perceived lack of use and associated costs, although one respondent stated the Opex was very low for the building.

Other Halls & Facilities

comments: 45

About

Public were asked for their views on whether Council should divest or maintain support for the Other hall or facilities. The following summarizes the opinions and reasons provided.

Arguments For

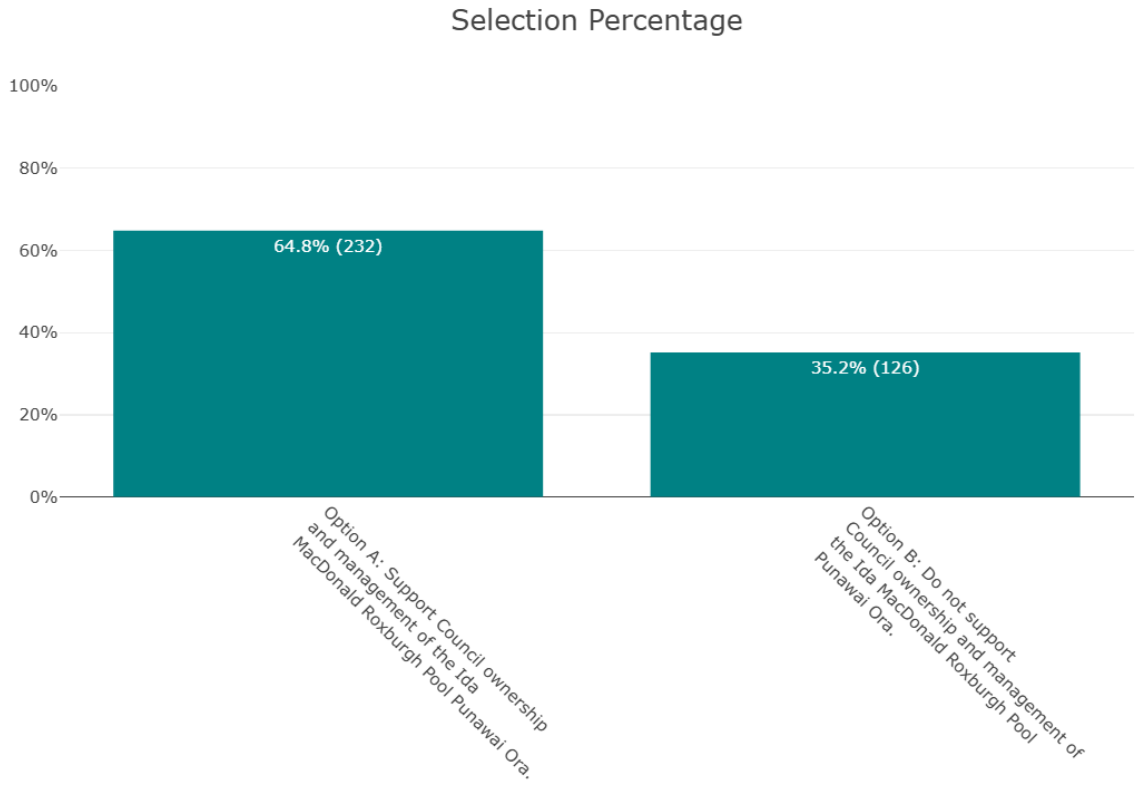
Some respondents highlighted the importance of community halls and facilities, particularly in rural areas, for fostering social connection, providing emergency hubs, and preserving local history. Central Stories in Alexandra was mentioned by several respondents as a well-used and vital community asset that preserves heritage, fosters artistic expression, and provides local information. One respondent noted that the cost of upgrading a particular hall is less than other halls in their community. Another respondent mentioned the increasing usage of a hall due to the closure of another facility.

Arguments Against

Several respondents expressed concerns about the potential divestment of community halls, particularly the impact on affected communities and the loss of unique community spaces. Some respondents highlighted the importance of community halls and facilities, particularly in rural areas, for fostering social connection, providing emergency hubs, and preserving local history. One respondent voiced concern over a community group controlling an asset they potentially don’t own, suggesting they should contribute income. There were also concerns about the financial implications of operating costs, capital expenditure, and earthquake strengthening costs. One respondent felt that the disparity of support to a new facility was unfair to the majority of ratepayers.

Summary

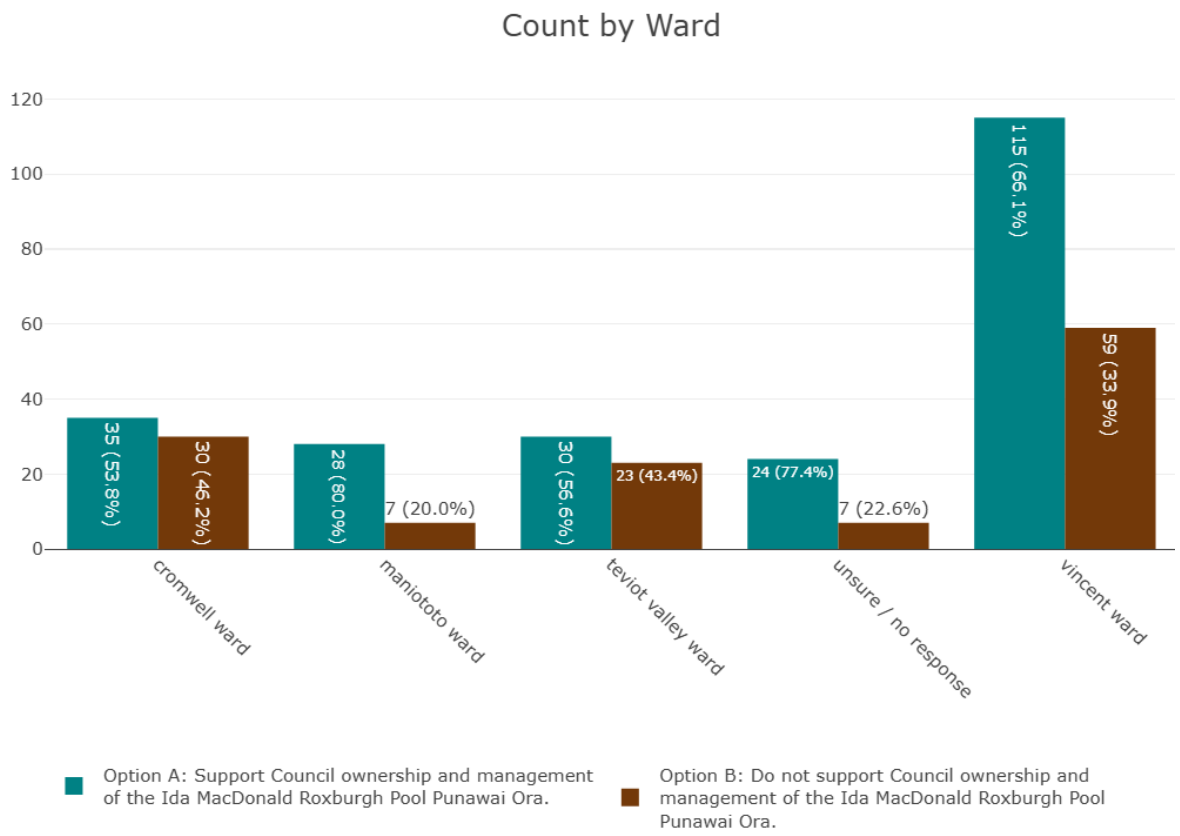
Feedback indicates a tension between recognising the financial challenges of maintaining community halls and the importance of these facilities for community identity, social connection, and emergency preparedness, with specific facilities like Central Stories receiving strong support for their community contributions, and concerns raised about the impact of divestment on rural communities and the fairness of funding allocations to different facilities.



Ida MacDonald Roxburgh Pool Punawai Ora

n=358
comments: 100

About



The question asks whether respondents support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora, with options to either support or not support this proposal.

There were 358 total responses: 232 voted for 'Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora. ', 126 voted for 'Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.'. 100 people made a comment.

Responses By Ward

Responses regarding Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora varied across wards. The Maniototo ward showed a stronger inclination towards supporting Council ownership and management, while the Vincent ward showed more support for not supporting Council ownership and management. The Cromwell and Teviot Valley wards had a roughly similar number of respondents for and against Council ownership and management. A large number of respondents selected 'unsure / no response' and, of those that did respond, there was a slight preference for supporting Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Summary

Option A, supporting Council ownership and management, was selected by 64.8% of respondents, while 35.2% chose Option B, opposing Council ownership. Option A was favoured due to the perception that Council ownership would ensure sustainability and broader community access, while Option B reflected a desire for community control and concerns about potential rate increases. Overall, the feedback indicates a community grappling with balancing the benefits of Council support against the desire for local autonomy and financial responsibility for the Ida MacDonald Roxburgh Pool Punawai Ora.

Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

comments: 52

Summary

Overall sentiment towards Option A is positive. The main themes include the necessity of the pool for the community, especially for water safety and recreation, and recognition of the challenges faced by the community in managing the pool independently. Respondents highlighted the need for Council resources to ensure the pool's sustainability, manage health and safety, and provide lifeguard services, while some expressed concern about potential rate increases and the impact on other community pools.

Key Points

- Council ownership ensures the pool's sustainability due to greater resources for maintenance, compliance, and staffing.
- Respondents highlighted the importance of the pool for community enjoyment, water safety education, and as a social hub.
- Several respondents acknowledged the Roxburgh community's effort in building the pool but recognised the challenges of community-led management.
- Some respondents expressed concern about potential rate increases associated with council ownership.
- A few respondents linked their support to the continued operation of other pools in the district.

In-depth Analysis
Arguments For

Respondents largely supported Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora due to sustainability concerns, resource availability, and ensuring community access. Many respondents highlighted that the Council has more resources for maintenance, lifeguard staffing, and meeting safety requirements. Some respondents noted the Roxburgh community had difficulty managing the pool's operational costs and health and safety liabilities. A few respondents mentioned the importance of the pool as a community asset for recreation, learning to swim, and social interaction, with some emphasising the need for consistent management across the district. One respondent noted the community had inve'ted a lot into the pool and children should have access to develop their swimming skills. The Roxburgh'Pool Committee also requested the support of the Teviot Valley Community Board for the divestment of the Roxburgh Swimming Pool to the Central Otago District Council.

Arguments Against

Some respondents expressed concern about the increased rates for the Teviot Valley and the financial burden on ratepayers. A few respondents were concerned about the Council picking up ongoing operating costs and preferred the Roxburgh community to decide on the ownership. One respondent didn't support taking on the Roxburgh pool if the outdoor pool in Alexandra is closed. Another respondent indicated they were not in support of either option.

Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

comments: 48

Summary

Overall sentiment towards Option B is mixed. The main themes include a desire for community ownership and management, concerns about increased rates and financial burden on the wider district, the belief that the Roxburgh community should be responsible for the pool's operation, and suggestions to explore alternative management models similar to Millers Flat. Some respondents felt the council should have addressed the ownership issue earlier and that the community has not fully explored all available options for self-management.

Key Points

- Many respondents believe the Roxburgh community should retain ownership and management of the pool.
- Several respondents highlighted the success of community-run pools like the one in Millers Flat as a model.
- Some respondents expressed concerns about increased rates and financial burden on the wider Teviot Valley if the council takes over.

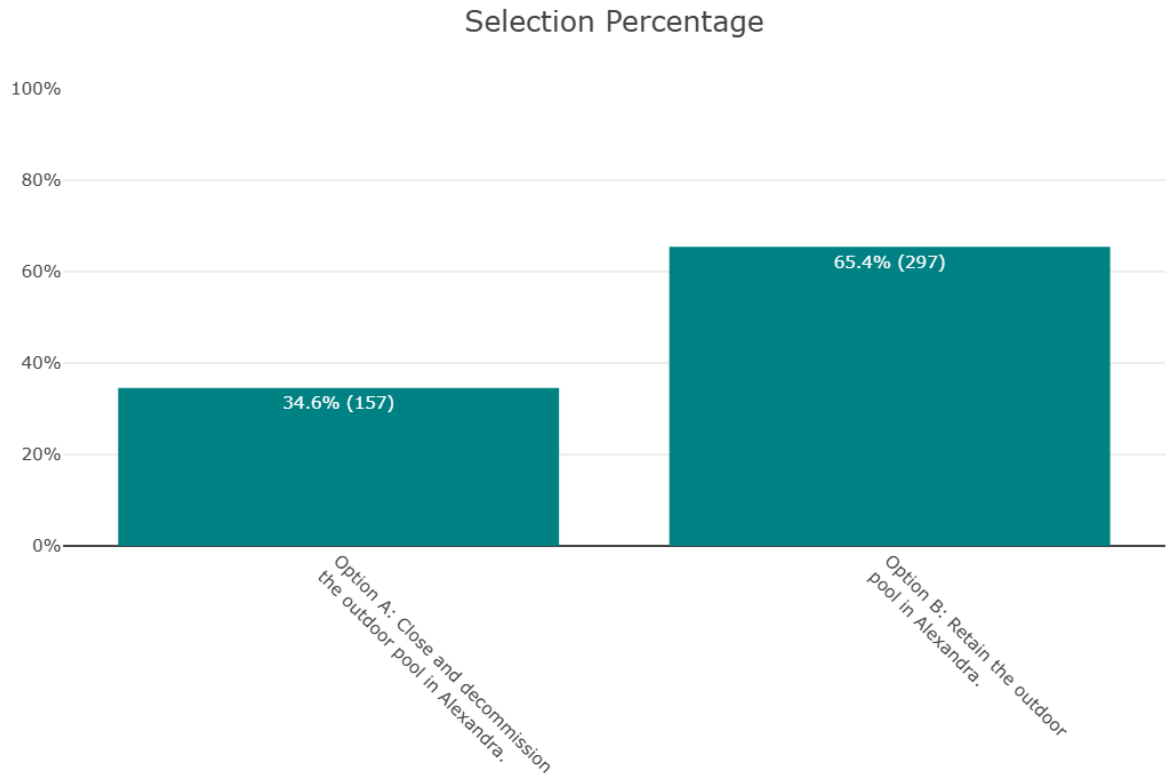
- A few respondents suggested exploring alternative management options, such as a key system or hybrid model with limited council involvement.
- Several respondents felt the Roxburgh community should have considered the ongoing costs and management of the pool before building it.

In-depth Analysis
Arguments For

Many respondents believed the Roxburgh community should retain control and responsibility for the Ida MacDonald Roxburgh Pool Punawai Ora, as it was built through community effort and fundraising. Some respondents highlighted the success of community-led pools like the one in Millers Flat, suggesting Roxburgh could adopt a similar model with community members taking responsibility and parents supervising their children. A few respondents suggested exploring options such as key access systems and increased community involvement before considering Council ownership. Some respondents expressed concern that Council ownership would dilute the community connection and potentially affect grant eligibility, as some funders prefer community-owned assets. A few respondents suggested a hybrid model where the community owns and operates the pool, with the Council providing lifeguards.

Arguments Against

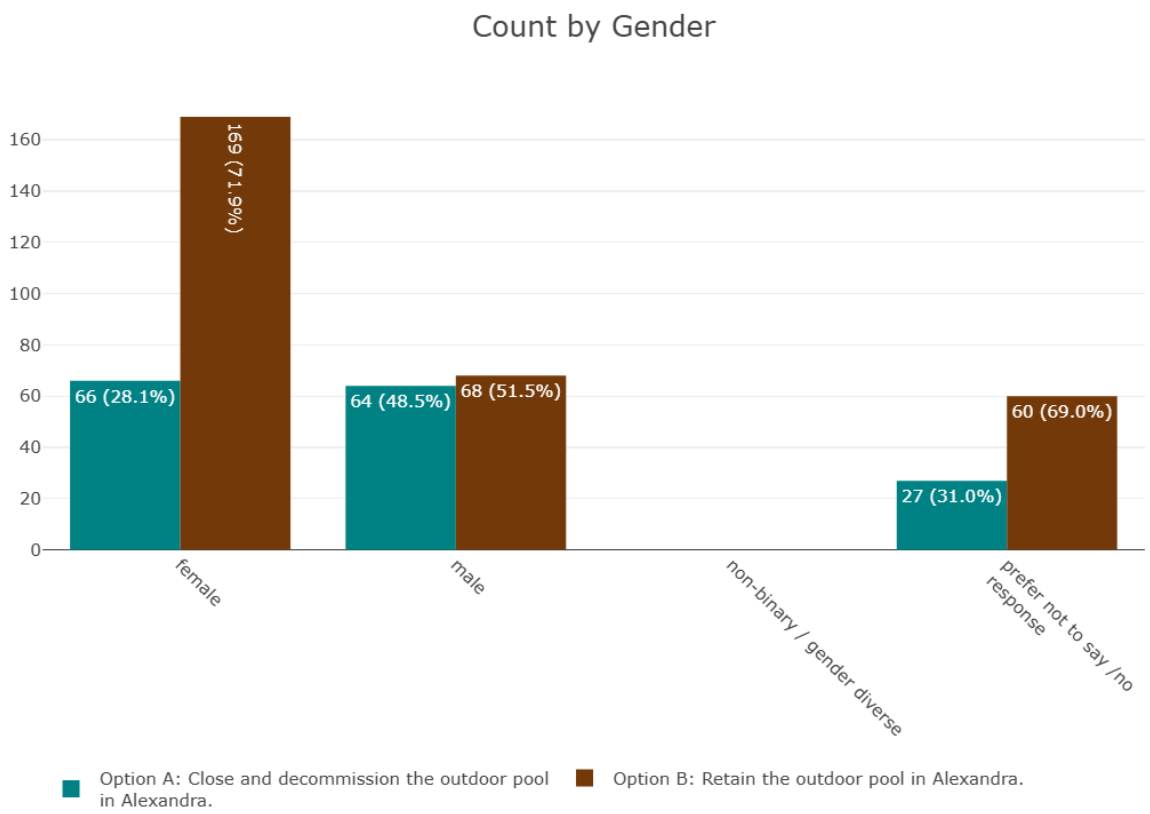
Some respondents expressed concerns about the long-term financial sustainability and management of the pool by the community, suggesting the pool should not have been built without a plan for ongoing funding. A few respondents felt that if the community cannot manage the pool, it should either operate on a user-pays basis or be decommissioned. Some respondents worried about potential rate increases for the wider Teviot Valley if the Council assumes ownership, particularly impacting ratepayers in areas like Millers Flat who already manage their own pool effectively. A few respondents noted that staffing issues would likely persist regardless of ownership and that the Council's proposed management costs seemed excessively high. Some respondents felt the Roxburgh community should bear the full financial burden, as residents from outside Roxburgh were unlikely to use the pool. A few respondents stated that the Roxburgh Pool Trust was trying to hand over the pool to the Council, requesting the Council takes over the ownership and management of the pool, and that the ratepayers will be disadvantaged again if the pool 'moves' to the Council.



Alexandra Outdoor Pool

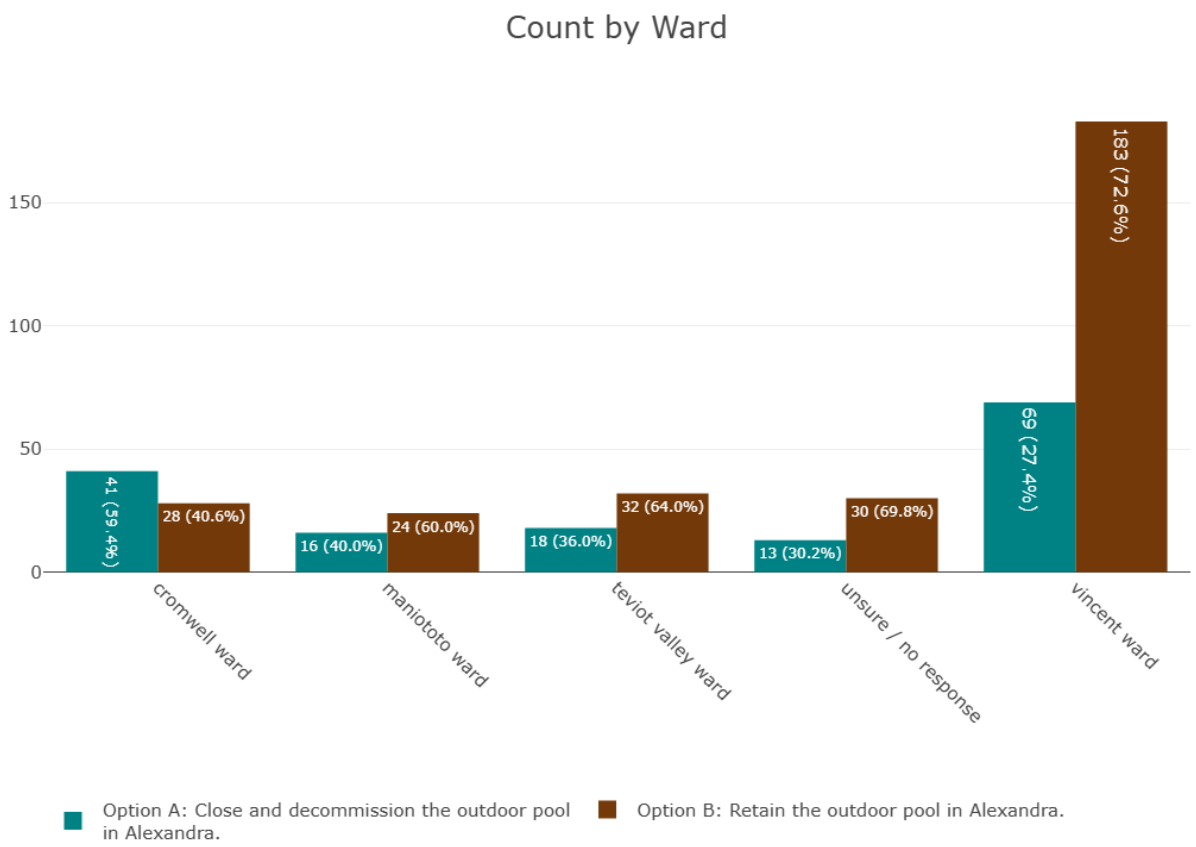
n=454
comments: 202

About



The question asks whether to close and decommission the outdoor pool in Alexandra or to retain it.

There were 454 total responses: 157 voted for 'Option A: Close and decommission the outdoor pool in Alexandra. ', 297 voted for 'Option B: Retain the outdoor pool in Alexandra.'. 202 people made a comment.



Responses By Gender

There is a stronger female bias in answering this question and there is a strong preference within this cohort for the pool to be retained, when compared to male respondents. Those who preferred not to say or gave no response also leaned towards retaining the pool. No respondents identifying as non-binary/gender diverse selected an option.

Responses By Ward

Respondents in Cromwell ward showed a stronger preference to close and decommission the outdoor pool in Alexandra, while respondents in Vincent ward preferred to retain the outdoor pool in Alexandra. Respondents in Maniototo ward and Teviot Valley ward also preferred to retain the outdoor pool in Alexandra.

Summary

Option B, retaining the Alexandra outdoor pool, was favoured by 65.4% of respondents, while 34.6% supported decommissioning it. The pool is viewed as a valuable community asset, especially for safe summer swimming and events like ice swimming, though staffing issues and potential improvements were frequently mentioned. Concerns about the accuracy of reported operating costs were also raised by some respondents, with suggestions for alternative uses of the space if decommissioned also suggested by some respondents. Overall, most feedback supports retaining the pool, emphasising its community value and potential for increased use with better management and enhancements, while a significant minority felt it was underutilised and costly.

Option A: Close and decommission the outdoor pool in Alexandra.

comments: 45

Summary

Overall, the sentiment towards closing and decommissioning the Alexandra outdoor pool is mixed. A significant number of respondents support the closure, citing low usage, the availability of alternative swimming options like the indoor pool and nearby lakes, and the potential for cost savings. However, some respondents expressed regret at the potential loss of the outdoor pool, highlighting its unique character and nostalgic value, while also suggesting alternative uses for the space if decommissioned, such as a skate park or family recreation area.

Key Points

- Many respondents feel the outdoor pool is underutilised, with low attendance and declining use cited as reasons for closure.
- Several respondents mentioned the availability of alternative swimming options such as the indoor pool, lakes, and rivers, reducing the need for the outdoor pool.
- Some respondents suggested alternative uses for the space if decommissioned, such as a skate park, family space, or picnic area.
- A few respondents highlighted potential cost savings from decommissioning, which could be redirected to other facilities or services.
- A small number of respondents expressed regret at the potential loss of the outdoor pool, citing nostalgia and its value to specific user groups.

In-depth Analysis
Arguments For

Respondents in favour of closing and decommissioning the outdoor pool in Alexandra cited low usage and the availability of alternative swimming options, such as the indoor pool, lakes, and rivers. Some respondents suggested the money saved could be better used for other facilities or to support pools in other areas. One respondent mentioned that the Regional Facility Strategy recommends rationalising facilities where demand no longer exists. Another respondent stated support from Sport Otago for this option, highlighting potential savings of approximately $200,000 per year.

Arguments Against

One respondent expressed reluctance, noting the outdoor pool as a point of difference and a hub for ice swimmers. Some respondents expressed a general appreciation for outdoor pools. One respondent also raised concerns about the council "fudging reality" regarding usage and costs, while still ultimately agreeing with the option due to economic times. Another respondent mentioned the nostalgic value of outdoor pools and their use by social service groups and families in the summer.

Option B: Retain the outdoor pool in Alexandra.

comments: 157

Summary

The overall sentiment towards retaining the Alexandra outdoor pool is overwhelmingly positive. Respondents highlighted its importance as a safe and enjoyable outdoor swimming option, especially given concerns about river quality and the hot climate. Many also emphasized its unique role in hosting ice swimming events, attracting tourists, and providing a valuable community asset, while some suggested improvements such as better staffing, shade, and promotion to increase usage and address perceived high operating costs.

Key Points

- The outdoor pool is considered a valuable community asset, providing a safe and enjoyable swimming venue, especially during hot summers when rivers may be unsafe due to pollution.
- Respondents expressed concern over frequent closures and reduced hours due to staffing shortages, suggesting this negatively impacts usage statistics.
- Many submissions highlighted the pool's importance for events like ice swimming competitions, which attract tourists and bring economic benefits to the town.
- Several respondents suggested improvements to the pool area, such as adding shade, picnic tables, water slides, or splash pads, to enhance its appeal and increase usage.
- Some submissions questioned the accuracy of the council's reported operating costs for the outdoor pool, suggesting they may be inflated.

In-depth Analysis

Arguments For

Respondents expressed widespread agreement (65.4% selection rate) that the Alexandra outdoor pool is a valuable community asset, particularly as a safe outdoor swimming venue, especially given concerns about river pollution and the hot summer climate. Many respondents highlighted its importance for children's water safety skills, recreation, and community events like ice swimming competitions, which bring economic benefits and media attention to the town. Several respondents mentioned the pool's uniqueness, with some stating it is the only one of its kind in New Zealand, and its importance for training world-class ice swimmers. A number of respondents also noted that the pool provides an alternative to the often crowded and stuffy indoor pool during summer. Some respondents suggested improvements such as better staffing, shade, and additional facilities to enhance its use.

Arguments Against

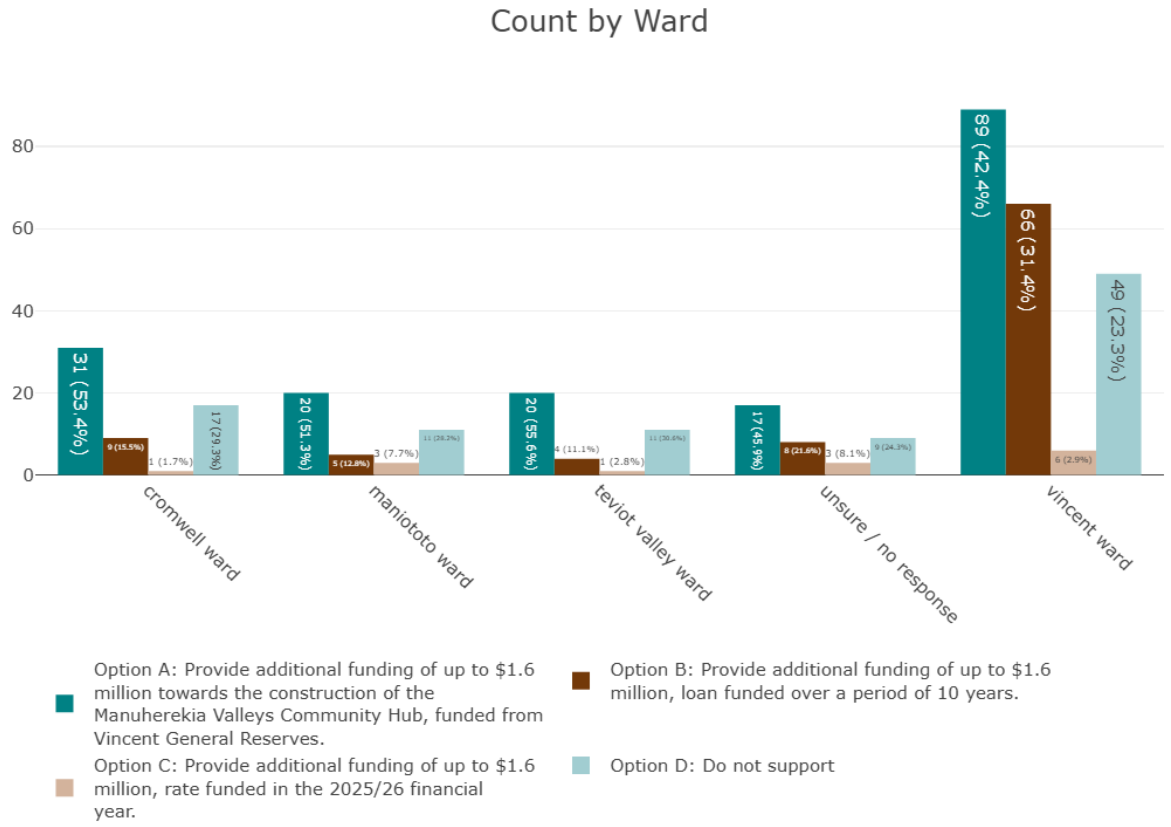
Some respondents indicated concerns about the pool's inconsistent opening hours due to staffing shortages, leading to reduced usage. A few respondents suggested the pool area needed improvements, such as more shade and playground equipment, to make it more appealing. One respondent suggested diversifying the offering to include a water park. A small number of respondents questioned the reported operational costs, suggesting they were inflated, and that cost savings could be achieved through better management and marketing. One respondent suggested closing other pools and upgrading Alexandra. One respondent suggested making the users pay.

Manuherekia Valleys Community Hub

n=380
comments: 85

About

The question asks whether to provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub. The options include funding from Vincent General Reserves, a loan, rates, or not supporting the funding at all.



There were 380 total responses: 177 voted for 'Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.', 92 voted for 'Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.', 14 voted for 'Option C: Provide additional funding of up to $1.6 million, rate funded in the 2025/26 financial year.', 97 voted for 'Option D: Do not support'. 85 people made a comment.

Responses By Ward

Respondents from Vincent ward showed a stronger preference for Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years compared to other wards. However, overall, Vincent ward supported Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funding from Vincent General Reserves. All wards showed similar low support for Option C: Provide additional funding of up to $1.6 million, rate funded in the 2025/26 financial year. Cromwell ward respondents showed a slightly higher preference for Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves compared to other wards, excluding Vincent ward

respondents who also showed a high preference. Support for Option D: Do not support was somewhat consistent across wards, with Cromwell, Maniototo and Teviot Valley wards having similar levels of support.

Summary

Option A, providing additional funding from Vincent General Reserves, was the most selected (46.6%), while Option C, rate-funded in 2025/26, received very low support (3.7%). Feedback indicates that the hub is considered essential for community connection and activities, particularly if smaller halls are decommissioned, but concerns exist regarding long-term costs and potential impact on existing facilities. Overall, there is considerable support for the Manuherekia Valleys Community Hub as a valuable community asset, but opinions diverge on the funding approach and its broader implications for the region's facilities and ratepayers.

Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

comments: 31

Summary

Overall, the sentiment towards Option A was positive. The main themes in favour included the critical need for the hub in the community, especially with the potential decommissioning of smaller halls, and the appropriateness of using Vincent General Reserves for a facility primarily benefiting Vincent residents. Some respondents highlighted the community's investment in the project and the potential for the hub to provide opportunities and support for various groups, while a few expressed concern about the lack of a 'Do not support' option and the need to ensure the hub is well-used and cost-effective, and that Cromwell is not unfairly favoured over other communities.

Key Points

- The respondents indicated that the hub is essential, particularly if smaller halls are decommissioned.
- A number of respondents highlighted the importance of the hub for community connection, activities, and wellbeing, especially for youth.
- Several respondents supported funding from Vincent General Reserves, emphasising that Vincent residents and visitors will primarily use the facility.
- Some respondents drew comparisons to funding decisions in Cromwell, suggesting consistency in supporting community facilities.
- A few respondents expressed the need for more information regarding existing funding, reserve amounts, and potential alternative uses for the funds.

In-depth Analysis
Arguments For

Many respondents supported Option A, citing the critical need for the community hub, particularly with the decommissioning of smaller halls. They highlighted that the Vincent General Reserves should be used for this purpose, as the facility primarily benefits Vincent residents. Several respondents emphasised the community's investment and the potential for the hub to provide opportunities for connection, wellbeing programmes, and various community groups, while others noted the project had already been committed to. Some respondents also drew comparisons to funding allocated to facilities in other areas like Cromwell, suggesting consistency in supporting community assets.

Arguments Against

One respondent wanted more information about the funding source, the amount in the Vincent General Reserve, and other potential uses for the money. A respondent expressed concern about the cost compared to the size of the population and the ability of local groups to afford to hire the facility and another respondent compared the relatively small amount of money for this project with the large amount spent on the Cromwell Hall.

Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

comments: 21

Summary

The sentiment towards Option B is mixed. While respondents appreciate the idea of spreading the cost over time and preserving reserves, some raised concerns about the loan's interest costs, the repayment responsibility falling on the community, and whether the project's scale is justified by the population size. A few respondents also stressed that funding the hub should not come at the expense of other community facilities like the Ophir Hall, or without considering other potential uses for the Vincent General Reserves.

Key Points

- Several respondents supported the funding of the hub as a long-term community asset.
- Some respondents expressed concern about the financial implications, including interest costs and the repayment of the loan, with one respondent suggesting a longer timeframe than 10 years.
- A few respondents were against using Vincent General Reserves for funding, with one respondent suggesting exploring alternative uses for the reserves and another respondent stating the community should fund it themselves if they want something grander.
- Several respondents emphasised the importance of the hub for the community and its potential to foster community engagement.

- Some respondents stressed that the hub should not replace existing facilities like the Ophir Peace Memorial Hall.

In-depth Analysis
Arguments For

Respondents in favour of Option B highlighted that the hub would serve a large community and be a valuable asset. The respondents said that spreading the cost of the project over a 10-year loan period makes financial sense for ratepayers. Some respondents noted that Option B allows reserves to be kept for other important needs, and encourages community ownership of the project. The respondents also noted the importance of rural hubs and the need to support them. The selection metrics show that 24.2% of submissions considered selected this option, indicating a notable level of support.

Arguments Against

Arguments against Option B included concerns about the interest costs associated with a 10-year loan. One respondent questioned whether the community could justify the cost of interest. Some respondents expressed concern about the overall cost of the hub relative to the population it serves. A respondent stated a desire for alternative uses of the Vincent General Reserves to be explored. Some respondents also emphasised that the hub should not come at the expense of other community facilities, such as the Ophir Peace Memorial Hall.

Option C: Provide additional funding of up to $1.6 million, rate funded in the 2025/26 financial year.

comments: 6

Summary

Overall, the sentiment towards providing additional funding of up to $1.6 million for the Manuherekia Valleys Community Hub is positive. Respondents highlighted the potential of the hub to be a huge asset to the community and surrounding areas, suggesting it could replace older facilities and benefit a wide community. One respondent expressed no comment, while another acknowledged the support provided by CODC for the hub.

Key Points

- The hub is considered a significant asset to the community and surrounding areas.
- The facility is viewed as a well-designed complex that will benefit a wide community.
- Some respondents believe the funding is better spent on this project compared to other local facilities.
- The hub is expected to bolster the Omakau area, providing benefits such as a site with power for the toy library.
- One respondent noted the importance of constructing the hub sooner to reduce uncertainty for local communities.

In-depth Analysis
Arguments For

Respondents in favour of Option C highlighted that the funding would enable the construction of a modern facility that would benefit the wider community and surrounding areas, potentially replacing older facilities. They viewed the proposed hub as a significant asset, particularly for organisations like the toy library, and considered the requested funding a worthwhile investment compared to other projects.

Arguments Against

One respondent selected 'None of the above - No comment', which does not provide a specific argument against, but indicates a lack of support or opinion for this option. Given that only 3.7% of submissions selected this option, it indicates that the majority of respondents did not strongly support this option.

Option D: Do not support

comments: 27

Summary

Overall, the sentiment towards Option D: Do not support, is largely negative. The respondents expressed concerns regarding the cost, potential financial burden on ratepayers, and the prioritisation of a new hub when existing facilities are underfunded or being divested. Several respondents suggested exploring alternative solutions like utilising existing buildings or reducing the scale of the project, with a few highlighting the need for more transparency and community fundraising efforts.

Key Points

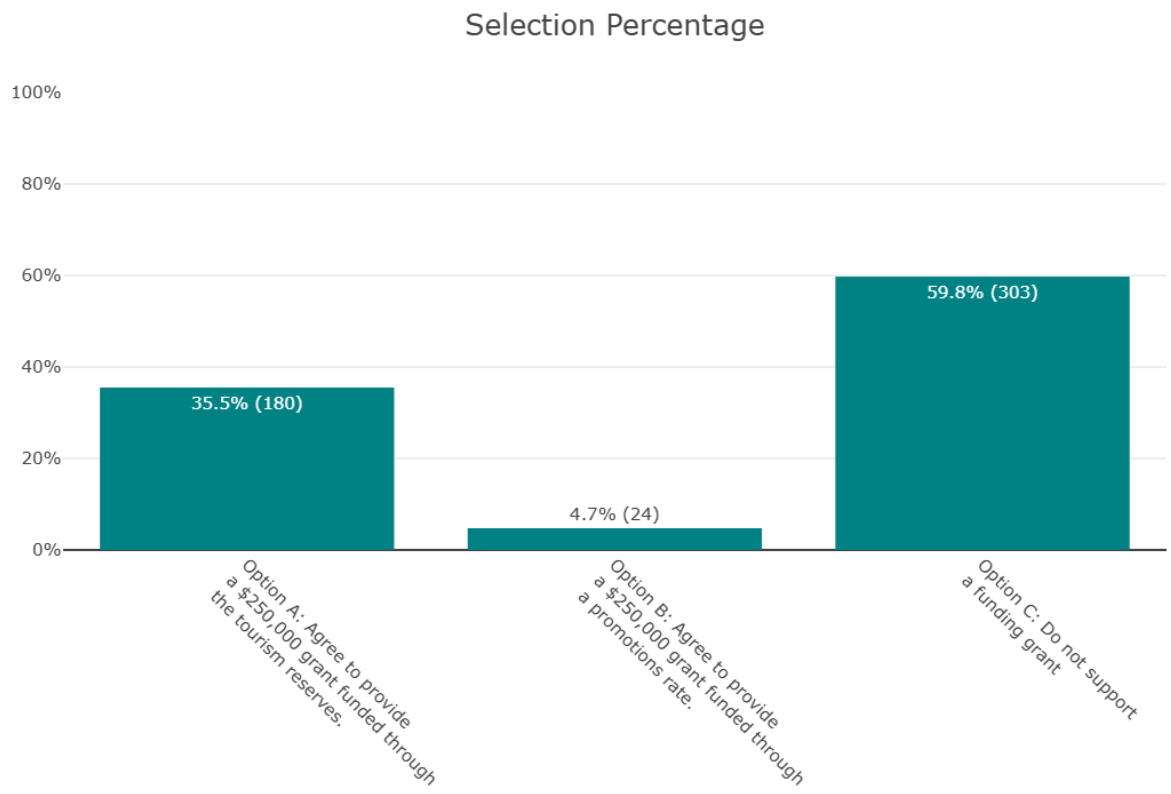
- Concerns exist regarding the long-term and escalating costs to ratepayers, especially in light of potential divestment of existing community halls.
- Several respondents suggested exploring options to improve existing facilities or using existing buildings instead of constructing a new hub.
- Doubts were raised about the actual demand for the hub and whether it justifies the financial commitment, particularly when compared to other community needs.
- Some respondents feel the funding request lacks transparency, especially regarding the initial underestimation of costs and the overall value for money.
- A few respondents believe the community should fundraise locally, similar to other area halls.

In-depth Analysis
Arguments For

Respondents in favour of not supporting the Manuherekia Valleys Community Hub expressed concerns about the financial implications, including escalating building and operational costs for ratepayers. Some respondents questioned the need for a new facility when existing ones are underutilised or being divested, suggesting that resources should be directed towards maintaining current infrastructure. A few respondents also felt the project was a 'vanity project', suggesting local fundraising instead.

Arguments Against

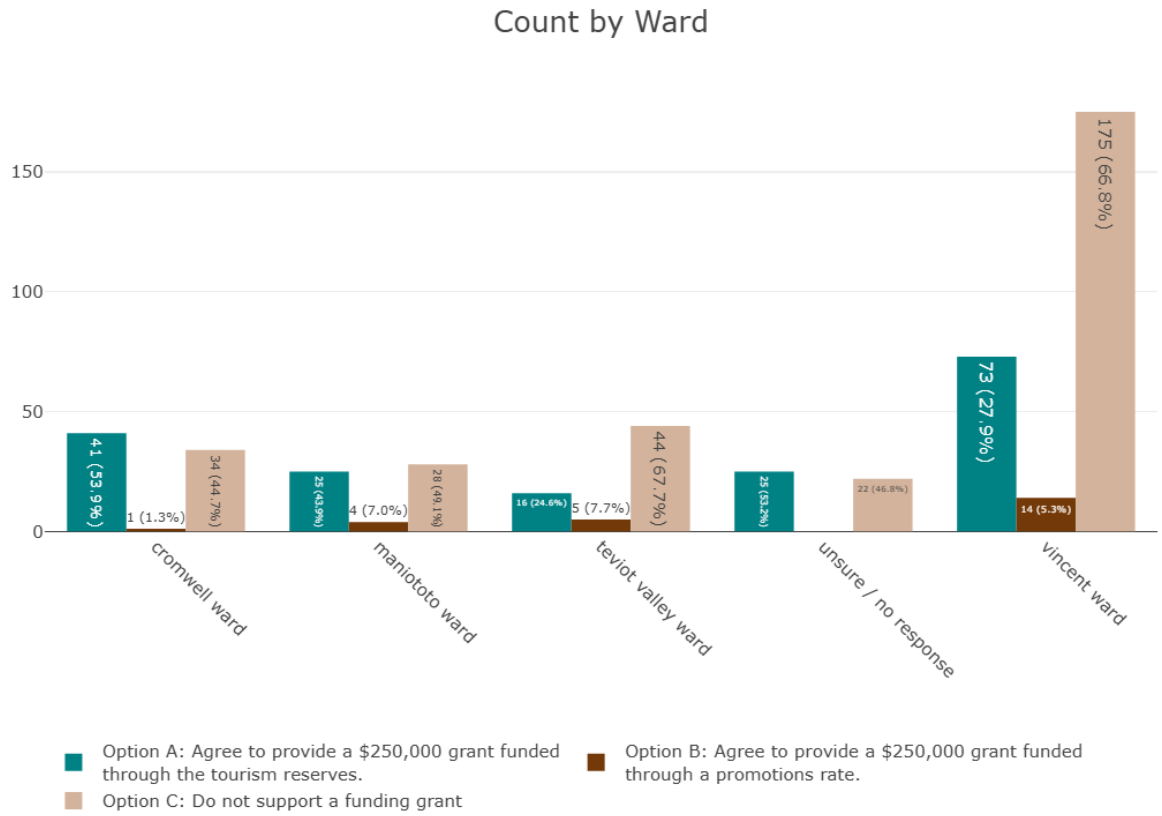
Arguments against not supporting the hub were not explicitly stated in the provided comments, as the comments were focused on justifying the 'Do not support' option. Therefore, arguments against this option are implicit in the concerns that a community hub is needed and would provide benefits, which are not detailed in the provided feedback for this option.



Supercars Championship

n=507
comments: 192

About



The question asks whether to provide a $250,000 grant for the Supercars Championship, with options to fund it through tourism reserves or a promotions rate, or to not support a funding grant.

There were 507 total responses: 180 voted for 'Option A: Agree to provide a $250,000 grant funded through the tourism reserves. ', 24 voted for 'Option B: Agree to provide a $250,000 grant funded through a promotions rate. ', 303 voted for 'Option C: Do not support a funding grant'. 192 people made a comment.

Responses By Ward

Preferences regarding the Supercars Championship varied across the wards. Respondents from Cromwell ward showed a stronger inclination towards agreeing to provide a $250,000 grant funded through the tourism reserves, while those from Teviot Valley ward were more inclined to not support a funding grant. Maniototo ward respondents displayed a more even distribution of preferences across the options compared to other wards.

Summary

Option C, 'Do not support a funding grant,' was the most selected option, chosen by approximately 60% of respondents, while Option B, utilising a promotions rate for funding, had very low support at only 4.7%. The primary sentiment was that Supercars should be commercially self-funded, with concerns raised about using public funds for a private venture and the environmental impact of supporting a fossil fuel-dependent event. Some respondents believed the grant would provide economic benefits and promote tourism, but others suggested the funds would be better allocated to essential community services and infrastructure, or that the benefits would primarily accrue to Queenstown, not the Central Otago District. Overall, there was significant opposition to providing a funding grant for the Supercars Championship, with a strong preference for commercially self-funding the event or allocating funds to community services and infrastructure projects instead.

Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

comments: 53

Summary

Overall, the sentiment towards providing a $250,000 grant for the Supercars Championship is positive. The respondents said that the event would bring significant financial benefits and promote tourism in the region, showcasing Central Otago and Cromwell to a wider audience. Some respondents highlighted the importance of ensuring local businesses benefit and visitor needs are met, while a few expressed concerns about rates or suggested matching funds from other districts, and one respondent was opposed to the option.

Key Points

- The respondents said that the grant would provide significant economic benefits and promote tourism in Cromwell and Central Otago.
- Several respondents highlighted the potential for worldwide TV coverage and increased visitation to the region.
- Some respondents suggested conditions for the grant, such as better deals for local ratepayers or ensuring the event doesn't increase rates.
- A few respondents expressed concern that Christchurch may have already secured the Supercars event.
- One respondent suggested matching funds from QLDC, given the dispersed benefits to their district.

In-depth Analysis
Arguments For

Respondents in favour of Option A highlighted the potential for significant financial benefits to Cromwell and the wider Central Otago region, with many believing the event would boost the local economy and promote tourism. Some respondents noted the event's potential to showcase the area on a global scale and provide a good return on investment for the district. A number of respondents also emphasised the importance of supporting events that attract visitors to the region, with one respondent pointing out that events align with Central Otago’s competitive advantage in tourism infrastructure and natural environment.

Arguments Against

Some respondents expressed concern that Christchurch may already have secured the Supercars event. One respondent stated the event is a commercial venture that would primarily benefit commercial tourism operators rather than general ratepayers. Two respondents simply stated "No" without providing further explanation, and one respondent questioned whether the event would actually eventuate.

Option B: Agree to provide a $250,000 grant funded through a promotions rate.

comments: 5

Summary

The sentiment towards Option B appears mixed. While some respondents believe it would bring revenue and foster community ownership, others oppose using public funds for a privately owned motorsport park, especially if the event is unlikely to be held there. One respondent highlighted the potential for ongoing funding for the community from such events, while another expressed strong disapproval of council funding for the Supercars at Highlands Motor Sports Park.

Key Points
- One respondent expressed concern about council funds supporting a private venture like Highlands Motor Sports Park.
- One respondent believes this option fosters ownership and reduces reliance on government funding.
- One respondent noted the potential for significant revenue generation for the local community (hotels, motels, food, fuel etc).
- One respondent mentioned Ruapuna potentially hosting the 2026 event, possibly excluding Cromwell.
- One respondent believes that the Supercars Races will not be held at Highlands park.

In-depth Analysis
Arguments For

Some respondents believed this option would foster ownership and bring ongoing funding to the community for years to come through hotels, motels, food, and fuel. One respondent noted the potential for significant revenue to the area, suggesting it would be a good investment.

Arguments Against
One respondent expressed strong opposition to the council using public money for a campaign benefiting Highlands Motor Sports Park, particularly Tony Quinn, arguing that Quinn has sufficient personal funds. Another respondent indicated that the Supercars Races will not be held at Highlands Park.

Option C: Do not support a funding grant

comments: 134

Summary

Overall sentiment towards the option 'Option C: Do not support a funding grant' is overwhelmingly negative. The main themes include the belief that Supercars is a commercial venture that should be self-funded, concerns about using ratepayer money for a private business, especially during a cost-of-living crisis, and the view that such funding contradicts the council's climate emergency declaration. Respondents suggested the money could be better used for community facilities, infrastructure, or environmental initiatives, and some questioned the financial benefits to the wider Central Otago district.

Key Points

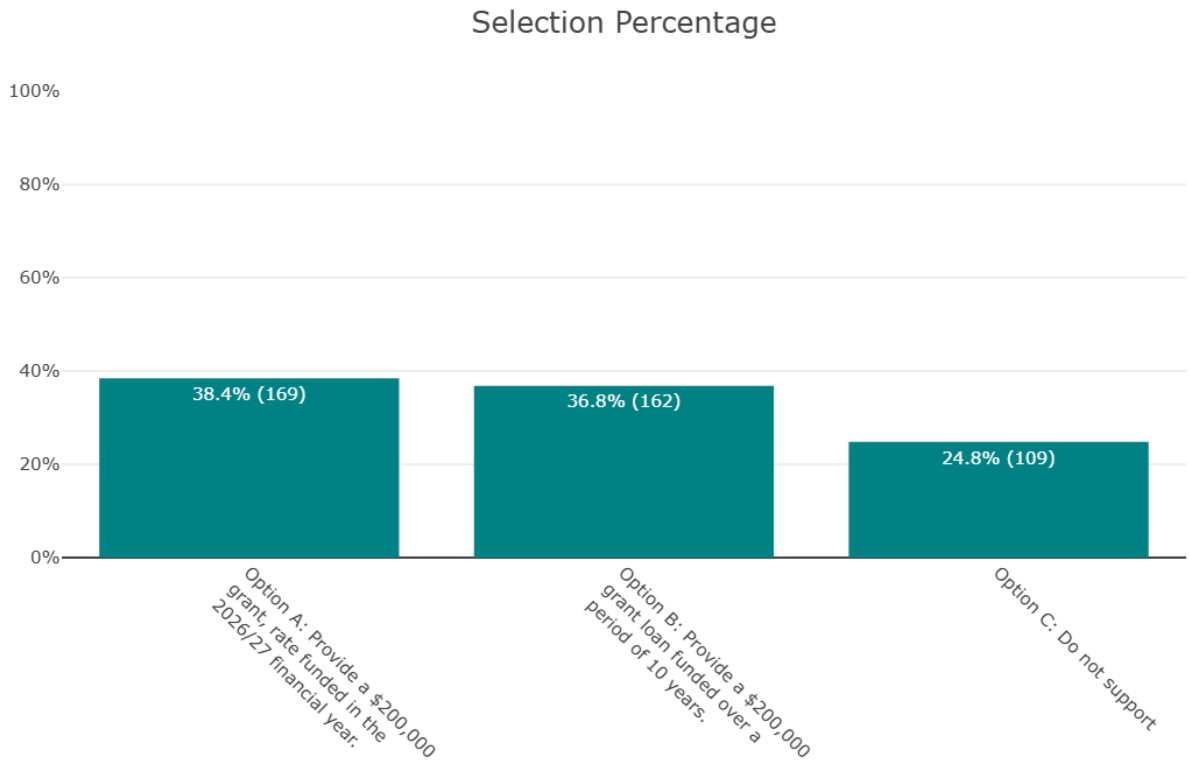
- Ratepayers expressed that Supercars should be commercially self-funded, not subsidised by council funds.
- Respondents highlighted the contradiction of funding a fossil fuel-dependent event during a declared climate emergency.
- Many submissions suggested that the funds could be better allocated to essential community services and infrastructure, such as halls and pools.
- Some submissions raised concerns that the economic benefits would primarily benefit Queenstown, not the Central Otago District.
- A number of respondents stated that Supercars is a wealthy sport and entertainment that does not require public funding.

In-depth Analysis
Arguments For

The respondents widely agreed (303 out of 507 submissions) that a funding grant should not be provided for the Supercars Championship. The primary reasons included that it is a commercial venture that should be self-funded, especially since Highlands is owned by a wealthy individual. Many respondents felt that ratepayer money should be prioritised for essential community services like halls, swimming pools, and infrastructure, particularly during a cost-of-living crisis. Several respondents raised concerns about the environmental impact of supporting a fossil fuel-dependent event, conflicting with the council's declared climate emergency. Some respondents believed that the economic benefits would primarily accrue to Queenstown, not the Central Otago District Council (CODC) area.

Arguments Against

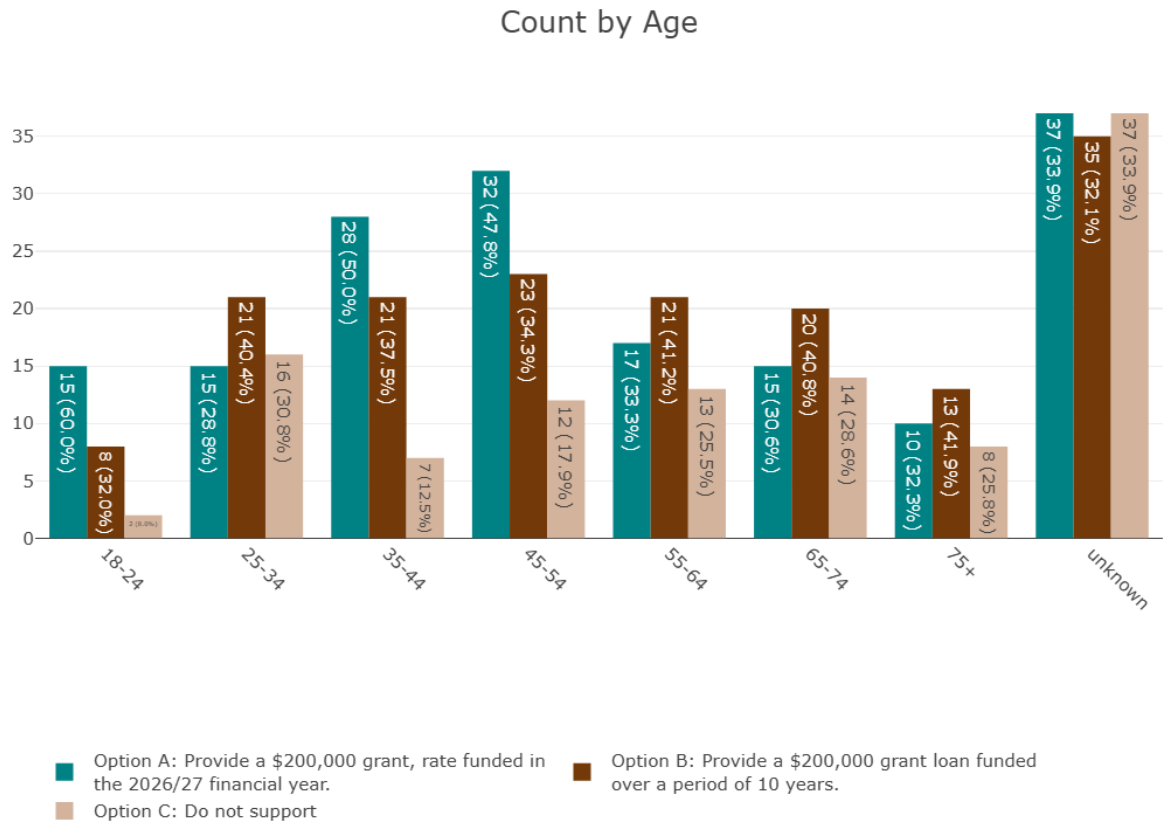
There were no explicit arguments in favour of providing a funding grant in the provided comments. The comments were overwhelmingly against providing the grant. Therefore, there are no arguments against this option based on the provided text.



Artificial Turf at Maniototo Area School

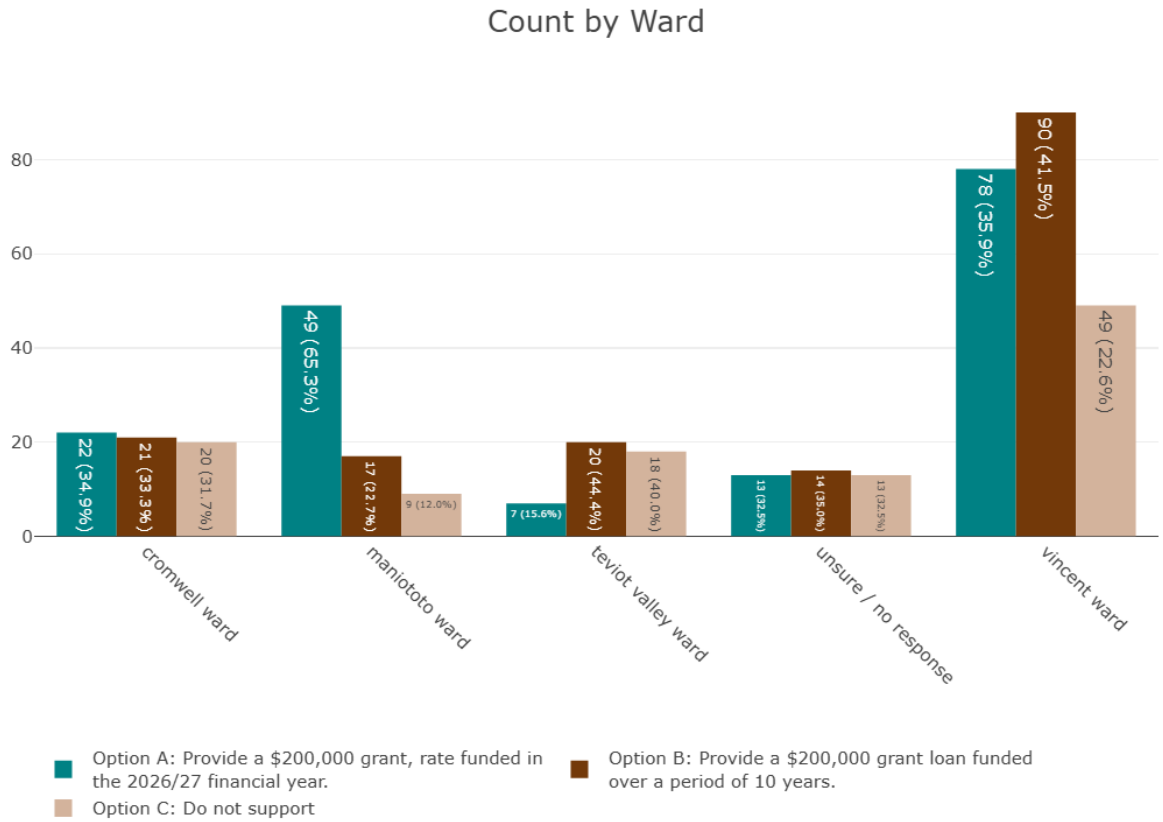
comments: 127

About



The question asks whether to provide funding for artificial turf at Maniototo Area School. The options are a $200,000 grant rate funded in the 2026/27 financial year, a $200,000 grant loan funded over 10 years, or to not support the funding request.

There were 440 total responses: 169 voted for 'Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.', 162 voted for 'Option B: Provide a $200,000 grant loan funded over a period of 10 years. ', 109 voted for 'Option C: Do not support'. 127 people made a comment.



Responses By Age

Respondents aged 18-24 showed a stronger preference for Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year, while those aged 75+ leaned more towards Option B: Provide a $200,000 grant loan funded over a period of 10 years. Respondents aged 35-54 showed more support for Option A, while those aged 25-34 were more inclined towards Option C: Do not support.

Responses By Ward

Preferences for the artificial turf options varied across different wards. Respondents in the Maniototo ward showed a stronger preference for 'Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.' compared to other wards. In contrast, respondents in the Teviot Valley ward showed less support for 'Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.' and were more inclined towards 'Option C: Do not support'. The Cromwell and Vincent wards showed a more even distribution of preferences across all three options.

Summary

Option A ($200,000 grant) and Option B ($200,000 loan) were similarly favoured, with 38.4% and 36.8% of respondents selecting them, respectively, while Option C (Do not support) was selected by 24.8%. Support for the grant (Option A) centred on the upgrade's crucial role in addressing safety concerns and enhancing wellbeing in an isolated community, while those favouring the loan (Option B) appreciated spreading the cost over time, though some felt central government should be responsible. Those who did not support the upgrade (Option C) raised concerns about financial implications for ratepayers, questioned whether funding school facilities was a core council service, and cited environmental concerns related to artificial turf.

Overall, the feedback indicates significant support for upgrading the artificial turf at Maniototo Area School, driven by the need for improved facilities and community benefits, but also highlights concerns about funding responsibility and financial impact on ratepayers, with some suggesting alternative funding models and a need to balance community benefits against financial constraints.

Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

comments: 56

Summary

Overall, the sentiment towards Option A is positive. Key themes include the importance of the turf for the wellbeing of young people in an isolated area, the current turf's poor condition and safety concerns, and the

benefits of having a local facility to reduce travel for sports. Respondents also highlighted the turf's use by both the school and the wider community, and the potential for the facility to foster sporting opportunities for kids and adults. A few respondents raised concerns about rates increases and alternative funding sources, and one respondent opposed the option without providing a reason.

Key Points

- The upgrade is considered crucial due to the existing turf's poor condition, posing safety risks and limiting usability.
- The grant is seen as a vital investment in the wellbeing of young people in an isolated area with limited social and sporting opportunities.
- The upgraded facility is expected to serve as a community hub, benefiting not only the school but also various sporting groups and holidaymakers.
- Several respondents highlighted the need to reduce travel burdens on families for sports practices and games.
- Some respondents noted the importance of the upgrade in light of the recent gym refurbishment, viewing the turf as the final piece of the puzzle.

In-depth Analysis
Arguments For

Respondents largely supported Option A due to the importance of the Maniototo Area School turf as a community and sporting hub, particularly given the area's isolation. The respondents said the current turf is unsafe and in need of urgent replacement, posing a health risk. The respondents highlighted the benefits for youth sports, social connection, and the development of local talent, with several respondents noting the high travel demands on families for sports. Respondents also emphasised that the facility would be well-used by both the school and the wider community, including holidaymakers, and that the upgrade aligns with other community facility improvements, such as the gym. Some respondents expressed a willingness to accept a rate increase to fund the project. Sport Otago also supports this option.

Arguments Against

One respondent was against the option. A small number of respondents raised concerns about rate increases and questioned whether funding should come from other sources, such as tourism funds or the Education Board. One respondent suggested short-term funding would be preferable. One respondent raised the need for toilet facilities if Option A was selected. One respondent stated a full-size hockey turf would be more desirable.

Option B: Provide a $200,000 grant loan funded over a period of 10 years.

comments: 33

Summary

Overall sentiment towards Option B, providing a $200,000 grant loan funded over 10 years, appears mixed. The respondents mentioned the benefit of spreading the cost over time and fostering community ownership, while others expressed concerns about the school's size justifying the expense and questioned why the Ministry of Education wasn't providing the funding. Some respondents highlighted the importance

of sports facilities for youth and community health, with a few suggesting user fees to cover costs and debt servicing.

Key Points

- A loan spreads the cost over time, easing the immediate burden on reserves.
- Several respondents believe central government (Ministry of Education) should be primarily responsible for funding such projects.
- Some respondents highlighted the importance of community involvement and user fees to cover costs and ensure responsible use.
- The facility is seen as a valuable asset for both the school and the wider community, promoting health and wellbeing.
- A few respondents expressed concerns about the justification of the cost for the school's size or questioned CODC's financial capacity.

In-depth Analysis
Arguments For

Many respondents supported the loan option, highlighting that it spreads the cost over time and fosters community ownership and responsibility through fundraising. Some respondents noted the benefit to the school and wider community, particularly for sports and health. A number of respondents mentioned that a long-term asset should be funded over a longer period, aligning with the expected lifespan of the turf. Several respondents indicated that it frees up reserves for other needs. Some respondents see it as a way to provide necessary facilities given insufficient central government investment.

Arguments Against

Some respondents questioned the justification for the project given the school's size, and others felt the Ministry of Education should be responsible for funding such projects. A few respondents expressed concern that the council doesn't really have the money. One respondent supported the Alexandra turf over the Maniototo one. One respondent was against the option.

Option C: Do not support

comments: 38

Summary

Overall sentiment towards Option C: Do not support, is largely negative. The main themes include concerns about the financial burden on ratepayers, especially during tight economic times, and the belief that funding for school facilities should come from the Ministry of Education, the school itself, or community fundraising, rather than council grants. Some respondents also expressed environmental concerns regarding artificial turf and questioned the necessity of the project, suggesting alternative funding sources should be explored first. There was also a view expressed that it is not a core council service and sets a precedent.

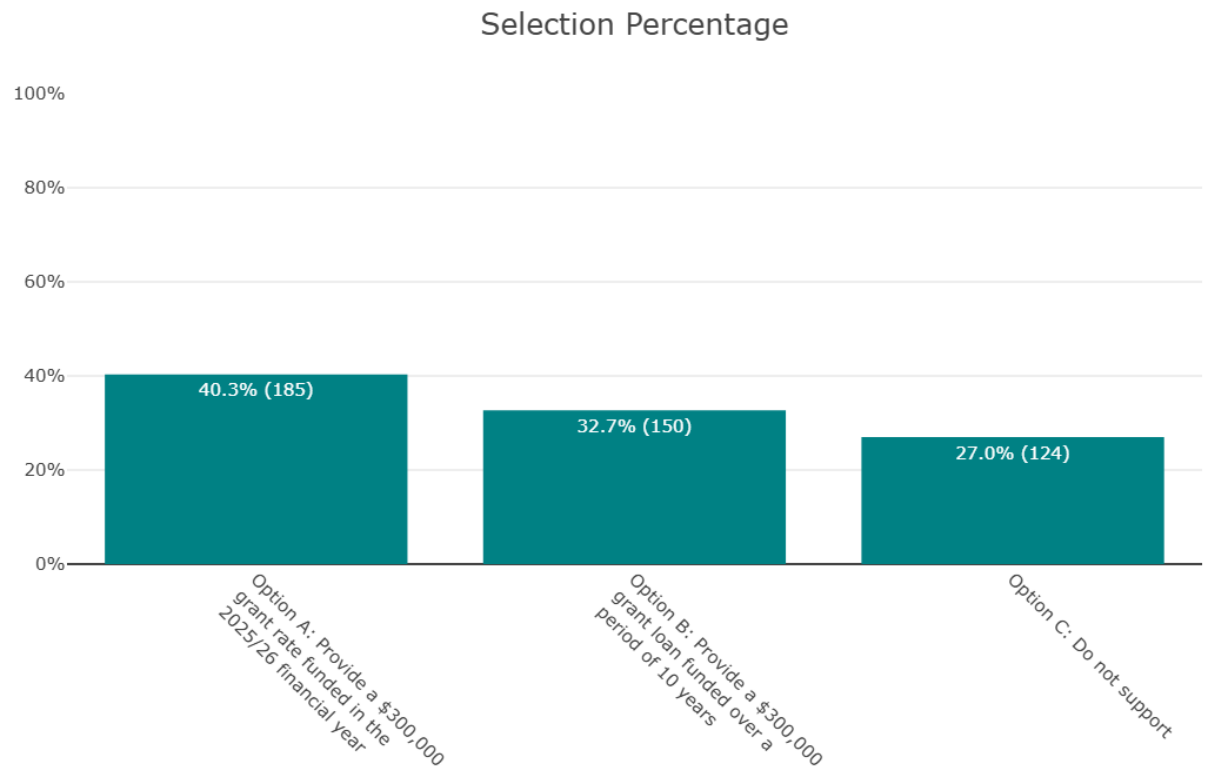
Key Points

- Many respondents believe the project should be funded by the Ministry of Education or through community fundraising, not by local council rates.

- Several respondents expressed concerns about the financial implications for ratepayers, especially given current economic conditions and potential rate increases.
- A number of respondents feel that funding school facilities is not a core council service and that alternative funding sources should be explored.
- Some respondents questioned the necessity of the project, viewing it as a 'nice-to-have' rather than an essential expenditure.
- A few respondents raised environmental concerns related to artificial turf, including plastic loading and microplastics.

In-depth Analysis
Arguments For

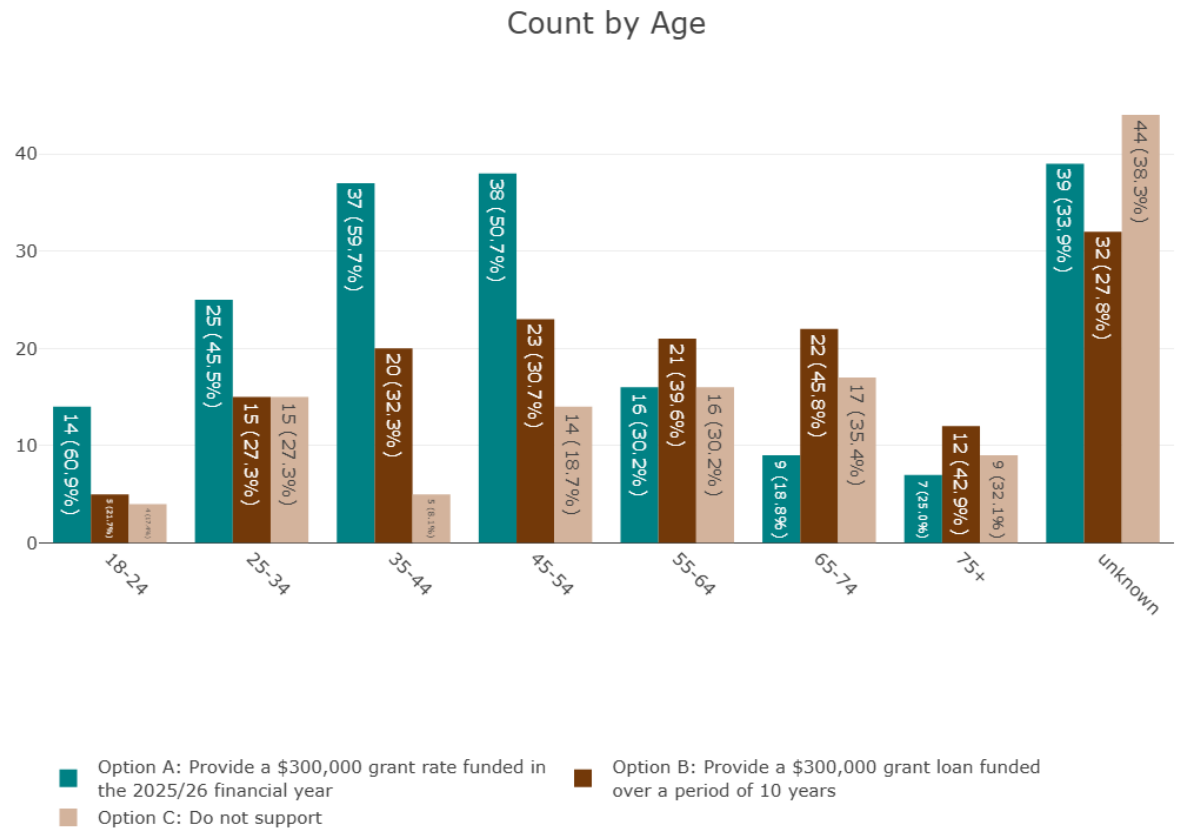
Many respondents believe that the artificial turf should not be supported by the council, with 109 selections (24.8% of the 440 total submissions). A common sentiment is that funding should come from alternative sources such as the school itself, the Ministry of Education, community fundraising, or external grants. Several respondents stated that it is not the council's responsibility to fund school equipment and that the school should explore other fundraising avenues. Some respondents highlighted the current economic climate and prioritisation of essential services over



Artificial Turf at Dunstan High School

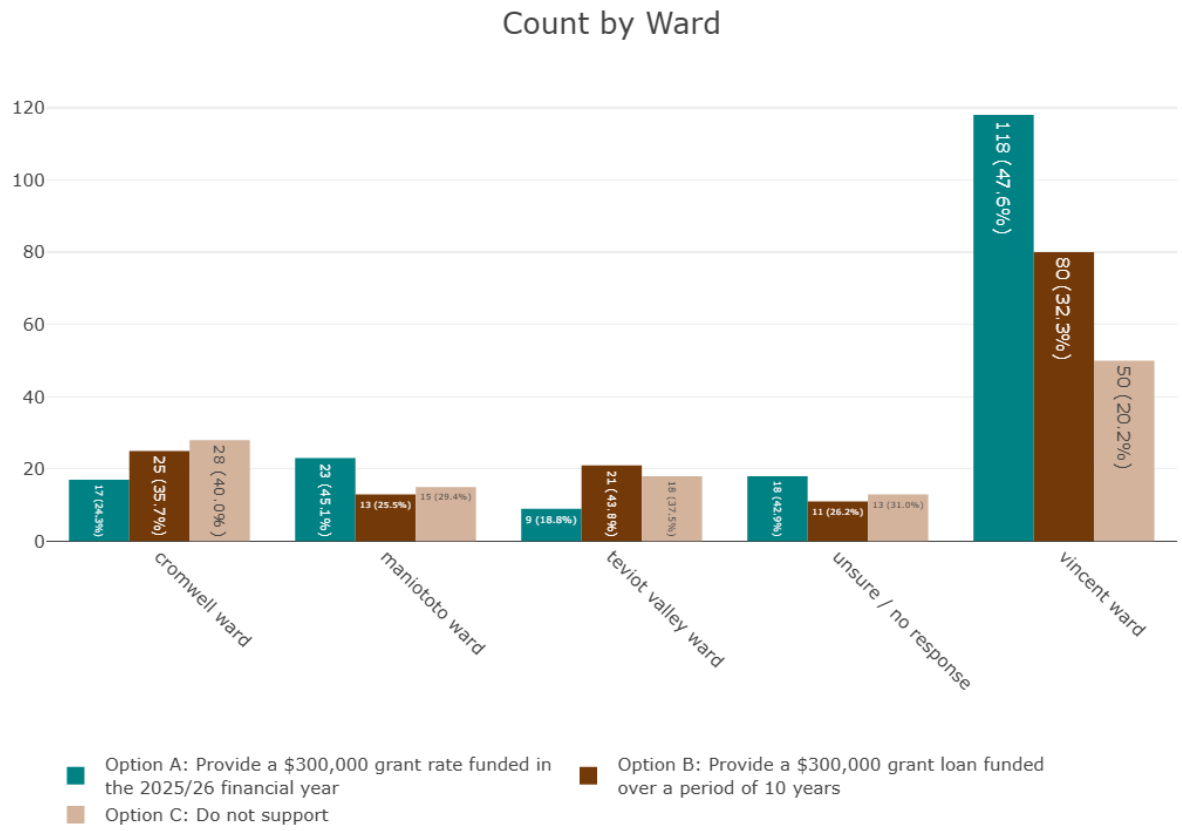
n=459
comments: 161

About



The question asks whether to support artificial turf at Dunstan High School. The options are to provide a $300,000 grant, a $300,000 loan over 10 years, or not to support the project.

There were 459 total responses: 185 voted for 'Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year', 150 voted for 'Option B: Provide a $300,000 grant loan funded over a period of 10 years', 124 voted for 'Option C: Do not support'. 161 people made a comment.



Responses By Age

Respondents aged 35-44 showed a stronger preference for Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year compared to other age groups, while respondents aged 65-74 were more inclined towards Option B: Provide a $300,000 grant loan funded over a period of 10 years. Option C: Do not support saw relatively higher support from the unknown age group compared to other age demographics, with those aged 65-74 also expressing notable support for this option. The 18-24 age group showed a lower preference for all options compared to other age groups, with a significant number not selecting any option.

Responses By Ward

Preferences for the artificial turf options varied across the wards. Respondents from Cromwell ward showed more support for 'Do not support', while those from Vincent ward favoured 'Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year'. In contrast, respondents from Maniototo ward leaned towards 'Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year', and those from Teviot Valley ward preferred 'Option B: Provide a $300,000 grant loan funded over a period of 10 years'.

Summary

Option A, providing a $300,000 grant, was the most selected (40.3%), while Option C, not supporting the project, received 27% of the selections. Feedback indicates strong support for a multi-purpose turf, particularly for hockey, but also concerns about funding responsibility, community access, and environmental impact. The respondents expressed a desire for the project, balanced with concerns about financial responsibility and community benefit, highlighting the need for a well-governed, accessible facility.

Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

comments: 76

Summary

Overall sentiment towards Option A is overwhelmingly positive. The dominant themes include the necessity of the turf for the growing hockey community and other sports, the reduction of travel for families, and the benefit to both the school and wider community. Respondents also mentioned the potential for attracting tournaments and the positive impact on the health and well-being of youth, with some suggesting the funding amount is insufficient compared to other projects.

Key Points

- High demand exists for a turf in Alexandra, particularly for hockey, due to the sport's growth and limited facilities.

- The proposed location at Dunstan High School is considered beneficial for both the school and the wider community, offering a multi-use facility.
- The turf would reduce travel time and costs for families from surrounding areas, including Maniototo, Roxburgh and Omakau.
- The project is seen as long overdue, with some respondents noting that discussions have been ongoing for over a decade.
- Some respondents believe that the $300,000 grant is insufficient for a full-sized turf, especially when compared to funding for other projects.

In-depth Analysis
Arguments For

Respondents widely agreed that a turf in Alexandra is long overdue and would be a valuable asset for the community, particularly for hockey, which has a large and growing number of players in the region. The respondents said that the location at Dunstan High School would provide a multi-use facility for the school and community, reducing travel time and costs for families, and potentially attracting regional and national sporting events. The respondents noted benefits such as increased participation in sports, improved health and well-being, and a safer playing surface. Some respondents highlighted the inadequacy of the existing turf in Cromwell and the need for additional facilities to accommodate the growing demand. A few respondents mentioned the potential for economic benefits to the town from visiting teams and families.

Arguments Against

One respondent suggested that the funding was insufficient compared to other projects and the Maniototo half turf. One respondent raised concerns about lighting impacting the Central Otago International Dark Sky Reserve. A respondent suggested consideration be given to building a multi complex centre like in Gore to cater to a wider range of sports. One respondent raised the need for toilet facilities.

Option B: Provide a $300,000 grant loan funded over a period of 10 years

comments: 46

Summary

Overall, sentiment towards the option of providing a $300,000 grant loan funded over 10 years is mixed. A significant number of respondents support the initiative, highlighting the need for a multipurpose artificial turf in Alexandra, the benefits for youth sports, and the potential for community use. However, concerns were raised regarding the location of the turf at Dunstan High School versus a more communal location, the financial burden on ratepayers, the necessity of the turf given existing facilities, and the long-term maintenance costs, with some suggesting the Ministry of Education should contribute or be responsible for funding such projects.

Key Points

- Strong support for a multipurpose artificial turf in Alexandra, particularly at Dunstan High School, with many viewing it as long overdue.
- Several respondents highlighted the importance of community access and raised concerns about the turf being primarily for school use if ratepayer funds are involved.

- Some respondents suggested the loan should be the responsibility of the Ministry of Education, given perceived insufficient central government investment in education.
- A few respondents expressed concerns about the ongoing maintenance costs of the turf and whether Dunstan High School would cover these expenses.
- Some respondents suggested fundraising by the school to contribute to paying off the loan.

In-depth Analysis
Arguments For

Many respondents supported the grant loan option, citing the long-term benefits for youth sports and community health and wellbeing. Some respondents highlighted the need for a turf in Alexandra, with Dunstan High School being a suitable location. Several respondents suggested that a loan fosters community ownership and responsibility through fundraising efforts. A number of respondents mentioned the importance of spreading the cost over time for ratepayers, given it is a long-term asset.

Arguments Against

Some respondents raised concerns about the location of the turf at Dunstan High School, suggesting it should be on council land for broader community access. A few respondents questioned the necessity of a new turf given the existing facility in Cromwell, especially with rising rates and potential cuts to other services. One respondent expressed concern about the lack of information on the ongoing costs to ratepayers and the potential for high upkeep expenses. Some respondents indicated that the Ministry of Education should be responsible for funding such projects. A couple of respondents were simply against the proposal.

Option C: Do not support

comments: 39

Summary

Overall sentiment towards Option C: Do not support, is largely negative. The main themes include the belief that funding should come from the Ministry of Education or the school itself, concerns about the project being a luxury rather than a necessity, especially given the current economic climate, and the availability of existing facilities in the wider area. Some respondents also raised concerns about the potential environmental impact of artificial turf and questioned the prioritization of funding towards rugby over other sports with growing participation rates.

Key Points

- Many respondents believe the project should be funded by the Ministry of Education or through community fundraising, not by council or ratepayers.
- Several respondents consider the artificial turf a 'nice-to-have' luxury, not an essential service for the council to fund, especially given the current economic climate.
- A number of respondents pointed out the existence of a similar facility in Cromwell and the upgrade at Pioneer Park, questioning the need for another turf in close proximity.
- Some respondents expressed concern that the location on school land might limit community access and raise questions about governance and funding models.

- A few respondents highlighted the potential environmental impact of artificial turf, citing concerns about plastic loading and microplastics.

In-depth Analysis
Arguments For

Respondents who selected 'Do not support' primarily argued that funding an artificial turf at Dunstan High School is not the council's responsibility, with many stating it should be funded by the Ministry of Education, the school itself, or through community fundraising. Several respondents highlighted the existence of a similar facility in Cromwell and the upgrade at Pioneer Park, questioning the need for another turf. A number of respondents felt that in the current economic climate, the council should focus on essential services and keeping rates down, viewing the turf as a 'luxury' or a 'nice to have' rather than a necessity. Some respondents also expressed concern that the project is on school land rather than community land.

Arguments Against

There were no explicit arguments against the option 'Do not support' within the provided comments. The comments focused on justifying the choice to not support the funding rather than arguing against that position. Therefore, it is not possible to synthesize arguments against this option based on the provided information.

Long-term Plan Policies

Identified Topics

- Rates affordability and increases
- Straw polls and community support assessment
- Development contribution levies and their impact on development
- Biodiversity offsets fund
- Council investments in property and licensing trusts
- Transparency and simplification of council information
- Council spending and staffing levels
- Utilisation of community facilities
- User pays principle for council services
- Community engagement and consultation
- Engagement with Mana Whenua
- Disparity in development rates across different areas
- Alexandra Airport funding and utilisation
- Fees and charges for council services
- Blossom festival support
- Development contribution levies as a tax on developers
- Debt funding for community projects
- Rubbish bin return fees
- Developer contributions for subdivisions
- Maori participation in council processes
- Council efficiency and unnecessary spending
- Stormwater charges for rural ratepayers
- Landfill charges and waste disposal
- Large developer contributions
- Transparency in council meetings and decision-making
- Green waste disposal and large waste item pickup
- Central Stories funding
- Contractor charges to the council
- Cromwell Cemetery remediation
- Environmental health audit fees
- Recycling service
- Council land sales policy
- Alignment between development contributions and infrastructure projects
- Waste water and potable water expansion
- Council vision and mission
- Council consideration of public input
- Teviot Road widening
- Naseby water and sewage connection fees
- Council District Plan Change 19 outcomes
- Central Otago District Council Long Term Plan
- Fees & Charges for all new Halls

Key Themes in Long-term Plan Policies - Comments on Fees, Development, Revenue and Significance Policies

- Financial Burden on Ratepayers: Concerns about increasing rates, fees, and charges, particularly for those on fixed incomes.
  - Example comment mentions(s) related to Financial Burden on Ratepayers: "My main concern is the annual increase in rates - people on benefits, young people with a mortgage and pensioners just can't afford it.", "Ratepayers are not a bottomless pit where revenue can be taken at a whim."
- Development Contributions and Fees: Feedback on development contributions, their impact on development, and potential disparities across different areas.
  - Example comment mentions(s) related to Development Contributions and Fees: "I have concerns about the inflexibility of the DFCP requiring roading levies to be paid on a change of use", "The significant proposed increases in Development and Financial contributions included in the documents will have serious ramifications on attraction of investment into our communities."
- Council Transparency and Engagement: Suggestions for improved transparency, community engagement, and consultation processes.
  - Example comment mentions(s) related to Council Transparency and Engagement: "Council need to be more transparent in their thoughts and actions and use rate payers money to massage their own egos.", "Across all long-term policies — particularly those relating to fees, funding, and engagement — I would encourage Council to place far greater emphasis on transparency, restraint, and trust-building."
- Council Spending and Efficiency: Comments related to council spending, staffing levels, and the need for cost-cutting measures.
  - Example comment mentions(s) related to Council Spending and Efficiency: "Just keep Rates low. Cut spending on all vanity projects. No more Staff Cut Staff Numbers, Consultants Start trimming from the top.", "Limit all spending! On council employees! Cut costs to employees!"
- Community Facilities and Services: Feedback on specific community facilities and services, including funding for Central Stories, the Alexandra Airport, and waste management services.
  - Example comment mentions(s) related to Community Facilities and Services: "courts do not get used at DHS do not support other facilities in Alexandra very well either pool, ice skating, curling", "The other point I would like to make is the investment in the Alexandra airport, $470k based on LTP funds allocated, versus the fees to use this asset being only $10 a time.", "Central Stories in Alexandra requires dedicated funding from Vincent Community Board to be able to continue."
- Waste Management and Charges: Concerns and suggestions related to waste disposal charges, recycling services, and green waste disposal.
  - Example comment mentions(s) related to Waste Management and Charges: "Whilst petty, as I had made known at the time, the Council policy of charging a fee for the return of 240l rubbish bin is something that seems unfair.", "yep, just keep putting up waste charges and see what will happen,fly tipping everywhere. We no longer have a recycling service, thanks council for not supporting its retention."
- Development and Infrastructure Planning: Feedback on aligning development contributions with infrastructure projects and addressing infrastructure needs for new developments.
  - Example comment mentions(s) related to Development and Infrastructure Planning: "Check and ensure alignment between development contributions policy with long term infrastructure projects supporting development catchments.", "I think a development charge should be met by

the developer when proposing new subdivision i.e. Sewerage and water and an upgrade if need be to our sewerage plant."

Overall Summary of Long-term Plan Policies – Comments on Fees, Development, Revenue and Significance Policies

The respondents raised concerns about the financial impact of rates and fees, particularly on vulnerable residents, and called for greater transparency and efficiency in council operations. Several comments focused on development contributions, infrastructure planning, and the need for equitable development rates across the district. Support was also shown for community facilities, particularly Central Stories, with suggestions for improved waste management and transparency in council decision-making.

Other Issues

comments: 228

Identified Other Issues

- Council should listen to residents' concerns.
- Council spending is wasteful, prioritising 'nice to haves' over basic needs.
- Transparency in council finances is lacking.
- Prioritise water and sewage infrastructure.
- Retain the Clyde hall and library.
- Lack of vision and action on sustainability and climate change.
- Support community facilities and ideas (halls, pools, libraries).
- Budget for shade sails over playgrounds.
- Borrowing for infrastructure should be shared by current and future ratepayers.
- Make it easier for the public to have their say.
- Molyneux Park is well looked after.
- Focus on wastewater issues.
- More mobility and scooter parks are needed.
- Footpaths need to be more suitable for disabled people.
- Too many departments in the CODC, focus on basic services.
- CODC shouldn't be real estate agents.
- Climate change risk to infrastructure is understated.
- Council should work for the community, not personal benefits.
- The arts, culture, and identity are not mentioned enough.
- Need a new auditorium in Ranfurly.
- Council shouldn't spend money on motor sport events.
- Clarity needed on development contributions.
- Invest in assets that reduce reliance on rates.
- Increase rates relief for people on the margins.
- Why is the proposed rate increase for Pisa Moorings residential property so high?
- Upgrade the water system in Omakau.
- Include the annual grant for Blossom Festival in the long term plan.
- Support the Alexandra Blossom Festival.
- Maintain roadsides and empty land in Cromwell.
- Support a dog park in Cromwell.
- Support local projects like Lookout Reserve and Shaky Reserve.
- Council should focus more on roads and cycle tracks.
- Support the arts, music, and youth development.
- No non-elected members of council voting on council.
- The toilet at the Fraser Reserve is closed, need more toilet facilities.
- Support the Cromwell Museum Trust.
- Need a rec centre in Cromwell.
- Foster progress and information through CODC press.
- CODC should support community facilities instead of the Cromwell race car track.
- Keep annual rates to a minimum.
- Retain historic buildings in Ranfurly.
- Re-address the rating imbalance for rural ratepayers.

- Limit rates increases to the level of inflation.
- Do not engage with or join QLDC.
- Review membership LGNZ, staffing levels, remuneration, and council vehicle expenses.
- Concentrate on basic services not vanity projects.
- Developers to pay for upgrade to services upfront or by levy.
- There is a disproportionate number of buildings in the Maniototo suggested for disestablishment.
- Councils have lost sight of why they were formed - to collect rates and provide facilities for the public.
- Review building divestments case by case.
- Outline the Naseby Wildfire Group's efforts to protect the community.
- Keep to only necessary spending for the next 10 years, keep 'nice to haves' for another time.
- Every town needs a town hall.
- The submission process was hard to find and get into.
- Maintain the Fenton Library, Ranfurly Town Hall and Patearoa Town Hall.
- Reduce rates increases.
- Over communicate on plans and evolving thinking on anything to do with rates and operations, particularly on social media.
- CEO and staff to be fully transparent to council and public.
- Councillors and mayor to hold CEO and council staff strongly accountable for specific deliverables and set targets.
- Strongly consider delaying debt repayment for longer periods.
- Provide further transparency at all times into council budgets and operations.
- Place more value on our natural environment.
- Get young people engaged in local politics.
- Council work needed on Aronui Dam.
- Roads & bridges need urgent attention.
- Acknowledge rapid and prolonged population growth and provide greater capacity for all our infrastructure.
- Support Central Stories request for funding increase.
- Cromwell Cemetery to be on LTP.
- Ophir Peace Memorial hall is important.
- Blossom Festival is important.
- Water meter replacement project review.
- CODC's support in building an application to designate Alexandra and the surrounding area as a Dark Sky Reserve.
- The proposed plan makes very little mention of parks and recreation reserves.
- Cromwell Lions Club supports the draft 2025-2034 long-term plan submission made by the Friends of Cromwell Cemetery.
- Include an option on reducing staffing numbers at our Council as a way of cost cutting and keeping rates increases down.
- Student survey for this has been biased.
- Common sense needs to prevail in any spending councils undertake.
- Support the Cromwell Racecourse Redevelopment.
- Wedderburn Hall is a good facility that is starting to be used more.
- Better clarification about the option to be able to provide a personal addendum to a personal submission during the period needs to be provided in future.
- Short term rentals ie Airbnbs should be charged at full commercial rates.
- There is a proposed 14% increase in rates for Pisa Moorings.

- There is absolutely no mention of ANY savings that Council have achieved by looking at their internal expediture.
- Council provide at least 1 new RV dump station to the north of Cromwell township.
- Halls that aren't being used or need extensive earthquake proofing should be divested.
- Council to take a lead from mana whenua who are unafraid to think in terms of a hundred years.
- The Cromwell Cemetery Plan in it's current form is not fit for purpose.
- Please adequately fund Central Stories in Alexandra.
- CODC community board meetings are all? during the day on a week day.
- Council should evaluate the opportunity to engage/invest in systems to further optimise efficiencies within Council operations.
- Rates increase should not be more than the LGCI.
- All existing parks and reserves in our towns NOT be sacrificed for medium and high density housing.
- The focus of this questionaire on recreational facilities that people use and enjoy is cynical.
- Factor in a significant financial contribution toward a project to re-activate the historic Clutha River Bridge as a shared use link across the Clutha, and establish Old Bridge Road as a shared space.
- Infrastructure Strategy includes allowance for funding of capital works for key transport links, safety improvements and upsizing of designated collector/arterial roads.
- Reduce some council services and show constraint in some areas and have a greater focus on what is needed rather than trying to be everything to everyone.
- A return to the previous mind set would be a sensible direction to go. A structural change. A Manager in charge of a Maintenance Team which services the local community.
- Keep rates down, can't keep increasing every year for less and less services.
- Re-build the Roxburgh Town Hall Cinema.
- Impact of districtisation can mean that smaller communities can be forgotten.
- Aligning the long term plan with the wellbeing work completed last year seems to be missing.
- The Council should improve it's communications.
- I have only answered questions relating to where I live, the Community hall section should be split into districts so there is no unfair bias.
- Central Stories provide the key to our community.
- NPHS recommends that the Council consider how to ensure changes are implemented equitably and with mitigation measures to prevent potential harm.
- The LTP contains multiple proposals and should have been documented and provided to communities at least six months ago.
- Firstly, you have been made aware that the entire submission process has been designed to confine and constrict submissions to those topics selected by Council.
- A full, independent review of the Council’s staffing levels and financial competence is commissioned.
- If you divest the facilities to the community to 'save ratepayers', take responsibility for a share of the maintenance and overheads at least for the first 10 years.
- Council was not conducting a limited consultation process and would consider submissions on subjects other than those previously defined in Council flyer and website communications.
- Amending its Revenue and Financing Policy 2025-2034 so that it states that Councillors, whilst considering and approving any spend that would involve the use of income derived from general rates or targeted rates on the District's properties, their primary objective in making that decision is to cap overall annual spending to a level that equates to next years' general rates or targeted rates increase not exceeding the annual increase in the Consumers Price Index (CPI).

- Council to allow another camping ground development i.e. supply land only so that a permanent camp for workers could be established with buildings paid for by power trust or private enterprise it could pay a lease back to council.
- As a performer, I have experienced the friendly environment of the museum and as an ex-central Otago boy, I feel our history must be promoted in the best way possible and for as many people to see and learn about is essential.
- As a volunteer over the past 3 years I have been involved in most aspects of this museum.
- Look after the locals.
- From an educational viewpoint Central Stories provides an exceptional service which is well used by the local high school, primary schools & early childhood centres.
- We needs a new surge system in Omakau.
- Propose a wastepaper/cardboard facility in Alexandra.
- STOP Making rates higher! Take pay cuts for current council office & management employees!
- We must preserve existing historic buildings i.e. the Ophir Peace Hall.
- Build the hub provided no cost blow outs.
- Provide good drinking water and do more to protect our rivers and streams from pollution.
- If you run a focus group for discussions regarding the council functions of community facilities, I would like to take part as I consider that I have lots of ideas and can see different aspects of many situations.
- I would like to kindly request that my submission be considered as a late submission.
- Long Term Plan needs to be about what sort of legacy you are leaving for future generations.
- Give all halls & facilities to the community they are in.
- We are two young men who live in Alexandra and who both live with physical disabilities.
- Council's facility Strategy: we strongly recommend that CODC develops a comprehensive facilities strategy to ensure a more coordinated, efficient, and future-focused approach to the management, use and investment in council-owned buildings and spaces.
- It is time for the Council to get back to Essential Services.
- Clyde hall in ned of exterior paint.

Key Themes in Other Issues

- Council Operations and Finances: Concerns about council spending, transparency, staffing levels, rates increases, and financial management.
    - Example comment mentions(s) related to Council Operations and Finances: Council spending is wasteful, prioritising 'nice to haves' over basic needs; Transparency in council finances is lacking; Keep annual rates to a minimum.
- Community Facilities and Services: Feedback on the importance of maintaining and supporting various community facilities such as halls, libraries, pools, museums, and recreational areas.
    - Example comment mentions(s) related to Community Facilities and Services: Retain the Clyde hall and library; Support community facilities and ideas (halls, pools, libraries); Please adequately fund Central Stories in Alexandra.
- Infrastructure and Development: Issues related to water and sewage infrastructure, roads, footpaths, cycle tracks, and the impact of population growth on infrastructure.
    - Example comment mentions(s) related to Infrastructure and Development: Prioritise water and sewage infrastructure; Footpaths need to be more suitable for disabled people; Roads & bridges need urgent attention.
- Community Engagement and Representation: Concerns about the council's communication, consultation processes, and representation of smaller communities.

    - Example comment mentions(s) related to Community Engagement and Representation: Council should listen to residents' concerns; Make it easier for the public to have their say; The submission process was hard to find and get into.
- Strategic Planning and Vision: Feedback on the council's long-term planning, sustainability efforts, and focus on essential services versus 'nice to haves'.
    - Example comment mentions(s) related to Strategic Planning and Vision: Lack of vision and action on sustainability and climate change; Keep to only necessary spending for the next 10 years, keep 'nice to haves' for another time; Long Term Plan needs to be about what sort of legacy you are leaving for future generations.
- Specific Local Issues: Concerns and suggestions related to specific locations or events within the district, such as the Cromwell Cemetery, Blossom Festival, and Omakau water system.
    - Example comment mentions(s) related to Specific Local Issues: Cromwell Cemetery to be on LTP; Support the Alexandra Blossom Festival; We needs a new surge system in Omakau.

Overall Summary of Other Issues

The respondents raised a wide range of issues beyond the direct scope of the question, with key themes including concerns about council operations and finances, the importance of community facilities, infrastructure needs, community engagement, and strategic planning. There is a strong emphasis on the need for fiscal responsibility, transparency, and a focus on essential services, alongside the desire to maintain and improve community assets and infrastructure.

Student Survey

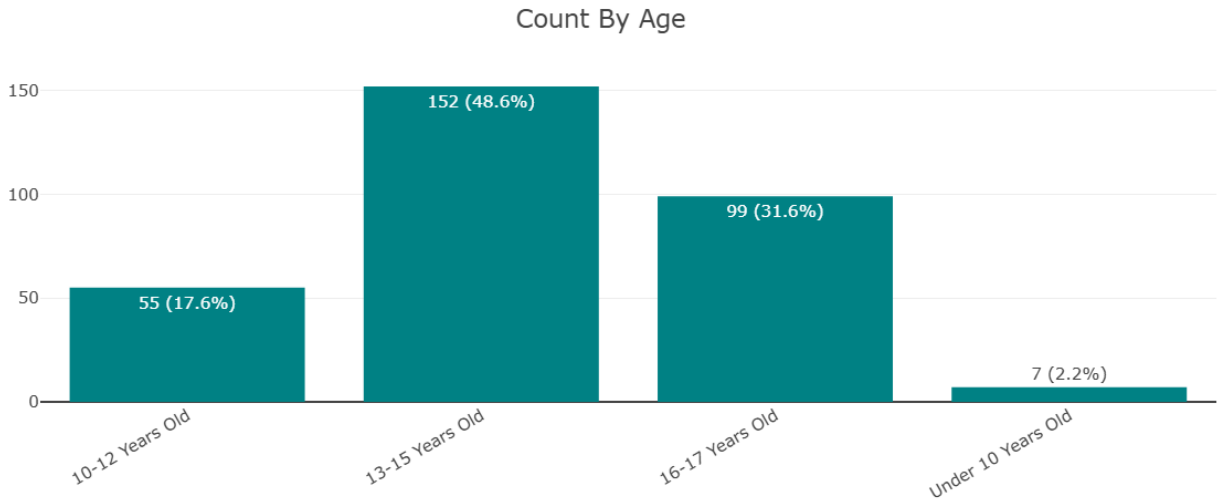
Overall Survey Insights & Themes

Introduction

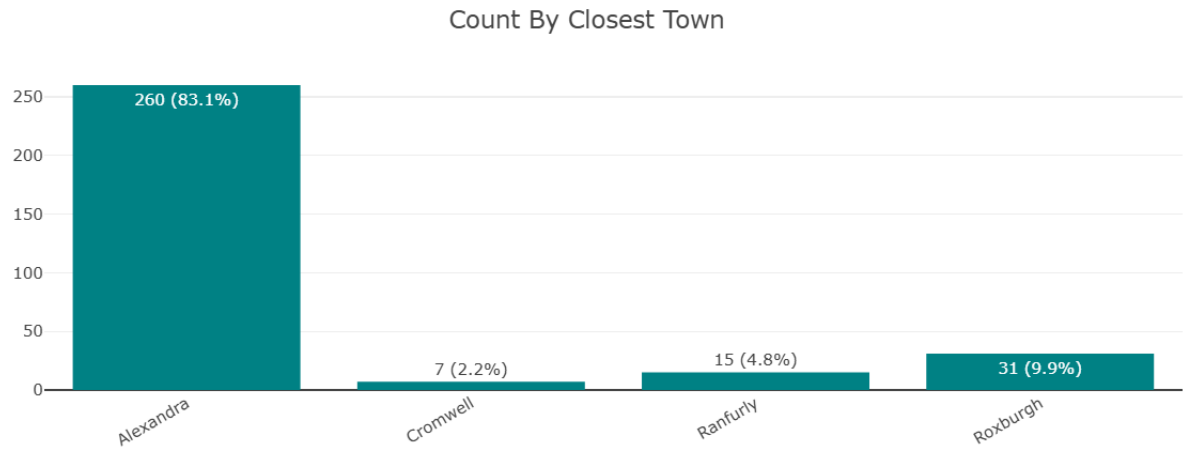
The community survey received 313 unique submissions and covered a range of topics, including community halls and facilities, local pools, the Supercars Championship, and artificial turf installations at two schools. The survey also included opportunities for other feedback and gauged student interest in future participation.

Total Unique Submitters Processed: 313

Highlights



The recurring themes associated with high satisfaction and positive feedback across the survey data include the importance of community facilities for events and gatherings, the value of recreational amenities like swimming pools, the perceived economic benefits of events like the Supercars Championship, and the desire for improved sporting facilities. Specifically, respondents emphasised the importance of community halls for local events, supported council ownership and improvements to the Roxburgh and Alexandra pools, recognised the economic benefits of the Supercars Championship, and supported the construction or upgrading of artificial turf fields at Dunstan High School and Maniototo Area School to enhance sports opportunities and reduce travel.



Areas for Improvement

Based on the survey data, several recurring themes indicate areas needing improvement. Firstly, there are concerns regarding the condition and maintenance of community facilities, specifically cleanliness issues at community halls and the Alexandra outdoor pool. Secondly, the allocation of council funds is a point of contention, with some respondents questioning the support for events like the Supercars Championship over community facilities and local needs. Thirdly, there are concerns around the prioritisation of projects and equitable distribution of resources, as seen in the debate over artificial turf projects at Maniototo and Dunstan High Schools, with some respondents feeling that resources should be focused on areas with broader community benefit or greater need. Finally, a significant percentage of respondents selected 'Maybe, maybe not' regarding future survey participation, suggesting a need to improve engagement and demonstrate the value of their feedback to encourage future involvement.

Summary

Overall, the survey of 313 unique submissions reveals varied opinions on key council decisions. There is strong support for maintaining the Alexandra outdoor pool and for council support of the Supercars Championship, while opinion is more divided on the artificial turf projects and community hall management. These results highlight the importance of considering diverse community needs and priorities in future council planning and resource allocation.

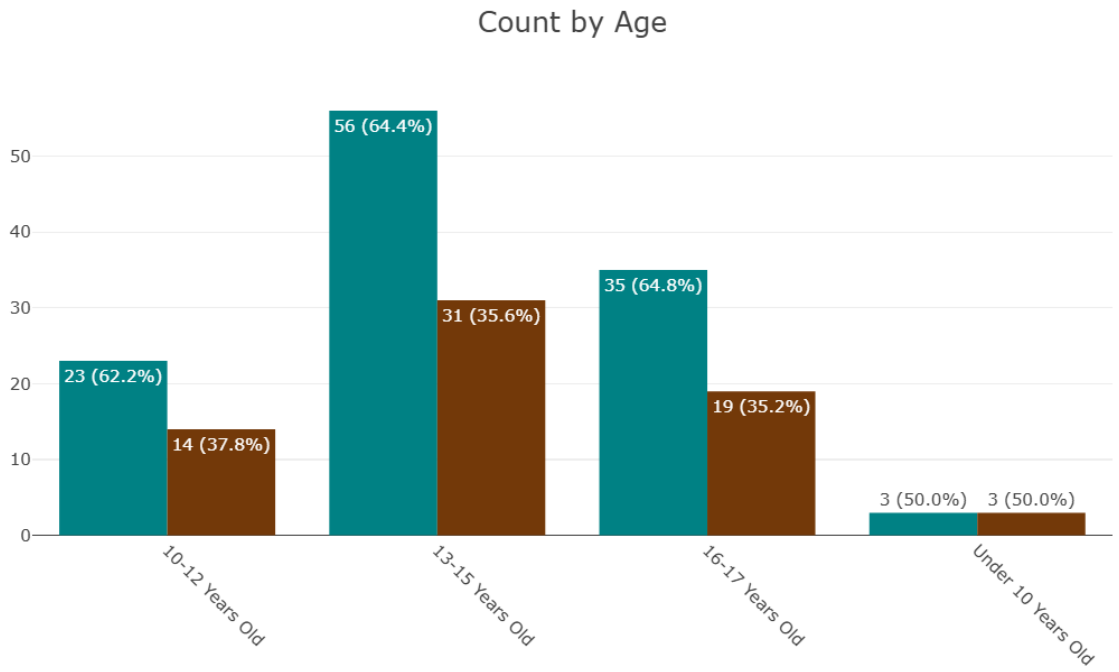
Community Halls & Facilities

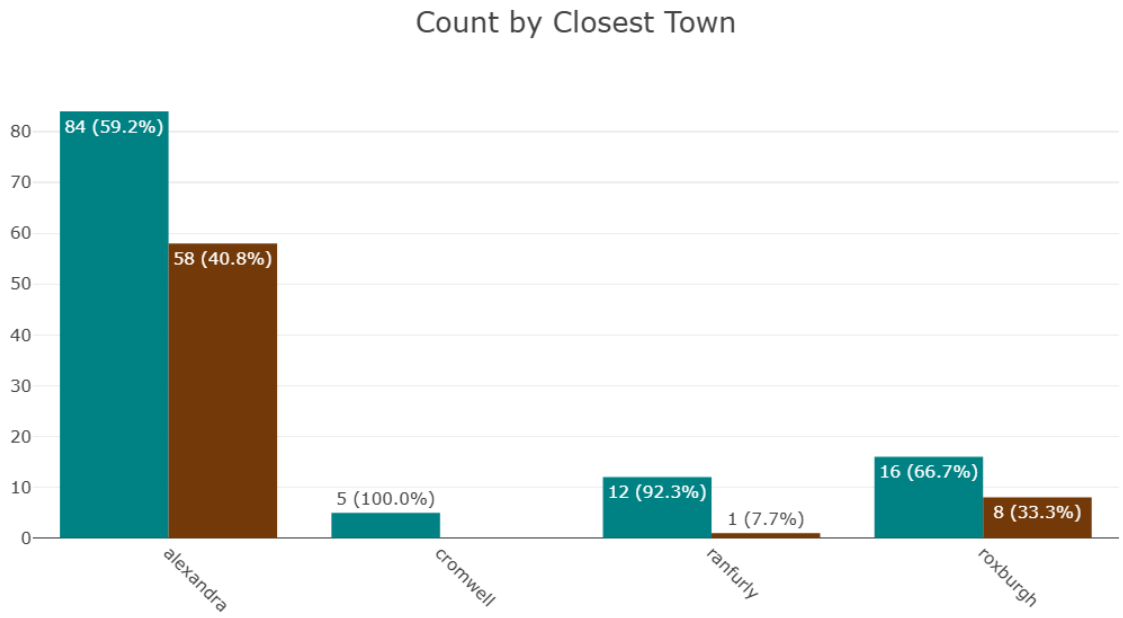
n=184
comments: 70

About



The question asks whether the council should maintain the current number of community halls and facilities, or reduce the number of halls. Respondents could choose between keeping all current halls or reducing the number of halls.

There were 184 total responses: 117 voted for 'Option A: Council should keep all of the current halls.', 67 voted for 'Option B: Council should reduce the number of halls.'. 70 people made a comment.



Responses By Age

Respondents aged 13-17 years old showed a slightly stronger preference for Council to keep all of the current halls compared to other age groups. The remaining age groups showed similar preferences for Council to keep all of the current halls and Council should reduce the number of halls.

Responses By Closest Town

Respondents from Cromwell and Ranfurly showed a stronger preference for Council to keep all of the current halls, while respondents from Roxburgh were more inclined to suggest that Council should reduce the number of halls. Alexandra respondents also favoured keeping all current halls, but to a lesser extent than Cromwell and Ranfurly respondents, with a reasonable number suggesting a reduction in halls.

Summary

Option A, retaining all current halls, was favoured by 63.6% of respondents, while 36.4% preferred reducing the number of halls. Many respondents emphasised the importance of halls for community events, historical significance, and specific activities like playgroups and meetings, with some specifically highlighting the Poolburn and Millers Flat halls. Overall, the feedback suggests a strong preference for maintaining existing community halls due to their vital role in local activities and community identity, although some concerns were raised about cleanliness, maintenance, and usage rates of certain halls.

Option A: Council should keep all of the current halls.

comments: 46

Summary

Overall sentiment towards keeping all current halls is largely positive, supported by a significant selection rate of 63.6%. The main themes include the importance of halls for community events, gatherings, and historical significance, particularly for smaller communities. Concerns were raised about the cleanliness of some facilities, and specific mentions were made in support of Poolburn Hall and the Millers Flat Hall, with detailed reasons for their continued use and value to the community. Some respondents were against the option with simple ‘no’ responses.

Key Points

- Many respondents believe the halls are well-used and important for smaller communities to host events.
- Some respondents highlighted the historical significance of the halls and their importance for community identity.
- Several respondents mentioned specific uses of the halls, including playgroups, dance classes, meetings, and school events.
- A few respondents expressed concerns about the cleanliness and maintenance of the halls.
- Some respondents specifically mentioned the Poolburn Hall and the Millers Flat hall, emphasising their importance to their respective communities.

In-depth Analysis
Arguments For

Respondents supporting keeping all current halls emphasised their importance for community events, gatherings, and meetings, particularly in smaller communities. Several respondents highlighted the historical significance of the halls and their role in hosting a variety of activities, including playgroups, sports, productions, weddings, and memorials. The Poolburn Hall was specifically mentioned by multiple respondents, who detailed its importance for school events and community gatherings, with some expressing concern about the impact of its potential closure. The high selection percentage (63.6%) suggests widespread agreement with this option.

Arguments Against

Some respondents indicated that the facilities are not always clean. A few respondents simply stated "no" without providing further explanation. One respondent suggested that some halls could be shut down if they

are not well-used and if the community prefers other halls with better facilities. Some comments implied a need for better maintenance and upgrades, such as improved changing rooms for sports.

Option B: Council should reduce the number of halls.

comments: 24

Summary

The sentiment towards reducing the number of community halls appears to be predominantly negative based on the comments provided. While a significant percentage of respondents selected this option (36.4%), the qualitative feedback indicates resistance to hall closures, with several respondents explicitly stating

Key Points

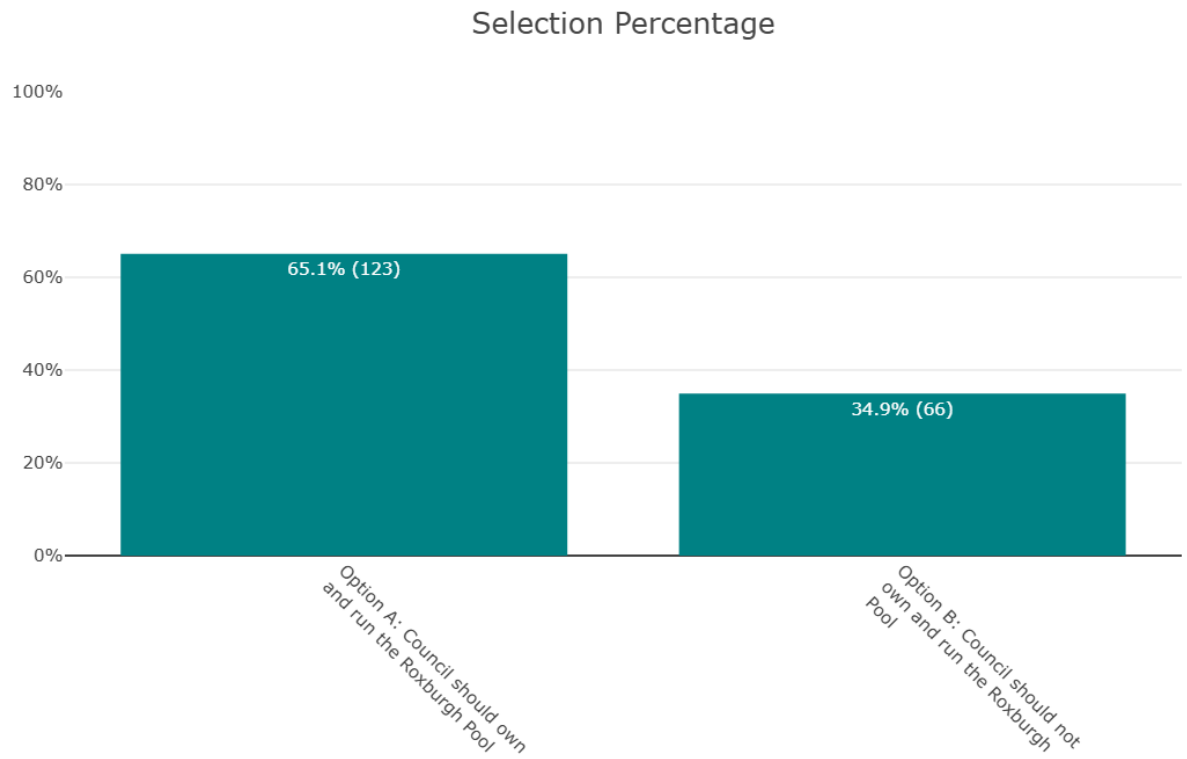
- Some respondents were against reducing the number of halls.
- Some respondents suggested removing halls that are not frequently used.
- Several respondents highlighted the importance of specific halls for community activities and events.
- Some respondents emphasised the role of certain halls as emergency centres.
- A few respondents mentioned the affordability of the halls.

In-depth Analysis
Arguments For

One respondent suggested halls that are not used should be removed.

Arguments Against

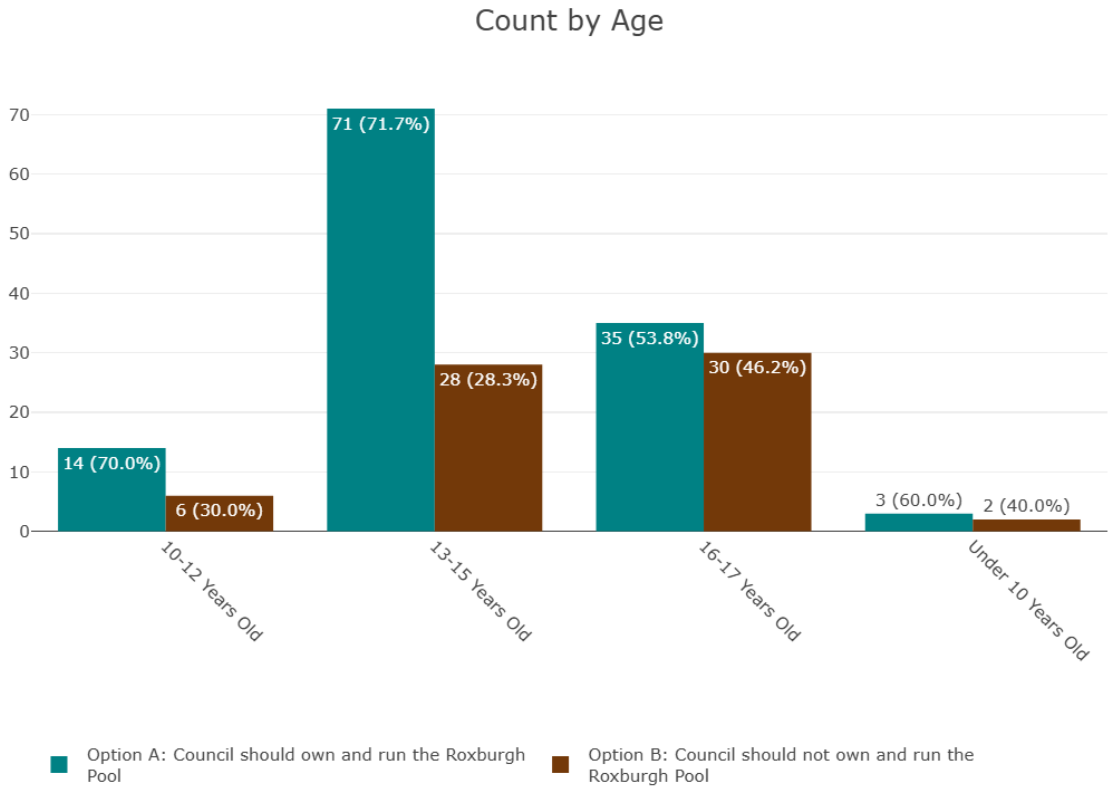
Several respondents explicitly stated their disagreement with reducing the number of halls, using terms like "No" and "Nope". Some respondents highlighted the importance of specific halls for community activities, citing examples such as playgroups, cricket, camping, school concerts, meeting places, exercise classes, and emergency centres. They emphasised the halls' roles in their towns and the potential impact on community events and well-being if these halls were removed. One respondent mentioned the affordability of the halls. Some respondents indicated specific halls, such as Pool Burn Hall and Becks Hall, should be retained due to their frequent use and importance to the community.



Ida MacDonald Roxburgh Punawai Ora

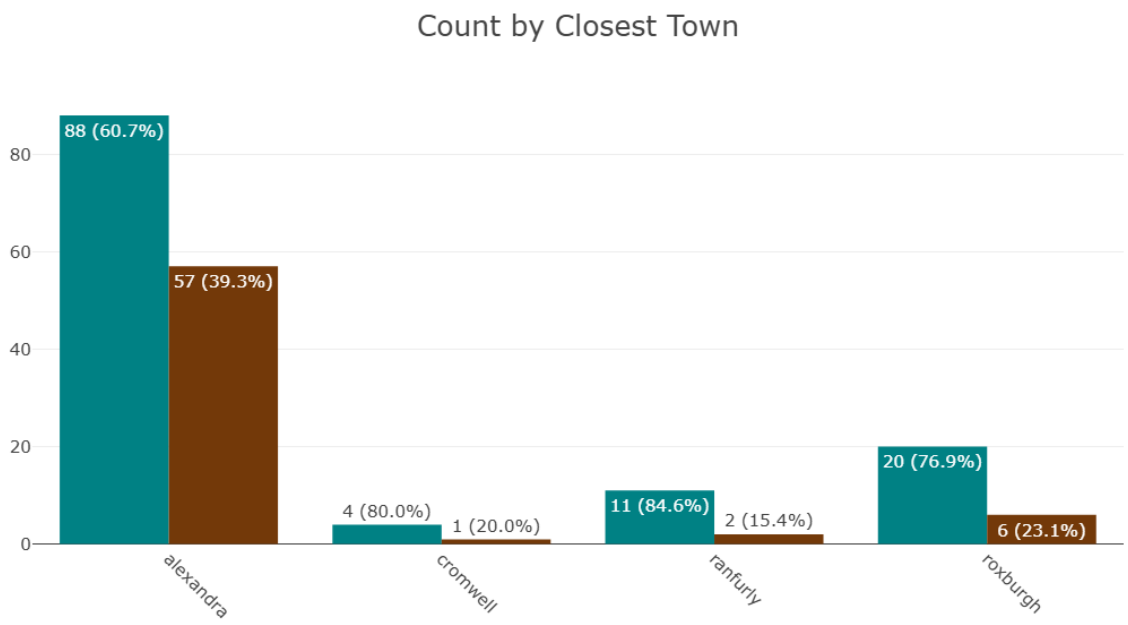
n=189
comments: 57

About



The question asks whether the council should own and run the Ida MacDonald Roxburgh Pool Punawai Ora, with options for the council to either own and run the pool or not to own and run the pool.

There were 189 total responses: 123 voted for 'Option A: Council should own and run the Roxburgh Pool', 66 voted for 'Option B: Council should not own and run the Roxburgh Pool '. 57 people made a comment.



Responses By Age

Respondents aged 16-17 years old showed a relatively even split in preferences between 'Option A: Council should own and run the Roxburgh Pool' and 'Option B: Council should not own and run the Roxburgh Pool', while those aged 13-15 years old showed a stronger preference for 'Option A: Council should own and run the Roxburgh Pool'. Respondents under 10 years old also favoured 'Option A: Council should own and run the Roxburgh Pool'. Respondents aged 10-12 years old also favoured 'Option A: Council should own and run the Roxburgh Pool' but to a lesser extent than the 13-15 age group.

Responses By Closest Town

Respondents from Ranfurly showed a stronger preference for Council should own and run the Roxburgh Pool compared to respondents from other towns. Respondents from Cromwell also showed a preference for Council should own and run the Roxburgh Pool, but to a lesser extent than those from Ranfurly. Respondents from Alexandra and Roxburgh also favoured Council should own and run the Roxburgh Pool, but with a slightly smaller margin than Ranfurly respondents.

Summary

Option A, Council ownership of the Roxburgh Pool, was favoured by 65.1% of respondents, while 34.9% preferred Option B, Council not owning the pool. Support for council ownership centres on enabling unsupervised access for children and teenagers with lifeguard supervision, while concerns against it include underutilisation and potential impacts on the Alexandra pool. Overall, the feedback indicates a desire for improved access and facilities at the Roxburgh Pool, with differing views on the best model for achieving this.

Option A: Council should own and run the Roxburgh Pool

comments: 37

Summary

Overall sentiment towards the council owning and running the Roxburgh Pool is mixed. While many respondents like the pool and think it's good for the community, a recurring theme is the need for a lifeguard to allow unsupervised access for children and teenagers. Some respondents explicitly stated that council ownership would be preferable if it meant providing a lifeguard, while others expressed satisfaction with the current setup or simply stated 'no' without elaboration.

Key Points

- Many respondents support council ownership to enable lifeguard supervision, allowing children and teenagers to swim without adult supervision.
- Several respondents feel the pool is good but needs improvements such as inflatables, slides, and more playing equipment.
- A number of respondents expressed a general positive sentiment towards the pool.

- Some respondents indicated the current requirement for adult supervision (over 18) limits access for some users.
- A few respondents were unsure or negative about the proposal.

In-depth Analysis
Arguments For

Many respondents expressed that council ownership would allow for lifeguard supervision, enabling children and teenagers to use the pool independently. Some respondents noted the pool is good for toddlers and teenagers. A number of respondents highlighted the importance of accessibility for learning water safety skills and avoiding travel to other towns for swimming.

Arguments Against

A number of respondents simply stated "no", without elaboration. Some respondents expressed satisfaction with the current state of the pool, indicating they don't see a need for change. One respondent suggested that if the committee provided a lifeguard, council ownership would not be necessary.

Option B: Council should not own and run the Roxburgh Pool

comments: 20

Summary

Overall sentiment towards Option B appears mixed. Some respondents expressed concerns about the pool's location and potential underutilisation, while others highlighted its value. A few respondents were unaware of the pool's existence, and some suggested alternative support models instead of council ownership, such as only paying wages.

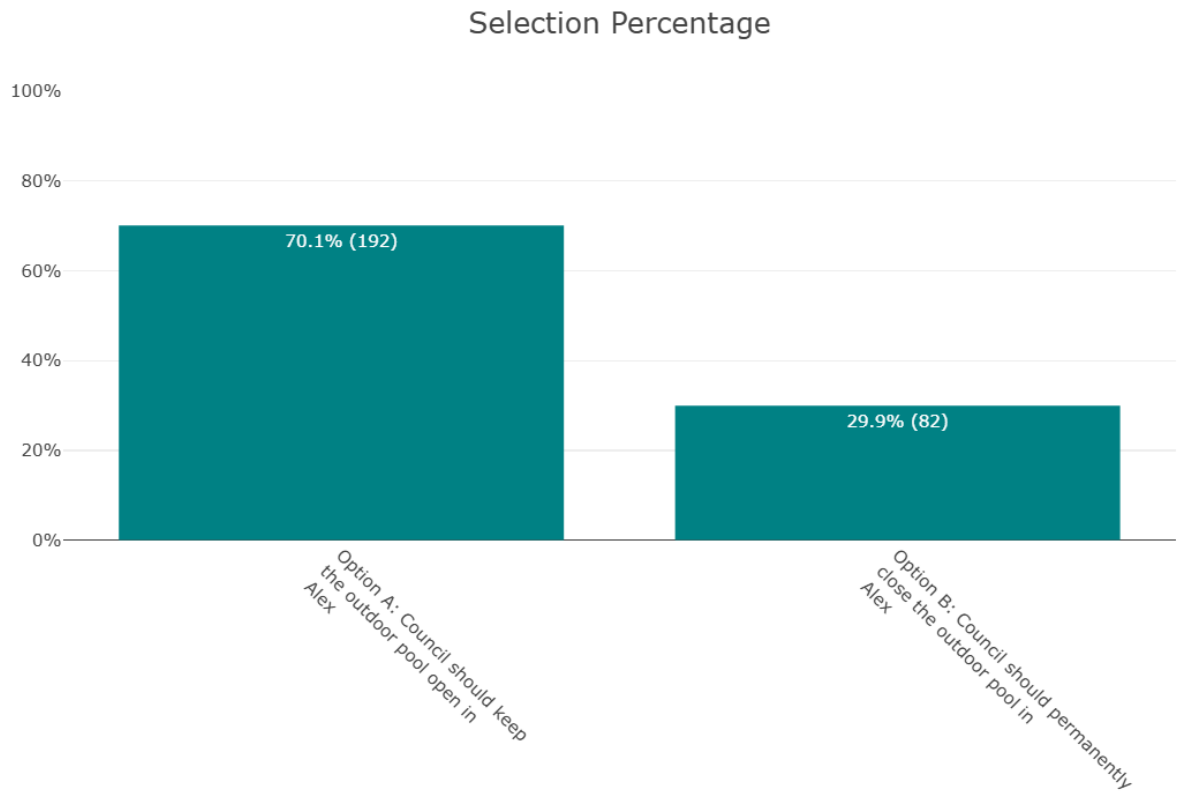
Key Points

- Some respondents believe the Roxburgh Pool is underutilised due to its location.
- Several respondents expressed concerns about the potential impact on the Alexandra pool if the Roxburgh Pool remains open.
- A few respondents were unaware of the Roxburgh Pool's existence.
- Some respondents suggested alternative support models, such as contributing to wages instead of full ownership.
- One respondent highlighted the presence of lifeguards, questioning the need for parental supervision.

In-depth Analysis
Arguments For

Some respondents believe the council should not own the Roxburgh Pool, with one respondent suggesting the council should only help pay wages rather than own the pool. One respondent felt that removing the outside pool at Alexandra would not encourage people to travel to Roxburgh.

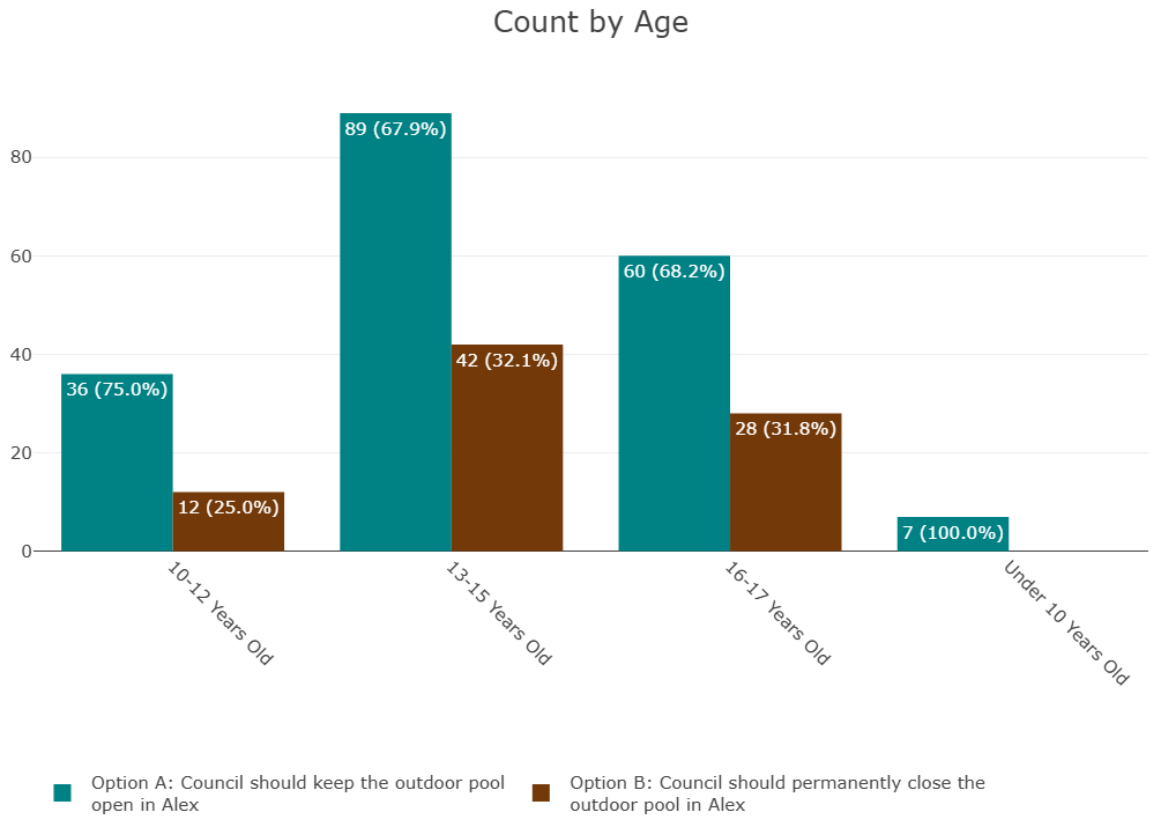
Arguments Against



Several respondents did not provide a reason for their selection. Some respondents expressed positive views of the pool, with one describing it as a "good pool" and another saying it "is really coool its warm mosgt of gtie and refreshing". Some respondents indicated a lack of awareness of the pool's existence, with one respondent stating, "I didn't even know there was a pool in Roxburgh". One respondent expressed concern about the pool's location, stating, "its to out in the country". One respondent suggested that there should be a lifeguard instead of restricting swimming to those 16 and over.

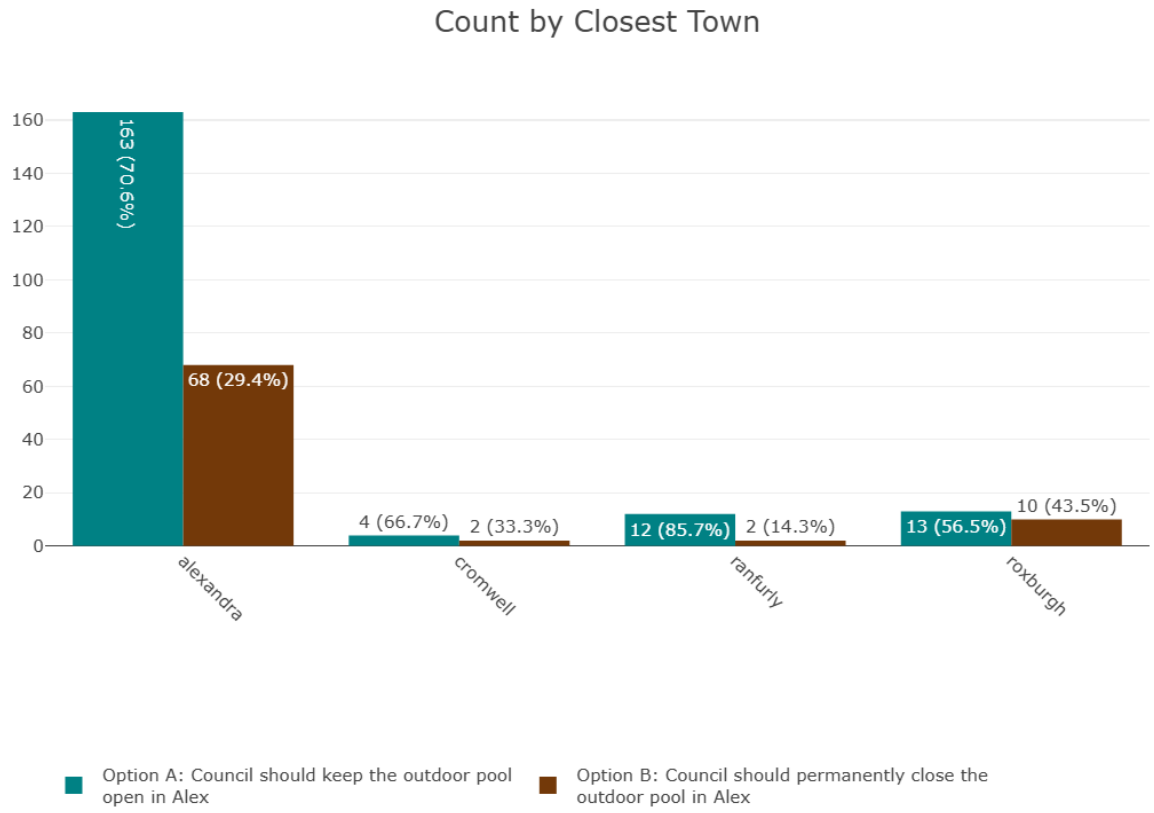
Alexandra Outdoor Pool

n=274
comments: 130



About

The question asks whether the council should keep the Alexandra outdoor pool open or permanently close it. The available options are to keep the pool open or to close it permanently.
There were 274 total responses: 192 voted for 'Option A: Council should keep the outdoor pool open in Alex', 82 voted for 'Option B: Council should permanently close the outdoor pool in Alex'. 130 people made a comment.



Responses By Age

Respondents under 10 years old showed exclusive support for the council to keep the outdoor pool open in Alex. While respondents aged 10-17 years old also favoured keeping the pool open, there was increasing support for permanently closing the outdoor pool in Alex as age increased within this group, with respondents aged 16-17 years old showing the most support for this option compared to younger respondents in the 10-15 age range.

Responses By Closest Town

Respondents from Ranfurly showed a stronger preference for Council to keep the outdoor pool open in Alex, while respondents from Roxburgh were more inclined towards Council permanently closing the outdoor pool in Alex. Preferences in Alexandra and Cromwell were more balanced between the two options, although a majority still preferred keeping the pool open.

Summary

Option A, keeping the Alexandra outdoor pool open, was favoured by 70.1% of respondents. This was attributed to its value as a place to cool off in summer, its use for school activities, and as a less crowded alternative to the indoor pool, though some suggested improvements to attract more users. Conversely, 29.9% supported closing the pool, citing underutilisation and high running costs, with some suggesting alternative uses for the space or funds. Overall, the feedback indicates a divide between those who value the pool as a community asset and those who view it as an inefficient use of resources.

Option A: Council should keep the outdoor pool open in Alex

comments: 98

Summary

The overall sentiment towards keeping the Alexandra outdoor pool open is overwhelmingly positive, with 70.1% of respondents selecting this option. Key themes include the pool's value for cooling off during summer, its importance for school activities like swimming sports and kayaking, and its role as a safe alternative to rivers and lakes. Some respondents suggested improvements like adding a slide, shade, or BBQs, and increasing the pool's availability and cleanliness, while others mentioned the water temperature and the pool being closed often as potential issues.

Key Points

- The outdoor pool is considered a great place to cool off during the hot summer months.
- Respondents mentioned the pool is used for school activities such as kayaking and swimming sports.
- Several respondents highlighted that the outdoor pool provides a refreshing alternative to the indoor pool when it gets too crowded or hot.
- Some respondents suggested improvements such as adding a slide, shade, or BBQ facilities to attract more users.
- A few respondents raised concerns about the pool's inconsistent opening hours and cleanliness.

In-depth Analysis
Arguments For

Respondents indicated that the outdoor pool is a great place to cool off during the summer, with some noting that it is refreshing and fun. Some respondents mentioned the pool is used for school events such as kayaking assessments and swimming sports. The pool is also valued as a safe alternative to lakes and rivers, especially given concerns about water quality. A number of respondents stated that the outdoor pool enhances the overall aquatic centre experience, preventing overcrowding in the indoor pool and providing a space for competitive swimming when the indoor pool is too hot. The high selection percentage (70.1%) and selected count (192) suggest widespread agreement that the pool should remain open.

Arguments Against

Some respondents indicated the pool needs to be cleaned more often and that there are bugs. One respondent mentioned that the pool needs to be deeper. A small number of respondents simply stated "No" without providing further explanation. One respondent stated that the pool could be used for better facilities.

Option B: Council should permanently close the outdoor pool in Alex

comments: 32

Summary

The sentiment towards closing the Alexandra outdoor pool is largely negative. The respondents said that the pool is underutilised due to the cold temperature and the presence of bugs and leaves, with some suggesting alternative uses for the funds, such as hydro slides. However, some respondents expressed their enjoyment of the pool and a desire to keep it open, or have improved facilities such as heating and more consistent opening hours.

Key Points

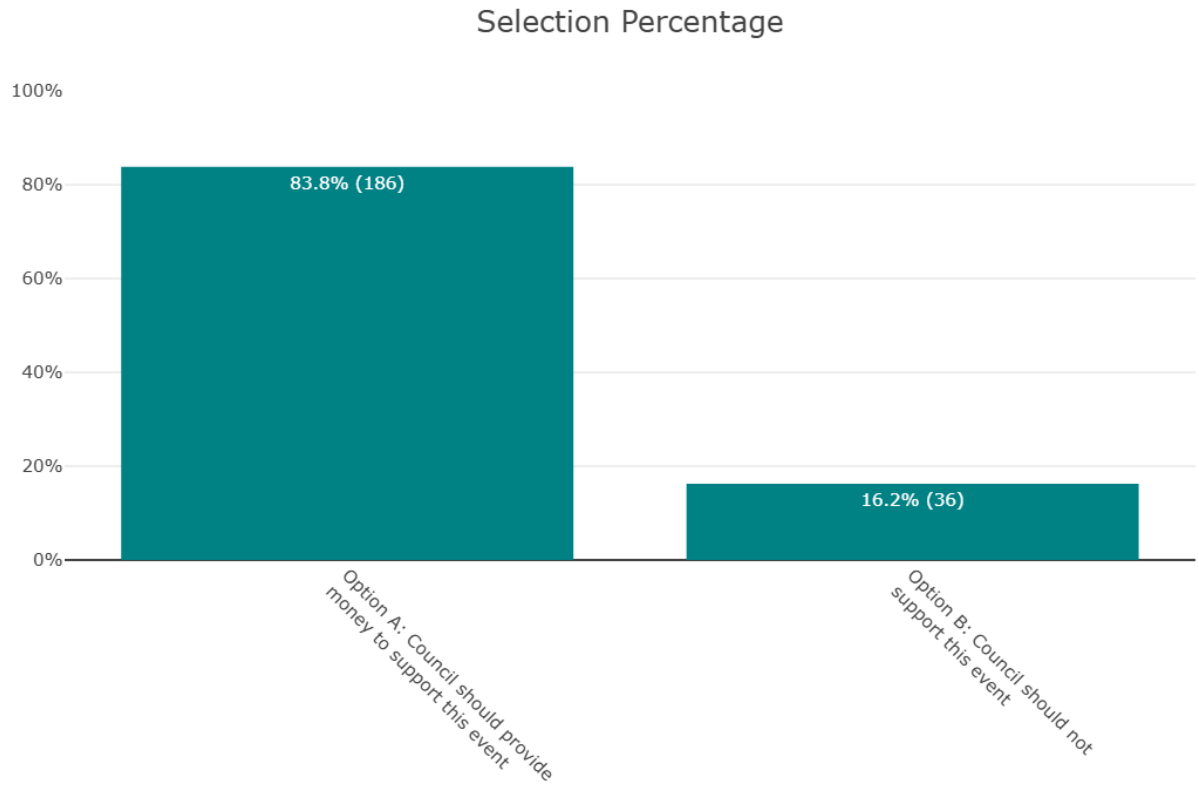
- Many respondents indicated the pool is underutilised, with some suggesting low daily usage numbers.
- Several respondents mentioned the high running costs relative to usage as a reason for closure.
- Some respondents suggested alternative uses for the space or funds, such as water slides or a bigger, deeper pool.
- A few respondents noted the pool's temperature and cleanliness (leaves, dirt, bugs) as negative factors.
- A small number of respondents expressed positive sentiments towards the pool.

In-depth Analysis
Arguments For

Respondents in favour of closing the pool cited low usage and high costs, with some suggesting the Clutha River and Lake Dunstan as alternatives. Some respondents indicated the pool was unhygienic or only used during the hottest parts of summer. A few respondents suggested alternative uses for the space, such as water slides.

Arguments Against

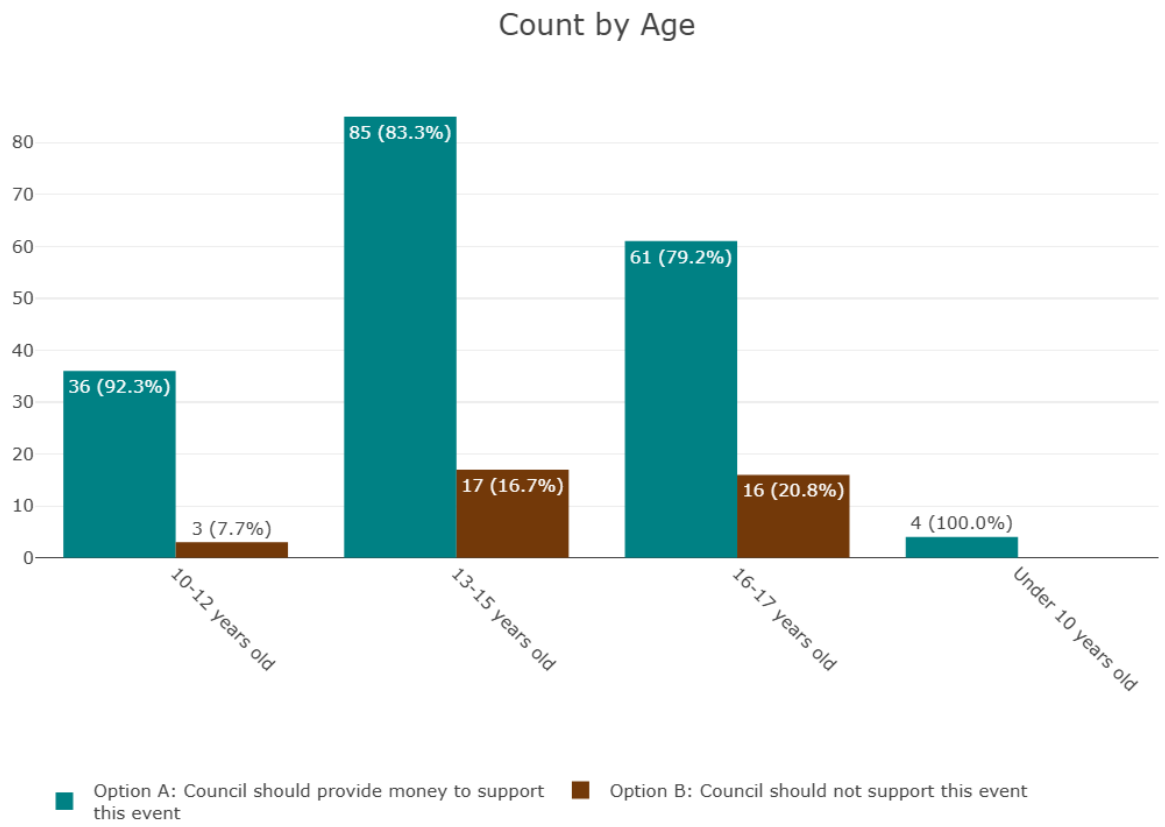
Respondents against closing the pool expressed that it was fun and that they loved it. Some respondents suggested improvements, such as heating or constant operation, to increase its popularity. One respondent stated that they love it so much and another stated it was so cool.



Supercars Championship

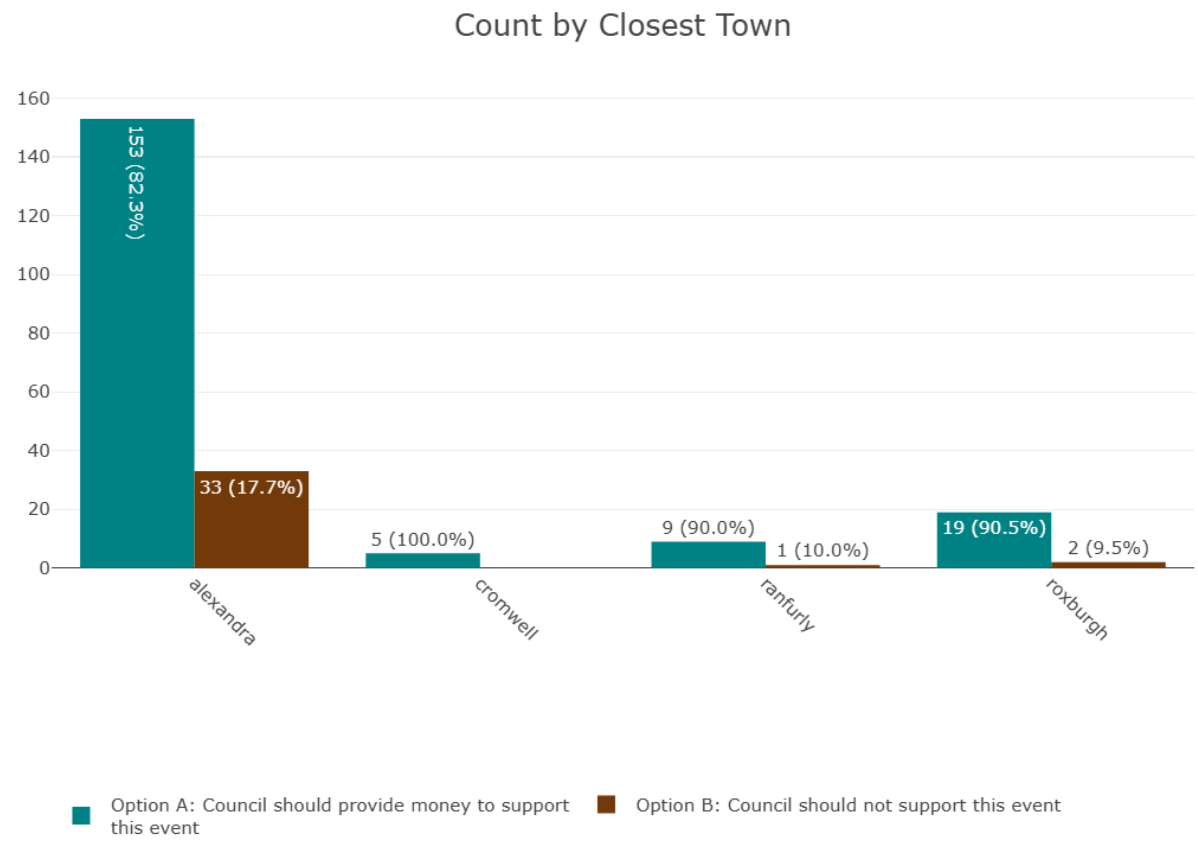
n=222
comments: 80

About



The question asks whether the council should provide financial support to the Supercars Championship. The options are for the council to either provide or not provide money to support the event.

There were 222 total responses: 186 voted for 'Option A: Council should provide money to support this event', 36 voted for 'Option B: Council should not support this event'. 80 people made a comment.



Responses By Age

Respondents across all age categories generally preferred that the council provide money to support the Supercars Championship. However, those aged 13-15 years old showed a slightly lower preference for council funding compared to other age groups, while those under 10 years old showed less support for the council not supporting the event compared to other age groups.

Responses By Closest Town

Preferences regarding the Supercars Championship were broadly similar across the 'Closest Town' category. The respondents from Cromwell showed support for the council providing money to support this event. The respondents from Alexandra, Ranfurly and Roxburgh also showed support for the council providing money to support this event, with a few respondents indicating the council should not support this event.

Summary

The majority of respondents (83.8%) supported the council providing money to support the Supercars Championship, citing economic benefits for local towns and the community, as well as the event's popularity. A smaller percentage (16.2%) opposed council support, arguing that funds should be prioritised for council facilities and community needs, with some raising concerns about the environmental impact. Overall, the feedback suggests that the Supercars Championship is a popular event with perceived economic benefits, although some believe council funding should be directed elsewhere and raised environmental concerns.

Option A: Council should provide money to support this event

comments: 69

Summary

The overall sentiment towards the option of the council providing money to support the Supercars Championship event is overwhelmingly positive. Respondents believe the event would bring money into local towns, benefit small businesses, and attract people to the area, boosting the community. Many respondents expressed that the event is fun, cool, and a great experience for locals and tourists alike, with some specifically mentioning their enjoyment of watching the races and the appeal of Highlands as a venue. A few respondents were negative towards the event, with some simply stating 'no' without providing a reason.

Key Points

- The respondents said the supercars championship is a well-loved event that many would miss if it were discontinued.
- Respondents indicated the event would bring money into local towns and generate more revenue.
- Some respondents believe the event would help small businesses and be a great event for the community.
- Respondents stated the event would attract people to the area and support the community.
- Several respondents expressed that the event is fun and cool to watch, and some specifically mentioned enjoying it at Highlands.

In-depth Analysis
Arguments For

Many respondents expressed enthusiasm for the Council providing money to support the Supercars Championship, with many stating it is “cool” and “awesome”. The respondents said that the event is “incredibly well loved” and brings money into local towns, benefits local businesses, and brings people to the area. Some respondents mentioned that the event is “really fun” and that “everyone on the South Island comes there.”

Arguments Against

A number of respondents simply stated “No” or “nope”, without providing further explanation.

Option B: Council should not support this event

comments: 11

Summary

Overall sentiment towards Option B is negative. The respondents said that council money should be spent on council facilities and community support rather than a luxury event. Some respondents believe the event primarily benefits businesses, not ratepayers, and raised environmental concerns about community payment for the event.

Key Points

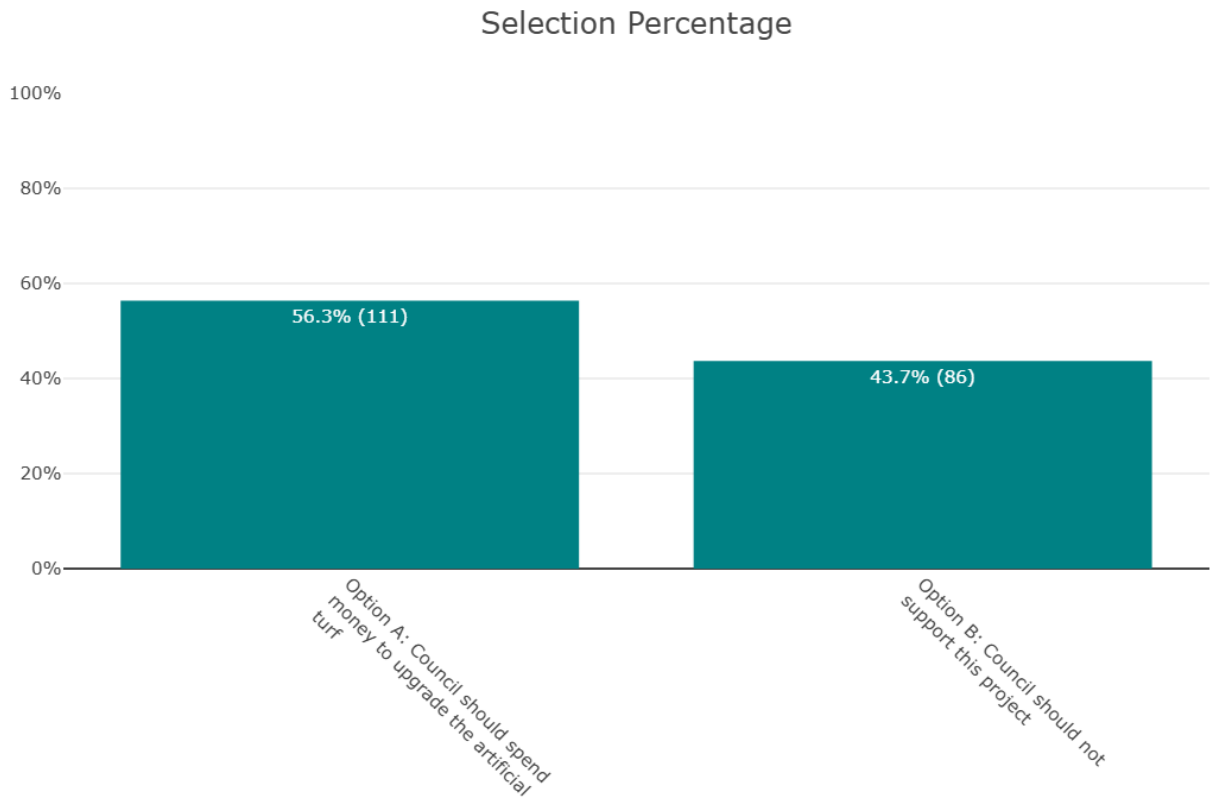
- Council funds should be prioritised for council facilities and community needs, not private events.
- Ratepayers shouldn't have to pay for an event that primarily benefits businesses.
- Concerns were raised about the environmental impact of the event.

In-depth Analysis
Arguments For

Several respondents believe the council’s money should be spent on council facilities and community support rather than on the Supercars Championship, which they view as a luxury. Some respondents indicated that the event primarily benefits businesses, not ratepayers. One respondent stated that the community shouldn’t pay for this type of event due to environmental concerns.

Arguments Against

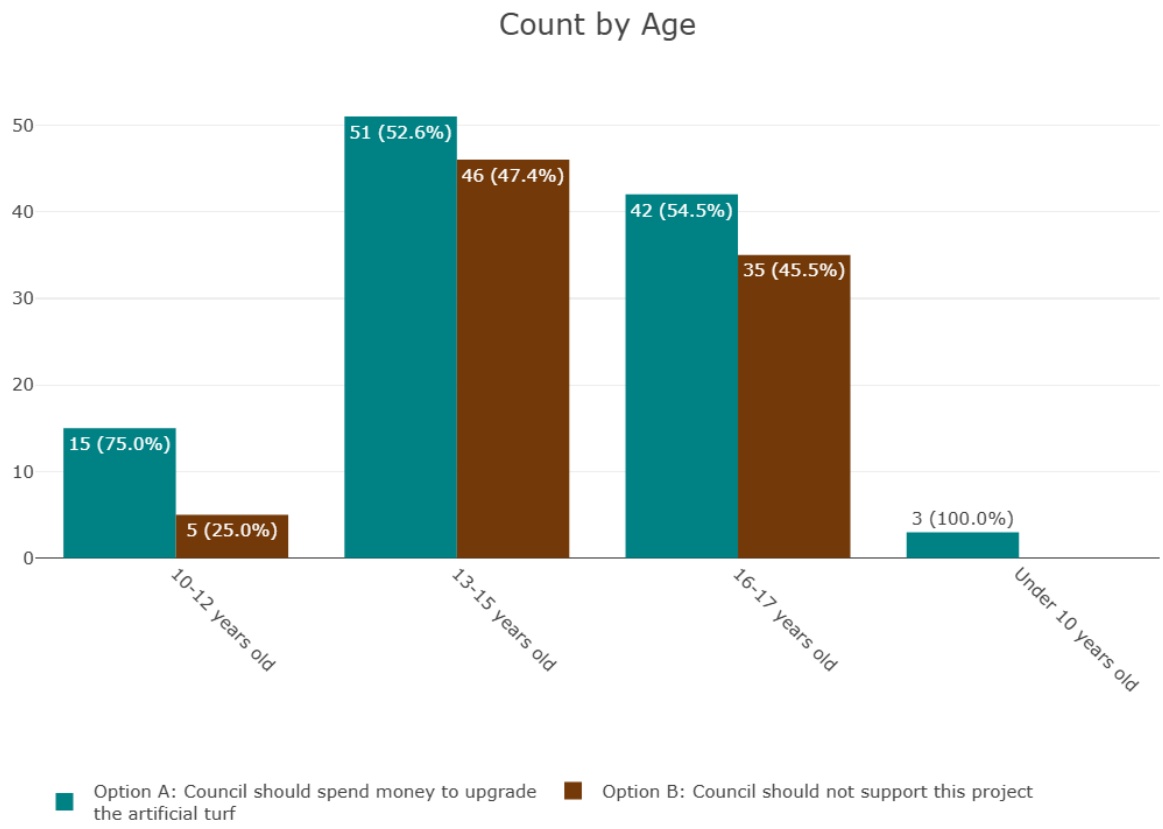
One respondent indicated being unsure. Another respondent mentioned their brother is into racing, implying a potential personal interest, although not explicitly arguing against the option.



Artificial Turf at Maniototo Area School

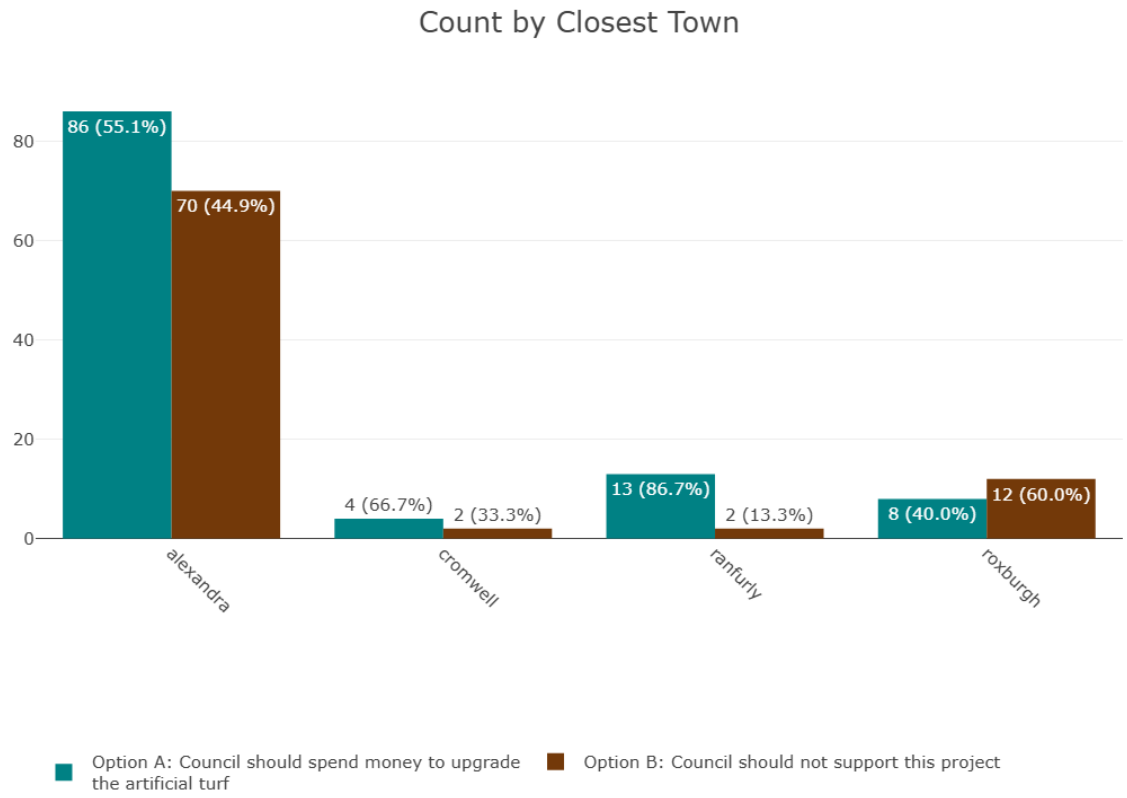
n=197
comments: 53

About



The question asks whether the council should spend money to upgrade the artificial turf at Maniototo Area School. The options are that the council should spend money on the upgrade, or that the council should not support the project.

There were 197 total responses: 111 voted for 'Option A: Council should spend money to upgrade the artificial turf', 86 voted for 'Option B: Council should not support this project'. 53 people made a comment.



Responses By Age

Respondents aged 13-15 years old showed a slight preference for Council to spend money to upgrade the artificial turf, while those aged 16-17 years old showed a slightly stronger preference for the same option. The youngest respondents, under 10 years old, exclusively supported Council spending money to upgrade the artificial turf, while respondents aged 10-12 years old also leaned towards this option. Respondents aged 13-15 and 16-17 years old were more likely to say that Council should not support this project than the younger age groups.

Responses By Closest Town

Respondents from Ranfurly showed a stronger preference for the council to spend money to upgrade the artificial turf compared to respondents from Roxburgh, who were more inclined to say the council should not support this project. Respondents from Cromwell also leaned towards the council spending money to upgrade the artificial turf. Alexandra respondents were fairly split between the two options, with a slight preference for the council to spend money to upgrade the artificial turf.

Summary

A majority of respondents (56.3%) supported upgrading the artificial turf at Maniototo Area School, while 43.7% were not in support. Those in favour cited frequent use by students and the community, the poor condition of the current turf, and the potential benefits for school sports teams and hosting events. Those not in favour expressed concerns about disproportionate benefit to one school, a lack of connection to the area, and a preference for prioritising projects in Alexandra, or other needs.

Option A: Council should spend money to upgrade the artificial turf

comments: 28

Summary

Overall sentiment towards upgrading the artificial turf at Maniototo Area School is positive, with 56.3% of respondents selecting this option. The respondents highlighted that upgrading the turf would benefit both students and the wider community by providing a safer and more suitable space for sports and other activities. Several respondents mentioned the current turf's poor condition, including cracks, mud, and slipperiness, posing safety risks and limiting its usability, while others noted the potential for hosting more events and encouraging greater participation in sports.

Key Points

- The turf is used frequently by students and the community.

- The current turf condition is poor, with concerns about injuries due to the surface and cracks in the adjacent courts.
- An upgrade would benefit school sports teams by providing more space for practice and games.
- Improved facilities could enable the school to host more events and matches.
- Upgrading the turf may encourage more children to participate in sports.

In-depth Analysis
Arguments For

Respondents in favour of upgrading the artificial turf at Maniototo Area School highlighted frequent use by students and the community. Some respondents noted the current turf's poor quality, leading to injuries and infections, and the dangerous condition of the adjacent courts. A few respondents suggested an upgrade would benefit school sports teams, allow for more practices, and improve safety. A couple of respondents mentioned the potential for hosting other schools and encouraging more kids to play sports. One respondent stated that upgrading the turf would be useful.

Arguments Against

A few respondents were against upgrading the artificial turf, with some simply stating "No" or "no thanks". One respondent said "Idk".

Option B: Council should not support this project

comments: 25

Key Points

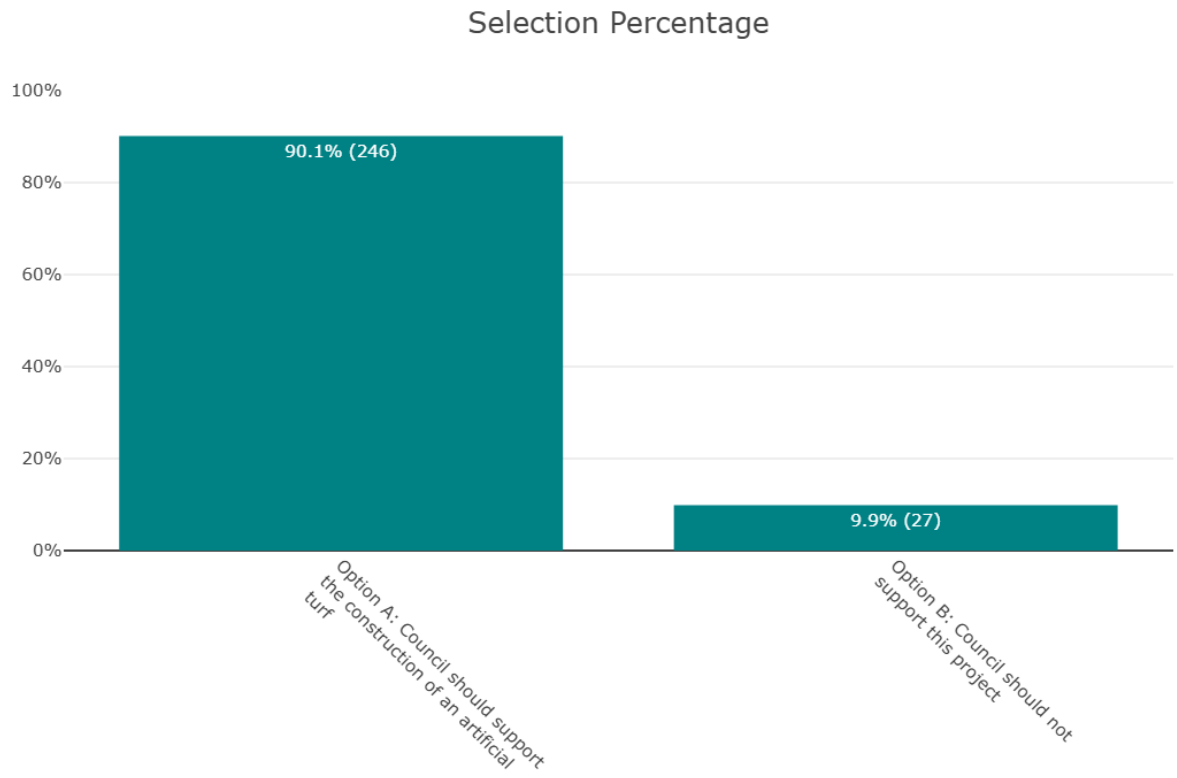
- Some respondents indicated the project would disproportionately benefit Maniototo Area School.
- Several respondents expressed a lack of connection to or familiarity with the Maniototo area.
- A number of respondents explicitly stated 'no' without further explanation.
- Some respondents suggested prioritising similar projects in Alexandra.
- One respondent suggested focusing on other needs instead.

In-depth Analysis
Arguments For

Respondents in favour of the council not supporting the project cited reasons such as the project primarily benefiting only the Maniototo school, with one respondent suggesting it "wouldn't be used much". Some respondents suggested the funds could be better used for other things or in other locations, such as Alexandra, where "people live or visit".

Arguments Against

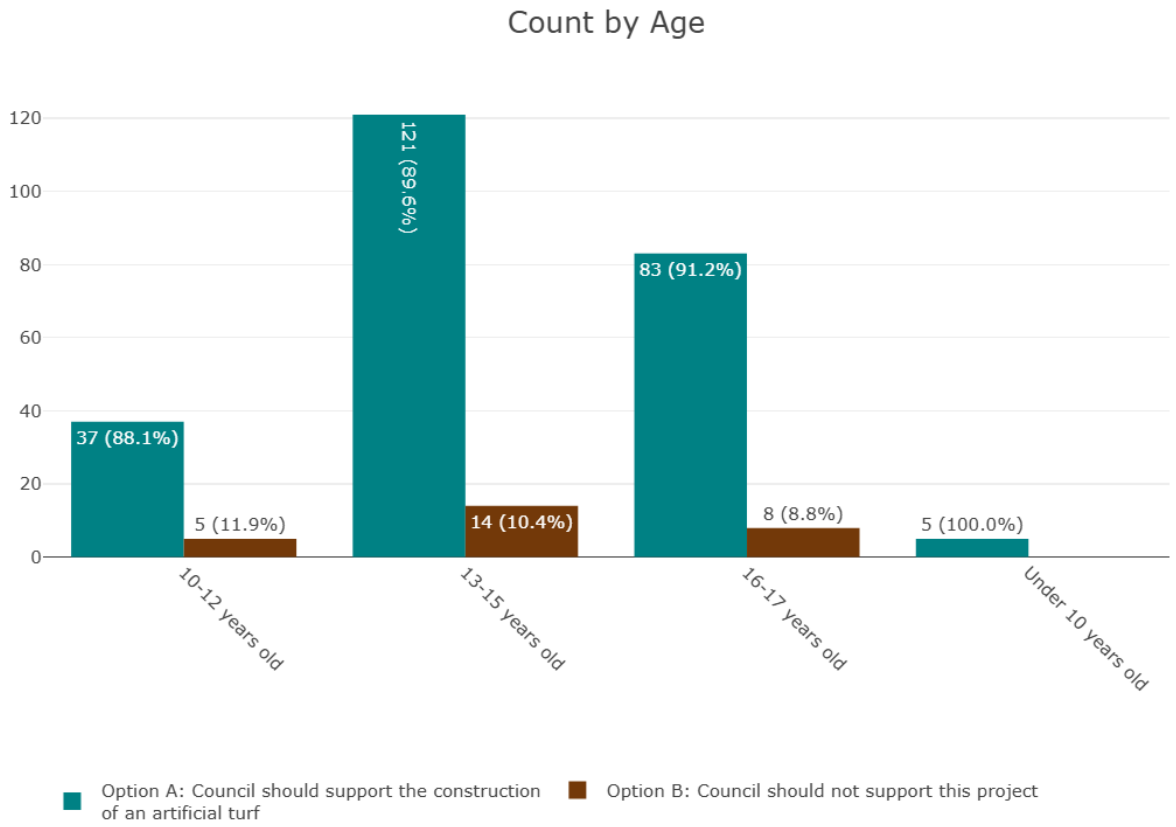
There were no explicit arguments against the option of the council not supporting the project. The negative comments primarily consisted of simple rejections of the project, such as "no", "nope", or expressions of indifference, such as "i dont live here" and "I have never been there". One respondent stated "Grass is good" suggesting a preference for natural grass over artificial turf.



Artificial Turf at Dunstan High School

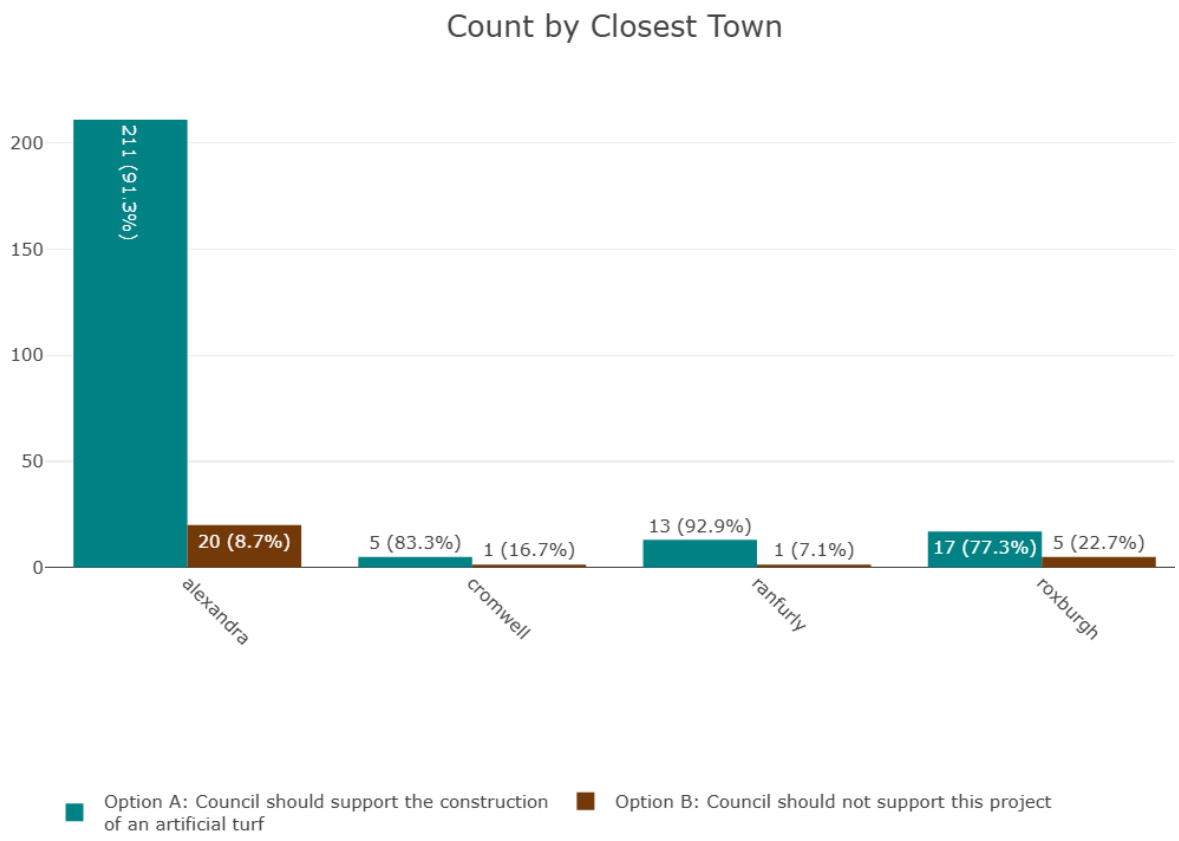
n=273
comments: 122

About



The question asks whether the council should support the construction of an artificial turf at Dunstan High School. The options are for the council to either support or not support the project.

There were 273 total responses: 246 voted for 'Option A: Council should support the construction of an artificial turf ', 27 voted for 'Option B: Council should not support this project'. 122 people made a comment.



Responses By Age

Respondents across all age groups generally supported the construction of an artificial turf. However, those aged 13-15 years old showed a slightly stronger preference for supporting the construction compared to other age groups, while those Under 10 years old showed less support for the construction of an artificial turf compared to other age groups, but still supported the construction overall.

Responses By Closest Town

Respondents from Alexandra, Cromwell, and Ranfurly showed a stronger preference for Council support of the construction of an artificial turf, while respondents from Roxburgh showed less support for this option and more support for the Council not supporting the project, relative to the other towns.

Summary

The vast majority of respondents (90.1%) support the construction of an artificial turf at Dunstan High School (Option A), citing benefits for the school, community, and sports teams, including reduced travel and increased opportunities; a small minority (9.9%) oppose the project (Option B), primarily due to cost concerns and perceived lack of need. Overall, the feedback indicates strong support for the artificial turf, driven by the potential for increased sports participation and community benefits, though some concerns about cost and specific facility preferences were raised.

Option A: Council should support the construction of an artificial turf

comments: 109

Summary

The overall sentiment towards Option A is overwhelmingly positive. The main themes include the benefit to Dunstan High School and the wider community by reducing travel for sports teams, providing a facility for multiple sports and PE classes, and attracting sporting events to the area. Some respondents expressed a desire for specific features like wet sand turf or basketball hoops, while a few respondents were opposed to the idea or suggested alternative uses for the space.

Key Points

- A new turf would benefit Dunstan High School and the wider community.
- The new turf would reduce travel time and costs for students and teams.
- The turf would provide more opportunities for students to participate in sports.
- The turf could be used for multiple sports, PE classes, and community events.
- Some respondents expressed a desire for a specific type of turf (wet sand) and additional facilities (lights, basketball hoops).

In-depth Analysis
Arguments For

Respondents largely supported the construction of an artificial turf at Dunstan High School, citing benefits such as reduced travel for teams from Alexandra, Maniototo Area School, and other surrounding areas. The respondents said that a full-sized turf would allow for proper practice and skill development, particularly in hockey, and encourage greater participation in sports by providing a local facility. The respondents also noted the potential for community use, P.E. classes, and hosting events, which could bring revenue to local businesses. Some respondents highlighted that the current facilities are inadequate, with one respondent mentioning the poor condition of the existing turf and another stating that the current tennis courts are dangerous. The high selection percentage (90.1%) strongly supports the widespread agreement regarding the need for and benefits of the proposed turf.

Arguments Against

A minority of respondents opposed the construction of an artificial turf. Some respondents simply stated “No” without providing a reason. One respondent expressed a desire for football and futsal on the tennis courts instead, while another suggested converting the area into a tennis court. Another respondent expressed a desire for lights on the rugby field. These comments suggest that some respondents may have alternative priorities or concerns about the allocation of resources.

Option B: Council should not support this project

comments: 13

Summary

The sentiment towards Option B, that the council should not support the project, is largely negative. The respondents said that there is no need for the project, that it costs too much money, and that not everyone will use it. One respondent suggested that the funds should go to Roxburgh instead, and another stated that nobody uses the court.

Key Points

- Some respondents expressed opposition to the project.
- Several respondents cited cost concerns.
- A few respondents indicated a perceived lack of need or usage.
- One respondent suggested diverting funds to other projects.
- One respondent believes the facility will be primarily used for hockey.

In-depth Analysis

Arguments For

Respondents in favour of the council not supporting the project cited reasons such as the high cost, a perceived lack of need, and a belief that the facility would be underutilised. One respondent suggested that funding should be directed towards other areas. Some respondents simply stated their opposition with comments like "dont do it" and "no just no NO".

Arguments Against

There were no explicit arguments against the option of the council not supporting the project within the provided feedback. The feedback consisted of reasons for not supporting the project, rather than arguments against that stance.

Other Feedback

comments: 85

Identified Other Issues

- Netball court shelter in Alexandra
- Support for mountain biking and dirt jumping
- Warm water kayaking facilities for youth
- Hockey turf for kids
- Jumping spot at Clutha River
- Improving Otago for locals and tourists
- Speedway upgrade in Cromwell
- Nets/chains on basketball hoops at Terrace School, Alexandra
- Ski field in Alexandra
- Keeping the Alexandra outdoor pool open
- Keeping Highlands and halls open
- Keeping Poolburn Hall open
- Keeping Ranfurly Hall open
- Hockey facilities affordability
- Entertainment centre with sports courts and cinema in Roxburgh
- Cricket pitch at Cromwell College
- Safe public area for car activities
- McDonald's in Alexandra

Key Themes in Other Issues

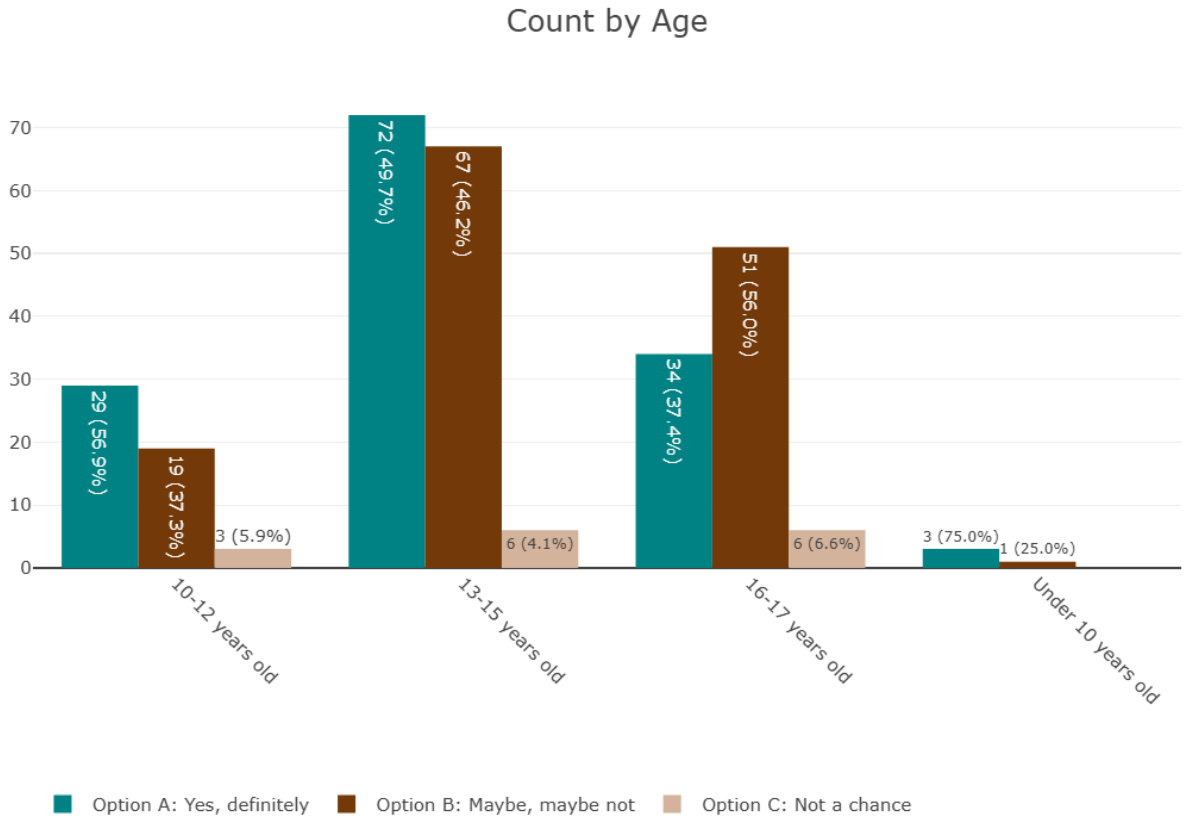
- Sports Facilities: Requests and suggestions for new or improved sports facilities.
  - Example comment mentions(s) related to Sports Facilities: Netball court shelter, mountain biking support, kayaking facilities, hockey turf, speedway upgrade, cricket pitch.
- Recreational Amenities: Feedback on the importance of maintaining existing recreational amenities.
  - Example comment mentions(s) related to Recreational Amenities: Keeping outdoor pool open, keeping Highlands and halls open, keeping Poolburn Hall open, keeping Ranfurly Hall open.
- Community Resources: Suggestions related to community resources and infrastructure.
  - Example comment mentions(s) related to Community Resources: Improving Otago for locals and tourists, nets/chains on basketball hoops, entertainment centre in Roxburgh.
- Miscellaneous Requests: Various unrelated requests and comments.
  - Example comment mentions(s) related to Miscellaneous Requests: Ski field in Alexandra, safe public area for car activities, McDonald's in Alexandra.
- Hall maintenance: Feedback on the importance of maintaining halls.
  - Example comment mentions(s) related to Hall maintenance: Keep highlands and keep the halls!, Keep the Poolburn hall, Please keep Ranfurly Hall open!!

Overall Summary of Other Issues

The respondents provided feedback and suggestions primarily focused on sports facilities, recreational amenities, and community resources. A number of respondents expressed a desire for new or upgraded sports facilities, while others emphasised the importance of maintaining existing amenities like the outdoor pool and community halls. A few respondents included miscellaneous requests such as a McDonald's in Alexandra.

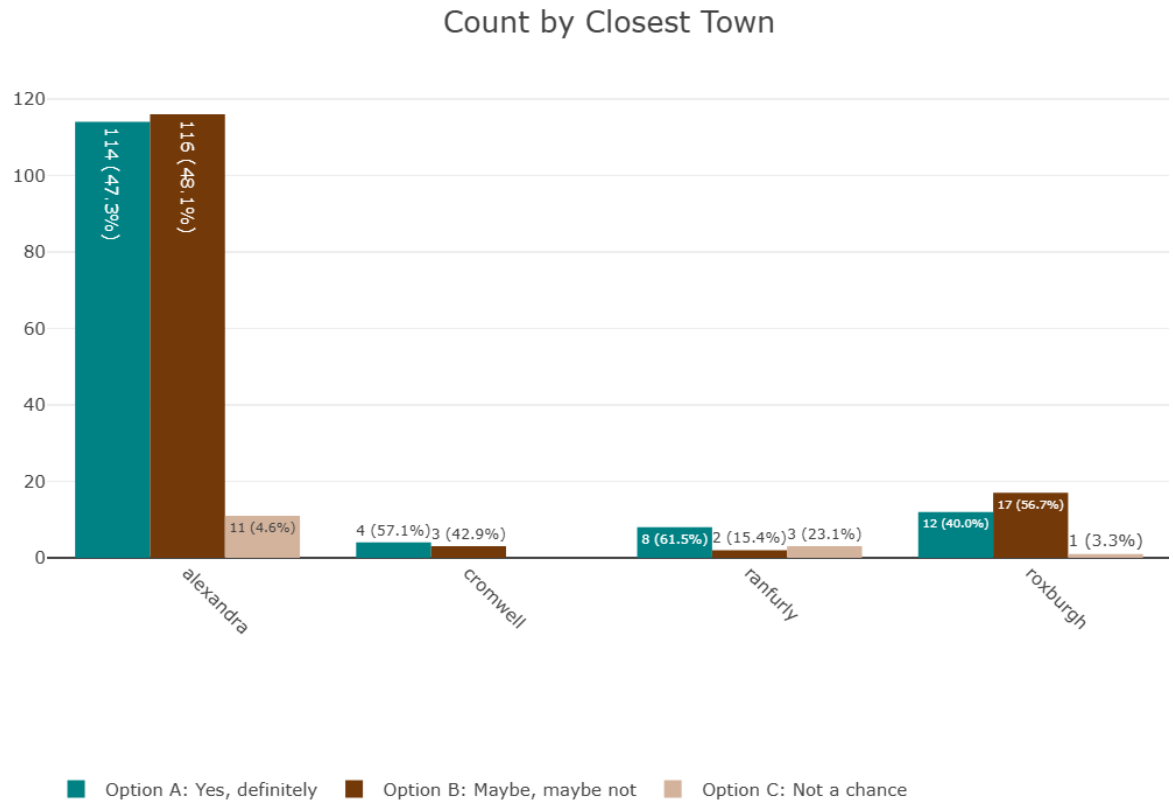
Student Likelihood of Future Survey Participation

About



The question asks students about their likelihood of participating in future surveys. The options are "Yes, definitely", "Maybe, maybe not", and "Not a chance".

There were 291 total responses: 138 voted for 'Option A: Yes, definitely', 138 voted for 'Option B: Maybe, maybe not', 15 voted for 'Option C: Not a chance'.



Responses By Age

Respondents aged 10-12 years old showed a stronger preference for "Option A: Yes, definitely" compared to other age groups. Respondents aged 16-17 years old leaned more towards "Option B: Maybe, maybe not" than the other age groups. The small sample size of respondents under 10 years old makes it difficult to draw definitive conclusions, but they also selected "Option A: Yes, definitely" at a high rate.

Responses By Closest Town

The respondents from Cromwell showed a stronger preference for "Option A: Yes, definitely" compared to respondents from other towns. Respondents from Ranfurly showed a greater inclination towards "Option C: Not a chance" compared to the overall trend. The respondents from Alexandra and Roxburgh had relatively similar preferences, with a roughly even split between "Option A: Yes, definitely" and "Option B: Maybe, maybe not".

Summary

The responses were split almost evenly between "Yes, definitely" and "Maybe, maybe not", with each option selected by 47.4% of respondents. Only 5.2% of respondents indicated "Not a chance". There was no feedback provided to further explain these selections. Overall, the results indicate a mixed sentiment regarding future survey participation, with a large portion of students unsure or unwilling to commit to future participation.

Appendix One: Key Themes from Community Meetings

Alexandra
Date: Wednesday, 2 April 5.30pm – 7:30pm
Location: Dunstan High School Hall
Public attendees: 34
Key themes included:

Council Debt:

- Concern over Council's debt levels, currently at $40 million, with an expected increase to $50 million.
- The debt increase was discussed in the context of the Cromwell Hall project.

Water Services:

- Concern regarding the "400% increase" in water due to changes in volumetric charges.
- Questions about the number of water leaks across the district.
- Suggestions for requiring developers to install separate piped irrigation supplies or rainwater tanks on new properties.

Environmental Sustainability:

- Inquiry about Council's actions to reduce its carbon footprint.

Alexandra Outdoor Pool:

- Some residents felt the outdoor pool remnant from bygone days and no longer needed.

Growth Planning:

- Question raised about how the Council calculates future growth rates and whether it allows for sufficient capacity when planning new infrastructure.

Tree Maintenance:

- Concern over tree stumps on the northern approach to Alexandra needing attention.

Millers Flat
Date: Thursday, 3 April 5.30pm – 7.30pm
Location: Millers Flat Hall
Public attendees: 29
Key themes included:

Pools:

- Discussion focused on how the Council manages pools, with the Millers Flat Pool highlighted as a successful community-run model. Questions were raised about why Roxburgh can't operate in the same way.

Hall Management:

- Concerns from the Millers Flat Hall committee regarding long-term certainty.
- While the impact of losing the Roxburgh Entertainment Centre gave short-term reprieve, the community would like longer term certainty.

Districtisation Concerns:

- Statements about perceived unfairness to those in the TV as the money mainly goes to the urban centres (Alexandra and Cromwell).

Supercars:

- Mixed views, with questions about environmental impact given the Council's carbon reduction goals.

Cost Analysis:

- Questions about Council's cost centre and assessed for accuracy - specific focus on tourism and economic development.

Rates Increases:

- Questions on why Millers Flat had higher proposed rates compared to other areas.

Cromwell

Date: Monday, 7 April 5.30pm – 7.30pm
Location: Cromwell and Districts Presbyterian Church
Public attendees: 25
Key themes included:

Funding Non-Core Activities:

- Questions about funding of 'non-core' activities such as Supercars and other "nice to have's", and confusion over funding sources (tourism reserves vs crown funding).
- Frustration about rates increases and residents feeling unheard. Calls for better community involvement in decision-making.

Debt Management:

- Concerns about CODC's debt levels, how it will be paid down and whether current spending is sustainable.

Council Controlled Organisation:

- Worries about losing local control over services if water management moves to a CCO.
- Requests for Council to advocate against overreaching government water regulations.

Santana Minerals:

- Questions about what the company will contribute to the community.

Irrigation Water:

- Discussion on using lake sources for irrigation instead of treated water.

Development Contributions:

- Noted increase in contributions for new sections to cover infrastructure costs.

Roxburgh

Date: Tuesday, 8 April 5.30pm – 7.30pm
Location: Roxburgh Memorial Hall
Public attendees: 14
Key themes included:

Turf Funding:

- Questions about the difference in funding for Dunstan and Maniototo turfs.

Rates Increases:

- Concerns about significant rate fluctuations year-to-year and the recent rate increases.

Pool Management:

- Discussion on Roxburgh pool costs, lifeguard availability and opening hours.
- Desire to make the pool more accessible to adolescents who don't require supervision.
- Increased liability on the operating trust

Discretisation Concerns:

- Opposition to discretisation despite Council approval. Community felt unheard.

Digital Access:

- Challenges for older residents with accessing digital services.

Supercars:

- Questions regarding tourism reserve funding being found and how it would be used to secure the bid.
- How would the reserves be used if it wasn't used for Supercars

Roxburgh Cemetery:

- Questions about what progress has been made for defining boundaries

Roxburgh Entertainment Centre:

- Concerns about the need for public advertising of meetings and a fair steering group formation.

Ranfurly

Date: Wednesday, 9 April 5.30pm – 7.30pm
Location: Ranfurly Rugby Clubrooms
Public attendees: 9
Key themes included:

Water:

- Concerns about increasing water costs, especially for high water users like the bowling club.
- Issues around reliability of clean drinking water in Naseby, with suggestions that new pipes may be needed to achieve this.
- Concerns about stormwater entering wastewater systems, increasing treatment costs.
- Comments on the need for a policy to encourage water storage.

Fenton Library:

- The importance of the library was highlighted by attendees.

Earthquake Strengthening:

- Questions around the required timeframe (2053) for earthquake strengthening.
- Some asked if efforts could be delayed.

Roading Funding Model:

- Discussion on how fuel-efficient/electric vehicles reduce fuel tax income, affecting road maintenance funding.

Maintenance Concerns:

- Sentiment that not enough money is being spent on maintenance and general upkeep in Maniototo.

Omakau

Date: Thursday, 17 April 5.30pm – 7.30pm
Location: Matakanui Rugby Clubrooms
Public attendees: 16
Key themes included:

Multi-Council CCO:

- Question about whether a multi-council CCO would actually reduce costs for the community.

Water Charges and Quality:

- Concern about increasing volumetric water charges, especially when water quality is poor.
- Some suggested that residents should receive a rebate if water quality does not improve.
- Water from taps should be both safe to drink and taste good.
- Frustration that water used for gardens is treated, which seems unnecessary.
- Questions on why Omakau and Ophir residents pay high water costs despite poorer quality water.
- Current volumetric charge options seem limited with no consideration of other models.

Water Supply Capacity:

- Omakau currently struggles with having enough water supply, and this needs to be addressed.
- A request for Council to help establish a new watering hole for the community.

Omakau Bridge:

- The blue hose across the Omakau bridge needs to be insulated.
- Ophir residents experience water shortages in winter until midday when the water thaws.

Fast Track Charges

Applications for consent under the Fast Track Act 2024

All costs incurred by Council consulting and providing assistance before the application is lodged (whether or not the application is subsequently lodged) will be recovered on a time charge/hourly rate.

All costs incurred by Council in undertaking all functions under the Fast Track Act 2024 when the substantive application is lodged will be recovered on a time charge/hourly rate.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.					In the first instance if you had enough staff at the pool you might actually be able to have it open.			Noted staffing - in mid to late February 2025, the outdoor pool was closed for three weeks due to staff shortages. We recognise that we didn't manage the staffing requirements as effectively as we should have, and we are now workignon new strategies to ensure the pool is property staffed going forward, such as hiring more casual staff. We are taking the necessary steps to avoid similar issues in the future.
	3 waters should have been totally given over to central government control when the chance existed, now these fantastic assets that everybody was so crazy about are going to break us !		I think we should retain the status quo for per cubic metre but reduce or remove the fixed charge. It's unfair to get it both ways. Get rid of the stupid expenses on tourism, bike tracks, dress collections and the like and stop paying for them with our water bill.					The fixed charge has been calculated to cover the cost of the water activity less the income recieved from volumetric charges. If we reduce the fixed charge to zero then the volumetric charge would need to be higher to reflect this. Council does not charge more for water than it costs to deliver.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.		Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.	I think the jump to $2.40 is too much and should be done incrementally over the years to a level where it is sustainable					Suggests staged implementation of increased charges
	Yes	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	It appears that there are 8% of ratepayers who have large back or front yards- who use a lot of water. Please consider ratepayers who have orchard and garden in their yards. Home produce helps defray budget costs and provides useful recreation. Central Otago generally does not provide enough natural precipitation to main crops. Increased charges for water , for some ratepayers may make such traditional activities unviable.					Significant upgrades to existing pipe networks will be required to support this level of water consumption. This will require the costs of water supply to increase more and is inequitable for the majority of users who use less water.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	Millers Flat water scheme should be left alone		Millers Flat water scheme should be left alone					There is no proposal fo Council to become involved in the Millers Flat Scheme which is a private supply.
				Option B: Retain the outdoor pool in Alexandra.	The outdoor pool would get more use if it was open regularly. Last season it was closed a lot due to staff shortages. This season its opening hours were significantly reduced once staff left to return to university. The costs for heating it this season must be a lot lower as the heating was turned off in January. I don't think it would have cost $250,000 to run it this season!!			Noted In mid to late February 2025, the outdoor pool was closed for three weeks due to staff shortages. We recognise that we didn't manage the staffing requirements as effectively as we should have, and we are now working on new strategies to ensure the pool is properly staffed going forward, such as hiring more casual staff. We are taking the necessary steps to avoid similar issues in the future.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	Support any changes which will more efficiently and effectively manage water provision and maintenance. Moving to a new entity must provide financial savings in the short and long term and will require excellent governance/oversight and clear accountability. It will be a challenging process! Ensure that local knowledge of managing water systems is not lost in any transition.	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.	A gradual increase would be more manageable for ratepayers as many may not fully realise how expensive their current water usage would be. Particularly older gardeners who use a lot of water!					Suggests staged implementation of increased charges
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	I'm not in favour of the council collaborating with neighbouring councils. We do not want to be burdened with extra costs of Queenstown Lakes water issues.	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	The increases in water charges seem very disproportionate to the reduction in fixed charges.					This assumes a reduction in overall water consumption of 30%. If the reduction is less than this them the fixed charge will be reduced in future years.
		Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	Leave it at 60 cents and REDUCE the connection charge!! Its ridiculous!	Option B: Retain the outdoor pool in Alexandra.	The outdoor pool is a valuable community asset. Id like to see community fundraising to install a hydroslide so that the pool gets more use. Its also a valuable venue for the ice swimming team to train and compete.			The cost of delivering the service needs to be recovered through charges to users. If the volumetric charge is low, then the fixed charge needs to be high.
				Option B: Retain the outdoor pool in Alexandra.	It would be a huge loss to the community if the outside pool was closed. It is an amazing amenity & would see more children swim at the Clutha river, which is a risk if they aren't good swimmers. I believe there could be staffing cost savings at times when the pool is being utilised for swimming club etc, which should reduce the staffing requirement if the groups signed relevant disclosures. Staffing levels could be maintained more effectively. I believe that more recent issues resulted from the large number of students employed that then returned to University. There replacements should have been advertised a lot earlier & relevant training undertaken or a better split of temp/ permanent staffing.			Noted In mid to late February 2025, the outdoor pool was closed for three weeks due to staff shortages. We recognise that we didn't manage the staffing requirements as effectively as we should have, and we are now working on new strategies to ensure the pool is properly staffed going forward, such as hiring more casual staff. We are taking the necessary steps to avoid similar issues in the future.

Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
				Option B: Retain the outdoor pool in Alexandra.	Council should not close the Alexandra pool in favour of funding the Roxburgh pool. The Alexandra outdoor pool should remain open. It is an amazing facility that our community needs. There should be a targeted rate to Roxburgh residents as well as a higher admission costs so that the Roxburgh pool can be maintained if shifted to council ownership. Otherwise not. It would be absolutely disgusting for our Alex community to lose our fantastic outdoor pools. So many young people and children use this in the summer. You would be taking away a facility and option for families, the swim club, world champion and international swim training g especially ice and cold plunge swimming.			Noted the Council is not taking over the management of the Roxburgh pool in favour of the Alexandra pool.
				Option A: Close and decommission the outdoor pool in Alexandra.		Absolutely do not support this. Council should be investing this money in day to day activities like parks. swimming pools, playgrounds and library maintenance. If this event does go ahead, free tickets should be given to all locals	We need to budget for shade sails over all council playgrounds	Many playgrounds already have shade sails. Additional shade sail locations will be determined through the Play Strategy.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	It's better to keep things as they are and have council responsible for water	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	Don't change, everything work fine.					The system is not fine, if the status quo is retained then further capital work will need to be added to the program to upgrade the pipe network to meet demand. This will further increase the fixed cost.
			Option C :$1567.74 for the year			From what we have seen in the Papers is that Ruapuna has 2026 event so Cromwell is out in the cold this round. this would however bring in a lot of revenue to the area and if needed would be a good investment		Support noted. Supercars are yet to make an official announcement on 2026 location. - NL
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	Increase our volumetric charge to $1.80 per cubic metre with a fixed charge of $843.54 per connection.		Neither of the above. Have you costed this option?: Increase our volumetric charge to $1.80 per cubic metre with a fixed charge of $843.54 per connection.					The fixed charge has been calculated to cover the cost of the water activity less the income recieved from volumetric charges. The suggested fixed charge with a $1.80m3 volumetric charge would generate more revenue than is required to meet the cost of the activity. Council does not charge more for water than it costs to deliver.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	Concern about going in with Queenstown lakes. Makes sense to have a bigger authority, however Queenstown has huge challenges and could absorb/dominate funding. Queenstown should be a stand-alone with direct government support as a premium Tourist destination with enormous water challenges.	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.					Summary comment is for council to focus on water issues, specifically wastewater for Vincent area as development and inclusion of Clyde will require redevelopment and expansion of this service. Would prefer a cost effective system that avoided or minimised discharge into rivers but not a super costly super land discharge. Current Government legislation seems to suggest there are compromise options.	Council is programming upgrades to water and wastewater to meet growth needs in the Vincent and Clyde areas. We are waiting on the new national performance standards for wastewater to ensure what we build is aligned with government requirements.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.		Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	Another option is to charge high users, who use over and above an average amount of water, an extra levy for the excess water used. If you really want to stop high users from using so much water you would not introduce a scheme that affects me. You can introduce charges that affects high users only.					More complex charging mechanisms can be considered in the future for high water users when real time metering is available in Central Otago. This will be considered for the next meter replacement program, in the next 5 years.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	I can only hope that a CCO might make a better job of delivering water to Ophir than our current situation where a "temporary" water line on the top of the bridge has been in place for over 2 years. This freezes over winter leaving us with no water in the coldest part of the year. Unacceptable.	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.	While I think the user pays model makes sense it is only fair that Ophir residents should expect the same quality and consistency of delivery of water as the rest of the district. It seems that we are paying for expensive upgrades to water systems across the district however receive no benefit with our water quality and pressure being well below what the majority of the district gets and expects.					Council has been progressively upgrading each water supply based on its level of non-compliance with the NZ Drinking Water Standards. Construction of a new water treatment plant for Omakau/Ophir is programmed for the 2026/28 period.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.		Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.	If the average household in Central Otago is 2.4 people and each person uses on average 586 litres per day then the household would use 513.3 cubic meters (m3) of water per annum so the options would cost on average:	Option B: Retain the outdoor pool in Alexandra.	Set it up so that a private company can manage, operate and promote the amenity. The management company would be responsible for the ongoing maintenace once it is brought up to an acceptable level of presentation and the filtration equipment etc is operable and has an acceptable lifetime before replacement is required.			The average household does not use 513m3 per annum. The median connection uses 224m3 and the average consumption per connection is 325m3. The average calcuated per person is based on very high consumption by 8% of the connections which use 43% of the water.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	I support option A with a level of nervousness as I can see the benefit of having access to a higher debt ceiling and being able to spread this out over a longer period time for rate payers. But if we are to join up with other Councils then how do we determine between different Councils working to different timeline and with different quality of services depending on past investment. Also by splitting these services out from Council I take it you also remove the asset from the balance sheet, my question is, will this not affect the ability of Councils to borrow against these assets? ie we reduce the amount we can borrow by reducing the asset base that is currently a part of our credit rating.	Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.	I support a drive to decrease water use within reason. When the volume charges were first brought in there was a noticeable decrease in the level of garden and road verge irrigation and this has an impact on the look/feel of our townships in summer time. If we put more emphasis on volume charges then this trend of not watering is only going to increase and affects how are towns residential area look and feel as a community.					Volumetric charge - noted.
	It also seems like the first step towards the ability to privatise all community infrastructure, and potentially in the future take away the ability for the community to have a say on the level of service that is required/wanted for this particular community.							Development contributions are set based on the capital programs required to service growth for each scheme. Council is unable to set these equally across the district. Development contributions for Alexandra and Clyde are high as there has been or will be high cost upgrades for both water and wastewater treatment to facilitate growth in this area. In comparison, the water upgrade costs in Cromwell are less and are spread across more housing unit equivalents than in Alexandra.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	I just don't want us to pair up with Queenstown	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.						There is no proposal to join a CCO with Queenstown Noted - Different filter system than in indoor pools.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	I like the status quo			Option B: Retain the outdoor pool in Alexandra.	Point 1: The outdoor pool has not been utilised by the community because of staffing issues at the pool. Often the outdoor pool is closed to the public due to a lack of pool staff to manage all the pools. The pool has struggled for years to employ enough staff to manage the whole facility.	I'm sure $250k is not enough to entice the Supercars franchise. If they want to race in Cromwell they will do it without the councils help. Promote the region and they will come.		Further information will be provided as part of SWDW consultation to explain that the status quo is a more expensive option due to the the significant regulatory changes occurring in the next year

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	Omakau needs a whole new water system. Our water stops flowing often and tastes like dirt throughout the year. Happy to pay if we are guaranteed a proper water supply that is fit for a first world country	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	If water supply is held to a proper standard then being charged isn't a problem, currently the omakau water supply is a total joke	Option B: Retain the outdoor pool in Alexandra.	What a waste of money to decommission the outdoor pool. So many of our waterways are deemed not fit for use by the council during summer in a place where we often hit 30deg the outdoor pool provides a safe and secure place for families to enjoy time together and for children to learn water safety	250000 would be better spent on saving assets we currently have	Perhaps look at more user charges to compact some costs especially in regards to both pools, polls are a community hub and shutting them down will only create more disconnect, spend more money on bringing people together in forms of the pools or community centres rather than on one time events. Upgrade our water system in omakau so we are not living in a third world society with substandard water that stops numerous times throughout the day as well as tastes like it is directly from	Council has been progressively upgrading each water supply based on its level of non-compliance with the NZ Drinking Water Standards. Construction of a new water treatment plant for Omakau/Ophir is programmed for the 2026/28 period.
							An issue which is so important to me is the maintenance of the roadsides and empty land close to the Cromwell town centre.Alexandra looks amazing when arriving in the town. Cromwell only looks tidy by the Big Fruit. Arriving from Queenstown…scruffy wasteland to the right…land owners should not be able to leave their property in such a state. The land opposite Jackson's shop…corner of Shortcut Rd and main road…a total disgrace. The roadside by the Wooing Tree estate between Jackson's shop and roundabout…is not maintained. I would like answers and see progress in this area as it reflects on the town. Cromwell looks like the poor cousin to the other neighbouring towns. Simple by laws controlling empty land maintenance and suitable fines might help. I want people to love visiting Cromwell and appreciate the beauty of the hills surrounding it, plus the lake and lakesides (another issue!). I love living here but would love it more if it looked good!	Noted - Land is privately owned.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	Option A might allow a more focussed approach to water planning but I am apprehensive that cost containment may not be as vigorous as the CODC would apply and this will be passed on to ratepayers.	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.						Further information will be provided as part of SWDW consultation to explain that the status quo is a more expensive option due to the the significant regulatory changes occurring in the next year
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	The quality of water in Ophir is so poor it's undrinkable. I believe three main issues need to be addressed, as follows:	Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.	As mentioned in section 13. The price per cubic metre should be less for undrinkable water. Unless council funds filtering systems in our houses.					Only properties connected to council supplies are charged for water, Council has been progressively upgrading each water supply based on its level of non-compliance with the NZ Drinking Water Standards. Construction of a new water treatment plant for Omakau/Ophir is programmed to be constructed in the 2026/28 period. Filtering systems on each house will not work if the water is from a surface water source and gets high turbidity following high rainfall.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.		Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	If the proposed changes are made, talk around some locals is the place will start to look terrible in summer, with burnt off front lawns, especially the council owned berm that a large number of properties are currently watering.	Option A: Close and decommission the outdoor pool in Alexandra.			I'd like to know and understand why council aren't looking to support a dog park in Cromwell and work with those trying to move it forward, rather than constantly putting barriers in the way despite not being willing to fund any of it	Agreed that Council is a large water user and will be considering opptunities to manage its water demand more efficiently to reduce the costs to ratepayers.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	WE NEED TO MANAGE THE RISK FOR OUR FUTURE WATER.....ON ALL LEVELS. The increased fowling of water by ducks and humans on a local scale and on a DISASTER scenario the potential hideous pollution of the Clutha if the SANTANA MINING COMPANY gets a permit to mine in the Bendigo hills. This company have no experience and the siting of any toxic waste dam in our hills let alone located at the head of Shepherds Creek is a not acceptable ! Council needs to protect THE CLUTHA our biggest asset and respect the heritage of our region.	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.		Option B: Retain the outdoor pool in Alexandra.				Comments are not relevant to the consultation item
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	Ophir needs a secure water supply - not the temporary pipe across the bridge which often goers out of action	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.						Council has been progressively upgrading each water supply based on its level of non-compliance with the NZ Drinking Water Standards. Construction of a new water treatment plant for Omakau/Ophir is programmed to be constructed in the 2026/28 period
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	No	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	Why the enormous increase options ?					Reasons for changes proposed are outlined in consultation document
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	I do not believe we should be doing a deal with other councils without benefits being clearly outlined for Central Otago rate payers. It sounds like from discussions we are not represented well.	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.						Further information will be provided as part of SWDW consultation
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	This council is there to run the council and its entire business units ,not create significant costs by diverting responsibility and accountability of costs to a third party { so called shared joint business unit} with little visibility of the day to day operations. This Sounds so much like Wellington council Water board ,where costs subcontractors ripping of Rates payers and the Water Board .	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	I understand costs have increased but so has your revenue (ie Cromwell Area users) . As a larger water user during the summer months I feel my water bill is to high. Compared to Neighboring settlements like Wanaka and Queenstown.					The water is free, the costs to pump it, treat it, sotre it, and reticulate it to housholds is not free.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
			It is not logical to expect that there will be another 30% reduction in water usage if volumetric charges are raised, as users will already have made a substantial reduction since 2012 and there will be little further saving to be made. The two scenarios are completely different, and it is disingenuous of Council to "assume" that there will be a further 30% reduction in usage.					8% of the connections are using 43% of the water. In many cases this relates to the use of treated water for large scale irrigation. If these users were to reduce their consumption by 30% in some cases, and install bores in others then the average redeuction across all water used could be as much as 30%. Council only charges for the cost of delivering the service, and if it is found that income is higher in year 1 then a further reduction the fixed charge can occur in year 2.
			Based on figures in the LTP if Option A (the preferred option) is implemented water charges to the					Council will investigate if there are non-potable water supplies for other parks facilities in Clyde which could be ustilised for irrigating this facility, instead of using the treated town supply
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	I support a CCO if it is absolutely going to be more economical to run long term, as long as it is not weighted down by bureaucracy.	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	They system is fine as it is - why change it?					The system is not fine, if the status quo is retained then further capital work will need to be added to the program to upgrade the pipe network to meet demand. This will further increase the fixed cost.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	Yes, Sorting out the water in Omakau would be great, Even if its a subsidised rate for rate payers we would be happy to get filtration systems put into our homes to help take out the foul taste. We have a carbon small filter on our kitchen tap and can taste the difference between that and our bathroom, when the water is bad we can smell it in the shower and the bath. It would be great for something like this to happen then the ratepayer can keep up the maintenance of the water filters, as it is there own benefit to do so.	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.						Council has been progressively upgrading each water supply based on its level of non-compliance with the NZ Drinking Water Standards. Construction of a new water treatment plant for Omakau/Ophir is programmed to be constructed in the 2026/28 period
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	Don't have any faith in QLDC do however see benefit of joining with other councils if needed just not QLDC	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.						There is no proposal to join a CCO with QLDC

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship? Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	Regardless of which option is chosen I don't see any benefit for Ratepayers. If option A then there is the cost of setting up and funding a new entity which the Ratepayer (water) will pay plus the the interest on extra debt. You say this will allow CODC to spend more on other things because it's debt is not tied up in 3 Waters provision so now Ratepayers are paying down interest on 2 lots of debt. I can see why a new entity is preferable to CODC as it appears an exercise in making the books look better.	Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.	Are these charges to be transferred to the new CCO should that be established? If so will the chosen option be moot?					CCO comment noted, we anticipate that existing charging regimes would coninue under a CCO for a number of years.
		Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	I would like to see that water is an affordable option for all residents. A garden should not be a luxury but something that adds to the quality of life for all residents. It should not be only the relatively wealthy residents who can afford to have a garden. In our climate water is a vital requirement to sustain a garden. We should be able to grow our own vegetables and maintain an attractive environment around our homes and in our neighbourhood. The whole town benefits from attractive properties.					An average property with an average garden wit consumption of 325m3 or less per annum would likely be better off in the long term under hihger volumetric charges and lower fixed charges. Unfortunately the costs to deliver larger amounts of water around the networks will increase and those who use more are able to influence these cost increases occurring more than those who use lower amount of water.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship? Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	This Plan assumes continuing the same level of service. I see nothing in the Plan for an alternative for treated sewerage by final disposal into the Mata-Au / Kawarau/ Manuherekia/ ?? Disposal to land should be included in the Water Services Delivery Plan. I see nothing in the Plan about encouraging water conservation measures, Rainwater recovery or supply of untreated water to the community. There would be industry users that do not require treatment and landscape irrigation should be identified and separated in the Water Services Delivery Plan.		None of the above.					The reason for increasing volumetric charge is to encourage more efficient water use. Seperately providing reticulated, untreated water is cost prohibitive. More complex charing mechanisms can be considered in the future for high water users when real time metering is available in Central Otago. This will be considered for the next meter replacement program, in the next 5 years.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	I could support this provided that it results in a significant reduction in staff and expenses incurred by Council. The future total cost for running water services must result in savings in overall cost under a CCO or it is not worth pursuing.	Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.	This whole senario is a nonsense from a cost to ratepayer viewpoint. By far the biggest water user is the council and the cost of their water use will ultimately be charged to the ratepayer one way or the other. The only real gain will be if the higher unit cost makes for a reduction in actual water usage.					Higher volumetric costs will change the whole of life value of investing in alternative water supply for parks and reserves, and make these options more economically viable. Council will also be onsidering its options to reduce water consumption across its facilities to reduce impacts on ratepayers.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.		Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	It would be preferable not to have the yearly charge at all - its disgusting that the council should propose such pricing under the guise of giving us a choice.					The cost of delivering the service needs to be recovered through charges to users. If the volumetric charge is low, then the fixed charge needs to be high.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	Poolburn Dam	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	Should be allowed enough free stuff to keep you place or rental clean & green			I don't think Cromwell has the accommodation services to support the event locally		Charges are set to meet the costs of delivering this service. Accommodation outside of Cromwell would be required to cater for an event of this size.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.		Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	Which every option. Water colour, taste needs to be improved in Omakau. I would pay more if you were going to do something about it.					Council has been progressively upgrading each water supply based on its level of non-compliance with the NZ Drinking Water Standards. Construction of a new water treatment plant for Omakau/Ophir is programmed to be constructed in the 2026/28 period. A new treatment plant is proposed for Omakau to remove the flooding risk. We are waiting for the new wastewater standards to be finalised in November as they are likely to signficantly reduce the upgrade costs for Omakau wastewater
	The Central Otago Water Services to remain in-house. Our borrowing rating (280%) has risen sufficiently to incur the appropriate debt level that is sustainable. Currently there is very little actual and accurate detail in any proposal that involves other councils in the mix. Assumptions, of which the water services proposal is based on - are the mother of all mistakes. Southland is already experiencing grief with their joint council approach. Larger is not always better and often is a cumbersome beast that is unwieldly and more expensive. Optimum bulk purchasing rates can achieved via the water services contractor - not the CCO. Lack of accountability due to another level of governance is fool-hardy and hopeful. As said to Tamah at Omakau community meeting - 'you expect the public to make a submission on water services based on airy-fairy documents?' to which she agreed. This district need to look at dual water supplies as legislation demands high standards for potable water - NOT high water standards for irrigation and flushing toilets. The result of a dual water supply would be good 30-40% drop in high quality treatment facilities.							Installing seperate non-potable water infrastructure is cost prohibitive, and council will not have the debt headroom to install this. Developers do pay for infrastructure costs related to development

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
						Super Cars to be funded as our commercial tourism operators would be the major beneficiaries of the event... although it appears that CHCH will hold the event. Commercial tourism operators contribute to the Tourism Fund... therefore their share of the fund should be considered separate and available for similar events.		Noted. A Tourism differential is applied to rate calculations that results in commercial premises paying more towards activities to promote tourism in Central Otago. - NL
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.	Prefer to stay with water services under the same umbrella of council. A separate entity will duplicate costs in administration and governance. There is also no guarantee that the preferred council option of a multi0council organisation will be acceptable to all council. Because of this high level of uncertainty I would choose status quo	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	I believe the majority of users will be impacted negatively. If council preferred options was adopted at current usage. 67% of users would be worse off and 33% would either continue to pay the same rate or be marginally better off. a 30% anticipated saving would change the scenario slightly but this 30% saving is complete uncertainty.					If the status quo is retained then further capital work will need to be added to the program to upgrade the pipe network to meet demand. This will further increase the fixed cost.
						If it provides income for the Cromwell Community you should try to have the Supercars Championships at Highlands Motorsport Park. The council should decide to use tourism reserves or through a promotions rate. Can the owner of Highlands not afford it. I know he's given the community something amazing, already.		The event is predicted to have a positive economic impact on Cromwell an the wider district.
Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.			Don't charge for water AT ALL!					Charges are set to meet the costs of delivering this service.
							These events that become regular bring large amounts of money into the community as wings of Wanaka have shown. Another event in the future is the solar eclipse in July 2028 mat will generate many tourists	Thank you for raising awareness of the Solar Eclipse - this has been passed on to our Tourism team.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.	You need to prioritise decent drinking water. it is a basic human right. In Ophir it has been fraught with bad engineering decisions and shocking water for the 28 years I've lived here. Boil water notices after heavy rain and supply severely downgraded by the Regional Council allowing dairy farms on both sides of the river above the water intake years ago. Hit them up for funding! The water is very chemicalised (I prefer not to even shower/wash in it) with chorine, fluoride etc and most locals buy or obtain other drinking water. Charging for the connection when its a ghastly and undrinkable is questionable indeed. I see tho as the biggst issue living here but it seems for Omakau/Ophir residents we are a low priority back-water.		In a dry climate that experience droughts these are a rip off to the ratepayer. To keep your garden alive in dry periods and trees from dying you have to water. i collect and use a lot of rainwater when possible. Surrounding dairy farms water constantly!					Charges are set to meet the costs of delivering this service. Dairy farms do not use treated town water supplies.

Please choose your preferred option.	Would you like to comment on our plan for water?	Please choose your preferred option.	Would you like to comment on volumetric charges?	Which option do you prefer?	Would you like to provide comments on the Alexandra outdoor pool?	Would you like to provide comments on the Supercars Championship?	Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?	Staff Comments
	Submission to 2025 - 34 Long Term Plan		Submission to 2025 - 34 Long Term Plan					High water use is typically associated with irrigation. Council staff are happy to work with Old Cromwell to identify opprtunities for reducing thei rwater consumption.
Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.		Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.	keep charge at 60c per metre considering Clyde/Alexandra were promised when the dam was built would never have to pay for water.					The ECNZ contract with Clyde was that the there would be no electricity charge for pumping the water for Clyde township,. This does not cover the costs of pump infrastructure, treating, storing, and reticulating the water to the households.

Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?
Just listen to the residents concerns please
It’s well beyond time for councils to remember they are spending ratepayers money not CODCs money. We are wasting a fortune on nice to haves when people can’t afford rent or food. Get rid of the bike tracks, the tourist facilities maintenance and promotion, drop the recycling it’s a complete rip off. Back to basics, notify the public of the wage bill for CODC, reduce staff levels, reduce wages, CODC is becoming a rich persons club. Stop farming everything out to contractors who rip us off. The whole organisation needs to be ripped apart and started again.
Focus on water and sewage first. Don’t do a QLDC. Roth will always be with us. Nice to haves will follow after these two important parts are done and resourced first
Please retain the Clyde hall!! A lot of Clyde families really value the library, and have an amazing connection with our superstar librarian Shelly. It's a common meeting place after school and is well used and loved by many locals. We also would love to see if reopen on Tuesday mornings, as Playcentre children used to love going down there for story time, and now can't visit at all due to this closure.
There is a distinct lack of vision and action on sustainability and climate change, completely ignoring the well studied economic benefits from these issues. Instead you are proposing to fund supercars.
Keep the half, pools and support the community ideas. Without these we have no community and we need to think about future generations because when they are gone they are gone and you sure as hell won’t reopen them when closed. These are where our children learn to dance, play sports, read, swim etc
I honestly can’t believe this is even a discussion. The community half, pools, library’s etc are exactly what I want my rates going to.
SAVE THE ALEXANDRA OUTDOOR POOL!
We need to budget for shade sails over all council playgrounds
We need to cover our base needs. Other things are a luxury. People cannot afford such things
Alexandra has great facilities that why I live here. Molyneux park is so will looked after as it pools
Our hall needs to stay for our community as we have no where else
Summary comment is for council to focus on water issues, specifically wastewater for Vincent area as development and inclusion of Clyde will require redevelopment and expansion of this service. Would prefer a cost effective system that avoided or minimised discharge into rivers but not a super costly super land discharge. Current Government legislation seems to suggest there are compromise options.
Wastewater is a issue for every settlement with the rapid development and population growth.

At the same time as this primary focus, I would like to see us retain our community resources as much as possible, sports grounds, cultural centres, libraries, museums and recreational resources. These are vital for a healthy growing community.
More mobility and scooter parks in township/Pioneer Park/Statdium
Playground Pioneer Park
Footpaths more suitable for disabled - some are very poor
Would say I sometimes wonder why we have so many departments in the CODC trying to cover too many items or things in Central. They all do a fabulous job but my thoughts are council are employed to bring us the basics services & planning for growth. Not sure we need all the other departments that are currently on offer.
Also CODC aren't real estate agents. It's very sad to see as a rate payer & an agent that works in town we aren't all given an opportunity to sell our own land as developer & council had their own agenda along time ago
On a positive note we are very lucky to live in Central & we have some fantastic staff working on behalf of us all. Thankyou
I am concerned that the risk to infrastructure from major climate events caused by climate change is understated. It is this risk that when manifested in terms of cost to the ratepayer, will demonstrate the conflict between the national economic growth agenda which has involved significant population growth which we have to provide for and a truly sustainable economy that provides a quality of life people come to Central for which the LTP is aiming for.
Just a hope that the council will begin to work for the community rather than to their personal benefits and protection of personal image.
It's pretty disappointing that The Arts, culture and identity didn't even get a mention
no
I would like a new auditorium built for Ranfurly at the current Maniototo Stadium site with green rooms and lockable storage facilities for (preferably low) rent by groups such as the Theatre Group. Ranfurly Town Hall should not be sold to someone who may turn it into more main street residential property (we have too much of that already) but knocked down and the section beautified in the meantime but kept for future retail/commercial land use if Ranfurly should grow in the future.
Council should NOT spend any rate payer money for motor "sport" events. Such "events" are not needed in Central Otago and there is no benefit for the whole community.
It is not clear what development contributions have been collected in the previous period and where these funds have then been spent. It would be great if some clarity could be provided on this point to the community. Particularly with the large increase in proposed charges in this area proposed, it would be great to get some understanding of where funds have been spent or where money is being collected for future spending.

I think this plan is okay for the conditions we find our community in, however believe there should be less emphasise on cutting and much more on investing in assets that reduce the reliance on rates as a percentage of councils income. National and global outlooks show an increasing pressure on finances. Council should be strategically investing to steer our community through and leave us better off, not selling to continue keeping rates artificially low.
I do support an increase in rates relief to people on the margins and am happy to pay a little extra to enable this.
I do not understand why the proposed rate increase for Pisa Moorings residential property is 14% when Cromwell is 9%, Alexandra is 8%, Clyde is 7%, Roxburgh is 10%. Why is Pisa Moorings so much higher?
Perhaps look at more user charges to compact some costs especially in regards to both pools, polls are a community hub and shutting them down will only create more disconnect, spend more money on bringing people together in forms of the pools or community centres rather than on one time events. Upgrade our water system in omakau so we are not living in a third world society with substandard water that stops numerous times throughout the day as well as tastes like it is directly from the river
I would like to see the annual $24,000 grant for Blossom Festival included in the long term plan. It doesn't make sense that this would sit in a contestable fund when the festival is such an integral part of the Alexandra DNA. This event contributes significantly financially to our local economy through so many different aspects. It encourages the circular economy of locals spending but also brings in many from outside the area that contribute greatly to a wide range of businesses. Finances from the festival are redistributed through so many local organisations like schools, child care centres, sports clubs, etc that often struggle for fundraising opportunities but jump at this opportunity to help make the festival great. The funding from CODC has helped keep the costs of the festival down for locals which has been very important through recessions and cost of living crisis. I personally believe that the festival also holds a certain amount of responsibility in helping with mental health wellbeing as after coming out of the harsh Central Otago winters I often hear how people have the event to look forward to as we celebrate the return to spring. To leave the Blossom Featival where it currently stands in contestable I believe would be a horrific mistake for all the above reasons along with so many more including the fact that even after all this it doesn't comply with the requirements of that funding.
I hope you fully support the alexandra blossom festival
An issue which is so important to me is the maintenance of the roadsides and empty land close to the Cromwell town centre.Alexandra looks amazing when arriving in the town. Cromwell only looks tidy by the Big Fruit. Arriving from Queenstown…scruffy wasteland to the right…land owners should not be able to leave their property in such a state. The land opposite Jackson's shop…corner of Shortcut Rd and main road…a total disgrace. The roadside by the Wooing Tree estate between Jackson's shop and roundabout…is not maintained. I would like answers and see progress in this area as it reflects on the town. Cromwell looks like the poor cousin to the other neighbouring towns. Simple by laws controlling empty land maintenance and suitable fines might help. I want people to love visiting Cromwell and appreciate the beauty of the hills surrounding it, plus the lake and lakesides (another issue!). I love living here but would love it more if it looked good!

I'd like to know and understand why council aren't looking to support a dog park in Cromwell and work with those trying to move it forward, rather than constantly putting barriers in the way despite not being willing to fund any of it
KACB would like CODC's continued support for our local projects: Lookout Reserve and Shaky Reserve. We are talking to Contact Energy about extending these plantings down to
We continue to protect plants against rabbits. More eradication efforts would be appreciated
We are continuing to supply hanging baskets on Centennial Ave. We would like to charge the direct cost back to CODC as we have in the past
We are also keen to keep up with the Riverside Kaimoanahaehae project.
For the Alexandra signs: planting has not done well with bunnies and dry conditions. Tiered layers of schist rocks might make more of a welcoming statement. We could come up with a design
The Council should be more focused on roads. For instance Sandflat Road is a significant through road that requires tar seal.
Cycle tracks are now a major part of sporting activities around Central Otago. The Council should be contributing to their extension and maintenance
I'm not seeing any support for the arts in the long term plan?
It is disappointing to see such a small focus from our council in support of the arts/music and youth development. Our youth trust gets incredible support through many donors but the council do not offer much support at all.
A focus on Key Infrastructure is essential.
Minimal input to cultural funding.
NO non elected members of council voting on council
Our rohe is experiencing many people exploring different areas. While I think the CODC provides good toilet facilities in the towns, I do ask why the toilet at the Fraser Reserve is closed. Will their be a toilet at the Lower Manorburn Reserve? The alternative is faeces and paper everywhere
Submission on behalf of the Cromwell Museum Trust
We wish to support the Council's proposal to fund the Museum in the new Cromwell Memorial Hall
The Trust also wishes to acknowledge the financial support provided by both the Council and the Cromwell Community Board over recent years and looks forward to a continuation of this funding. The Trust will be pleased to work with Council on initiatives to further enhance the role that the new Museum can play within the community.
Every town needs a town hall.
This was so hard to find and get into to put a submission in, it was appalling!!! I can’t imagine you will get many
Very disappointing

I would like the FENTON LIBRARY and the RANFURLY TOWN HALL and PATEAROA TOWN HALL maintained and kept within the community. These are very special significant buildings to our area that have a lot of history. We are a small town and we rely on these buildings. Yes some are made from Mud Brick, but most houses in the area and region are made from part of this mud brick, with people living in them perfectly fine. So to not let people use these buildings and to take them away from us is terrible.
Look after the locals.
X the roads
important keep traffic & goods a smooth path. To Central Otago & tourists exciting to hear the Thompson George might be a new highway.
We needs a new surge system in Omakau. It's not good enough that every flood overflows through the current ponds & washes human waste into the river. Worse the dairy cows!! If it was a dairy for me you would have taken them to court!!! Every time it happens there are promises of fixing the problem. If it had been done 5 years ago it would have cost less. The longer you put it off the more expensive it will continue to get. Knowingly allowing this environment threat to local waterway is totally unexpectable & next time it happens , and it will bue to you dragging your feet, court action must follow. Also our water may not contain bugs but the the taste , odour and colour are not up to standard often. Boiled water notices are common and have, in the past, been in place for months. Taumata Arounui "Drinking water aesthetic values" states "Water is considered acceptable when its aesthetic properties are not objectionable to the majority of its consumers." There are lots of people in Omakau who have spoken out about our water. Also in this act: "water suppliers have a legal duty (section 24, water services act 2021) to take all reasonably practicable steps to ensure that they provide their consumers with aesthetically acceptable water" We do no get aesthetically acceptable water. Also making us boil off water for long periods of time does not meet your legal requirements under the act. Stop treating us like a 3rd world town.
Much has been made of the recent rapid and prolonged population growth which has increasingly placed further demand on our infrastructure. This is hardly unexpected due to numerous predictive reports and consent figures etc. So why are the ratepayers continuing to fund this growth? Where is the sustainable development funding going? Who is paying for the water lines out of Alexandra into the rural areas? Is the current model adequate for the current position and going forward? Develpment funds should anticipate the growth and staff should plan accordingly.
Propose a wastepaper/cardboard facility in Alexandra. Inexpensive to operate and turns mulched paper/cardboard into blocks suitable for domestic wood burning heaters.
Much appreciated. Would be available if time prevails to speak to this submission.
STOP
Making rates higher! Take pay cuts for current council office & management employees!
We must preserve existing historic buildings i.e. the Ophir Peace Hall. These building are irreplicable
1) status quo for the Ophir hall - CODC should support this as minimal cost

2) Build the hub provided no cost blow outs
3) Provide good drinking water and do more to protect our rivers and streams from pollution - the Manuherekia river is a disgrace
If you run a focus group for discussions regarding the council functions of community facilities, I would like to take part as I consider that I have lots of ideas and can see different aspects of many situations
Due to the timing of public holidays and the grape harvest being in full swing, I was unable to submit my feedback on the Long Term Plan within the formal consultation period. I would like to kindly request that my submission be considered as a late submission.
Having reviewed the previous Long Term Plan, it appears that funding was allocated under “Tracks and Waterways” towards the operation and maintenance of facilities (including tracks) associated with Lake Dunstan, among other areas. It is difficult to determine from the current consultation documents whether similar allocations will continue under the new plan. I would like to ensure that such funding remains available—potentially under the proposed Community Facilities Charge.
In particular, there are members of the Lowburn community who are willing to contribute both financially and physically to the development of improved tracks around the Lowburn inlet, including connecting these to the existing cycleway from Pisa Moorings to Cromwell. I am requesting that Council consider making funds available to explore co-funding options for this initiative, and to support the ongoing maintenance of any resulting tracks.
There is significant grassroots momentum around improving access and trail infrastructure in the area, and I believe this represents an important opportunity to support community wellbeing and active recreation.
Long Term Plan needs to be about what sort of legacy you are leaving for future generations. Not divesting all historic & heritage building that are an important part of Central Otago's history and beauty and admired by visitors to the region. These iconic buildings sit proudly in the landscape and its short sighted to only view them in terms of dollars generated. More funding put into reserves with planting & beautification would be a good priority - along tracks, waterway (it is rather rough around Alexandra & outer areas in Vincent.)
Give all halls & facilities to the community they are in.
We are two young men who live in Alexandra and who both live with physical disabilities. One of us uses a walker to get around and the other uses a wheelchair. We love our town, and we want to be part of everything it has to offer, just like everyone else.
But getting around safely and independently in Alexandra is not easy. The footpaths are often uneven, cracked, or too narrow. Sometimes the gradient is too steep or there are no proper drop-down kerbs, which makes it really dangerous for a wheelchair. In some places, we have no choice but to go onto the road, which is not safe at all. It's especially scary when there's traffic or when cars are parked over the footpath.
When we want to go to the shops, meet friends, or just be part of our community, we have to plan around the state of the footpaths. Something that should take a few minutes can turn into a long and stressful trip. We both want to be as independent as possible, but its hard when the physical environment puts barriers in our way.

We know the council is trying to make Alexandra a better place for everyone. We just want to remind you that people with disabilities are part of 'everyone'. Better, safer, and more accessible footpaths would make a massive difference in our lives, not just for us, but for others too such as people using mobility aids, older people, parents with prams.
We respectfully ask that improving and maintaining accessible footpaths be prioritised in the Long Term Plan. Small changes like smoother surfaces, more ramps, and safer crossings could open up a world of freedom for people like us. Lets make Alexandra can be a place where everyone, no matter their ability, can move around safely and with dignity.
Council's facility Strategy: we strongly recommend that CODC develops a comprehensive facilities strategy to ensure a more coordinated, efficient, and future-focused approach to the management, use and investment in council-owned buildings and spaces.
Council's facility Strategy: we strongly recommend that CODC develops a comprehensive facilities strategy to ensure a more coordinated, efficient, and future-focused approach to the management, use and investment in council-owned buildings and spaces.

Council's facility Strategy: we strongly recommend that CODC develops a comprehensive facilities strategy to ensure a more coordinated, efficient, and future-focused approach to the management, use and investment in council-owned buildings and spaces.
It is time for the Council to get back to Essential Services. Review staffing. Remember there are Ratepayers who have no disposable income to cover increasing costs, Council need to prioritise on the basic function of the Counci.
Clyde hall in ned of exterior paint.

Q1. **I'm registered for Let's Talk**	No. Please complete the demographic questions below.
Q2. **First name**	Raymond
Q3. **Last name**	Checketts
Q4. **Email address**	[redacted]
Q5. **What is your connection to the Central Otago District?**	I live in the district
Q6. **Where do you live?**	Cromwell Ward
Q7. **What year were you born?**	[redacted]
Q8. **What gender do you identify with most?**	[redacted]
Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	no
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.
Q13. **Would you like to comment on our plan for water?**	not answered
Q14. **Please choose your preferred option.**	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.
Q15. **Would you like to comment on volumetric charges?**	not answered
Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.

Q17. **Which hall/facility would you like to comment?**

Ophir Hall
Poolburn Hall
Clyde Railway Station Building
Former Clyde Museum Stables & Goods Shed
Ranfurly Hall
Naseby Hall
Patearoa Hall
Waipiata Hall
Wedderburn Hall
Naseby General Store
Millers Flat Hall
Millers Flat Bowling Club
Roxburgh Squash Court Building

Q18. **Would you like to comment on the Ophir Hall?**

Depending on the amount of EQP required and usage the building should be considered surplace

Q19. **Would you like to comment on the Poolburn Hall?**

Depending on the amount of EQP required and usage the building should be considered surplace

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q21. **Would you like to comment on the Clyde Railway Station Building?**

Depending on the amount of EQP required and usage the building should be considered surplace

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

Depending on the amount of EQP required and usage the building should be considered surplace

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

Q24. **Would you like to comment on Clyde Hall?**

not answered

Q25. **Would you like to comment on Becks Hall?**

not answered

Q26. **Would you like to comment on Vallance Cottage?**

not answered

Q27. **Would you like to comment on the Riding for the Disabled?**

not answered

Q28. **Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?**

not answered

Q29. **Would you like to comment on the Ranfurly Hall?**

Should be retained if other facilities are unsuitable

Q30. **Would you like to comment on the Naseby Hall?**

Should be retained if feasible

Q31. **Would you like to comment on the Patearoa Hall?**

Depending on the amount of EQP required and usage the building should be considered surplice

Q32. **Would you like to comment on the Waipiata Hall?**

Depending on the amount of EQP required and usage the building should be considered surplice

Q33. **Would you like to comment on the Wedderburn Hall?**

Depending on the amount of EQP required and usage the building should be considered surplice

Q34. **Would you like to comment on the Millers Flat Hall?**

Disposable

Q35. **Would you like to comment on the Millers Flat Bowling Club?**

Unused should be disposed of

Q36. **Would you like to comment on the Roxburgh Squash Court Building?**

Unused should be disposed of

Q37. **Would you like to comment on the Fenton Library?**

not answered

Q38. **Would you like to comment on the Naseby General Store?**

Access how much work would be required to up grade

Q39. **Would you like to comment on another hall or facility?**

not answered

Q40. **Would you like to comment on the Centennial Milk Bar?**

not answered

Q41. **Would you like to comment on the Ranfurly Service Centre?**

not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43.	**Would you like to upload any supporting documents about halls and facilities?**	not answered
Q44.	**Which option do you prefer?**	Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

May assist with some of the running costs

Q46.	**Which option do you prefer?**	Option A: Close and decommission the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

not answered

Q48.	**Which option do you prefer?**	not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50.	**Which option do you prefer?**	not answered

Q51. **Would you like to provide comments on the Supercars Championship?**

The event would be very good for the whole Central Otago area also the Southern Lakes. The event should be able to support itself. The grant should perhaps be a "one off" grant

Q52.	**Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54.	**Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	Cromwell Bulletin

Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

not answered

Q14. **Please choose your preferred option.**	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

Q15. **Would you like to comment on volumetric charges?**

Having a lower per unit charge will "reward" the lower water user, vs a high water user. This is turn will reduce water use if people pay higher rates and in turn hopefully conserve water over time

Q16. **Please select your preferred option.**	Option A: Divest all of the community halls listed (highlighted in green above).
Q17. **Which hall/facility would you like to comment?**	not answered

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

not answered

Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17. **Which hall/facility would you like to comment?**	Ophir Hall

Q18. **Would you like to comment on the Ophir Hall?**

I disagree with the divestment option for the Ophir Hall. It is a huge asset to the town of Ophir and surrounds. It is used continuously for movie nights, Bands and Gigs, meetings, get togethers' and weddings. It also houses the Generator and emergency kits for any disaster, and people know that they can meet at the Hall if needed. The Hall is an extremely important part of Ophir and has been since it was opened in 1926. It would be a shame to lose this asset. I hope there can be a compromise agreed upon that the town and council find acceptable. Keeping the Status Quo would in my opinion be the best outcome.

Q19. **Would you like to comment on the Poolburn Hall?**

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Ranfurly is an isolated area. Sport is incredibly important to the wellbeing of young people in the area, There are not other options for social connection. The turf at MAS is unsafe and almost unusable. This turf redevelopment is needed urgently. It would be a hub for sport in the community.

Q54. **Which option do you prefer?**	not answered

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Q43. Would you like to upload any supporting documents about halls and facilities?	not answered
Q44. Which option do you prefer?	Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer?	Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

not answered

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

If you give them $250 000 please give the same for the Maniototo courts and turf

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Why is this rate funded when highland parks get $250k from tourism. Surely there is a sports fund or equivalent we can use to support this upgrade. The whole area of Central Otago would benefit and use these facilities as games would be all played here.

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

not answered

Q46. **Which option do you prefer?** Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

In the first instance if you had enough staff at the pool you might actually be able to have it open. This summer it has been a joke. Every time we went staff said pool closed due to staff shortage. So of course it was hardly used as staff always refused to allow people to use it. To close it is so short sighted. You have only just started warming it up outside and now you want to close. It would be such a loss to our community

Q48. **Which option do you prefer?** Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?** Option C: Do not support

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

What is happening to it currently

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

Pool shouldn't have been built if no money available to maintain it - not Alexandra's problem

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

Over this summer season the rivers had toxic algae or were not safe for swimming. I believe the Alex outdoor pool was used every day and people didn't want to use the inside pool in the hot summer with the smell of chlorine

Q48. **Which option do you prefer?**	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

My main concern is the annual increase in rates - people on benefits, young people with a mortgage and pensioners just can't afford it. They are on a fixed income and there is just no more $$ coming in. Residents - especially the vulnerable, on benefits or a pension should not be forced to move out of Central because they can longer afford to stay in their home. cODC need to make their own cuts - need to have v nice to have. Is the current fleet of CODC vehicles really necessary. Can vehicles not be shared with the ORC who have a sizeable fleet in their carpark.

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

Just listen to the residents concerns please

Q58. **Would you like to upload any supporting documents?**	not answered

Q1.	**I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2.	**First name**	not answered
Q3.	**Last name**	not answered
Q4.	**Email address**	not answered
Q5.	**What is your connection to the Central Otago District?**	not answered
Q6.	**Where do you live?**	not answered
Q7.	**What year were you born?**	not answered
Q8.	**What gender do you identify with most?**	not answered
Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

Important that more unnecessary bureaucracy and public service cost is not created via another council entity that is not needed frankly. We need less regional council costs and lower rate increases not more

Q14.	**Please choose your preferred option.**	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16.	**Please select your preferred option.**	Option A: Divest all of the community halls listed (highlighted in green above).
Q17.	**Which hall/facility would you like to comment?**	not answered

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

not answered

Q20. Would you like to comment on the Clyde Police Lockup?

not answered

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities?	not answered
Q44. Which option do you prefer?	Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer?	Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

not answered

Q48. Which option do you prefer?	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

Given council COL increases in rates (many in double digits overall) & over recent years, I am strongly against the council proposing more rate payers money is spent beyond the council's core remit of water, pipes and roads/footpaths. To me this is a commercial issue that needs to be addressed via commercial sponsorship fundraising, not hard earnt rate payers coin during a cost of living crisis in NZ.

Q52. **Which option do you prefer?**	Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	not answered

Q13. **Would you like to comment on our plan for water?**

3 waters should have been totally given over to central government control when the chance existed, now these fantastic assets that everybody was so crazy about are going to break us !

Q14.	**Please choose your preferred option.**	not answered

Q15. **Would you like to comment on volumetric charges?**

I think we should retain the status quo for per cubic metre but reduce or remove the fixed charge. It's unfair to get it both ways. Get rid of the stupid expenses on tourism, bike tracks, dress collections and the like and stop paying for them with our water bill.

Q16.	**Please select your preferred option.**	Option A: Divest all of the community halls listed (highlighted in green above).
Q17.	**Which hall/facility would you like to comment?**	not answered

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

not answered

Q20. Would you like to comment on the Clyde Police Lockup?

not answered

not answered

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

Roxburgh wanted a flash pool and they've got it, now they can live with it, Im not driving tyere to use it qnd never will so I don't have any desire to pay for it.

Q46. Which option do you prefer? Option A: Close and decommission the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

If it can't be self funding get rid of it. If people want it then let them pay for its maintenance and operating costs. User pays.

Q48.	**Which option do you prefer?**	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

Look at all the community centers that you're getting rid of now, last thing we need is more of them, particularly in areas that are as sparsely populated as the manuherekia valley

Q50.	**Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

This is almost as dumb as a dress collection ! I love motor racing BUT I have zero desire to pay for it from my rates. It ranks up there with bike tracks and tourists and they can all pay for themselves. Only way we should give them money should be if they give us a return on it. The fact it brings more tourists into the area simply increases costs for ratepayers !

Q52.	**Which option do you prefer?**	Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Seriously ! Retired people are struggling to put food on the table, let the kids get dirt on their knees !

Q54.	**Which option do you prefer?**	Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Seriously again as for the previous answer

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

It's well beyond time for councils to remember they are spending ratepayers money not CODCs money. We are wasting a fortune on nice to haves when people can't afford rent or food. Get rid of the bike tracks, the tourist facilities maintenance and promotion, drop the recycling it's a complete rip off. Back to basics, notify the public of the wage bill for CODC, reduce staff levels, reduce wages, CODC is becoming a rich persons club. Stop farming everything out to contractors who rip us off. The whole organisation needs to be ripped apart and started again.

not answered

Q24. Would you like to comment on Clyde Hall?

not answered

Q25. Would you like to comment on Becks Hall?

not answered

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

The community need a place to go to in the case of a Civil Defence emergency. There are also no other buildings equivalent, as the council do not allow use of the stadium as a community building

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

A very well utilised store that would be purchased privately if the council decides to sell it. Think it is a good idea if it is sold

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	not answered

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Maniototo Area School punches well above their weight in the hockey / netball representatives. There are no current netball courts in Ranfurly. The hockey turf is below average, and the school will ensure this is well maintained and cared for. This would be a great asset for the community as well as the school

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q17. **Which hall/facility would you like to comment?**	Poolburn Hall

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

I operate the Poolburn Hub, formerly the Poolburn Hotel. We run a small cafe and provide a place for locals to meet such as the Poolburn Curling Team. From my perspective, as someone new to the community, it is clear that the Poolburn/Moa Creek Hall is used on a weekly basis by the community, in particular it is an integral part of the Poolburn school. The Poolburn/Moa Creek Hall should continue to be maintained by the council.

Q20. Would you like to comment on the Clyde Police Lockup?

not answered

Q24. Would you like to comment on Clyde Hall?

not answered

Q25. Would you like to comment on Becks Hall?

not answered

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option A: Close and decommission the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

not answered

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

Maybe a negotiating part is add $2.50 to each day ticket - "Local Council Fee"

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Only if school role is increasing

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Having enough sports fields in central is topical with recent media reports around Cromwell and the racetrack and potential overflow for QTWN residents. A joint council sit down and work thru fields and facilities across both councils is required as not every town can have every facility at present time....

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

Focus on water and sewage first. Don't do a QLDC. Roth will always be with us. Nice to haves will follow after these two important parts are done and resourced first

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	**Other (please specify)** ODT

not answered

Q41. **Would you like to comment on the Ranfurly Service Centre?**

not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** — not answered

Q44. **Which option do you prefer?** — Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

Compliance and maintenance costs are too much for a small community trust to maintain and would eventually need more funding from Council in order to operate. Council has more resources in terms of lifeguards which can be moved around the other pools in the district.

Q46. **Which option do you prefer?** — Option A: Close and decommission the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

not answered

Q48.	**Which option do you prefer?**	Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50.	**Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52.	**Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54.	**Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

We use the outdoor pool regularly and feel that it is an important addition to Alex pool, which we love. Also, there have been ice swimming competitions and is a great area to chill in summer.

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

We are facing a climate crisis and I would think committing money to support combustion engine races does not make sense. People running these races are relatively wealthy, so please let them fund this privately or use the admissions fees to cover the race. Similar to America's Cup sailing. I would like to see the money used better to support our environment and to mitigate the climate change effects.

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Yes for children's sports!

Q54. **Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Yes for children's sports! I live in Clyde, and my children will go to Dunstan HS in the future, so would prefer this to go ahead. However, Maniototo matters and in addition to Cromwell's turf, would give good coverage for sports in our area.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q2. **First name**	not answered
Q3. **Last name**	not answered
Q4. **Email address**	not answered
Q5. **What is your connection to the Central Otago District?**	I live in the district
Q6. **Where do you live?**	Cromwell Ward
Q7. **What year were you born?**	[redacted]
Q8. **What gender do you identify with most?**	[redacted]
Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	yes
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	[redacted]
Q12. **Please choose your preferred option.**	not answered

Q13. **Would you like to comment on our plan for water?**

Yes

Q14. **Please choose your preferred option.**	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

Q15. **Would you like to comment on volumetric charges?**

It appears that there are 8% of ratepayers who have large back or front yards- who use a lot of water. Please consider ratepayers who have orchard and garden in their yards. Home produce helps defray budget costs and provides useful recreation. Central Otago generally does not provide enough natural precipitation to main crops. Increased charges for water , for some ratepayers may make such traditional activities unviable.

Q16. **Please select your preferred option.**	Option B: Maintain the current level of support that Council provides for all of the halls and facilities listed above.

Q17. **Which hall/facility would you like to comment?** not answered

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

a good deal.

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

I made a submission to the 10 year plan about the significance of straw polls in assessing levels of community support. Note with interest that a straw poll was used to ascertain levels of support this year, for a project in Cromwell. This project was the re-establishment of the Chinese riverside slum. As with national political polls, straw polls are indicative of publish support. However the ultimate poll is th election result itself. Polls do not give the public the opportunity to discuss and debate proposals, and gain the best information available. They do not enable the public to shift sentiment. To listen to what others have to say.

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	Social media

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? not answered

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

It could be further enhanced to improve its use e.g. children's play equipment and regular events to utilise it better. It's a great asset and with the continuing decline of lake and river quality (and concerns about sewerage discharge from large towns upstream of Clyde) it will become more important im the future. The region continues to grow and it's hard to get access to beaches to swim over the busy holiday periods so this pool provides another option to allow everyone to swim during the hot summer months.

Q48. **Which option do you prefer?**	not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

We need a facility to play hockey in Alexandra now that they tennis court turf has been removed!

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

Please retain the Clyde hall!! A lot of Clyde families really value the library, and have an amazing connection with our superstar librarian Shelly. It's a common meeting place after school and is well used and loved by many locals. We also would love to see if reopen on Tuesday mornings, as Playcentre children used to love going down there for story time, and now can't visit at all due to this closure.

Q58. **Would you like to upload any supporting documents?**	not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. **Would you like to comment on the Wedderburn Hall?**

not answered

Q34. **Would you like to comment on the Millers Flat Hall?**

Millers Flat Hall is a well used community space the likes of which is not available elsewhere in the area except if people are able to travel 34km round trip to Roxburgh. Investment in this facility is dire to enable the community to have a local meeting place, social venue, funeral venue, ad-hoc events, support for local clubs and sports events and the commercial kitchen to enable various charities, clubs or the school to partake in fundraising that may require this. The local school use this facility for end of year productions and have done for many many years. It would be a significant loss to the area for this hall not to be maintained.

Q35. **Would you like to comment on the Millers Flat Bowling Club?**

not answered

Q36. **Would you like to comment on the Roxburgh Squash Court Building?**

not answered

Q37. **Would you like to comment on the Fenton Library?**

not answered

Q46. **Which option do you prefer?** Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

The Alexandra outdoor pool is a unique facility. It supports young people gain confidence in swimming which will save lives. Too many NZ children drown, this pool will help to ensure our Otago children are confident swimmers in an outdoor environment. The Alexandra outdoor pool also provides a safe facility for ice-swimming events. If Alexandra can make this an annual event it will attract ice-swimmers from all over NZ and indeed the world, bringing economic benefits to the town.

Q48. **Which option do you prefer?** not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

Motorsport people are wealthy enough not to need this grant. The event does not fit well with a world where climate change mitigations are badly needed.

Q52. **Which option do you prefer?**	Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Artificial turf is a blight on the environment and increases plastic loading and microplastics in the environment.

Q54. **Which option do you prefer?**	Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Artificial turf is a blight on the environment and increases plastic loading and microplastics in the environment.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

The outdoor pool would get more use if it was open regularly. Last season it was closed a lot due to staff shortages. This season its opening hours were significantly reduced once staff left to return to university. The costs for heating it this season must be a lot lower as the heating was turned off in January. I don't think it would have cost $250,000 to run it this season!!

Q48. Which option do you prefer? not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?** Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

Why is this a consideration? Highlands is a commercial business run by a multi millionaire. Spectators and racers will be paying to be part of the championship! Will any of the profit be put back into the whole community not just Cromwell.

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

Yes, please consider allowing more time before deciding to divest the Patearoa hall. The community have lost the use of the school buildings and the hotel is no longer open. A recent community survey indicated an overwhelming desire to have a community hub for meetings and socializing. Until the community can investigate our needs, research funding options and decide what we will do, I consider it important during the investigation period to retain the availability of the Patearoa hall.

Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	no
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.

Q13. **Would you like to comment on our plan for water?**

not answered

Q14. **Please choose your preferred option.**	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.

Q17. **Which hall/facility would you like to comment?**

Clyde Police Lockup
Former Clyde Museum Stables & Goods Shed
Riding for the Disabled
Ranfurly Hall
Naseby Hall
Wedderburn Hall
Millers Flat Bowling Club
Roxburgh Squash Court Building

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

not answered

Q20. **Would you like to comment on the Clyde Police Lockup?**

Divest.

Q21. **Would you like to comment on the Clyde Railway Station Building?**

not answered

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

Divest

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

Q24. **Would you like to comment on Clyde Hall?**

not answered

Q25. **Would you like to comment on Becks Hall?**

not answered

Q26. **Would you like to comment on Vallance Cottage?**

not answered

Q27. **Would you like to comment on the Riding for the Disabled?**

Divest.

Q28. **Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?**

not answered

Q29. **Would you like to comment on the Ranfurly Hall?**

Divest.

Q30. Would you like to comment on the Naseby Hall?

Divest.

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

Divest.

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

Divest.

Q36. Would you like to comment on the Roxburgh Squash Court Building?

Divest.

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities?	not answered
Q44. Which option do you prefer?	Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?**	Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

I take a deifferent view. Diversify the offering - It needs expanded to include a water park for young families. Similar to what Oamaru council has created for their community.

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

I don't agree. This is a one off event. Council needs to focus on looking after the basics, well!!

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Manlototo Area School?**

This is a community facility, and the majority of us know someone playing or involved with hockey. This is a must.

Q54. **Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Get it done!!! How long has the community been waiting for a facility like this? Too long!!!

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered

Q1.	**I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2.	**First name**	not answered
Q3.	**Last name**	not answered
Q4.	**Email address**	not answered
Q5.	**What is your connection to the Central Otago District?**	not answered
Q6.	**Where do you live?**	not answered
Q7.	**What year were you born?**	not answered
Q8.	**What gender do you identify with most?**	not answered
Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.

Q13. **Would you like to comment on our plan for water?**

Support any changes which will more efficiently and effectively manage water provision and maintenance. Moving to a new entity must provide financial savings in the short and long term and will require excellent governance/oversight and clear accountability. It will be a challenging process! Ensure that local knowledge of managing water systems is not lost in any transition.

Q14.	**Please choose your preferred option.**	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.

Q15. **Would you like to comment on volumetric charges?**

A gradual increase would be more manageable for ratepayers as many may not fully realise how expensive their current water usage would be. Particularly older gardeners who use a lot of water!

Q16. **Please select your preferred option.**	Option A: Divest all of the community halls listed (highlighted in green above).
Q17. **Which hall/facility would you like to comment?**	not answered

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

not answered

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q21. **Would you like to comment on the Clyde Railway Station Building?**

not answered

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

not answered

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

not answered

Q27. **Would you like to comment on the Riding for the Disabled?**

not answered

Q28. **Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?**

not answered

Q29. **Would you like to comment on the Ranfurly Hall?**

not answered

Q30. **Would you like to comment on the Naseby Hall?**

not answered

Q31. **Would you like to comment on the Patearoa Hall?**

not answered

Q32. **Would you like to comment on the Waipiata Hall?**

not answered

Q33. **Would you like to comment on the Wedderburn Hall?**

not answered

Q34. **Would you like to comment on the Millers Flat Hall?**

not answered

Q35. **Would you like to comment on the Millers Flat Bowling Club?**

not answered

Q36. **Would you like to comment on the Roxburgh Squash Court Building?**

not answered

Q37. **Would you like to comment on the Fenton Library?**

not answered

Q38. **Would you like to comment on the Naseby General Store?**

not answered

Q39. **Would you like to comment on another hall or facility?**

not answered

Q40. **Would you like to comment on the Centennial Milk Bar?**

not answered

Q41. **Would you like to comment on the Ranfurly Service Centre?**

not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** not answered

Q44. **Which option do you prefer?** Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

The community has created a great asset and should retain control of it.

Q46. **Which option do you prefer?**	Option A: Close and decommission the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

The figures support this. It is not a very well designed space so there is little incentive to use the outdoor pool, especially as there is lake and river swimming accessible in the surrounding area.

Q48. **Which option do you prefer?**	Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

Private entity which should be self supporting. Strongly opposed the support of this using ratepayers funds.

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Manlototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities?	not answered
Q44. Which option do you prefer?	Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer?	Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

not answered

Q48. Which option do you prefer?	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

Community halls are not going with the times anymore and

Q50. **Which option do you prefer?** Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

Funding this would be incredibly out of touch in a time of climate emergencies. It would make a mockery of the already poor commitments the council has on climate change. Its insulting to even consider this and shows the lack of leadership and understanding and interest in global issues on climate by this council. There is a lot of actual good you could do with this money instead of throwing it into something that is actually harmful on so many levels.

Q52. **Which option do you prefer?** not answered

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?** not answered

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

There is a distinct lack of vision and action on sustainability and climate change, completely ignoring the well studied economic benefits from these issues. Instead you are proposing to fund supercars.

Q58. **Would you like to upload any supporting documents?** not answered

Q59. **How did you hear about this engagement opportunity? You may tick more than one.** not answered

Q38. **Would you like to comment on the Naseby General Store?**

not answered

Q39. **Would you like to comment on another hall or facility?**

not answered

Q40. **Would you like to comment on the Centennial Milk Bar?**

not answered

Q41. **Would you like to comment on the Ranfurly Service Centre?**

not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** — not answered

Q44. **Which option do you prefer?** — Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

It's on school property, so gather it's largely used by the school. A shared management would be better

Q46. **Which option do you prefer?** — Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

Make the outside area more appealing! Very little shade, is there a BBQ families can use like at the boat ramp? A few playground equipments. It's a very barren space

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

I support the ALEXANDRA turf over the Maniototo one if only ONE was to be granted money.

Q54. **Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

A much needed asset that has been a long time coming! A perfect solution situating it at DHS as it would get a huge amount of use for many sports, plus support the ever increasing number of field hockey players from Roxburgh, Ranfurly, Maniherikia and Alexandra areas.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

No

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

No

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	Email

Q1. **I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2. **First name**	Jenny
Q3. **Last name**	Grimmett
Q4. **Email address**	[redacted]
Q5. **What is your connection to the Central Otago District?**	I'm a Central Otago District ratepayer
Q6. **Where do you live?**	Maniototo Ward
Q7. **What year were you born?**	[redacted]
Q8. **What gender do you identify with most?**	[redacted]
Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	no
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.

Q13. **Would you like to comment on our plan for water?**

The opportunity to work with professionals and experienced individuals from other local authorities is helpful to keep CODC from working in a silo mentality, hopefully keeping knowledge fresh, and sharing roles rather than duplicating them and wasting time and money. There are only so many qualified people to go around so if the same people can be used to do the work for several councils, that would be useful, provided they are appropriately qualified and motivated to work for all of the communities they will be engaged by. Ideally the Council will make sure decision making is transparent so rate payers are made aware of what is happening, where their rates are being spent and, where appropriate, have an opportunity to comment on decisions on important issues affecting our community.

Q14. **Please choose your preferred option.**	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.

Q15. **Would you like to comment on volumetric charges?**

No-one has a lot of spare cash these days, but water needs to be supplied in a potable quality and that costs money. Keeping the fixed charge lower, but increasing the rate per cubic metre may make it more affordable and encourage users to be careful with their usage.

Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17. **Which hall/facility would you like to comment?**	Ophir Hall Poolburn Hall Becks Hall Naseby General Store Centennial Milk Bar Ranfurly Service Centre

Q18. **Would you like to comment on the Ophir Hall?**

This building has been lovingly restored painted and has good kitchen and toilet facilities with lots of input from the local community and regular events scheduled (movies, concerts, and local fund raiser events). It contributes to the heritage character of the Ophir Village.

Q19. **Would you like to comment on the Poolburn Hall?**

This building is well supported and relied on by locals, including the school which uses the hall for school assemblies, and productions for the students and their families and friends. It has great facilities for catering and other activities, such as exercise classes. It would be missed if it were to go into private ownership unless it could be leased out at a reasonable Tate to the school, which does not have its own hall.

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q21. **Would you like to comment on the Clyde Railway Station Building?**

not answered

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

not answered

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

Q24. **Would you like to comment on Clyde Hall?**

not answered

Q25. **Would you like to comment on Becks Hall?**

This building has fantastic facilities for exercise classes, and events held by Beef and Lamb and other rural focussed organisations to explain rural issues to locals and people from further afield.

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

The store is a valuable resource for Naseby and people who travel to it as a destination for groceries and baked treats and ice creams. It keeps the village alive by having it at its heart.

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

The Art Deco history displayed in this building is iconic. It is well received by visitors to the area.

Q41. **Would you like to comment on the Ranfurly Service Centre?**

Now that the toilets have been relocated to the car park along the road, I don't visit it much. It is part of the heritage values of Ranfurly so would be good to be kept as part of that overall streetscape and used more efficiently.

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** not answered

Q44. **Which option do you prefer?** not answered

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

I don't know anything about the pool so have not answered the question.

Q46. **Which option do you prefer?** not answered

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

I don't use the pools at Alexandra as it is too far to travel.

Q48. **Which option do you prefer?** Option C: Provide additional funding of up to $1.6 million, rate funded in the 2025/26 financial year.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

Funding a modern facility will mean that some of the older facilities in the local area will have less use, and perhaps the Hub will be a replacement for these. The sooner it can be constructed, the less uncertainty there is for local communities.

Q50. **Which option do you prefer?** Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

Highlands offers a wide range of activities for locals and visitors to the area, which in turn has downstream effects on people coming to the area and spending locally.

Q52. **Which option do you prefer?** Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Sports is good for most people and encouraging more frequent exercise options on an all weather surface has to be a good thing for the health and wellbeing of students and their families.

Q54. **Which option do you prefer?** Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Sports is good for most people and encouraging more frequent exercise options on an all weather surface has to be a good thing for the health and wellbeing of students and their families.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

I have concerns about the inflexibility of the DFCP requiring roading levies to be paid on a change of use, that has no noticeable increased demand on roads and hence no need to money to be taken. There should at least be clauses to allow for waivers and discounts in all of these types of documents.

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered

not answered

Q23. Would you like to comment on Blyth Street Museum, Clyde?

not answered

Q24. Would you like to comment on Clyde Hall?

not answered

Q25. Would you like to comment on Becks Hall?

Becks Hall is one of the few community facilities we have in this area (if not the only). As a ratepayer, I pay $ 124,28 per annum for 'waste management', which will be $ 133.41 for 2025/2026. We do not have access to rubbish collection. Anything I like to dispose of at a transfer station, I have to pay for separately. I'm more than happy that this amount would go towards keeping the Hall for the community, as it is certainly not spent on waste managent in our area. Or $ 30.45 for Molyneux Park... why?

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

Q41. **Would you like to comment on the Ranfurly Service Centre?**

not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?**	not answered
Q44. **Which option do you prefer?**	Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?**	Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

Why on earth should you close it? Central Otago has the hottest summers, the only thing that could be developed there are more shaded areas and specifically shade over the baby pool. Tables and nice grass would make the outside more desirable to families.

Q48. **Which option do you prefer?**	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities?	not answered
Q44. Which option do you prefer?	Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer?	Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

As a rate paper and community member I have paid for the pool along with those before me and everyone else in the community. I don't believe you have the right to make this decision as it belongs to the people of Alex and surrounding areas. The out door pool is unique and an awesome place to go in the summer with my children. You want to give a profitable business (speedway) money yet want to close down something we the people paid for. Not ok!!!! I do not support the closing of this pool!!! Its very short sighted and we need to look after these amazing facilities for future generations

Q48. **Which option do you prefer?** not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?** Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

When you want to close down community facilities- pools halls etc. Then wanting to put this much money into a business that only benefits a select few people - once off is insane. Put that money into our hall, pools etc

Q52. **Which option do you prefer?** Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Manlototo Area School?**

Yes Again this would be awesome for the community

Q54. **Which option do you prefer?** Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

This would be amazing for our community. That money you want to give the speed way would pay for most of this a much better use of the money

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

Keep the half, pools and support the community ideas. Without these we have no community and we need to think about future generations because when they are gone they are gone and you sure as hell won't reopen them when closed. These are where our children learn to dance, play sports, read, swim etc I honestly can't believe this is even a discussion. The community half, pools, library's etc are exactly what I want my rates going to.

Q58. **Would you like to upload any supporting documents?** not answered

Q59.	**How did you hear about this engagement opportunity? You may tick more than one.**	**Other (please specify)** Alex swimming pool

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

Health and wellbeing, I go all the time in summer and enjoy when it's heated. It's a safe place for swimming and learning to swim in Alexandra. I really only enjoy being outside in the fresh air. It's a healthy hobby for my family. It is one of the only council facilities I use and it's a huge bonus to our region, it's a beautiful pool and I often brag about it to my family in other areas of the country who don't have an amazing community pool like Alexandra. I would be hugely disappointed if you got rid of it, it's needed for one of the hottest, driest and most inland places in New Zealand it was a lovely place to refresh and feel good in the heat.

Q48. Which option do you prefer? not answered

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? not answered

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

This has seen use for events recently which has provided much needed revenue into the area (Accommodation and eating out etc.). In addition this is a community resource which is unavailable at times due to staffing issues rather than lack of wanting to use. People have been denied access this year being told there is no lifeguard available to oversee swimmers.

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	not answered

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

This is long overdue. The number of players in the area has grown massively in the Alex, Clyde areas with no training or match facilities available. 30 high school or even up to 60 juniors on the Pioneer Park courts at a time is not sustainable and is dangerous. Especially as there are no flood lights to extend training times.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q1.	**I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2.	**First name**	not answered
Q3.	**Last name**	not answered
Q4.	**Email address**	not answered
Q5.	**What is your connection to the Central Otago District?**	not answered
Q6.	**Where do you live?**	not answered
Q7.	**What year were you born?**	not answered
Q8.	**What gender do you identify with most?**	not answered
Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

I'm not in favour of the council collaborating with neighbouring councils. We do not want to be burdened with extra costs of Queenstown Lakes water issues.

Q14.	**Please choose your preferred option.**	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

Q15. **Would you like to comment on volumetric charges?**

The increases in water charges seem very disproportionate to the reduction in fixed charges.

Q16.	**Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.

Q17. **Which hall/facility would you like to comment?**	Ophir Hall Poolburn Hall Clyde Police Lockup Clyde Railway Station Building Former Clyde Museum Stables & Goods Shed Blyth Street Museum, Clyde Clyde Hall Becks Hall Vallance Cottage Riding for the Disabled Former Clyde Briar & Herb factory, and cottage Ranfurly Hall Naseby Hall Patearoa Hall Waipiata Hall Wedderburn Hall Fenton Library Naseby General Store Centennial Milk Bar Ranfurly Service Centre Wallace Memorial Rooms Millers Flat Hall Millers Flat Bowling Club Roxburgh Squash Court Building

Q18. **Would you like to comment on the Ophir Hall?**

Ophir is a tiny community but close to Alex and Omakau. Decommission the hall there.

Q19. **Would you like to comment on the Poolburn Hall?**

Poolburn is a tiny community but close to Omakau and Alex. Decommission the hall there.

Q20. **Would you like to comment on the Clyde Police Lockup?**

Never heard of it. Decommission it.

Q21. **Would you like to comment on the Clyde Railway Station Building?**

Sell it to private biking companies if they want it. Not needed to be funded by ratepayers

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

If it's currently used as a museum keep it, depending on whether visitor numbers are increasing with the rail trail and dunstan trail use, otherwise close it down.

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

Perhaps museums in Clyde should be consolidated in one building to keep costs down.

Q24. **Would you like to comment on Clyde Hall?**

It's used for theatre productions and markets and has a library attached so keep it going if money permits.

Q25. **Would you like to comment on Becks Hall?**

Beck's Hall users could use the new multi hub facility in Omakau. Decommission this one.

Q26. **Would you like to comment on Vallance Cottage?**

Being an original mud brick home that housed a large family, it has historic significance for our wider community and should be kept as a museum and promoted more to the community. I know schools do use it.

Q27. **Would you like to comment on the Riding for the Disabled?**

An important facility for young disabled children. Worth retaining if they are not eligible for grants to help run it.

Q28. **Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?**

Not aware of it. No opinion.

Q29. **Would you like to comment on the Ranfurly Hall?**

Ranfurly, being so far away from Alexandra and Omakau, needs a community hall space. If there is no better alternative in Ranfurly (eg a modern school hall?) keep it.

Q30. **Would you like to comment on the Naseby Hall?**

Get rid of it. Naseby people can use one in Ranfurly.

Q31. **Would you like to comment on the Patearoa Hall?**

Again get rid of the smaller halls and use ones in bigger centres such as Ranfurly

Q32. **Would you like to comment on the Waipiata Hall?**

Get rid of it. Use one in Ranfurly.

Q33. **Would you like to comment on the Wedderburn Hall?**

Get rid of it. Use one in Ranfurly.

Q34. **Would you like to comment on the Millers Flat Hall?**

Get rid of it. Use one in Roxburgh.

Q35. **Would you like to comment on the Millers Flat Bowling Club?**

Important to keep people active so keep it if transport to Roxburgh is an issue for the older community.

Q36. **Would you like to comment on the Roxburgh Squash Court Building?**

It should be funded by users and small grant sought from the council.

Q37. **Would you like to comment on the Fenton Library?**

Never heard of it. Decommission if usage is low.

Q38. **Would you like to comment on the Naseby General Store?**

It's an iconic part of our history. But how many people visit it and do they just buy the odd icecream there. Maybe it should be kept as a museum manned by volunteers with little financial input from council apart from a small grant.

Q39. **Would you like to comment on another hall or facility?**

not answered

Q40. **Would you like to comment on the Centennial Milk Bar?**

A stunning art deco building. But should be in private hands.

Q41. **Would you like to comment on the Ranfurly Service Centre?**

Study the numbers and usage. Use it or lose it principle applies

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

No idea what they are.

Q43. **Would you like to upload any supporting documents about halls and facilities?** not answered

Q44. **Which option do you prefer?** not answered

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

Why was it built if the community could not sustain it. Should be more user pays and grants sought from Central lakes trust etc

Q46. **Which option do you prefer?** Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

Be honest in your reporting. Usage is declining because you don't have the staff to manage it. It's a vital part of the pool complex and the area should be enhanced with better outdoor seating and picnic tables and a water slide. Children love it in summer and parents do too as the indoor pool is stifling hot and has an awful chemical smell to the facility. We have world champion ice swimmers who use it. It's fun for dogs at the annual swim. When we lost the wonderful centennial outdoor pool, it was always envisaged that we would continue to have access to an outdoor pool. It does not match the other one but definitely needs to be kept. Could be used for water polo or canoe polo in summer and kayak rolling practice. Kids love it with the big floaties on it in summer. Nothing beats swimming in fresh air and it's safer than rivers. Keep it please!!

Q48. **Which option do you prefer?** Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

Needs to be one there when you're decommissioning all the smaller halls. Use savings from that.

Q50. **Which option do you prefer?** Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

Council should not be funding tourism. It should be privately funded by users and business owners. Use any tourism reserves to offset rates rises

Q52. **Which option do you prefer?** Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Ranfurly is not eligible for central lakes funding sadly so council needs to come to the party and provide support for a community used sporting hub that fosters sporting opportunities for kids and adults.

Q54. **Which option do you prefer?** Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

There is one at Cromwell that can be used and one at Pioneer Park being upgraded. No double ups needed.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?** not answered

Q59. **How did you hear about this engagement opportunity? You may tick more than one.** **Other (please specify)**

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?** Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

This complex is unique in the central area, a real point of difference. Alexandra for many years has had an outdoor pool, to de commission this now would be a real shame. If you were to try marketing\advertising this more in the summer months perhaps have themed days, pool parties etc, you may well find you have more patronage, as many visitors are probably unaware of it. Also with the rivers becoming increasingly unswimmable this is a real asset. I have paid rates here for over 25 years and this will be the first time I have put in a submission form.

Q48. **Which option do you prefer?** not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** not answered

Q44. **Which option do you prefer?** not answered

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?** Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

It's valuable for the community during summer. Children and families live it. Used for ice swimming every other winter which brings people to the area to spend money in hotels, restaurants and tourism. The ice swimming also gets Alexandra noticed on TV etc. so more people visit.

Q48. **Which option do you prefer?** not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

This hall is the heart of our community, as we don't have any other meeting place. The hall is our remembrance for men who served in the wars, a meeting place for playgroups, a sports ground, and a place of celebration for weddings, funerals and birthdays. The community has proven how important it is to us by the care and love we have shown the hall over the years, often over generations of families. Please consider our small community and how cherished this vital resource to us when making your decision.

Q2. **First name**	Steve
Q3. **Last name**	Goodlass
Q4. **Email address**	[redacted]
Q5. **What is your connection to the Central Otago District?**	I live in the district
Q6. **Where do you live?**	Vincent Ward (Alexandra and surrounds)
Q7. **What year were you born?**	[redacted]
Q8. **What gender do you identify with most?**	[redacted]
Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	no
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

A CCO is a for profit entity presumably

Q14. **Please choose your preferred option.**	Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.

Q17. **Which hall/facility would you like to comment?** Poolburn Hall
Clyde Railway Station Building
Clyde Hall

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

The Poolburn hall is an important hall for the people of the valley as we have no other large covered areas for the community to congregate. It is used extensively by the school as there is no hall or gymnasium at our school. It's also used for community get together, kids sport, play group, meetings etc. Should it be lost then there are no other alternative spaces. It also has great historical significance and houses our memorials to the fallen.

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q21. **Would you like to comment on the Clyde Railway Station Building?**

This is a significant building in clyde and should be retained. Sitting in a public reserve it would be madness to divest it. It has a great tenant in place in keeping with what the railway line has become, a rail trail. The outside space is actively used by community members and groups alongside the tenant and it all works very well. I know the tenant is wanting to continue and would like to take on more of the space.

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

not answered

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

Q24. **Would you like to comment on Clyde Hall?**

It's rather odd that one of the most used halls in the district was identified for divestment. It provides such an important function to a large number of the community that it simply must be retained.

Q25. **Would you like to comment on Becks Hall?**

not answered

Q26. **Would you like to comment on Vallance Cottage?**

not answered

Q27. **Would you like to comment on the Riding for the Disabled?**

Q17.	**Which hall/facility would you like to comment?**	Poolburn Hall
Q18.	**Would you like to comment on the Ophir Hall?**	not answered

Q19. **Would you like to comment on the Poolburn Hall?**

The Poolburn hall is the heart of the Ida Valley. It serves as a meeting place the Valley. It holds many weddings,21sts and other social events. Many children of the Valley have been through playgroup and plunket in this hall. This is a place with historical links via the World Wars and the many men and women who have served from this area. The hall has been painted by community members in the past at very little cost to the council,mowing of lawns is done by the community members.. This is a much loved playground of children and sports clubs.

Q1.	**I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2.	**First name**	Vicki
Q3.	**Last name**	O'Neill
Q4.	**Email address**	[redacted]
Q5.	**What is your connection to the Central Otago District?**	I'm a Central Otago District ratepayer
Q6.	**Where do you live?**	Vincent Ward (Alexandra and surrounds)
Q7.	**What year were you born?**	[redacted]
Q8.	**What gender do you identify with most?**	[redacted]
Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	not answered
Q13.	**Would you like to comment on our plan for water?**	not answered
Q14.	**Please choose your preferred option.**	not answered
Q15.	**Would you like to comment on volumetric charges?**	not answered
Q16.	**Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17.	**Which hall/facility would you like to comment?**	Poolburn Hall

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

* Central meeting place for the community * Play group * War memorial and museum - shows the history of the Ida Valley * Used for sporting events * Used a lot by the school for many things eg prize givings, productions, discos * Great place to hire to hold events eg weddings, funerals and birthdays * The community contribute alot to the upkeep of the hall cleaning, lawns and outside upkeep and general maintenance * The toilets are well used for sport events * If there was a disaster where civil defence needed a meeting spot this would be the logical meeting point for the community

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q1. **I'm registered for Let's Talk**	No. Please complete the demographic questions below.
Q2. **First name**	Deb
Q3. **Last name**	Stevens
Q4. **Email address**	[redacted]
Q5. **What is your connection to the Central Otago District?**	I live in the district
Q6. **Where do you live?**	Vincent Ward (Alexandra and surrounds)
Q7. **What year were you born?**	[redacted]
Q8. **What gender do you identify with most?**	[redacted]
Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	no
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	not answered

Q13. **Would you like to comment on our plan for water?**

I have concerns over a privately owned company providing water. It is very difficult for a private company who needs to make a profit and who doesn't have the benefit of government interest rates to keep costs down.

Q14. **Please choose your preferred option.**	not answered

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17. **Which hall/facility would you like to comment?**	Poolburn Hall

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

Yes, it would be a huge loss to our community. Our hall is well utilised by numerous groups all year round. Please see the attached document for further information.

Q17.	**Which hall/facility would you like to comment?**	Poolburn Hall
Q18.	**Would you like to comment on the Ophir Hall?**	not answered

Q19. **Would you like to comment on the Poolburn Hall?**

The hall is one of the epicentres of the valley where there are events such as playgroup, weddings, fireballs and general valley gatherings. The hall holds history literally and figuratively from the war memorial to the history photos on the walls.

Q18.	**Would you like to comment on the Ophir Hall?**	not answered

Q19. **Would you like to comment on the Poolburn Hall?**

The Poolburn Hall is the heart of our community. It is the only meeting place left for the whole community. It has our community playground, tennis courts and cricket club within the grounds. Not only are there weddings, funerals, 21st, school events, community sports events, playgroup and more. It holds years of memories with photos and memorabilia, including our war memorial. Santa even makes a visit yearly to give the children presents.

Q17.	**Which hall/facility would you like to comment?**	Poolburn Hall

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

The hall, known as the Poolburn Moa Creek Hall as it is for both our communities, is a vital place for us all.. It is the only place we can all meet, we have no church or hotel anymore, this is very important to us all from early childhood with the playgroup, and adults use this hall and grounds for meetings, sports events, functions etc. Our local school also use the facility regularly. It houses a lot of memorabilia for our community including sports photographs, trophies and very importantly our war memorials. Also we would all gather here should there be an emergency, as it is the central meeting place.

Q17.	**Which hall/facility would you like to comment?**	Poolburn Hall

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

Yes. I have discovered the Poolburn-Moa Creek Hall is an Integral part of this community. I moved into this Community 2021 and as I work away from home mostly, it is events being organised by School and other groups that enables me to meet the local Community and be able to immerse myself to be part of the area. This hall is the only structure of reasonable size in this area to enable large groups such as the school to be able to hold events and is critical for groups from Sporting to Family Groups. The Hall has so much history held within the building , and memorabilia including the War Memorial which cannot be lost. Where would this go ? Many events have been and will continue to be held there to Birthdays, Weddings, Funerals, Community celebrations, family celebrations and many more. The facilities are of a great standard for food preparation and serving as well as the Performance Stage so can cover a multitude of events to keep the Community connected. It would be a great loss to the education of our young people in this area if the Hall was not available any more for their events. This is a fundamental area for the mental health and wellbeing of rural communities as the challenges of everyday life and raising families and this cannot be overlooked There is significant distances to be travelled t o go elsewhere to find these facilities when we have a perfectly ideal Hall in our backyard. I can see no reason why this Hall cannot continue to be maintained to service this area. I urge you to reconsider the option for Poolburn-Moa Creek Hall to retain this awesome facility for this awesome community.

not answered

Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17. **Which hall/facility would you like to comment?**	Ophir Hall Poolburn Hall

Q18. **Would you like to comment on the Ophir Hall?**

I regularly attend functions at the Ophir hall. The last one was the Canadian folk singer in March 2025. It was a great opportunity to see people I know from Ophir and have a night out close to home. It was great for my mental health. I just don't like going all the way to Alexandra, especially in winter with the icy roads.

Q19. **Would you like to comment on the Poolburn Hall?**

Poolburn Hall is the hub of the community. There are many events held there. Birthday parties for little ones is an especially important one. Families with small children often do not have the financial means to take their children and guests out of the valley. The hall is perfect for the little ones to run around and have a great time on a budget. The school uses the hall for many important functions. The school production is a big one. This could not be put on on the school premises as their is no room big enough. The stage at the hall is perfect, as are the curtains to give it a real theatre feel. The whole community come out to support the school at this event and it is a draw card for social events. The talent show is also held here with the same great reasons aas above. One might argue that we could go to Ophir or Omakau. This is not feasible from a time and transport perspective. We sinply do not have the time to run 3 trips over the hill, and parents do not have the time to constantly come to school to ferry us over for every practice. Health and safety is also an issue, crossing Black's Hill in winter is not ideal. The prize giving is also held there. The students love the grandeur the hall gives and it makes the event very special. One special event at our prize giving is the Māori karanga for the year 8 leavers. The stage allows this to be effectively performed and gives the leavers the send off they deserve. Play group meets here, it gives local families a place to meet on a regular basis when it is unlikely they would make it into town. It is also great for facilitating local connections for people who often need local support. In this time of great change it is important for us to remember our past, The hall is a memorial for the fallen soldiers. Many men from our local area died for our county and they deserve to be remembered in their local hall, The sports ground it also at the hall. matches can be held at this ground as the toilets in the hall are used. WIth out this the community could not host these events. We, as a community, look after the hall. I was on lawns last year, as a new community member. We care for and value our hall. I also use the recycling there as it is extremely convenient. It seems to me that in a valley as isolated as ours, the real people who will suffer from this closure would be the children, young families and people less able to travel. Having the hall is essentially helping your mental health budget. The council do not do much for the Poolburn Community. The school funds it's own pool which is used for the whole community. This hall makes the world of difference for us. Centralising everything does not support those in further out communities. We are important too.

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

It is an important monument for our community as this is how we remember those community members who fought for our freedom in the World Wars. Our hall remains the venue for so many of our community gatherings, wether it be funerals, weddings, 21st and other birthday parties, Christmas gatherings and many more great excuses for a community gatherings. The hall provided a meeting place for my young pre-school family. This was provided an important support in an isolated rural community. These once a week gatherings continued for a period of at least 15 years and for all the young mothers living in the Ida Valley was a highlight of every week. Our Playgroups were funded by the Ministry of Education so provided important education to young mums. If there was no hall sadly I don't think this great tradition and opportunity would continue. The Poolburn Hall has provided the toilets and supper room for many a sports fixture, both through the school and the community. The memorabilia that is displayed and protected in the Poolburn Hall is extremely special to the community. The fact our community doesn't have a Poolburn Hotel anymore, and other than the school we haven't got any public buildings. So it is important we have somewhere to display this history.

Q44. Which option do you prefer? Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

It would be a huge loss to the community if the outside pool was closed. It is an amazing amenity & would see more children swim at the Clutha river, which is a risk if they aren't good swimmers. I believe there could be staffing cost savings at times when the pool is being utilised for swimming club etc, which should reduce the staffing requirement if the groups signed relevant disclosures. Staffing levels could be maintained more effectively. I believe that more recent issues resulted from the large number of students employed that then returned to University. There replacements should have been advertised a lot earlier & relevant training undertaken or a better split of temp/ permanent staffing. Heating costs could be reduced if pool covers were used both inside & outside pools at night. That would reduce cleaning costs in the outdoor pool & retain heat from earlier in the day to reduce heating costs. Staff spend a large amount of time cleaning, have external cleaners been priced to see if it is cost beneficial & could reduce the staffing requirements at the pool to save money which could fund the running costs of the outdoor pool. More marketing be done so that people are aware of the economic benefit of an annual pass for the family & the ability to pay via a weekly direct debit. Maybe if families were aware of that it would be a more affordable option. The inside pool is well utilised, especially in the morning & on regular occasions all lanes have multiple people in them. Having the outside pool gives another option & it is the preferable option over the summer. I am very passionate about the pool and am a regular user - around 6 times a week. I believe it would be a massive loss if the outside pool is closed & we need to do everything possible to retain it! There are ways to cost save in other areas & these need to be explored further rather than close an important asset. More marketing needs to be done to increase patronage as I fondly remember the old outside pool in Alex and the large numbers that attended it most days. I am a strong advocate to retain the outside pool & manage the operation effectively.

Q48. **Which option do you prefer?** Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option A: Close and decommission the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

It is hardly ever used. When it is warm enough kids get sunburnt even with sunscreen. It should of been built im and had something fun like a hydroslide for the kids. There is more needed for kids in the area. Everyone says Alexandra is a retirement town which is why all the kids leave.

Q48.	**Which option do you prefer?**	Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54.	**Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

This would be the most beneficial out of everything on here. Hockey esp but other sports too have a serious lack of turf time available with only one turf in cromwell. Kids have to travel huge distants and have really late games. Maniototo teams not getting home to 11pm on school nights. This really needs to happen as the sport is growing every year.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q17. **Which hall/facility would you like to comment?**	Poolburn Hall

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

Poolburn hall is the community hub and heart. The Poolburn Hall has a long standing relationship with the community and services a range of groups and celebrations. The hall is more than just a hall its walls talk. As for decades if has and continues to be the place of community celebrations and sadly farewells. The walls themselves are filled with memorabilia and most importantly the hall contains the war memorial for those past in ww1 and ww2. The hall is the centre of community connections and is a huge asset for the Poolburn School. Also hosts a weekly playgroup and the cricket club host both childrens and adult cricket there. The toilets are essential for any sporting event on the grounds. This includes the small schools cross country that hosts multiple small schools. The Poolburn community have very little resources and the Poolburn commnuity need this hall. The Poolburn community is isolated, and the Poolburn hill is designated an alpine pass. Weather is a huge factor in this valley. Traveling to other locations is not practical. Don't take away the heart of this community. The community also works hard to maintain your resource. They have rosters for mowing, cleaning, spraying and have previously painted it.

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities?	not answered
Q44. Which option do you prefer?	Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer?	Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

The outdoor pool in Alexandra is an absolute gem. I have been using the pool for over a decade and regularly travel to Alexandra just to have a swim. However on two separate occasions over the last 2 years I have been told the outdoor pool is not available for use due to lack of lifeguards. Does this artificially lower the number of people that have been recorded as using the outdoor pool? I think it is a huge asset and would happily swim in it at my own risk, if lifeguards are unavailable. I have been doing this at the Ophir pool for years without incident. Very few communities in NZ have an outdoor pool and it is a much more pleasant experience than indoor pools especially in the long Central Otago summers. I strongly encourage the Council to retain the Alexandra Outdoor pool.

Q48. **Which option do you prefer?**	not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	Social media

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

Council should not close the Alexandra pool in favour of funding the Roxburgh pool. The Alexandra outdoor pool should remain open. It is an amazing facility that our community needs. There should be a targeted rate to Roxburgh residents as well as a higher admission costs so that the Roxburgh pool can be maintained if shifted to council ownership. Otherwise not. It would be absolutely disgusting for our Alex community to lose our fantastic outdoor pools. So many young people and children use this in the summer. You would be taking away a facility and option for families, the swim club, world champion and international swim training g especially ice and cold plunge swimming.

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

While it would be a great thing to have and good for tourism, this should not be at the expense of core activities and facilities the Council provides ESPECIALLY the Alexandra outdoor pool. This money could be put instead to keeping that open and/or the Roxburgh pool.

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

SAVE THE ALEXANDRA OUTDOOR POOL!

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	Social media

Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	not answered

Q13. **Would you like to comment on our plan for water?**

not answered

Q14. **Please choose your preferred option.**	not answered

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17. **Which hall/facility would you like to comment?**	Clyde Hall

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

not answered

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q21. **Would you like to comment on the Clyde Railway Station Building?**

not answered

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

not answered

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

Q24. **Would you like to comment on Clyde Hall?**

As a member of a small badminton group that uses the Clyde Hall weekly throughout the year, I would be very concerned if the hall was to close. We are older players that are not interested in competitive badminton but enjoy the regular activity and social contact that our small group of approx 8 - 10 players provides. The hall is the right size for us, has court markings and a high roof and is the only small hall in the Alex/Clyde area that I know of that is suitable for badminton. The group has used the hall for many years and will continue to use it for many years to come if it remains open.

Q25. **Would you like to comment on Becks Hall?**

not answered

Q26. **Would you like to comment on Vallance Cottage?**

not answered

not answered

Q28. **Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?**

not answered

Q29. **Would you like to comment on the Ranfurly Hall?**

not answered

Q30. **Would you like to comment on the Naseby Hall?**

not answered

Q31. **Would you like to comment on the Patearoa Hall?**

not answered

Q32. **Would you like to comment on the Waipiata Hall?**

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? not answered

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? not answered

Q47. Would you like to provide comments on the Alexandra outdoor pool?

not answered

Q48. Which option do you prefer? Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?** Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

I do not support a $250,000 grant for the Supercars Championships in Cromwell. Although I'm aware that the grant will not line the pockets of the owners and management directly, I'm not convinced that the benefits to the community will be sufficient to outweigh the granting of this amount of money. Car racing is a rich man's sport so I'm sure that industry sponsorship provides sufficient funds to run events such as Supercars without using local tourism reserves that could be better spent.

Q52. **Which option do you prefer?** not answered

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?** Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

I fully support the construction of an Alexandra turf as it is well overdue, particularly for hockey. My only concern with the situation of the turf at the high school is around having sufficient access to Molyneux Stadium for changing rooms and toilets (a necessity) and the hours of operation. Although hockey games will no doubt be split between the Cromwell turf and this one it is very likely that a number of games will need to be played into the evenings and this means a lot of extra lighting will be required. If we can get it right a hockey turf in Alexandra will be very much appreciated by the hundreds of hockey players in the area.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

Huge asset to the community. Used by locals and tourists. As a swim teacher I receive a lot of feedback from visitors and parents on how much they enjoy the choice in the summer, especially parents that dont like taking the children to the rivers or lake but the safety of a controlled outside pool area.

Q48. **Which option do you prefer?**	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

There are already empty places that could be rented out for hub meetings. Forming a hub is a good idea but use an existing building

Q50. **Which option do you prefer?**	Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

Provide the grant but have better deals for local rate payers

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

If the community also has use of it

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	The News - Central Otago

Q6. **Where do you live?**	not answered
Q7. **What year were you born?**	not answered
Q8. **What gender do you identify with most?**	not answered
Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	no
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.

Q13. **Would you like to comment on our plan for water?**

not answered

Q14. **Please choose your preferred option.**	Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16. **Please select your preferred option.**	Option B: Maintain the current level of support that Council provides for all of the halls and facilities listed above.
Q17. **Which hall/facility would you like to comment?**	not answered

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

not answered

Q20. Would you like to comment on the Clyde Police Lockup?

not answered

Q21. Would you like to comment on the Clyde Railway Station Building?

not answered

Q22. Would you like to comment on the Former Clyde Museum Stables & Goods Shed?

not answered

Q23. Would you like to comment on Blyth Street Museum, Clyde?

not answered

Q24. Would you like to comment on Clyde Hall?

not answered

Q25. Would you like to comment on Becks Hall?

not answered

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

Put a temporary low cost cover over it or around it and it took so much for the community to fundraiser to get that pool established.

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

This Hub needs to be there as it provides for a large wider community

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

This does not need to be supported when you need to be supporting community hubs

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Manlototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Why? There is a turf in Cromwell and there needs to be a fully closed ice rink first and a cover over netball courts

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** — not answered

Q44. **Which option do you prefer?** — Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?** — Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

I recently took my grandchildren to the pool on a hot, sunny day and they were disappointed and upset that we were unable to swim outside. During the summer there are few safe places to swim as the toxic algae builds and ,for younger swimmers, the river is not an option. The lack of use relates to the fact that it is unavailable so often. During our recent visit one staff member stood by the closed door the whole time we were there and could just have easily kept an eye on the outdoor pool from where she was standing! Do not close the pool!

Q48. **Which option do you prefer?** — Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?** — Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?** — Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?** — Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Q17. **Which hall/facility would you like to comment?**	Ophir Hall

Q18. **Would you like to comment on the Ophir Hall?**

This is an active and well used community hub used for concerts community fundraising gatherings celebrations and funerals. It is in a great state of repair and carefully maintained by the locals. With significant upgrade ms to toilets, wheel chair access, outdoor area in recent years. And it has the ability in most cases to match council contributions. We are a small community and the hall is essential in maintaining local connections especially over winter when most services are closed. We value and take pride in our hall which stands tall next to the Ophir post centre and old jail.

Q19. **Would you like to comment on the Poolburn Hall?**

Q1. **I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2. **First name**	not answered
Q3. **Last name**	not answered
Q4. **Email address**	not answered
Q5. **What is your connection to the Central Otago District?**	I live in the district
Q6. **Where do you live?**	Cromwell Ward
Q7. **What year were you born?**	[redacted]
Q8. **What gender do you identify with most?**	[redacted]
Q9. **I am submitting**	as an individual
Q10. **Do you want to speak to your submission at a formal meeting?**	no
Q11. **Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12. **Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

I do not want a council controlled organization. It will become a big mistake like what Wellington has.

Q14. **Please choose your preferred option.**	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16. **Please select your preferred option.**	Option A: Divest all of the community halls listed (highlighted in green above).
Q17. **Which hall/facility would you like to comment?**	not answered

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

not answered

Q20. Would you like to comment on the Clyde Police Lockup?

not answered

Q21. Would you like to comment on the Clyde Railway Station Building?

not answered

Q22. Would you like to comment on the Former Clyde Museum Stables & Goods Shed?

not answered

Q23. Would you like to comment on Blyth Street Museum, Clyde?

not answered

Q24. Would you like to comment on Clyde Hall?

not answered

Q25. Would you like to comment on Becks Hall?

not answered

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option A: Close and decommission the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

not answered

Q48. Which option do you prefer? Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

They are a business. The rate payers should not be supporting a private business. If it would not make money they would not run it.

Q52. **Which option do you prefer?**	Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Community should fund raise for it.

Q54. **Which option do you prefer?**	Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

The local community should fund raise for it.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** — not answered

Q44. **Which option do you prefer?** — Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

Important community assets. Learning to swim is a very important skill for all NZers to learn

Q46. **Which option do you prefer?** — Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

This is a very important part of the Alex pool. During the peak of summer there is significant use of all pools and sometimes all pools are crowded. It's important to have lane swimming and activity space. The outdoor pool helps create space for this to be available

Q48.	**Which option do you prefer?**	Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50.	**Which option do you prefer?**	Option C: Do not support

Q15. **Would you like to comment on volumetric charges?**	not answered
Q16. **Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.

Q17. **Which hall/facility would you like to comment?**

Ophir Hall
Clyde Hall
Riding for the Disabled
Patearoa Hall
Naseby General Store

Q18. **Would you like to comment on the Ophir Hall?**

Moderate usage from the community

Q19. **Would you like to comment on the Poolburn Hall?**

not answered

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q21. **Would you like to comment on the Clyde Railway Station Building?**

not answered

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

not answered

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

Q24. **Would you like to comment on Clyde Hall?**

Adequate community to fulfill need of hall

Q25. **Would you like to comment on Becks Hall?**

not answered

Q26. **Would you like to comment on Vallance Cottage?**

not answered

Q27. **Would you like to comment on the Riding for the Disabled?**

Seems like a good charity for the community

Q28. **Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?**

not answered

Q29. **Would you like to comment on the Ranfurly Hall?**

not answered

Q30. **Would you like to comment on the Naseby Hall?**

not answered

Q31. **Would you like to comment on the Patearoa Hall?**

Helps hold the community together and bring people to Patearoa for weddings ect . Bugger all else there since pool closed

Q32. **Would you like to comment on the Waipiata Hall?**

not answered

Q33. **Would you like to comment on the Wedderburn Hall?**

not answered

Q34. **Would you like to comment on the Millers Flat Hall?**

not answered

Q35. **Would you like to comment on the Millers Flat Bowling Club?**

not answered

Q36. **Would you like to comment on the Roxburgh Squash Court Building?**

not answered

Q37. **Would you like to comment on the Fenton Library?**

not answered

Q38. **Would you like to comment on the Naseby General Store?**

not answered

not answered

Q40. **Would you like to comment on the Centennial Milk Bar?**

not answered

Q41. **Would you like to comment on the Ranfurly Service Centre?**

not answered

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** not answered

Q44. **Which option do you prefer?** Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?**	Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

Low usage likely reflects the inadequate staffing at the pool. Restructure the pools stagging. I have seen 3 life guards standing around the indoor pool doing nothing woth low numbers inside and swimming lessons in progress while the outside pool could have been open. Great facility and option to exercise on hot days. Indoor pool is not enjoyable on a hot day for leisure or exercise. Stuffy inside

Q48. **Which option do you prefer?**	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

not answered

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

This is a very important community asset to the Maniototo. We have to travel so much for sports so to have a turf that is of the same level as other towns in the Central Otago region for kids to practice on is a must. Extending the turf will also allow for games to be played in Ranfurly instead of our kids always having to travel. We are often treated like the poor cousins over in the Maniototo and left out of a lot of things although a lot of rates are generated from our area. Having the turf on school grounds means it will be used throughout the day by PE classes and students during lunch and break times, unlike other turfs in the CO area which are unused during the day.

Q54. **Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? not answered

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

The issue with this pool as I see it, is simply, It's not always open for use during the summer, often closed as no lifeguards available. Annoying to go to the pool to use it and then find its not open. Its a great pool and the outdoor area is great, nothing better on a lovely day than sitting out there with the family. Ensuring there are enough qualified lifeguards to make people go there and not be disappointed. Blow up play toys and a sausage sizzle would be great, pool parties like there used to be. Have fundraising groups do a bbq etc at no cost to the pool, will increase patronage and help a non profit organisation all at the same time. Its a definite asset to keep and promote it more.

Q48. Which option do you prefer? not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

Fundraising by the school and the surrounding areas to pay for this themselves. Maybe $100,000 would be more appropriate.

Q54. **Which option do you prefer?**	Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Support at a lesser amount $100.000 would be more appropriate. Unfortunately schools/pupils need to make an effort to fundraise themselves.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered

Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	Option A: Create a Council Controlled Organisation (CCO) from 1 July 2027.

Q13. **Would you like to comment on our plan for water?**

There needs to be safeguards against future privatisation. Projects and maintenance should be in-house.

Q14.	**Please choose your preferred option.**	Option A: Increase the volumetric charge to $2.40 per cubic metre, with the fixed charge of $509.24 per connection.

Q15. **Would you like to comment on volumetric charges?**

Good idea. Makes charges fairer

Q16.	**Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.

Q17. **Which hall/facility would you like to comment?**

Ophir Hall
Poolburn Hall
Ranfurly Hall
Naseby Hall
Patearoa Hall
Waipiata Hall
Naseby General Store
Centennial Milk Bar

Q18. **Would you like to comment on the Ophir Hall?**

not answered

Q19. **Would you like to comment on the Poolburn Hall?**

Q44. Which option do you prefer?	Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?** Option B: Retain the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

I would be prepared to pay more on my rates to keep the pool.

Q48. **Which option do you prefer?** Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?** Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

Central Otago will benefit from events like this. We must ensure we have the supporting infrastructure and services so we don't lose visitors to Queenstown and Wanaka

Q52. **Which option do you prefer?** Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Manlototo Area School?**

This is an absolute necessity for future sport participation in the area. Population is growing and participation will too

Q54. **Which option do you prefer?** Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

This is an absolute necessity for future sport participation in the area. Population is growing and participation will too

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

With interest rates coming down, it is probably a good time to look at potential investments. Investment in residential and commercial property would have the two-fold effect of mitigating any future rates-shock and allowing council to guide the direction of housing and small business in our area. A licensing trust similar to the one in Invercargill is also a no-brainer.

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

Q1.	**I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2.	**First name**	not answered
Q3.	**Last name**	not answered
Q4.	**Email address**	not answered
Q5.	**What is your connection to the Central Otago District?**	not answered
Q6.	**Where do you live?**	not answered
Q7.	**What year were you born?**	not answered
Q8.	**What gender do you identify with most?**	not answered
Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

We think moving it to a CCO format is a terrible idea, multiple layers of more administration, directors, etc create more costs and make maintenance slower. We would strongly oppose this.

Q14.	**Please choose your preferred option.**	Option C: Status quo. Retain the charge at 60 cents per cubic metre, with a fixed charge at $843.54 per connection.

Q15. **Would you like to comment on volumetric charges?**

Hiking the water charges to an unreasonable level for properties that use irrigation as well as regular household use will feel this the most, lifestyle blocks certainly will. While our size isn't large by any stretch it will also stop people watering the lawns and verges which will look unsightly and also will increase the fire risk. Based on the last 12 months usage we would pay: Option C :$1567.74 for the year Option B : $2811.84 for the year Option A : $3405.84 for the year That's over twice the amount we currently pay which is ridiculous and can't afford to pay this much. The more people building new houses are making an impact on existing ratepayers and a lot of the upgrades to existing should be put on new home builds or the developers as I would imagine a lot of the older long term residents came here for peace and lifestyle and never imagined having to pay for other houses infrastructure.

Q16. **Please select your preferred option.**

Option C: Maintain Council support for specific halls and facilities on the list above.

Q17. **Which hall/facility would you like to comment?**

Ophir Hall
Riding for the Disabled
Ranfurly Hall
Wedderburn Hall
Centennial Milk Bar
Ranfurly Service Centre
Roxburgh Squash Court Building

Q18. **Would you like to comment on the Ophir Hall?**

Although historic the money is better spent on Omakau's new hall as its only a few minutes away. this could be sold off

Q19. **Would you like to comment on the Poolburn Hall?**

not answered

Q20. **Would you like to comment on the Clyde Police Lockup?**

not answered

Q21. **Would you like to comment on the Clyde Railway Station Building?**

not answered

Q22. **Would you like to comment on the Former Clyde Museum Stables & Goods Shed?**

not answered

Q23. **Would you like to comment on Blyth Street Museum, Clyde?**

not answered

Q24. **Would you like to comment on Clyde Hall?**

not answered

Q25. **Would you like to comment on Becks Hall?**

not answered

Q26. **Would you like to comment on Vallance Cottage?**

not answered

Q27. **Would you like to comment on the Riding for the Disabled?**

Its a just sitting costing money and most likely get vandalised. sell it

Q28. **Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?**

not answered

Q29. **Would you like to comment on the Ranfurly Hall?**

Ranfurly does need a hall although possibly the sports pavillion gets used more for functions these days

Q30. **Would you like to comment on the Naseby Hall?**

not answered

Q31. **Would you like to comment on the Patearoa Hall?**

not answered

Q32. **Would you like to comment on the Waipiata Hall?**

not answered

Q33. **Would you like to comment on the Wedderburn Hall?**

Old plain hall, if not used let it go

Q34. **Would you like to comment on the Millers Flat Hall?**

not answered

Q35. **Would you like to comment on the Millers Flat Bowling Club?**

not answered

Q36. **Would you like to comment on the Roxburgh Squash Court Building?**

if its not used anymore , best sell it

Q37. **Would you like to comment on the Fenton Library?**

not answered

Q38. **Would you like to comment on the Naseby General Store?**

not answered

Q39. **Would you like to comment on another hall or facility?**

not answered

Q40. **Would you like to comment on the Centennial Milk Bar?**

see below move the service centre into the Milk bar ??

Q41. **Would you like to comment on the Ranfurly Service Centre?**

Nice building that could be sold and turned into accommodation maybe better to move the service centre to the heart of town into the milk bar maybe?

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** not answered

Q44. **Which option do you prefer?** Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

not answered

Q46. **Which option do you prefer?** Option A: Close and decommission the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

Indoor pools are more useful all year round. in summer people will go to the lakes and rivers

Q48. **Which option do you prefer?** Option C: Provide additional funding of up to $1.6 million, rate funded in the 2025/26 financial year.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

I have seen the plans and it is a very well laid out complex and will benefit a wide community. compared with what is being spent on our Cromwell hall this isn't a lot to ask and better spent here than on Ophir Hall as an example.

Q50. **Which option do you prefer?** Option B: Agree to provide a $250,000 grant funded through a promotions rate.

Q51. **Would you like to provide comments on the Supercars Championship?**

From what we have seen in the Papers is that Ruapuna has 2026 event so Cromwell is out in the cold this round. this would however bring in a lot of revenue to the area and if needed would be a good investment

Q52. **Which option do you prefer?** Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Manlototo Area School?**

Why isn't the MOE paying this as its a school and not council business

Q54. **Which option do you prefer?** Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Again its an MOE funded school. Not a council issue

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58. **Would you like to upload any supporting documents?**	not answered
Q59. **How did you hear about this engagement opportunity? You may tick more than one.**	Email

Q49. Would you like to provide comments on the Manuherekia Valleys Community Hub?

not answered

Q50. Which option do you prefer? not answered

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option A: Provide a $200,000 grant, rate funded in the 2026/27 financial year.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

The school would use the turf everyday, especially in winter as it gets very cold on the ground. It is a great facility for the community to use and COHA. It could be charged for use to help get back some of the investment. It also fits nicely with the gym improvements which will be open to the community to use.

Q54. **Which option do you prefer?**	not answered

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

not answered

Q46. Which option do you prefer?

not answered

Q47. Would you like to provide comments on the Alexandra outdoor pool?

not answered

Q48. **Which option do you prefer?**	Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

not answered

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

A multipurpose artificial turf in Alexandra is long overdue and Dunstan High School provides the perfect site for this. Coming from a strong family hockey background I fully support this proposal.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

Q1.	**I'm registered for Let's Talk**	Yes. Please skip past the demographic questions and click next at the bottom of the page.
Q2.	**First name**	not answered
Q3.	**Last name**	not answered
Q4.	**Email address**	not answered
Q5.	**What is your connection to the Central Otago District?**	I live in the district
Q6.	**Where do you live?**	Vincent Ward (Alexandra and surrounds)
Q7.	**What year were you born?**	[redacted]
Q8.	**What gender do you identify with most?**	[redacted]
Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

I will be interested to see how the new entity will be structured and if it can provide economy of scale to our region.

Q14.	**Please choose your preferred option.**	Option B: Increase the volumetric charge to $1.80 per cubic metre, with the fixed charge at $639.24 per connection.

Q15. **Would you like to comment on volumetric charges?**

not answered

Q16.	**Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17.	**Which hall/facility would you like to comment?**	Riding for the Disabled

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

not answered

Q20. Would you like to comment on the Clyde Police Lockup?

not answered

Q21. Would you like to comment on the Clyde Railway Station Building?

not answered

Q22. Would you like to comment on the Former Clyde Museum Stables & Goods Shed?

not answered

Q23. Would you like to comment on Blyth Street Museum, Clyde?

not answered

Q24. Would you like to comment on Clyde Hall?

not answered

Q25. Would you like to comment on Becks Hall?

not answered

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

There is no question this whether this should be demolished.

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option A: Support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

Given the community is unable to afford to run it the council has no other acceptable option but to take over the operation.

Q46. Which option do you prefer? Option A: Close and decommission the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

If it is not used enough, scrap it. We have a number of options in the area to swim in fresh water if that is what is desired.

Q48. **Which option do you prefer?**	Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

This is a long term community asset and should be funded as such so the cost is spread. 10 years may be too short a time frame.

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

The super cars organisation should be able to fund their own Event. I understand one of the owners of the event is also the owner of the Highlands Park. I suspect that the majority of the benefits would go to the Queenstown and Wanaka who have the the accommodation infrastructure to cope with the numbers projected and they don't belong to our council area. If Cromwell want the event then by all means let them pay for it.

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

A long term asset should be funded over a period of at least 10 years

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Long term asset should be funded over a minimum of 10 years

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

Borrowing should be used to spread the costs of the work that is required to enable the costs to be shared by existing and future rate ratepayers. While there is a lot of "financial" numbers included in the AP and LTD documents there is a distinct lack of transparency in the information provided. While there is plenty of detail in the capital works expenditure proposed (understandably so) there is very little detail as to the "operating costs" of the Council. While you continue to hide/fudge the detail you leave a very fertile field for ratepayers to questions the reasons for the lack of detail. The difference in the clarity of financial information in your Annual Report (and this has its issues also) and your AP and LTP documents is extreme and I think it is crucial that Council takes a close look at how they publish financial information. There is a balance to be struck somewhere.

Q58. **Would you like to upload any supporting documents?**	not answered

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option A: Close and decommission the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

I use the pool at least 3 times a month with my kids that are 5 and 8 they never want to use the out door pool and very rearly I see ppl using the outdoor pool

Q48. **Which option do you prefer?**	Option D: Do not support

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

It's the long term cost look at all the halls we have now the population isn't there like it was 50 plus years ago

Q50. **Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

It would be better of spend else where I'm a petrol head I own 2 classic cars v8 etc if ppl want to go user pays

Q52. **Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

If the kids want it they need to earn it and look after it and learn that you don't just get hand outs in life loan them the money with a interest rate that they need to pay back then it's up to the school to work out how to achieve this user pays

Q54. **Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

If the kids want it they need to earn it and look after it and learn that you don't just get hand outs in life loan them the money with a interest rate that they need to pay back then it's up to the school to work out how to achieve this user pays

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

Stop wasting are money on crap like a wooden fence up by the netball court Make it easier for the everyday working person have there say about what are money is spent on Stop with the meeting about a meeting g to have a meeting and wasting time and get on with stuff but listen to the rate payers

Q1.	**I'm registered for Let's Talk**	No. Please complete the demographic questions below.
Q2.	**First name**	Carol
Q3.	**Last name**	Keen
Q4.	**Email address**	[redacted]
Q5.	**What is your connection to the Central Otago District?**	I'm a Central Otago District ratepayer
Q6.	**Where do you live?**	Vincent Ward (Alexandra and surrounds)
Q7.	**What year were you born?**	[redacted]
Q8.	**What gender do you identify with most?**	[redacted]
Q9.	**I am submitting**	as an individual
Q10.	**Do you want to speak to your submission at a formal meeting?**	no
Q11.	**Please provide your daytime phone number and email. We will be in touch to confirm the date and time of the meeting. The hearings will be held on 15-16 May 2025.**	not answered
Q12.	**Please choose your preferred option.**	Option B: Status quo. Water services continue to be owned, maintained and delivered by Council.

Q13. **Would you like to comment on our plan for water?**

We need local people controlling OUR water. Trim staff to bare minimum to keep costs under control.

Q14.	**Please choose your preferred option.**	not answered

Q15. **Would you like to comment on volumetric charges?**

No, doesn't apply to us as we're on private scheme. Water needs to be available to all at an affordable price.

Q16.	**Please select your preferred option.**	Option C: Maintain Council support for specific halls and facilities on the list above.
Q17.	**Which hall/facility would you like to comment?**	not answered

Q18. Would you like to comment on the Ophir Hall?

not answered

Q19. Would you like to comment on the Poolburn Hall?

not answered

Q24. Would you like to comment on Clyde Hall?

not answered

Q25. Would you like to comment on Becks Hall?

not answered

Q26. Would you like to comment on Vallance Cottage?

not answered

Q27. Would you like to comment on the Riding for the Disabled?

not answered

Q28. Would you like to comment on the Former Clyde Briar & Herb factory, and cottage?

not answered

Q29. Would you like to comment on the Ranfurly Hall?

not answered

Q30. Would you like to comment on the Naseby Hall?

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. Would you like to comment on the Wedderburn Hall?

not answered

Q34. Would you like to comment on the Millers Flat Hall?

not answered

Q35. Would you like to comment on the Millers Flat Bowling Club?

not answered

Q36. Would you like to comment on the Roxburgh Squash Court Building?

not answered

Q37. Would you like to comment on the Fenton Library?

not answered

Q38. Would you like to comment on the Naseby General Store?

not answered

Q39. Would you like to comment on another hall or facility?

not answered

Q40. Would you like to comment on the Centennial Milk Bar?

not answered

Q41. Would you like to comment on the Ranfurly Service Centre?

not answered

Q42. Would you like to comment on the Wallace Memorial Rooms?

not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? not answered

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

Should be up to Teviot people

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

Keep it open. Cut costs else where , trim staff.

Q48. Which option do you prefer? Option B: Provide additional funding of up to $1.6 million, loan funded over a period of 10 years.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

We need to support but keep to a tight budget

Q50. **Which option do you prefer?** Option A: Agree to provide a $250,000 grant funded through the tourism reserves.

Q51. **Would you like to provide comments on the Supercars Championship?**

Fund but only if it doesn't increase rates.

Q52. **Which option do you prefer?** Option C: Do not support

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

It's a nice to have, but not necessary especially in these tight economic times when Rates etc are sky rocketing

Q54. **Which option do you prefer?** Option C: Do not support

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

It's a luxury, not necessary.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

No. Too much reading, need simplified version for all Central Otago Ratepayers to read. This is why most people don't do submissions. Just keep Rates low. Cut spending on all vanity projects. No more Staff Cut Staff Numbers, Consultants Start trimming from the top. If we have heads of Departments why do we need an overpaid CEO?

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

No.

Q58. **Would you like to upload any supporting documents?** not answered

Q43. Would you like to upload any supporting documents about halls and facilities? not answered

Q44. Which option do you prefer? not answered

Q45. Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?

not answered

Q46. Which option do you prefer? Option B: Retain the outdoor pool in Alexandra.

Q47. Would you like to provide comments on the Alexandra outdoor pool?

It is a great asset for Alexandra to have an outdoor pool. Especially in summer for an alternate option to lakes, rivers and indoor pool. It puts the area a huge presence with the Ice swimming events in winter and we have had world records come out of this from our swimmers, which would mean there would be less opportuntiy for these swimmers to continue and not bring this media presence to the area. As HoF PE at Dunstan. We use the outdoor pool for parts of our PE programme for practicing water safety and kayaking. Without this pool, we would loose the abilty to run these aspects of our outdoor ed and PE programmes which would be a huge loss for our programmes at years 9-13. We also have used the outdoor pool for our school swimming sports when we run it in the summer months. this allows an exciting aspect of outdoor swimming and sunshine for the students and would be a shame to loose this opportunity.

Q48.	**Which option do you prefer?**	not answered

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50.	**Which option do you prefer?**	not answered

Q51. **Would you like to provide comments on the Supercars Championship?**

Q52.	**Which option do you prefer?**	not answered

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54.	**Which option do you prefer?**	Option A: Provide a $300,000 grant rate funded in the 2025/26 financial year

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

As HoF PE at Dunstan, this turf would be a huge asset to our school and the community. The turf would be used for many PE classes and give us another usable space to run effective PE lessons. This would be used most days for a range of different sports and allow a better space to use underfoot during winter and colder months for students to play on. It would be used for lunchtime activities and another space for sports practices. We would be able to play matches for sports teams on this space which would mean more fair travel and greater opportunity for our sports teams . The surface needs resurfacing as it is currently unsafe for carrying out what we need to do.To make it a turf will be a far better way of spending this money then just resurfacing becasue of the multipurpose options it provides. S block and special olympics would also have a safe and contained place to run their activities during the year.

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q31. **Would you like to comment on the Patearoa Hall?**

As we are all aware the Patearoa hall is at a time where some decisions need to be made around its current state and its future within the community. The building itself has been utilized by the community for decades and was erected in 1906, the hall itself has been used on numerous occasions over the years, weather for social gatherings, sporting events, community fixtures or business meetings/training so as you could imagine there is a lot of history and passion that comes with this iconic fixture within the community. We, the Patearoa Reserve Committee, are open to all options for the future of the hall but we seek an extension of time to make sure that ALL options are exhausted, and we land on the right outcome for the community. Yours sincerely, Drew Dundass On behalf of the Patearoa Reserve Board

not answered

Q31. Would you like to comment on the Patearoa Hall?

not answered

Q32. Would you like to comment on the Waipiata Hall?

not answered

Q33. **Would you like to comment on the Wedderburn Hall?**

not answered

Q34. **Would you like to comment on the Millers Flat Hall?**

not answered

Q35. **Would you like to comment on the Millers Flat Bowling Club?**

not answered

Q36. **Would you like to comment on the Roxburgh Squash Court Building?**

not answered

Q37. **Would you like to comment on the Fenton Library?**

not answered

Q38. **Would you like to comment on the Naseby General Store?**

not answered

Q39. **Would you like to comment on another hall or facility?**

not answered

Q40. **Would you like to comment on the Centennial Milk Bar?**

not answered

Q41. **Would you like to comment on the Ranfurly Service Centre?**

What would happen if given over to the community? This is to entrance to Ranfurly from Rail Trail. It needs to be maintained in good order.

Q42. **Would you like to comment on the Wallace Memorial Rooms?**

not answered

Q43. **Would you like to upload any supporting documents about halls and facilities?** — not answered

Q44. **Which option do you prefer?** — Option B: Do not support Council ownership and management of the Ida MacDonald Roxburgh Pool Punawai Ora.

Q45. **Would you like to provide comments on the Ida MacDonald Roxburgh Pool Punawai Ora?**

Clutha District have removed council ownership of Kaitangata and Lawrence pools. why take on something in Roxburgh when Millers Flat has no CODC ownership of its pool.

Q46. **Which option do you prefer?** — Option A: Close and decommission the outdoor pool in Alexandra.

Q47. **Would you like to provide comments on the Alexandra outdoor pool?**

I have never used it in 6 years of living in Alex. Prefer to swim indoors in colder weather or at Lake Dunstan in summer.

Q48.	**Which option do you prefer?**	Option A: Provide additional funding of up to $1.6 million towards the construction of the Manuherekia Valleys Community Hub, funded from Vincent General Reserves.

Q49. **Would you like to provide comments on the Manuherekia Valleys Community Hub?**

not answered

Q50.	**Which option do you prefer?**	Option C: Do not support

Q51. **Would you like to provide comments on the Supercars Championship?**

Cromwell is the only part of the district that directly benefits from Highlands, not the wider district. $250k could be better spent.

Q52.	**Which option do you prefer?**	Option B: Provide a $200,000 grant loan funded over a period of 10 years.

Q53. **Would you like to provide comments on the Artificial Turf at Maniototo Area School?**

not answered

Q54.	**Which option do you prefer?**	Option B: Provide a $300,000 grant loan funded over a period of 10 years

Q55. **Would you like to provide comments on the Artificial Turf at Dunstan High School?**

Support so long as the turf is maintained going forward. Will DHS pay to upkeep the turf & pay for the water?

Q56. **Long-term Plan Policies Would you like to provide comments on the following policies as outlined on pages 34 - 41 of the consultation document?- Fees and charges- Development and Financial Contributions Policy- Revenue and Financing Policy- Significance and Engagement Policy**

not answered

Q57. **Other commentsDo you have any other comments to make in relation to the key proposals and content of the draft 2025-2034 Long-term Plan?**

not answered

Q58.	**Would you like to upload any supporting documents?**	not answered
Q59.	**How did you hear about this engagement opportunity? You may tick more than one.**	**Other (please specify)** Alex pool
